The materials used in making up the hats for next fall cover a very wide range. They include velvet, velvet plush, taffeta silks, chenilles and chenille sequins, feathers, birds, and wings, velvet foliage, feather pompons, aigrette mountings, ostrich pompons, and ospreys. Ostrich feathers promise to be a strong feature; they will appear largely in shaded effects. Birds will likely be prominent, of all kinds, from very small to very large, though the recently enacted legislation in the United States against this form of ornamentation which comes into force next year, is likely to affect the demand considerably after a time. From the very nature of the predominating materials, good use will be made of buckles, and these will be large and often of a long square shape. Ribbons have been selling better than for many seasons past, the principal widths being from Nos. 60 to 100. The demand for velvet and satin ribbons has been particularly strong. Fancy velvets and fancy plushes are also a feature. To one variety of the latter, our attention was especially drawn. It is called the "Leopard" plush, and, in design and appearance, imitates the glossy skin of that animal. The coloring of many of the materials used appears to lean largely towards wine color, though other reds are represented, as also different shades of green, castor, etc.

As to the predominating shapes, it may be stated that the "large" hats are quite large, big picture hats being in good demand. Turbans are of the long, pointed style, while in some, the brims roll up very high at the sides. High crowns show a tendency to

creep in again; but the flat style still largely prevails. While the above descriptions of hat may be said to be those usually asked for by the visiting milliners, many outing or ready-to-wear hats are still being sold, and in these rough materials seem to be most largely used.

THE PRAIRIE COUNTRY CROP.

The news from our special correspondent at Winnipeg is as follows under date of Sept. 3rd, at noon: "The weather during the past week has been cool, but generally favorable for harvesting. Cutting of grain is well advanced, and even finished at some points. Threshing has begun, and will be in full swing in a week's time. The estimated average yield of wheat in the whole Northwest is now 18 bushels per acre. The grain is turning out a good sample, and it is expected that the quality will equal that of last year.

THE FRUIT TRADE.

When the enormous size of last year's crop of apples in Canada, more especially in Ontario and Quebec, is considered, the crop promised for this season may be described as a wonderfully good one. Experience shows that under the system of horticulture usually practised at the present day, crops of fruit are good and bad alternately. This, too, is the case when the present apparent yield is compared with last year's; but not nearly to such an extent as might have been anticipated. And it is to be borne in mind that while last year the shipment of apples from Halifax aggregated only about 80,000 barrels, Nova Scotia this year has an enormous crop, the probable shipments being estimated at something like 400,000 barrels, which will do something to make up the deficiency, taking the Dominion as a whole.

And now what about the prospects for getting rid of this year's production at a profitable figure. As to Great Britain, practically all fruit yields there, according to apparently reliable reports, have been greatly reduced, owing to heavy rains and bad weather generally. France, too, is going to be short of apples, judging from the many enquiries which have been received in this country as to the prospects here. In Germany, the crop promises normal, or nearly up to normal results, but consumers there are quite likely to ask for more than their own country produces. All in all, therefore, there is the promise that this year Canada may be able to do a very satisfactory export trade with her surplus apples. But dealers and exporters should not be led away by these conditions; they should keep a very tight rein upon themselves in the matter of prices. They may profitably remember former bitter experiences. A clamor for early Canadian apples in Great Britain at fine prices should not be construed into a desire on the part of the British consumer to take the whole Canadian crop at double the prices we would be inclined to give for the pick of the fruit here. On more than one occasion in the past Canadian exporters have been led by these early good prices to lose their heads in a rash scramble to get apples at any cost, and have found themselves bitten pretty badly at the day of reckoning. Another thing which should be constantly borne in mind is that nothing, not even extra quality in the goods shipped, pays better than thoroughly good packing. Without this item added all others become valueless; flavor, good appearance, high-priced market, become of no avail. In this connection, the demonstrations which are being given in fruit-packing at the Toronto Fair, should be of great interest and value.

So far as the other domestic fruits are concerned, this has been a very busy season so far; in fact never have the wholesalers had to rush sales through more rapidly than during the last few weeks. The old bug-bear of over-production seems to have loomed up again; some sorts of fruit, notably plums, have had to be sold at prices which could only have barely covered the cost of picking, packing and shipping, let alone giving a little interest on the grower's investment. Perhaps it is not, however, so much the heavy production which is at fault as a lack of a wide and thorough system of distribution, for while in large cities fruit may be at times so plentiful as to be almost a drug in the market, there are a dozen minor points at a little distance away where a sufficiency cannot be obtained at any price.

THE SALMON FISHERY.

The failure of the salmon run on the Fraser River this year is attributed by some to the construction of the dam at Quesnelle for gold washing purposes. This waterway was used by about a third of the salmon in their migration to the spawning grounds, and it is supposed that when the dam was built they could not get up the stream. The fish ladder which was constructed proved too steep, the salmon exhausting and killing themselves in their efforts to climb it. It is now proposed to destroy the dam, though this would make no practical difference so far as the fishing is concerned before the year 1907. Whatever be the cause, there is no doubt that the catch will be very small this year. Prices for futures are at present held very firmly, and there is a disposition on the part of both canners and dealers to await the course of events. The action of some of the British Columbia canners in endeavoring to induce the Dominion Government to declare a close season in part of September, is being much criticized. The alleged reason for such a step is that great danger threatens the whole industry unless something be done to check the growing scarcity of fish. The fishermen, on the other hand, claim that the canners' action is prompted by a desire to manipulate the market for their own ends, and the Government apparently think there is something in the charge, for they express a desire for further enlightment and delay before doing anything in the matter.

A TELEGRAPH CHANGE FORESHADOWED.

For a week or two past paragraphs have been appearing in Canadian newspapers, principally those of Montreal, indicating in a vague way an intention on the part of the Western Union Telegraph Com-

pany of the United States, to "absorb" the wires, buildings, and plant of the Montreal Telegraph Company and the Dominion Telegraph Company, which for the last twenty years have been worked by the Great Northwestern Company of Canada. Indeed the Montreal Herald of Monday gives currency to a report that "American subordinate officials" are to "take charge of the operation of the Canadian company" last named. Enquiry at headquarters here fails to elicit any information of this remarkable story. It might be well for the Western Union authorities to understand, however, that the Canadian people are not likely to view with favor the supplanting of officials in the telegraph service, who have served them long and well, by strangers sent over here from the United States. It will not be easy to convince people in Canada, who have had such excellent service from the C.P.R. and G.N.W. telegraph companies, that there is any need of having smart fellows sent across the line to teach us how to do telegraph business, or to have, as is threatened in this latest story, "American capitalists" to institute a general policy in Canada, more to the liking of the Western Union. If they are disposed to give our business men any newer and better facilities than already exist, that is a different story, and there can be no objection. But what Canadians will resent is the idea that there is any need for the Yankees to come over here and do our business for us, in telegraphy or anything else.

CANADIAN TRADE IN 1902-03.

It is a gratifying evidence of changed conditions in one of the departments at Ottawa that we received, on the 14th August, the unrevised monthly statements of the imports and exports of Canada for the year ended with June, 1903. We used to have to wait for these figures till six months, perhaps nine, after the close of the year to which they related; and it is very agreeable to be able to tell, so soon after the close of a twelve-month, how much Canada has bought and sold during her fiscal year.

The total imports for 1903 were $233,787,325, (of which $9,000,000 was coin and bullion, and the duty collected, $37,109,717, while those of 1902 were $202,791,595; duty collected, $32,423,862.

Exports during 1903 amounted in value to $225,849,724, and of these $214,401,674 consisted of Canadian products or manufactures.

The aggregate trade of the country, outwards and inwards, was therefore $459,637,059—not a small amount, certainly, for a people numbering less than six millions, for it represents more than $76 per head of the population.

To-day's table is at a disadvantage as compared with our table for 1902, because we can give only totals, not particulars, of the kinds of goods exported to foreign countries, nor yet to the British Empire outside the United Kingdom. The June Blue Book gives these particulars about the Mother Country and the United States only. For full details our readers must wait.

The imports are divided into three classes: 1. dutiable goods; 2, free goods; 3, coin and bullion. The value of each is expressed in the following table:

IMPORTS FOR CONSUMPTION, 1902 AND 1903.

	Year, 1903.	Year, 1902.
Dutiable goods	$136,792,874	$118,657,496
Free goods	88,017,654	77,822,694
Coin and bullion	8,976,797	6,311,405
Total imports	$233,787,325	$202,791,595

The increase in our purchases of free goods is quite noteworthy. The $88,000,000 worth of these we bought were largely raw materials for our manufactures—$7,000,000 worth of anthracite coal, for example; $7,863,000 worth of furs, hides and skins; $1,743,000 worth of crude rubber; $1,085,000 worth of jute and jute yarn; $5,968,000 worth of raw cotton; $1,240,000 worth of wool; $2,362,000 worth of tobacco leaf; besides drugs and dye stuffs, flax seed, broomcorn, gums, noils, rags, oils, ores, and many forms of metal goods. Out of this total of eighty eight millions of free goods imported, sixty-nine millions' worth, or more than three-fourths, comes from the United States.

Leaving out of the account in both cases the foreign products exported from Canada—which are mostly American grain and manufactured goods—we copy from page IV. a comparative statement of the total exports of Canada:

EXPORTS, FISCAL YEARS 1901-2 AND 1902-3.

	Value, 1903.	Value, 1902.
The mine	$ 31,064,861	$ 34,947,574
The fisheries	11,800,184	14,059,070
The forest	36,386,015	32,119,429
Animals and their produce	69,817,542	59,245,433
Agriculture	44,624 321	37,152,688
Manufactures	20,924,967	18,462,970
Miscellaneous	83,784	32,599
Totals	$214,401,674	$196,019,763
Add foreign products	11,448,050	15,620,523
	$225,849,724	$211,640,286

There is thus a gain of $14,209,438 in the exports of last year over those of 1902. None of this increase comes from either minerals or fishery products exported, for in both these descriptions of goods 1902 surpassed 1903. The increase this year was largest in animals and their produce exported, but forest and field did a good share towards it. A very gratifying feature is the growth in our exports of Canadian manufactured goods from $18,462,970 to $20,624,967. It is noticeable, too, that foreign manufactures exported declined from $2,372,000 in 1902 to $2,255,000 in 1903.

Our imports from the whole British Empire amounted in value to $65,007,080; of which $37,614,000 came in under the preferential tariff; $7,364,000 under the general tariff and $20,028,000 free of duty. This total represents about 28 per cent. of our entire imports; we procure 58 per cent. of them from the United States and 14 per cent. from other countries.

—We are under obligation to a correspondent who points out to us that our article of 21st August on the Commercial Congress unfortunately leaves two important words out of what is known as the compromise resolution. These are the two words desired by Sir Wm. Holland as expressing in some measure the attitude of the free trade manufacturers of Great

Britain. We have inserted them and marked them by italic type. The resolution now reads:

"That, in the opinion of this Congress the bonds of the British Empire would be materially strengthened, and a union of the various parts of His Majesty's dominion greatly consolidated by the adoption of a commercial policy based upon the principle of mutual benefit, whereby each component part of the Empire would receive a substantial advantage in trade as a result of its national relationship, due consideration being given to the fiscal *and industrial* needs of the component parts of the Empire;

"That this Congress urges upon His Majesty's Government the appointment by them of a special commission composed of representatives of Great Britain and her colonies and India, to consider the possibilities of thus increasing and strengthening the trade relations between the different parts of the Empire, and the trading facilities within the Empire, and with foreign countries."

SPLENDID HOLIDAYING.

According to Forster, the biographer, "Splendid strolling" was the term applied by Maclise, the painter, to the holiday jaunts of Charles Dickens and his artist friends in the amateur plays they performed in England for charitable objects. "Splendid holidaying" may be a not inappropriate term for the tour of Canada now being made by the delegates from British Chambers of Commerce. The special trains prepared for them by the Grand Trunk and C.P.R. respectively leave, on the testimony of the visitors themselves, nothing to be desired. If the travellers need either information, advice, or sympathy—and who, in a strange land does not look for some of these things—they have "guides, philosophers, and friends" at every turn. On the Grand Trunk they had such prominent officials as Messrs. Loud, Davis, Pullen, and Tiffin, to accompany them; on the Canadian Pacific they had Mr. A. E. Lalonde, travelling passenger agent, to accompany the party from the Ottawa to the Pacific. But what need of more railway men? Have they not with them Hodgson and Ames, Hadrill and McFee, Desjardins and Masson, all of the Montreal Board? Mr. Ames is a famous organizer, and also a gilt-edged brick. He, more than any other man, we are told, organized this trip, going out beforehand to the coast and arranging for the comfort of all this large gathering.

The arrangements are admirable. Every man and woman is allotted by name and number a certain seat in a certain car. Their luggage is on the train with them, and accessible at stated times. Each person is provided with an itinerary and a time-table.

Speaking of time-tables, was there ever a prettier piece of work of this kind produced in Canada than the Annotated Time Table presented to the visitors by the Grand Trunk? This striking pamphlet is a running commentary on the route over the fifteen hundred miles of its track which the tourists traverse on a quick run from Montreal to Niagara, Detroit, Sarnia, and Muskoka. Besides the time of arrival at each station are given in separate columns the miles from Montreal, and the height above sea-level of each of the 227 points they touch or pass. The letterpress is interesting, the information well proportioned, and the illustrations, whether colored lithographs of places or the dainty shields and emblems that accompany them, are a delight to the eye. It is a beautiful piece of work.

More than anything of which they had not before heard, the visitors were impressed with the beauty of the Muskoka Lakes, over which they had a sail in the "Medora." And when after that tangle of water and forest they are set down to lunch at the Royal Muskoka hotel, 1,000 feet above the sea, their satisfaction might well be complete. Here and there the Indian names of places puzzled them, as well as everybody else. But while they were told the meaning of Washago and Orillia, of Couchiching and Ahmic, they were spared the brain and tongue-twisting exactions of Minnecoganashene, of Kahweambegewogamog, or even Penetanguishene, for they did not get that far north or west. However, those who go down the Intercolonial Railway to the Atlantic, as some 40 or 50 of them intend, will get their note-books full of quaint Indian and French names.

Apart from the features of landscapes which impress travellers with their beauty, there were some points whose utility did not escape the keen eyes of the visitors. "Your waterpowers are vast," said a quiet man on his return from the northern lakes, "there is a great opportunity here for the development of electric energy." And another said, shrewdly, referring to radial railways, "there is a wonderful field here for tramways to connect your villages with your cities."

Very delightful it was to sit at lunch in the King Edward Hotel with a group of sprightly, intelligent English women, and to hear them tell with real feeling how well they had been looked after thus far on their journey, and how pleased every visitor was. One of them—and there are thousands in the United States equally puzzled—could with difficulty grasp the fact that the wonderful archipelago of Muskoka, among whose inlets and islands they had steamed for a whole day in a boat, should be absolutely closed in the winter by frost. On the other hand, it was perplexing to a polite gentleman, one of the city officials, when he closed a window into which a cold, damp air was blowing upon a young lady's shoulders, to have her turn to her mother and express in a whisper her fear that she would die with the heat. The elder lady presently declared it insupportably warm, and the amazed young man hastened to reopen the window. The temperature was perhaps 65.

A pretty incident occurred at the Exhibition on the Saturday, when a Toronto man, observing Mr. Alexander Muir, author of "The Maple Leaf, our emblem dear," a national song of Canada, introduced him to the delegates, who gave him cordial welcome. One of those present at the luncheon was able to tell Mr. Muir of a charming English girl, who, when the air was sung, rose and clapped her hands, pointing out to her party with pride a real Canadian maple leaf which she had plucked in Muskoka the day before, and placed in her corsage.

A man from Leeds, who displayed quite extraordinary energy in getting about Toronto and other places in a short time, ascertaining what manufactures we had in his line, manifested warmth of appreciation as he said: "Thank you very much, gentlemen, for your welcome kindness; we shall not soon forget it. Two things have impressed me in this trip: One is the noble panorama of the St. Lawrence as we came up to Montreal; the other, the marvellous variety of beauty of the Muskoka lakes."

Nobody complained of the weather. Indeed they thought it surprisingly fine, even on the days of Scotch mist. Of course in any Southron had complained, we could have retorted upon him with stories of rainy days at Greenock, and fogs in London. The thunderstorms surprised them, and our lightning was on the wireless, tireless system. "A grand spectacle, Sir," said a grave and Miltonic-looking personage, approvingly describing one of the storms. "Oh, papa," said his daughter, "it was just horrid—I was so frightened." The fact being, probably, that the deluge of rain was one of the really frightful parts of the storm.

The delegates heard "The Maple Leaf" sung at Toronto. We wonder if they heard Bergeron sing "Brigadier, vous avez raison," at Montreal? Some of the Canadians on the train to Winnipeg would be likely to give "The Canadian Boat Song," and surely Hon. Mr. Desjardins or Mr. Masson was able to render "A la claire fontaine" for the delight of car No. 6, en route.

It occurred to one, sometimes, during the trip, that the Canadian escorts of these good people were hardly impartial in their attentions. But human nature is, and will be, human nature. Given a man or a group of men whose manner shows the glad hand and the open heart—a Canadian will instantly respond and fraternize with such people. But towards a man whose silent stare or chilling demeanor says: "Prav remember, Sir, that we have not been introduced," he cannot feel the same. As Tom Hood put it, distinguishing real piety from mere piosity, (his nerves had suffered from the "unco guid" as well as from the lordly patron):

> With sweet, kind natures, as in honey'd cells,
> Religion dwells, and feels herself at home,
> But only on a formal visit dwells,
> Where wasps, instead of bees, have formed the comb.

Thank Fortune, there were not too many of the haughty type. And even some to whom the frigid English manner was natural, were saved by the graciousness of their women, bless them.

It was a source of amusement to the travellers when they reached London, on the Canadian Thames, to find such familiar surroundings as Westminster and Blackfriars bridges; streets named Pall Mall, Regent and Piccadilly, and also a cathedral of St. Paul's. On the train they made jokes with one another about the facility with which Canadians who live in London in Ontario can take cheap trips whenever they like to Paris and Berlin. (They might have added Hamburg, Baden, and Petersburg.) They were eager to learn more, too, of the "classic city," Stratford; of the royal city, Guelph; the maple city, Chatham. And they ventured to think, from what they heard of it, that Brantford ought to have been named the Indian city.

Whoever thought of erecting, upon the steamer from Detroit up the St. Clair lake and river to Sarnia, the pyramid of products of Essex, deserved well of that prolific county. Scarcely would the visitors have believed else that the strip of land between lakes Erie and St. Clair produced tobacco, sorghum, hops, peaches, grapes, small fruits and all cereals, crowned by stately maize, ten feet high. A grateful and loyal passenger described to the writer the thrill he felt when, on nearing the wharf of Walkerville, there burst out of the murky and rainy sky the words, "God Save the King," in huge electric letters, on the front of the Messrs. Walker's offices. "Everywhere we went," said he, "you made us feel that you were British; and as it were compelled us—by kindness—to feel at home amongst you;" which the writer thought, and continues to think, a very pretty speech from an undemonstrative Briton.

It is not the place of the present writer to make predictions, but from what he learned of the earnest temper and the honest disposition of many of the present party, it will be a wonder if they do not, when they return from the mines of British Columbia, the prairies of Manitoba, the hills and dales of the Maritime Provinces, say, and sing, with Kipling: "Canada is a great country; a country with a future. *There* are all good things to be got out of the ground. Why don't Englishmen think more of it as a field for English capital and enterprise? Send your folks to Canada; and if they can't go themselves let them send their money—plenty of it."

Those amongst the group of 220 who are admirers of Mr. Chamberlain ought perhaps to be told that the London Economist—which calls the Honorable Joseph "a circus performer of the highest order"—has found out during their absence in Canada that England's "commercial decadence," and other such "direful vaticinations of the tribe," are the merest moonshine. According to that journal of 22nd August, income tax receipts during the eight years ended 1902, were £607,551,000, as compared with £475,680,000 in the preceding eight years. The population is increasing, wealth is accumulating, revenues are advancing—why, therefore accept the theory of our decadence? Such is the burden of one of the two-column articles of the Economist. The Congress delegates may as well go straight home.

OUR SAINT JOHN LETTER.

It is rumored that Messrs. Baird and Peters will build an equally large tea house alongside, or very near the Estabrooks building, which is to be ready in less than a month. Messrs. Baird and Peters are leaders in the St. John wholesale grocery trade as well as in the tea business, and are now considering the establishment in St. John's, Newfoundland, of a branch of their grocery business. They have had a tea house in St. John's for some time.

Another St. John lumber mill has been destroyed by fire. On Saturday evening during a severe thunder storm, the Galey Mill in Carleton, owned by J. A. Gregory, was struck by a bolt and burned. The mill had been idle for some time, and the machinery was being moved to Mr. Gregory's mill at Lepreaux, so the loss is not heavy. With the mill there was destroyed about $1,300 worth of manufactured lumber, owned by John M. Driscoll, as well as a large quantity of firewood.

The city of St. John and the Canadian Pacific Railway now have large crews of men at work rebuilding the warehouses and elevator conveyors burned in the fire last spring. One of the warehouses will be two stories, the Dominion Government having arranged to lease the upper story for a term of years. It is wanted for the accommodation of emigrants, the present immigration building having been found much too small for the business now developing.

There are reports of several big deals in lumber privileges, but the only one officially announced is the purchase by Messrs. Scott Brothers, Fredericton, of the Victoria Mills, formerly operated by Messrs. Hale & Murchie, and managed recently by Mr. J. R. McConnell. The Messrs. Scott will cut extensively on the Tobique during the coming winter, and will run three mills; the new one, their old mill at Kingsclear above Fredericton, and a new mill to be put up on Magaguadavick Lake, where they have a fine privilege.

The Bonny River Lumber Company are preparing to build a fine new mill to take the place of the one destroyed by forest fires recently. Examinations of the Company's lands have shown that the destruction of timber is not nearly so great as was at first supposed.

St. John is an important centre for the lime business of the Maritime Provinces, and under the Dingley United States Tariff, a large trade was done with the United States which the present tariff has killed. The kilns were idle for a long time, burning only for the local trade, but with the establishment of pulp mills there has grown up a new demand and now the business is booming again, some of the Maine pulp mills send here for their lime, which is of a superior quality to that got out at Rockland.

The railway of the New Brunswick Coal Company is now completed to the coal fields in Queen's County, and ere long regular trains will be running from Norton on the I.C.R., to Newcastle. The construction of this line is expected to have an important bearing on the development of the coal fields, and the expectation is that in a few months there will be greater activity in the section than ever before. The line is to be extended from Newcastle to Fredericton. With the construction of the Grand Trunk Pacific to Chipman, the line may play an important part in bringing to St. John the western produce that it is believed will seek an outlet through this port.

* * *

Saint John, N.B., 25th August, 1903.

THE TRENT VALLEY CANAL.

Editor Monetary Times:

Sir,—It was with pleasure and thankfulness that I noticed the several large cuts in last Saturday's Globe of the immense hydraulic lift-lock (the largest in the world), which is now about completed at Peterboro, on the Trent Canal—thankfulness for the efforts shown in thus calling attention to this great waterway, which until the last few years had been so neglected.

But I must call attention to a mistake in the dimensions as given of the pontoons or water-tight steel boxes which are to lift the barges from the lower level of the canal up to the upper level, or vice versa, and thus save a great amount of time over the ordinary locks. Instead of that given, the depth of the pontoons will give eight feet of water in the clear, being built to suit the purposes of an eight foot canal. The ordinary locks have at present a depth of six feet of water on the sills, but all the works are being constructed so that a draught of eight feet can be obtained at a very little expense. The capacity of the Trent Canal barges drawing eight feet will be about 25,000 bushels—being three times the capacity of the barges used on the Erie Canal—that great railway-freight-tariff regulator.

The Trent Canal will connect the Upper Lakes to Lake Ontario by short-route navigation to the sea-board; i.e., a steam-tug canal, with its northern terminus at the city of Midland, on Georgian Bay and having the grandest harbor on the Upper Lakes. It will give a canal route 23 hours shorter than the Welland Canal route between Sault Ste. Marie and Montreal, being some 245 miles less in distance, and will give also a shore mileage of one thousand miles of

navigable waters to a sadly railway-neglected district in its northern half,—in fact the term "canal" is a misnomer, because out of the whole distance not more than 15 or 20 miles will be canal, the remaining portions being lake and river stretches which are utilized for the navigable channel. The Trent Canal, in fact, is Nature's short waterway between the Upper Lakes and Lake Ontario, and it would be ungrateful were we not to accept her gift.

The quantity of forest products, of hardwood especially, throughout the northern section is enormous. The pine has been practically all floated out, but the hardwood is at present only waiting till the canal barges can receive it at the mouths of the streams tributary thereto. The other portions of the canal (district) are rich in agricultural products; in fact one of the largest cereal mills on the Continent, an American branch works, recently erected at Peterboro, was attracted there not only on account of the water-powers and the Trent Canal, but on account of the grains in the district. The district has lately proven (also the local) benefits to be derived from the construction of a canal by the gathering of many large industries at the different large towns on its line, and notably so at Peterboro, where three of the largest factories of their kind in Canada have been erected.

During next summer the long stretch between Lake Simcoe and Rice Lake will be completed and opened for navigation. Some two and one-half million dollars or less will complete the stretch between Lake Simcoe and Georgian Bay, and two million will complete the stretch between Rice Lake and Lake Ontario.

Were the Canadian public to only understand the great capacity of this canal, and also to know that its utility has been proven by a Government appointed Commission, composed of the first railway and waterway engineers of the country—who took evidence from port and port, and from end to end of the Great Lakes, as to its national and practical value as a grain-carrying route—there would be an end to that narrow-minded spirit of antagonism on both sides of politics, not to speak of the lamentable ignorance displayed generally as to the capacity and to the utility of the Trent Canal, when the Government makes its annual small grant for construction work, and instead this great work would be so backed up by public opinion that its construction would be completed without a moment's delay.

J. Alex. Culverwell.

Peterboro, September 1st, 1903.

INDEPENDENT ORDER OF FORESTERS.

From the report of the Order for the year 1902, as furnished to the various insurance departments, I take the following facts: Temple Building—Value given as $654,732, and net rents $7,280, a return of less than 1¼ per cent., a truly remarkable investment.

Taking the actual cost of the building on October 31st, 1901, namely, $834,116, (which is the figure given in the report of the Insurance Commissioner of the State of Connecticut for the year 1901), the return is less than 1 per cent. In 1900 the cost or expenditure was $796,916, and net rents $5,578, equal to ¾ of 1 per cent.

If the amount expended on the building had been left on deposit with the bank at 3 per cent., the Order would have received $73,397 in the three years, 1900-1902, on the average cost, instead of $20,401, the amount actually received on the investment, a loss for the last three years of $53,000, in interest alone; add to this the difference between the present value and actual cost the loss in all to the Order is $232,000. Further comment is needless.

Union Trust Co.'s Stock.—This concern was engineered with the funds of the Order, the plea put forth being that the executive had not the necessary time to devote to the investing of the funds; but while they could not, or did not want to, find the time for such as officers of the Order—a duty for which they are paid—they evidently can, and do find it as officers of the Union Trust Co., the inference being that they required double salaries.

The amount of stock held by the Order is given as $846,680.55 par value, the cost being $1,042,280.55, a premium of nearly 25 per cent. for a company that only paid 4 per cent on the par value. The total paid up capital is $847,980.55, so that the Company is practically the Order. Who holds the balance of the capital stock $1,300? The Company had, in addition $100,000 of the funds of the Order for investment.

Here we have two items of assets in which nearly $2,000,000, or one-third of the funds of the Order has been sunk and for which the sum of $41,147 was received for interest and rents, the very striking return of a fraction over 2 per cent.

Provincial Trust Co.—Although this company was merged into or absorbed by the Union Trust Co., the sum of $82,654.50 assets of such Provincial Trust Co. still figures as an asset of the Order for that amount. What is the actual value of this sum?

Interest $33,259, and rents $3,418, due and unpaid, making in all $36,677 on mean ledger assets of $5,529,586. The Canada Life had only $24,400 at the end of the year, on assets of over four times that of the Order.

General Account.—The sum of $312,538 was transferred to this account from the Mortuary Fund to cover the over drafts, yet notwithstanding this large amount, there was still a deficit of $254,684 at the end of the year—increased by this time nearly another $100,000, according to the accounts published monthly in The Forester.

Expenses $755,188 (equal to 24.51 per cent. of the amount paid by the members), an increase of $112,425 over 1901, and an increase of $256,375 over 1900.

How much longer will the members allow such mismanagement of finances and gross extravagance to continue, and sit in fancied security that everything is couleur de rose, lulled thereto by the glittering generalities of the Supreme Chief and the pretended magnificent surplus?

Will they wait before taking action till something occurs like that which aroused the Knights of Pythias; or will they take time by the forelock and cry halt?

A Member.

A CREDIT MAN'S DUTIES.

Editor MONETARY TIMES:

SIR,—I read with considerable interest an article which recently appeared in the MONETARY TIMES under the heading "Advantage of personal interviews in granting Credit." The duties which devolve upon the credit man in any large institution are as Mr. Sheble, the writer, intimates, truly "multifarious," and to discharge them satisfactorily, he must have a vast amount of patience, as well as the ability to size up character and human nature. A personal interview is most advantageous in granting credit. No matter what implicit confidence you may have in the judgment of your travellers or in the Mercantile Agency reports, you have not the same feeling of satisfaction in despatching goods as if you had met the purchaser face to face in your own office.

Some of the best travellers I have ever come in contact with, so far as popularity and ability to sell goods are concerned, have had the greatest tendency to lead the office into bad debts—not so much through their desire to make sales, but through being over sanguine as to the financial standing of their customer. Of course, if a retail merchant wishes to misrepresent matters, he can do so as readily in the office of the credit man as he can in the sample room, yet one would suppose from Mr. Sheble's experience, that upon cross-examination he concluded the man he refers to was not telling the truth and declined the risk. His standing, according to his figures, certainly entitled him to the credit asked for, and though we are left somewhat in the dark as to why it was refused, we may assume that an air of suspicion lent itself to the statement which on paper showed the man to be quite solvent, and which, in the ordinary course of events, would have gained him the advance asked for. The successful credit man must have a good deal of give and take and at the same time sufficient back bone to prevent good nature being imposed upon.

A growing country means increased competition among merchants. Special inducements are being thrown out continually to buy from this house and that, and a man requires good sound judgment and common sense to discriminate as to what seems reasonable or otherwise. What I mean is that the credit man must have the happy faculty, I may say the double happy faculty, of keeping his first-class customers satisfied and in good humour—without of course cringing to them—in order to retain their accounts, and of declining risks that appear undesirable, no

matter how unpleasant the performance of his duty may be. Confidence should invariably exist between wholesale houses and their customers, especially when favors are being asked. No merchant who seeks a renewal, even occasionally, should have any hesitation in giving his full confidence when it is asked for—in fact, unless his circumstances are known to the credit man, it should be insisted upon, and if still refused, the house is better without the account.

Confidence should also exist between wholesale houses themselves. I would like to see organized here something in the nature of a credit man's association, in order that the heads of this important department of wholesale trade might meet occasionally to exchange confidences, compare notes and discuss the many knotty questions that come up from time to time. The credit man naturally spends the greater part of his time in the office ; but he should, when he has the opportunity, get out through the warehouse, where he may meet customers who possibly have no occasion to seek him in his office, and in order that he may keep in touch with his staff of salesmen. He should always have a right hand man or understudy—some one who is steadily familiarizing himself with the accounts and who is capable of stepping in any time in the event of an emergency. The position throughout is a trying and most responsible one. The conditions of the country and of particular districts, the crops, and all other signs of good or bad times must be carefully watched. In many cases the foundation of bad debts is laid in good times. The retailer buys more heavily than usual—in fact gets overstocked, but possibly does not feel the ill effects of it until a period of depression sets in. *Then* he wakens to the fact that his liabilities are nearly double what they should be. The result is perhaps an extension of time, which is often but the precursor of further trouble—a reduction in his rating—a tendency on the part of his suppliers to draw out—and eventually his inability to get goods except on cash terms. Over buying and credit too freely granted are fertile factors in bringing about failure, and this is where the judgment of the credit man should assert itself.

I have no desire to trespass too much upon your valuable space, but these are a few of the ideas that occurred to me after reading the article above referred to, and as "one of the unfortunates," I agree with Mr. Sheble that the position of credit man, if he aims at being a successful one, is to say the least of it, no sinecure.

Very truly yours,

J. Fraser Macdonald.

Toronto, August 25, 1903.

THE DOMINION EXHIBITION.

We have only to add to what we said last week in a general way about this really worthy fair, that no one should miss seeing the Jubilee Presents.

MACHINERY HALL.

The Canada Foundry Company, Toronto, who produced the structural steel required in the Manufacturers' Building, have a large space in which are displayed a Curtis electric car truck, some handsome drinking fountains, hydrants and various cast and wrought iron work, besides a large assortment of screws and nuts.

The Northey Manufacturing Co., Toronto, show their typical pumps and hydrants to advantage.

The James Morrison Brass Company made a really beautiful display. Gas and electric fixtures form a special feature this year, but besides these they show various locomotive valves, injectors, lubricators, brass chancel rails, etc. The specimen of a Quinn automatic flush, in which everything is shown at work, is well worth looking at.

Goold, Shapley & Muir, Brantford, make a good representative showing in their line of goods.

The Goldie McCulloch's (Galt) chef d'oeuvre this year is a one-cylinder compound steam engine, believed to be the only one of its class in successful operation in the world.

The Henderson Roller Bearing Co., Toronto, have a good exhibit in charge of Mr. R. I. Henderson. They make antifriction bearings for bicycles, electric motors and generators, railroad cars and shaftings, wheels and axles of every description, and claim that by their use a saving in power is effected of from 25 to 75 per cent.

Babcock & Wilcox, Limited, Montreal, Glasgow and London, show the latest form of water steam boiler.

The Rogers Electric Company, Toronto, have one of the most tastily arranged exhibits in the building.

MANUFACTURERS' BUILDING.

The new Manufacturers' Building contains so many points of interest that it is difficult to pick out a few for special mention. It will surprise many people who have not yet visited it to learn that the structure itself, spacious and expensive though it is, cost somewhat less than the fixtures which have been placed by the exhibitors themselves inside it. We are told, for example, that the piano manufacturers alone have spent $18,000 on decorations.

"Canada for the Canadians" is a prominent watchword this year, and in no case does it apply more fittingly than in connection with the Hallwood Cash Register Co., of 84 King Street East, Toronto, as this is the only register made in Canada. The trade in this country is under the excellent care of Col. Patton.

Brown & Wells, Limited, the Toronto export house, show samples of Tobler chocolate.

The Dominion Radiator Company "the largest manufacturers of radiators under the British flag," have a noteworthy railing around their space. It is in the form of a complete radiator in the shape of the letter L, made of 200 sections, each two and a half inches in thickness, thus giving a length of solid radiator of nearly forty-two feet. The specimens of their work which are thus uniquely surrounded are equally interesting. The Safford radiator is known the civilized world over.

Ryrie Brothers, Toronto, the famous jewellers, have not only a very prettily arranged, but a highly instructive exhibit, in charge of Mr. Quinn.

The Canada Launch Works, Limited, Toronto, are building up a larger business in this particular line than most people imagine. Their exhibit at the Fair, which is being looked after by Mr. M. M. Whitaker, the president of the company, is always surrounded by an admiring crowd. Some of the samples of boat-building shown are exceptionally fine. Besides launches, this company makes gasoline and steam engines, boats and dingheys, etc.

The arrangements made for the housing of the piano makers this year are a great improvement, each maker being provided for his own use with a separate compartment, in which his instruments may be tested without the discord resulting from the auditor being inflicted with a dozen different tunes being played at one time, all within his immediate range of hearing. Among the exhibits which caught our attention more particularly were the following: The Dominion Organ and Piano Co., in charge of Mr. J. W. Alexander, the company's president. The Bell Organ Company's showing is well up to the mark of previous years. The Morris Piano Co., of Listowel, can show instruments which are rapidly making for themselves a name in the front rank. The D. W. Karn piano also can be studied in some fine specimens.

The booth, or miniature building rather, of the Metallic Roofing Co., never lacks for attention on the part of sightseers, it is so complete in itself, neat in its design, and representative of what its builders manufacture.

The Sylvester Bros. Manufacturing Co., of Lindsay, Ont., show some good specimens of launches and gasoline engines.

The Office Specialty Manufacturing Co., Toronto, make such a multiplicity of furniture and appliances aiming for comfort, convenience and economy of time and labor in the office that their catalogues should be consulted in order to obtain a just conception of their productions. One of their specialties is a system of vertical filing, which is well worthy of attention from the thousands of business men who lose valuable time through not possessing up-to-date office equipment. The gentleman in charge of their very fine exhibit is Mr. McGill.

Among the exhibits of food stuffs we noticed the varied one of Leeming, Miles & Co., grocers, Montreal. The Eby, Blain Co. make a good showing, which includes their handy coffee pot, which has now become well known to all lovers of really good coffee.

It is not to be wondered at in a country like Canada that its production of furnaces and stoves should be in the first rank as regards both variety and superiority. The J. F. Pease Furnace Co., Toronto, make a fine showing as usual, with their well-known "Economy" type. The Moffatt Stove Co., of Weston, Ont., evidently hit the taste of some of their visitors of Saturday last, for they are booked to ship goods to Great Britain for the use of delegates to the great Chambers of Commerce Congress in Montreal recently. Their "Pearl" and "National" stoves are becoming well known.

CANADA'S IMPORTS AND EXPORTS

FROM ALL COUNTRIES, FISCAL YEAR, 1903.

Compiled from Government Blue Books for the MONETARY TIMES.

BRITISH EMPIRE.

	IMPORTS.	EXPORTS.	TOTAL.	*CHARACTER OF EXPORTS.
U. K. Great Britain and Ireland	$58,893,710	$131,202,321	$190,096,031	Arsenic, asbestos, coal, copper matte or regulus, mica, potash; fish, cod, canned lobsters, fresh and canned salmon; marine furs and skins; woods, hewn and sawn, spruce and pine deals, staves, shooks; wool, tallow, poultry, bacon, hams, lard, eggs, butter, cheese, cattle, sheep, swine; apples, canned fruits, barley, buckwheat, oats, pease, wheat, rye, bran, wheat flour, oatmeal, hay, hops, maple sugar and syrup, clover and flax seed, field implements, books and pamphlets, clothing, rope and twine, cotton fabrics, drugs and chemicals, rubber manufactures, pig iron, machinery, iron and steel hardware, sole and upper leather, boots and shoes, whiskey, wine, pianos, organs, oil cake, rags, wagons and carriages, bicycles, doors, sashes and blinds, household furniture, matches and match splints, spool-wood and spools, wood pulp, woollen goods.

GRAND TOTAL	**$233,787,325**	**$225,849,724**	**$459,637,049**	

*As the Blue Books for 1903, thus far published, give details of exports to Great Britain and the United States only, we have in the case of other countries in this list assumed that the Canadian exports to them this year were like those of the previous one.

FINANCIAL MATTERS.

A letter received this week from a point in the North-west Territories and signed "A Territorial Manager," encloses a clipping from the Monetary Times of recent date describing a strike among the bar-tenders of Fernie, B.C., for a fixed wage scale of $70 per month and board. The writer of the letter calls the attention of head officers of banks to the circumstance that the salary of the N.W.T. bank managers does not exceed $1,000 to $1,200 a year, not including board and lodging. And he enters upon a satirical comparison of the parts and attainments of bar-tenders and bank-managers respectively, closing with the rather bitter sentence: "A bank manager's salary hereabout does compare strangely, however, with that of a locomotive fireman, whose earnings average about $85 per month."

Mr. J. M. Courtney, Deputy Minister of Finance, leaves for England this week, in connection with two Canadian loans which mature on October 1st. One is a 5 per cent. loan of £500,000, against which there is no sinking fund, and the other a 4 per cent. loan of £1,500,000, which will be partly met by sinking funds to the amount of over £969,500. In his budget speech Mr. Fielding intimated that the 5 per cent. loan would be met out of revenues; also such portion of the 4 per cent. loan as might on the date of maturity be outstanding.

The liquidators of the Elgin Loan Company, of St. Thomas, namely, the London & Western Trusts Company, announced that the first dividend of 25 cents on the dollar would be paid to depositors of the company this week. The liquidators also announce that a further dividend of 25 cents will be available in about thirty days.

The Sovereign Bank branch at Markham has just been removed into its new and cosy premises, which like all new bank offices nowadays, are made comfortable for both staff and patrons.

We are advised that the Sovereign Bank of Canada has opened branches at Aylmer and Springfield, Ont.

Last week, we hear, an offer of $20,000 was made for a seat on the Montreal Stock Exchange, but was refused. The record price up to date is $27,500.

MACHINERY HALL

AS was to be expected the opening of our permanent machinery exhibition in the old cyclorama building has been amply justified. Every day a large number of visitors are on hand looking over the collection of machinery. In order to meet the convenience of visitors to our city it has been decided to keep open every night until 11 o'clock during the Dominion Fair. If you want to see the very latest in machinery and tools give us a call. Our address is 131-145 Front St. W. The latch string is always on the outside. It would be hard for you to miss the building, we almost touch Union Station. A cordial invitation to all to come around.

H. W. PETRIE.

A HUGE SUCCESS

CLEARING HOUSE FIGURES.

The following are the figures for Canadian clearing houses for the week ended with Thursday, Sept. 3, 1903, compared with those of the previous week.

Cities	Sept. 3, 1903	August 27, 1903
Montreal	$19,012,748	$18,397,050
Toronto	13,910,875	12,833,157
Winnipeg	4,020,493	4,121,276
Halifax	2,301,507	1,733,076
Hamilton	1,007,028	903,424
St. John, N.B.	1,101,171	1,013,854
Vancouver	1,342,373	1,319 734
Victoria	493,596	519,711
Quebec	1,653,271	1,510,245
Ottawa	1,903,991	1,921,375
London	769,782	658,763
	$46,747,053	$44,932,665

THE SOVEREIGN LIFE ASSURANCE COMPANY OF CANADA

AUTHORIZED CAPITAL $1,000,000.

INCORPORATED BY SPECIAL ACT

FULL GOVERNMENT DEPOSIT.

HEAD OFFICE, TORONTO.

OF THE PARLIAMENT OF CANADA.

A. H. HOOVER, PRESIDENT.
R. SHAW WOOD, 1ST VICE-PRESIDENT.
WILLIAM DINEEN, 2ND VICE-PRESIDENT.

ROBERT E. MENZIE, TREASURER.
ALEX. DAVIDSON, M.D., MED. DIRECTOR
SIDNEY H. PIPE, ACTUARY.

THE Accumulation Policies issued by the Sovereign Life Assurance Company of Canada are absolutely free from conditions, and guarantee the most liberal Extended Insurance, Paid-up and Loan Values annually, after being two years in force. First-class contracts can be secured by reliable energetic men as Managers, District and Local Agents throughout the Dominion. Address with full particulars and references.

A. H. HOOVER, President and Managing Director.

Its Success Tells All.

ON Long Island, a small piece of land some twelve miles west of North Sydney, C.B., a seam of apparently valuable hematite iron ore has been discovered, and in its vicinity a rich deposit of ochre.

CONSTRUCTION work on the Chateauguay and Northern Railway between Maisonneuve and Joliette, Quebec, is nearly finished. The bridge over both branches of the Riviere des Prairies, connecting the Island of Montreal with the mainland, is also nearing completion.

Commercial.

MONTREAL MARKETS.

Montreal, Sept. 2, 1903.

Ashes.—The supply of ashes is still extremely limited, and anything in the way of desirable first readily brings $5.85. Pearls are wanted, but there have been no late transactions to establish a quotation.

Dairy Products.—The shipments of cheese last week aggregated 80,848 boxes, being 4,314 more than for same week of 1902, and the total of exports for season to date are 1,449,566 boxes, just about 250,000 boxes more than for same period of last year. The market again shows some further access of strength since last writing, some holders demanding 11c. for finest Ontarios, with actual business reported at 10⅞c; Townships' are quoted at 10⅝c. and Quebecs at 10⅜ to 10½c. Butter shipments last week footed up to 11,081 packages, about 300 less than for corresponding week a year ago. Total shipments to date aggregate 168,594, some 88,000 less than at date last year. Values in this line are also firmer than a week ago, and for fancy brands 20c. is being asked; Townships is quoted at 19¼ to 19½c., and fine Quebecs at 19 to 19¼c.

Dry Goods.—The attendance at the millinery openings this week has been large, with gratifying results, quite equal if not ahead of last year. The dry goods warehouses have also had their share of outside visitors, and, though no very large sales are reported, still quite a good aggregate of sorting orders have been placed. A number of travellers are now at home to meet visiting buyers, while others are in Toronto and Sherbrooke to meet customers attending the exhibitions in those cities, and these are said to be sending in some very good orders. Maritime Province travellers will mostly be in Halifax next week for the exhibition there. Values continue to rule firm in all lines. Very few requests have been received for renewals on retail paper coming due on the 4th inst.

Groceries.—An improving demand is reported, and a busy September is looked for. The sugar market is described as a very firm one, and refiners are only said to be awaiting indications of an advance in New York to put up local prices. In the meantime standard granulated remains at $4.20, with yellows ranging from $3.50 upwards. Molasses is firming up, and some holders are not anxious sellers at present, while some are said to be quoting 42½c. for Barbados in a jobbing way, and hold that the price will reach 45c. before the winter is out. The first direct Mediterranean fruit steamer, the Escalona, is now reported to be

THE CANADIAN CASUALTY AND BOILER INSURANCE COMPANY

Full Government Deposit Paid.

loading currants at Patras, and is scheduled to be at Denia about the 9th for her quota of Valencia raisins. The Bellona is timed to begin loading at Patras about the 19th, completing cargo at Sicilian ports, Denia and Malaga. The currant market at Patras is cabled a little firmer. Latest quotations for fine off-stalk Valencias are 21 to 21s. 6d., equalling laid down cost of about 6½c.; selected layers are quoted at 24 to 26s. Quotations for canned corn and tomatoes are still unsettled. Prices for new salmon to arrive in about three weeks are high; Clover Leaf brand is quoted in a jobbing way at $1.47½ to $1.65 for talls and flats respectively.

Hides.—The only change to be noted is an advance of 10c. in lambskins, making the present quotation 55c. Quotations for beef hides and calfskins are the same as before.

Leather.—A fair volume of local business is reported, with a steady export movement in sole. Values are well held. Heavy and middleweight sole have been advanced a little in the United States, but local quotations are unchanged at 23½ to 24c. for manufacturers' No. 2, and 26 to 27c. for slaughter. Western splits are steady at 20 to 21c.; Quebec ditto, 16 to 18c.; juniors, 15 to 16c.; glove grain, 10½ to 12c.; buff and pebble, 11½ to 12c.

Metals and Hardware.—The lockout among the tin and Canada plate works in Wales has not affected local prices yet, though British quotations are up 2d. a box. Galvanized sheets continue to be quoted at $4.25 for Gorbals and equal, and Ternes at $7.25. Ingot tin is again lower, with inside jobbing quotations down to 29¼ to 29 ½c.; copper has picked up somewhat, and is now quoted at 14½ to 14¾c.; lead is firm at $3.10, and spelter at $5.75; antimony, 7½ to 8c. In pig iron not much recent business is reported, but last week's quotations will hold. From Glasgow it is reported that the market there is showing some advance. The Hamilton Company is apparently overtaking the accumulation of orders, and is said to be offering iron at $19.50 net terms delivered here. Bars are steady at $1.90 to $1.95.

Oils, Paints and Glass—Business in these lines is again becoming more active, though all during mid-summer there was quite a good movement for the season. In values there are no special changes. The linseed oil market is very erratic and unsettled and it is somewhat difficult to establish. Leads continue to be sold at cut prices. Turpentine is firm. We quote as follows: Single barrels, raw linseed oil, 50 to 51c.; boiled, 53 to 54c., net, 30 days, or 3 per cent. for 4 months' terms. Turpentine, 78c., single barrels. Olive oil, machinery, 90c. to $1; cod oil, 35 to 37½c. per gallon; steam refined seal 50 to 55c. per gal.; straw, do., 45 to 47c.; castor oil, 7½ to 8c., for machinery; pharmaceutical do., 8½ to 9c.; lead (chemically pure and first-class brands), $4.85 to $5; No. 1, $4.60; No. 2, $4.40; No. 3, $4.15; No. 4, $3.90; dry white lead, 4½ to 4¾c. for pure; No. 1 ditto, 4 to 4¼c.; genuine red ditto, 4¼ to 4½c.; No. 1 red lead, 4c.; putty, in bulk bbls., $1.80; bladder put y in bar-

J. J. W. Deuchar, F.F.A., F.I.A., General Manager and Actuary of the Norwich Union Life Assurance Company, speaking of investments says:

"It may serve to indicate the great importance of obtaining a good return on the investments, if it is realized that one per cent. of increased interest on the funds of a company will, on the average, have as great an effect as a saving in expenditure equal to 10 per cent. on the premium income, while, if an office could count on realizing 5 per cent. interest in place of 3, it might reduce its premiums some 30 per cent., or double its bonuses."

Mr. Deuchar does not name **THE GREAT-WEST LIFE**; but the above statement exactly describes the happy position of its policy-holders.

TORONTO MARKETS.

Toronto, Sept. 3, 1903.

Chemicals, Drugs, etc.—No change in conditions has occurred since last report. Trade is about average for this time of the year, and prices keep up well. From Liverpool comes word that the English chemical market has improved somewhat, and that the tone all round is a little better. Sulphate of copper is very strong, while other lines remain steady.

Dry Goods.—Numbers of visitors are in the city in connection with the Exhibition and the fall millinery openings, and many of them are seizing the opportunity to visit the wholesale general dry goods stores. Still more visitors are likely to come next week, and the trade is prepared for a very heavy business. From all parts of the country come good reports as to the prospects for trade during the balance of the year. The demand continues good for all staples, including those for which advances were recorded last week.

Flour and Grain.—Prices of flour have advanced since last week, and ninety per cent. patents are now quoted at $3, buyers' bags, middle freights. Manitoba flour is steady. Shorts show an improved demand, while bran is quite steady. Oatmeal is firm. Ontario wheat is unchanged, while Manitoba is 2 to 3c. higher. Barley is steady and unchanged. Oats, rye and buckwheat remain as before. Not much new-crop grain is moving except a little wheat.

Fruit.—A brisk trade is being done in fruits and vegetables. Peaches are arriving in large quantities, and are selling at 25 to 35c. for white and 40c. to $1 for yellows. Plums are very plentiful at 15 to 30c. Grapes, which are beginning to arrive in larger quantities, fetch 17 to 20c. per basket for ordinary and 25 to 50c. for Champion. Huckleberries are about 75c. or a little more per basket. Tomatoes are easy at 15 to 25c. Other quotations are: Cocoanuts, per sack, $3.75 to $5; oranges, late Valencias, $4.50 to $5; lemons, Sorrentos, $3.50 per case; new crop Messinas, $3.50 to $3.75 per case; bananas, 8s., $1.40 to $1.75; 1sts, $1.75 to $2; extras, $2 to $2.50; sweet potatoes, $4.50 per barrel; corn, 7 to 8c. per dozen; celery, 25 to 40c. per dozen; cucumbers, 12½ to 15c. per basket; 24's, 40 to 50c.; egg plants, 30c to 50c. per basket; apples 12½ to 20s. per basket; canteloupes, 25 to 30c. per basket.

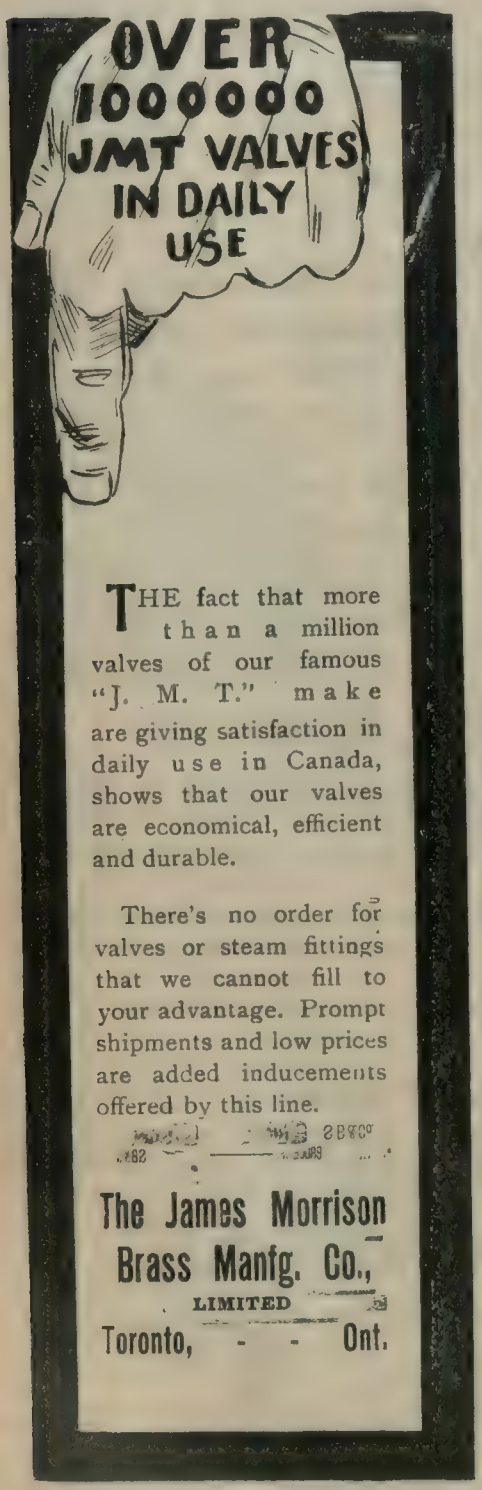
Groceries.—Sugars keep unchanged, with a fair movement. In canned goods no corn or tomatoes are offered for futures, prospects for the pack being poor. It is too early to say very much concerning dried fruits, but apricots will certainly be scarce. Peaches will be plentiful, and prunes are likely to be higher. Teas are held very high, with not much actual business passing. Wholesale houses report a busy week, with so many visitors in town.

Hardware.—Seasonable goods, such as screen doors, farmers' tools, etc., are still moving, but naturally the demand is falling off gradually, and articles more adapted for the fall taking their place. Trade is very active. No changes have been made in prices, which remain quite firm, both for shelf hardware and most of the metals. For these latter the demand keeps up satisfactorily.

Live Stock.—A quieter trade prevailed at last city market. Hardly any exporters offered, while for butchers' cattle there was a distinct feeling of easiness. In the latter, too, the quality was not over fine. For stockers and feeders prices showed no change, but the demand was slack. Milch cows sold well. All the sheep and lambs sold well early in the day. In the Junction market trade was brisker. Some lots fetched extra good prices, but, on the whole, the tendency was towards dragging figures.

Provisions.—A comparative scarcity prevails in really high-class butter, though of the secondary qualities there is over much, which causes the market to drag. The cheese market is steady, the price realized being about 10½c. For eggs there is a better demand, and the price has improved slightly. In poultry, ducks and turkeys are wanted. Spring chickens sell at about 10c. Hops are quiet just now at about 18 to 20c. for old crop.

Wool.—A large lot of wool came in from the North-West a few days ago, the quality of which is rather better than has been the case lately. The price was about 2c. per pound higher than last year. There is practically no export demand for fleece. For pulled wools the enquiry is normally brisk, and prices keep up pretty well.



THE fact that more than a million valves of our famous "J. M. T." make are giving satisfaction in daily use in Canada, shows that our valves are economical, efficient and durable.

There's no order for valves or steam fittings that we cannot fill to your advantage. Prompt shipments and low prices are added inducements offered by this line.

Continued Progress

During the last few years the North American has made marvellous strides in all Departments tending to its upbuilding, which can readily be seen by the following figures, showing a comparison of

Three SEPTENNIAL Periods

Year	Cash income	Assets	Policies in force
1881	$ 39,613	$ 88,763	$ 1,221,712
1888	263,691	666,919	7,927,564
1895	581,478	2,300,518	15,779,385
1902	1,270,840	5,010,813	30,927,961

A strong progressive Canadian Company giving excellent returns to its policy-holders, therefore making it a desirable Company for agents to represent. Three active agents wanted.

Mercantile Summary.

The Ontario Tack Company, whose factory at Hamilton was burned down a little time ago, is about to rebuild.

The Canadian Pacific Railway is laying the tracks on its new Arcola-Regina branch, which is to be ready for operation by November.

A company has been formed in Fairville, N.B., under the leadership of Mr. J. Masson, and with a capital of $250,000, for the purpose of mining copper at its property at Pocologan, in Charlotte county.

The Inter-Provincial Land Corporation, composed of Winnipeg and Toronto capitalists, has bought two large blocks of land in Assiniboia. One of them consists of 50,000 acres just south of the Touchwood Hills, and on the Kirkella branch of the C.P.R., and another is of 40,000 acres on the Canadian Northern, west of Fort Pelly.

Several rumors are current regarding Imperial Government extensions at the Esquimalt, B.C., fortifications. According to these, a new fort is to be erected at Albert Head, jutting into Royal Roads, ten miles from Victoria, and to be fitted with two six-inch guns. A battery of small quick firing guns is being established in the naval yard, covering the entrance of Esquimalt harbor. Another report says that the Imperial Government intends to construct a large graving dock.

THE GREAT WEST PERMANENT LOAN AND SAVINGS CO.,

274 Portage Ave., Winnipeg, Man.

Permanent Preference Stock of the par value of One Hundred Dollars per Share is being rapidly subscribed for at a **20** per cent. premium. This stock bears Five per Cent per annum, paid half-yearly. It also participates in the profits in excess of said five per cent. Profits paid yearly.

Mercantile Summary

THE St. Lawrence & Adirondack Railway Co., which forms a part of the New York Central, held its annual meeting in Montreal last week, and re-elected the old board of directors.

CONSENT to assign has been filed by Bisaillon & Bigaouette, manufacturers of confectionery in Montreal. The business was started in a small way last spring, as P. A. Bigaouette & Co., the style being subsequently changed as above.

A COMPANY has been formed in Johnstown, Pa., under the title of the Kipp Oil Co., whose intention it is to buy out the Chatham, (Ont.), Oil Co., raise its capital to $100,000, and bore wells and develop the oil industry on an extensive scale.

THE Ava Chemical Company, of New York, in which J. D. Rockefeller is said to be interested, is about to establish factories in Winnipeg and other Canadian and United States cities, for the manufacture of standard chemicals and proprietary medicines.

THE popularity of the late John Hunter, the well-known Toronto traveller, was well attested on Tuesday, by the large number of business men who followed his remains to the depot at Halifax. Mrs. Frank Courtney accompanied Mrs. Hunter to Toronto, and she has the sympathy of hosts of friends in Halifax and all over the Maritime Provinces.

A TELEGRAM from Wabigoon, Ont., speaks of a highly satisfactory clean-up at Big Master mine, Gold Rock. Six gold bricks were produced aggregating 21 pounds avoirdupois, valued at $7,000, while the concentrates and tailings still to be treated by another process may bring the value up to $9,000, or an average for the ore of about $20 per ton. This was obtained at a depth of only 150 feet.

THE Ontario Mining & Smelting Company have started their new smelting furnaces at Bannockburn, and the smelting of lead from native Ontario ores is said to have become an accomplished fact. There are some 1,500 tons of ore on the dump, some of which will wait until it can be operated by concentrator machinery, which is to be installed next month. The smelter is now running on hand-picked galena. The vein has been opened for 1,800 feet, at which distance it is eight feet wide at the bottom.

THE Boston Herald prints the following curious story, showing how addicted to tobacco English workmen are. The directors of an English woolen mill offered £1 to each of its thousand employees who would abstain from smoking and chewing tobacco for six months. Although the offer went into effect only a few weeks ago, over 300 operatives are already disqualified from receiving the sovereign, and it is thought that only a small number will be able to hold out faithfully during the half-year.

MONTREAL & TORONTO

Mercantile Summary.

MRS. HALTER'S general store and dwelling house, at Chelmsford, Que., were last week destroyed by fire. The loss was $12,000, with only $4,000 insurance.

A CARRIAGEMAKER of Shawinigan, Que., named W. Ferron, is reported in trouble. He was recently sued by a Montreal creditor, and now his father has made a demand of assignment upon him.

SEVERAL weeks ago we reported the suspension of Calixte Beaudry, a prominent merchant of St. Nazaire de Bagot, Que. He has now been able to effect a compromise, having arranged to pay 60 per cent. upon liabilities of some $17,000.

UP to two years ago Napoleon Belanger was a farmer in the neighborhood of Plessisville, Que. At that time he bought out a general store, but having had no business experience and no regularity in habits or proper attention to business, he could not reasonably expect to succeed. A demand of assignment just made upon him by a Montreal creditor does not therefore create any surprise.

THE Lac du Bonnet Power Co. offer to sell to Winnipeg all rights and privileges necssary for the complete development of the Lac du Bonnet water falls, together with an installation of 10,000 horsepower of electric energy, delivered at transforming station, within the city limits, within two years from date of contract. The price asked is $1,500,000.

FOR the year ending June 30th last, the homestead entries made in the Canadian Northwest numbered 31,002, as compared with 14,289 for the year ending June 30th, 1902, or an increase of 16,713. The scene of greatest settlement seems to have been in the Regina district, where 7,258 entries were made during the twelve-month, Yorkton district coming next with 5,793.

A DEMAND of assignment was made last week upon H. Breitman, of Montreal, who two years ago engaged in manufacturing fur linings and collars for the wholesale trade. He has since arranged to pay 35 cents on the dollar, namely, 25 cents cash, and 10 cents on time.——Larue & Frere, tailors, of the same city, have arranged a settlement at 50 cents, payable in instalments at three, six, nine, and twelve months.

As a printer, in former years, Alphonse Beaudoin, of Montreal, carried on a moderate business, but two or three years ago he branched out into a general stationery business, which has apparently proved his undoing, and his assignment is recorded. Likely enough he bought too many goods. His liabilities are scheduled at some $7,000, but as a few months ago he is said to have claimed to owe less than $500, explanations as to how they have since grown to the above amount will doubtless be expected.

Mercantile Summary.

W. J. Scott's sawmill, at Springhill, N.B., has been completely destroyed by fire. Loss over $15,000; insurance only $5,000.

The Ontario Government has begun work on the new bridge over an arm of the Lake of the Woods. It is expected to cost about $25,000.

Messrs. Ford & Featherstone, of 10 John Street North, Hamilton, report gratifying success in their efforts to introduce the Cary safe in Canada. Commencing about one year ago the business has grown so as to warrant the keeping of nine men on the road.

Sir A. Caron, Sir F. W. Borden, M.P.; P. Davis, of Ottawa; Hy. Harris, of Tunbridge Wells, England, and others, have formed a company with a capital stock of $100,000, with the object of purchasing and working mineral and timber lands in British Columbia and the Northwest. It will be known as the Transcontinental Exploration Syndicate, Limited.

PRICES IN TRINIDAD.

According to a report recently received from Port-of-Spain, Trinidad, general business in the island has shown some improvement of late, and stocks of merchandise as a rule, were not excessive. Venezuelan trade, which is done largely by way of Trinidad ports, had also improved, but was still precarious owing to President Castro's persistence in keeping some of that country's ports closed. Referring to flour, in which trade we may say, Canadians might gain a much firmer established trade if they would only try to develop it systematically and with care for the conditions of packing, etc., imposed, the market was firm and the demand good. The total arrivals of all kinds during the fortnight prior to August 13th, were 7,000 barrels. In codfish there has been a sharp drop in prices, owing to heavy receipts, inferior quality of offerings and unfavorable weather. The market for butter continued depressed, and sales were being made only with difficulty. Stocks of lumber and coopers' material were in moderate compass, and prices were very firm at $32 for scantling, $33 for rough boards, and $36 for dressed boards, with a tendency to advance. Island prices for cacao had again advanced.

WEST INDIAN PRODUCTS.

One of the exhibits at the Dominion Fair which is among those most worth while going to see, and which, judging from the crowds always to be seen surrounding it, is what most people appreciate highly, is that which represents the productions of that wonderful archipelago of islands lying to the far southeast of this continent, known as the British West Indies. Wonderful not only in their historical associations and wealth in the past, but in resources

of rich soil and glorious climate which, together with the new spirit of progress now moving in many of them, may mean an infinity of possibilities for the future! It is not often that a country can boast of such a good friend as the Pickford & Black Steamship Line has proved itself to be to the West Indies, for not only has this company transported to Halifax from various points in the Islands hundreds of articles for exhibition entirely free of cost, but Mr. C. S. Pickford is devoting his entire services with equal absence of remuneration, to their proper display, upon which so much depends. Thousands of people probably would acknowledge that their ideas of the West Indies, their aspect, climate, products, etc., have been wonderfully enlarged through the painstaking care with which Mr. Pickford has answered the many questions asked him, and with which he has been able to display typical island growths to illustrate his answers. At the exhibit, which is situate near the entrance to the grounds, in the same building as the New Ontario display, there are ginger, kola and cocoanuts, fruits, rum, etc., from Jamaica; arrowroot and lava dust from St. Vincent; sugar and cane from Barbados; and a hundred and one other articles typifying the manifold agricultural possibilities of the Islands. The magnificent series of photographs of Jamaica life and scenery would alone be worthy of a visit, while ladies more especially are enchanted by the artistic fancy work made from palm fibre. The whole exhibit is emphatically one which no visitor to Toronto should miss seeing.

The Ink of the Wise

is worth more than the blood of martyrs, said Mahomet. Wise business men invariably use

Barnes' Writing Fluid

Which never fails to give entire satisfaction, being the blackest, most permanent and most economical ink on the market. If your stationer does not handle Barnes' Ink, write to the selling agents:

C. P. R. REPORT.

The Canadian Pacific Railway Company issued last week its twenty-second annual report, being for the year ending June 30th last. The net earnings for the year were $15,836,845, making a surplus, after payment of all fixed charges and dividends, of $3,973,960. The working expenses amounted to 63.57 per cent. of the gross earnings, as compared with 62.44 per cent. last year, and the net earnings were 36.03 per cent. as compared with 37.56 per cent. in 1902. Reference was made in the report to the result of the stock issues, also to the construction of the Regina-Arcola branch and the purchase of an Atlantic fleet. Notice was given of the expenditure during the year of $5,000,000 on various classes of equipment in addition to orders already placed. That the company's management is not unmindful of its obligations to the Canadian public in the matter of sufficient facilities to meet the extraordinary growth of traffic during the last few years the following passage from the report addressed to shareholders will serve to show: Many of the new works are being carried out on a more comprehensive scale than at first intended, and the increase of nearly 50 per cent. within three years in the tonnage moved annually has made it imperative that you should, for the convenience of the public and your own financial advantage, provide forthwith many additional facilities calculated to assist in promoting promptness and economy in the handling of your traffic, that under ordinary conditions might have been spread over a number of years. Not-

withstanding your large outlay in the past for lands, tracks, buildings, and other works at your more important terminals, like St. John, Montreal, Toronto, Ottawa and Winnipeg, the facilities at most of these points are quite inadequate for present demands and as a result there is frequent congestion, resulting in inconvenience and expense to everybody concerned. With a view to remedying these conditions, and in order that the work of bringing your property to a high standard of efficiency may be continued without cessation, you will be asked to authorize the directors to expend capital for these general purposes to an amount not exceeding $4,500,000.

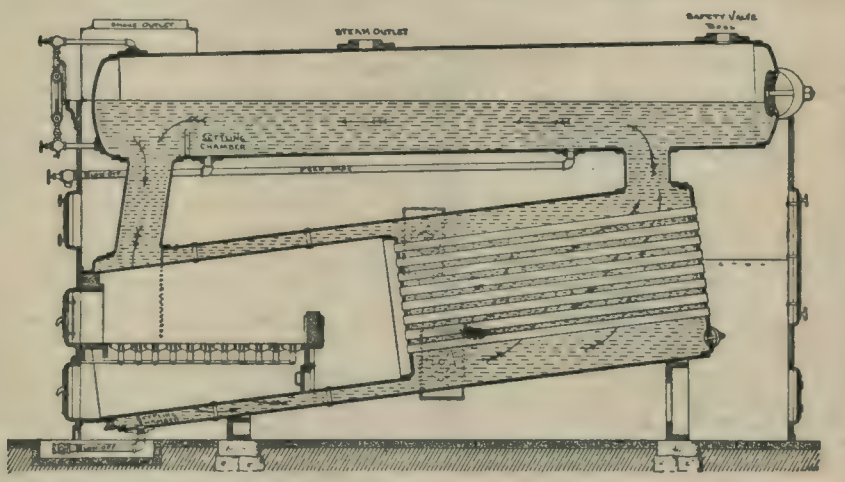
Combines the Best Qualities of Other Boilers.



The Mumford Standard internally fired boiler combines to a remarkable extent the best features of the Scotch and English types of internally fired boilers, together with the lighter weight, less floor space and more perfect circulation of the best boilers of the American water tube type.

The construction throughout, except the tube sheets, is cylindrical and spherical, requiring no stays; the boiler is supplied with an outer steel casing or for brick setting as desired by the customer.

The steam and water space is divided between two cylindrical shells; the thickness of plate is not so great as in the Scotch marine type, and the expensive and troublesome rear combustion chamber is avoided.

IRON PRODUCTION IN THE UNITED STATES.

Monthly statistics of blast furnace operations in the United States show that the July production of anthracite and coke pig iron was only 1,550,340 tons, which is a falling off of 123,000 tons as compared with June, when the product was 1,673,000 tons. If the fact be taken into account that the latter is a month of thirty days the decline amounts to over 150,000 tons. The furnaces have not been doing well, a common occurrence in midsummer, and a considerable number of furnaces have either blown out or have been banked on account of labor troubles. The adjustment of the latter would cause a return to larger output, but as it is we entered the month with a capacity of 352,554 tons a week, contrast with the maximum of 387,725 tons on June 1st. To this restriction in the supply of domestic pig iron must be added the imminent cessation of imports. As an offset, the stock of antracite and coke pig iron increased in July by about 76,000 tons, the natural result of the deadlock between buyers and sellers which has been going on for so long a time. The firm attitude of the Southern association furnaces in holding the prices while being undersold in all quarters is beginning to bring up the question whether after all their patient waiting may not be rewarded by a surrender to them.

The Chicago market has purchased upwards of 60,000 tons, more than one-half going to Northern furnaces. Very little is being done in Bessemer pig. The pig iron committee of the United States Steel corporation had a meeting yesterday, but did not recommend any purchases, although, according to estimates from 75,000 to 100,000 tons of Bessemer pig will have to be bought to cover the requirements to the end of the year. — The Iron Age.

LIFE OF FRENCH WORKING CLASSES.

Enquiries have been made by the French "Office du Travail," or Labor Bureau, into the wages and conditions of life of the French working classes at the present time, as compared with those which prevailed sixty years ago. In every direction marked improvement is shown. Taking three equi-distant periods between 1840 and 1893, the wages of men were on an average 2.07 francs, 2.76 francs, and 4 francs per day, and of women 1.02 francs, 1.30 francs and 2.20 francs. In the fifty years the wages of men doubled, and those of women more than doubled. The last ten years have witnessed a still further advance. With equal decisiveness the enquiry has proved that the working people of France live more expensively and are better nourished—the standard of life has been raised. While the population has grown only 12 per cent., the consumption of wheat has risen 60 per cent., of potatoes 100 per cent.; of meat, 90 per cent.; of sugar, 500 per cent.; of tobacco, 170 per cent.; of wine, 90 to 100 per cent., and of alcohol generally, 200 per cent. The Socialistic doctrine that the mass of the people are always getting poorer is an untruth. The ever-increasing consumption of wheaten bread, of meat, and of sugar throughout Europe demonstrates its falsity so far as this part of the world is concerned.—Correspondent of London Telegraph.

BANK AND OFFICE FITTINGS

OUR facilities for doing bank and office interior woodwork are all that could be desired. We are ready for big and little jobs in that line. Such work is no novelty for us, the only trouble is, we want more. What about that change you have been thinking of making in your office arrangement? Drop us a line and we will be pleased to figure on the work. That doesn't mean you must give us the job. Oh, no! Only we would like to be given a chance to see if by good workmanship and reasonable prices we cannot get your order. That's all. No job too small for us to figure on, none too large but what we can handle.

THE RETORT STINGING.

The editor of the Chinese Daily World, published in this city, is a graduate of Yale, and rather clever at repartee, as was recently instanced, when a rather dapper young fellow called at the World office to sell a certain grade of paper. The editor affects the American style of dress, and the paper-house drummer thought he would be smart and open the conversation by impudently asking: "What kind of a 'nese are you—a Japanese or a Chinese?" The editor smiled blandly, and with a courteous bow restorted: "Before I answer your enquiry will you kindly inform me the kind of a key you are, and tell me if you are a monkey, a donkey, or a Yankee?"—San Francisco Wasp.

FIRE INSURANCE IN CANADA, 1902.

In no year, from the time, shortly after Confederation, that the first general statistics of fire underwriting in Canada were compiled, was there so favorable a year for the companies as 1902. In that year, not only was the volume of premiums taken greater than ever before, but the losses were in much smaller ratio than in any previous year. Not having room for the figures of the whole 34 years tabulated, we make room for a few of them:

Year.	Premiums received.	Losses paid.	Per cent. of loss.
1869	$1,785,539	$1,027,720	57.56
1872	2,628,710	1,909,975	72.66
1882	4,229,706	2,664,986	63.01
1892	6,512,327	4,377,270	67.22
1900	8,331,948	7,774,293	93.31
1901	9,650,348	6,774,956	70.20
1902	10,577,084	4,152,289	39.26

The average loss of these years is something over 66 per cent. of the premiums received, and indeed the average taken over the whole thirty-four years is nearly 68. For a dozen years beginning with 1891 and continuing until 1900, the losses increased with but once interrupted regularity from $3,905,000 in the year 1891, to $4,701,000 in 1897, and to $7,774,000 in 1900, when they reached 93.31 per cent. of the premiums. Then the increase of rates by underwriters and regulation of risks began to take effect. Also the realization by municipalities that the fire waste had grown to be disastrously and shamefully excessive, and was a detriment to the whole body politic seemed to compel Canadians to think, and to take steps to lessen these yearly burnings. A public opinion had begun to form on the subject, and the fact that it is the whole people who pay insurance losses, and not the insurance companies, was apparently brought to the general consciousness. At any rate the losses declined a million dollars during the next year, and two and a half millions last year.

The fire business of 1902 was carried on by 38 companies; 21 of them British, 8 American, and 9 Canadian—the same number as in the preceding year. The premiums taken amounted to nearly a million more than in 1901. The shares of the respective groups of companies were as under:

Companies	Paid for losses.	Premiums.	Loss ratio 1902.	Loss ratio 1901.
Canadian	$865,214	$2,055,793	42.09	58.46
British	2,724,487	6,946,919	39.22	74.13
American	562,588	1,574,372	35.73	65.98
Total	$4,152,289	10,577,084	39.26	70.20

A considerable increase is obtained in the aggregate of insurance done last year by the licensed companies in Canada. Its aggregate was $892,049,886, as compared with $821,522,854 in 1901. More than half this business was done by the British fire underwriters, the proportions done by various groups of companies being, by British, $556,692,825; by Canadian, $215,145,909; by American, $120,211,152. But the increase in the business of the Canadian companies compared with 1901 was much greater than either of the others. In fact the business written by the Canadian companies increased by $44,251,000, as compared with $14,550,000 in the British, and $11,724,000 by the American group.

The rate of premium charged upon risks taken shows an increase for several years last past—and not before it was needed. In 1899 and 1900 the average premium amounted to only 1.23 and 1.25 of the risk taken; by 1901 it had risen to 1.42, and by 1902 to 1.47, the British and Canadian companies getting 1.46 each, and the American 1.53.

It is worthy of remark, as shown by a table on page 14, that the Canadian fire business of the two largest Canadian companies was vastly more profitable than the United States business of the same companies, great as was the volume of the latter. The British America's $40,000,000 of risks in Canada cost in losses only 38½ per cent. of the premiums, while the $173,000,000 of risks written by the same

company in the States costs 59.90. Similarly, the Western, which had in 1902 over $64,000,000 at risk in Canada only lost by fire 40.70 of the premiums; it had $295,000,000 at risk in the States, and its loss thereon was 62.99 per cent. of the premiums.

THE DRY GOODS TRADE.

With the fall millinery openings last week and the Dominion Exhibition last week and this, it is not to be wondered at that there should be an extraordinary number of visitors to the various dry goods establishments of the cities. Morover, these have in a greater number of cases than usual, seized the occasion not only to study the general trend of fashions, but to give orders, sometimes for large amounts. This has caused the wholesale stores to look like beehives, where the drones have necessarily been but few. The reason for this state of things probably is that the retailers throughout Canada have at length awakened to the fact that the high prices asked for practically all staple and imported goods are here to stay, at any rate for an indefinite period. Hesitation and postponement of purchases, they have learned, mean in all probability still higher prices later on, with the additional doubt whether then they will be able to get their orders filled at all in time for the needs of their trade. The slight hesitation noticeable for a time while the crops were in the balance has largely passed away, even in Manitoba, where it is now recognized that any deficiency in yield is likely to be counterbalanced by the extra values. The slight lack of ready money, too, which caused people to hold back as long as possible, is passing away, or will do so just as soon as the crop movement gets into full swing. All these are factors which bid fair, added as they are to the general high state of prosperity enjoyed by the country, to bring forth a phenomenal season, unless something untoward happens.

Prices for cotton goods are very firm, as intimated above, but these do not appear to interfere with the demand. In fact the recent advances in price would seem to have actually stimulated it, a stimulation which other lines are enjoying to some extent as well. There have been one or two breaks recently in raw cotton, but these have not affected the values of made-up goods; indeed, under the circumstances which have been explained before in these columns, they should not have been expected to do so. Not only cotton goods are high, but woolens are in the same position. Several gradual advances have been made in imported cloths, Bradford and other English centres of manufacture having felt the effects of continued increases in the cost of raw material and labor just as much as our domestic mills. The latter, it is a great satisfaction to be able to note, are not only engaged very busily in turning out their typical products, but these are gaining in quality each season, and people ask for them more and more. Domestic homespuns and friezes are deservedly popular.

As to the smaller articles of apparel, hosiery, underwear and so forth, they share the firmness possessed by dry goods generally. Advances are by no means unlooked for in some lines of men's underwear. They are all sought for in large quantities, as also are gloves, handkerchiefs, and a hundred other articles comprised in a modern dry goods stock.

THE CANADIAN PREFERENCE TARIFF.

Commenting upon a special report respecting Canadian trade, issued by the Dominion Government for the use of the recent Congress of Chambers of Commerce of the Empire, the London Economist notices the remarkable growth of our foreign trade, which is quadrupled since Confederation. The figures submitted, it considers, are "highly gratifying; and it is equally satisfactory to contemplate the rapid increase in immigration, the expanding revenue of the country, the enormous growth of banking deposits, and other evidences of material progress" in Canada. Then, as to the increase of British exports to Canada between 1898 and 1903 from $32,043,000 to $58,784,000, that journal enquires how far it has been due to preferential treatment. But answers the question thus:

"The granting of the fiscal preference by the Dominion Government was intended to extend the trade of the Mother Country at the expense of her rivals, but the fact is, that while our exports have grown, those of our competitors have also grown, some of them in a far greater proportion than ours. The following comparison of Canada's imports from the countries named in the fiscal years 1898 and 1903 respectively illustrates this point:—

	1903.	1898.	Increase per cent.
Great Britain ...	$58,784,847	$32,043,461	83
United States ...	128,795,237	74,824,923	72
Germany	12,282,637	5,584,014	120
France	6,580,029	3,975,030	65
Belgium	2,800,179	1,230,110	127

Therefore, says the Economist, the preferential tariff has failed of its purpose: England's exports to Canada have grown, it is true, but those of Germany and Belgium have grown in quicker ratio, and "what has really happened is that we in common with other countries have participated in the growing trade of Canada, which has been stimulated by a series of abundant harvests, producing a condition of general prosperity."

One can hardly blame a journalist, seated cosily in his London office, for taking statistics and drawing inferences in harmony with his own views. But we submit that there is another way for the British merchant to look at this preference. For a series of years he has been able to send his goods into Canada 8 or 10 per cent., (for that is the equivalent of the reduced duty), cheaper than could the Belgian, the Frenchman, the American. What is the reason that, under these favorable circumstances the Britisher does not show a greater increase in trade than any of these? It is, we think, because he has not profited by his advantage in tariff as he might very easily have done. In other and plainer words, the fault is his own if the preferential tariff has not helped him. A letter from Glasgow to the "Ironmonger" of August 22nd, contends that since the preference by Canada came into force "the British

manufacturer has been *practically bonused* to the extent of $20,000,000," or four millions of pounds. And one of the trade commissioners of Canada, Mr. P. B. Ball, of Birmingham, writes: "Since I have been in this country I have found it very largely due to the indifference of the manufacturer that more trade has not been done with the colonies—or probably I should say with Canada." So when we are somewhat gratuitously told: Your preference tariff is no good as a stimulator of trade, we are able to retort: Possibly not, but if you English had been as smart as the Yankees and the Germans it would have been.

TRADES UNION LAW.

It chances that in the same journal which describes the issue of two writs by the Gurney Foundry Company, one against striking workers in Toronto, the other against the Western Foundry, of Wingham, for enticing away the plaintiff's workmen, appears a report of two recent cases in Great Britain in which decisions were given adverse to Trades Unions. They were before the Court of Appeal. The first, which concerned "the Welsh stop-day" had been tried before Justice Bigham last year. On that occasion, the plaintiffs, the Glamorganshire Coal Company and seventy-three other colliery proprietors sued the Miners' Federation for damages of £76,000.

The judge held, according to the report of the case in "Engineering," that:

> The federation had not rendered itself liable, because it was actuated by an honest desire to benefit the members, and not by any malice towards the employers; and, further, that the defendant federation had no prospect of personal gain. The appeal was against that decision, and the appeal was allowed. The points raised were not new ones. It was a case of breach of contract, and the federation not only advised the men to break the contracts, but actually instructed them to do so, and called the men out. The federation, in its action, did not differ materially from that taken by the Amalgamated Society of Railway Servants in the Taff Vale case.

The second case was of an entirely different character. It arose out of defalcations in a branch of the Amalgamated Laborers' Union. The defaulting officer of the branch was proceeded against for the recovery of the money, without much success, so he was expelled from the Union; and thus far the Union was within its legal limits. But here trouble began When this dismissed workman obtained work, the secretary of the Union told the workman's employer that if the defaulting member was given work all the union men would stop work. Upon this the man was discharged. Now mark what follows:

The discharged man brought an action against the secretary, the treasurer, and the Union. He was awarded £100 as damages against Williams, the secretary, Mr. Justice Walton ruling that the Union as a body, and Toomey, the treasurer, were not responsible for the action of the secretary. This seemed arbitrary, and the decision was appealed against, and the appeal was allowed, the Lords Justices Vaughan, Williams, Romer, and Stirling being agreed that the Union was responsible. This is in harmony with the Taff Vale case, and other cases fixing responsibility upon the Union for the action of its officials. Some of the labor leaders are startled by these two decisions. It is stated that the member for Battersea rather welcomed them, declaring that it would "force our people (the unions) to see their real position. We must work for an alteration of the law, and the worse the law turns out to be the better case we shall have." But the English bench has a strong and wholesome regard for the sacredness of contracts, and will be in no haste to alter the laws in this regard merely to please trades-unions.

CROP AND HARVEST IN THE WEST.

The following is our Winnipeg despatch of this week, concerning the condition of the grain crops in Manitoba and the Territories. It is dated noon of yesterday: "Harvest conditions have not been as favorable as could be desired during the past week. Heavy rains have fallen and there has been frost at various points, though no reports of damage have resulted from it. Considerable grain throughout the Territories has still to be cut, though cutting is almost completed in Manitoba, and threshing well under way."

BRITISH VISITORS TO CANADA.

Whatever susceptibility to irritation may have been shown by some of the British Chambers of Commerce delegates over the so-called protectionist views of Canadians in academic discussion, and however misguided they may have thought us in differing with them as to the future scope of inter-imperial trade, they now show nothing but the frankest admiration for this country and for the way in which its residents are developing it. East and west they have gone from Toronto in groups. Some forty of them reached Fredericton, N.B., on Saturday last, and spent a quiet Sunday and a busy Monday in St. John. Leaving that city on Tuesday via Digby and the Annapolis Valley for Halifax, they were as much pleased with the pastoral beauty of the country and the evidences of its richness as they had been surprised at what they saw of Ontario. The larger party, of nearly two hundred, are still in the Northwest, and at last accounts were marvelling at the great wheat plains of Assiniboia, driving about the vast cattle ranches around Calgary, and admiring the scenic wonders of Alberta. Englishmen, if they can be got to express themselves at all, do so frankly; and we may expect, from what they have already said about this, to them, new and surprising country that they will, when they reach home, tell their chambers fairly and squarely what they have seen and how it has impressed them.

—We hear a report that three remaining loan companies in St. Thomas, Ont., have amalgamated, under the title of the Southern Loan and Savings Company, with a subscribed capital of $1,000,000, or are preparing to do so just as soon as the formalities required by law shall have been complied with. Of the capital, nearly $900,000, it is stated, will be fully paid up, as follows: Southern Loan, $400,000; Southwestern Loan, $193,800; Star Loan, $253,900; total, $847,000.

OUR AUSTRALIAN LETTER.

Providence continues to smile on Australian affairs. Perhaps this is hardly the correct simile but it is the correct idea. The rains of the past month have been generous and widespread. The outlook for the harvest, which should begin in a couple of months, is most promising, and the prophets are beginning to predict a sixty million yield. The southwest corner of New South Wales and a few other inhabited points are still in sore straits for water—Australia is never without a drought somewhere—but as a rule grass and grain promise alike well.

In trade the grass is growing, but the commercial agent horse is having a bad time of it. Outside of mining and the race-track the Australian is not speculative, and the importer is just now wisely cautious. There is yet two months to the harvest and the weather is a little more uncertain than the favorite in the Melbourne Cup. In another month if the good rains still come things will begin to move a bit. There should not be a boom, for wool is still the foundation of the prosperity of the country and the cut cannot be large this year, nor even in the next. There should, however, be a great improvement.

Importers of wheat and flour are in the doldrums and wondering how they are to get out. The papers assert they are holding on firmly to prices, but millers know all the same that wheat can be had under cost. Yet authorities say that two and a quarter million bushels must yet be ordered to meet Australian needs before the home harvest can come in. The Canadian Commissioner doubts this, on the ground that the figures quoted do not make proper allowance for stocks on hand in January last and, that there are New South Wales farmers with some grain to sell, and the fact that most of the December consumption will be of Australian wheat. There may be a million yet needed, and when the discovery is made the demand will be sudden and must be met, if met at all, at once. British Columbia exporters should, therefore, stand by to meet the emergency if it comes.

The British money-lender is helping Providence to bless Australia by buttoning up his pockets. Queensland, a badly drought-stricken but yet promising state, tried to borrow a modest three-quarter million of pounds, and offered 3½ per cent. debentures at the low figure of 96, but could only get a third of the amount taken. This sort of discipline is needed to make Australia stand on its own legs. If persisted in it will knock a good deal of social economical nonsense out of the Australian head and prevent a crisis that would be worse than half a dozen droughts. There appeared to be no limit to the Australian willingness to heap up debts, for he ran into debt so easily; and he still attempts to soothe the lender and comfort himself with the old fiction that the money is being spent in reproductive works. What are included in such works are political railways that neither pay their way nor increase the productive power of the country; sand shifting that wind blows back again; scrub cutting on lands that are allowed to return to wilderness; gorgeous public buildings whose merit is that they are to excel anything on earth; bridges to replace predecessors rotted away, and even a new sofa for the Government is chucked in, I am told, with the other items covered by a loan. Worse still is that in late years the mistaken policy of the Labor Party has resulted in the Government not getting value for its money. Some recent revelations have rather surprised even this country. In Victoria certain drainage works were carried on by day labor. The Government after a time tried piece-work, on the basis of the average amount done for six shillings. On piece-work the diggers earned from one to two pounds per day. In this State the work of Government bricklayers on a public building averaged three hundred bricks per day, in private employment the day's work was a thousand. It is no marvel that the treasurer had to tell a deputation who wanted more money to spend on a recently constructed work that the Government had spent £321,000 on it already, and the annual return was £96. I can remember when we were told that half the sum was to be expended on this very work, and golden returns were promised from it.

The misfortune of Australia is that it was born with not one but two golden spoons in its mouth. The first was the possession of a great area easily adapted to produce the finest wool in the world; the other was the vast store of precious metals in country easily accessible, and the riches easily won. Both made great returns for the money and labor employed. Both these resources are done. The good pastoral lands have long since been occupied, and even territory where three good years out of ten is the utmost that can be expected. The minerals of Australia are far from being exhausted, and it is possible that as rich finds remain as have yet been disclosed, but it will be in regions like the rich West Australian mines, where the gold won, great as are the yields, will only fairly repay the capital and labor employed. Several serious evils are the natural result of the rapid developing of these two resources.

Agriculture was neglected and despised. It was too slow and too laborious. It is still difficult to get people to go on the land.

Great extravagance public and private. When the cream had been taken from mineral and pastoral production, the extravagance was maintained by public and private borrowing in England. Public works that might well have been cautiously constructed from the resources of the country, for in no land were the resources so easily accessible, were built on debt.

Demoralization of the economical ideas of the working man. He saw employment decreasing and declining. With a true Briton's faith in Parliament he believed he could stimulate both by getting control of Parliament. With an astuteness that indicates an ability which when more wisely directed will bring great results, he has succeeded in getting control. Unluckily he is a better politician than economist, and his efforts have been directed towards increasing the wages and holidays, and decreasing the number of working hours and the amount of work done per hour. So long as the credit of the Government lasted this policy appeared to bear good fruit, but when the credit is strained the evil time is approached. The faith in Parliament is not destroyed, and the most drastic proposals, even to the establishment of Government banks and making of artificial money, are in the air. The immediate future of Australia depends upon whether these wild but old experiments shall be tried in this land, too, or whether the people shall have a return to political sanity.

Australia has a great future before it, but this future can only be unlocked by common sense, hard work and frugality, three principles not over popular just now. Even men of otherwise great intelligence will point to the remarkable development of the past and tell you when the drought is over that it will recur, deliberately shutting their eyes to the fact that there is no probability that the causes which created the remarkable advancement can recur. Improvement will come, and there are already signs of breaking clouds in sight. But just now Australia is not an earthly paradise. Capital is nervous, and some of it is leaving the country. Great resources are to be developed, and great bodies of men and money are idle. High wages decreed by a Compulsory Arbitration Court, and thousands of young and able bodied men not ashamed to live on public and private charity. And some of those who are ashamed but have to take charity are Canadians, fools who have been induced by the pretty tales they have heard of Australia to come here. One, a French Canadian, told his story to the Canadian Commissioner. As nearly as I can, I repeat the patois as Mr. Larke related it to me:—

"Mon Dieu! I haf not tink dere can be soch a country dat a man dat laike work cannot get braid by de work. I search de street, I tramp de country, and I get one shilling in de week. I go to de Government Bureau, and he ask if I haf the elector's right. I say "No.' He shaik his head, I say, 'but I'm Canuck—I Breetish.' He say, 'No good, Monsieur.' I'm hungry, I'm dirty, my clothes wear out. I'm in meesery, in meesery all de taime." —F. W.

Sydney, New South Wales, 11th August, 1903.

ABSTRACT OF

FIRE INSURANCE IN CANADA

For the year 1902.

From the Report of the Superintendent of Insurance

(SUBJECT TO REVISION)

OUR HALIFAX LETTER.

August, a usually quiet month, has ended well, and great activity now characterizes all branches of trade in this city. The business situation throughout the Province is exceedingly good, which is somewhat of a surprise, considering all the untoward elements encountered during the last twelve months. Last spring the outlook was more or less ominous. Speculation had been rife, large amounts had been lost through the slump in stocks, and it was feared that general business would be seriously affected. The failure of the apple crop of 1902 had a depressing effect, and since then unseasonable weather gave rise to fears, and proved for a time a disturbing element. Fortunately the business community is in a much better position than many expected. Both the wholesale and retail branches of the various trades are enjoying a fair degree of prosperity, and the present outlook is brighter than it has been for some time.

A study of the results of the "speculative debauch" shows them to have been less disastrous than anticipated. The greater part of the losses appears to have fallen upon people outside of business circles. Some savings have gone, and a number of persons are carrying debts which they contracted to provide the money with which to speculate, but they have met other current obligations about as well as before. Merchants have not impaired their capital to a serious extent, nor are they suffering largely from difficulty in making collections. No doubt the effects would have been felt more severely but for the fact that the general progress of the country has supplied a larger buying capacity from the people who have not lost.

In certain sections of the Province there are still conditions that no one wishes to see. In the Annapolis valley there is said to be a disposition on the part of the banks to be very conservative in the matter of accommodation, owing to the unsatisfactory financial conditions induced by the apple crop experience of last year. This year's good crop and high prices, however, will enable our orchardists to get fairly upon their feet again. In Sydney business conditions are not so good as might be wished. But there is more stability since the boom has subsided and the weaklings are weeded out. Taking the situation all through, business in this Province is in good shape, and there is little excuse at the present time for pessimism.

Travellers for local houses are now all in the city assisting headquarters' staffs in looking after the wants of merchants in attendance at the Provincial Exhibition. The Nova Scotia branch of the Canadian Manufacturers' Association has gone to a good deal of trouble in accommodating such of its members as may be attending the fair. A convenient booth or office has been constructed in the main exhibition building, where letter writing can be done and business transacted. The membership of the Nova Scotia branch has grown considerably, and, judging from the applications for berths, a large number will take advantage of the Pacific coast excursion later in the month.

The first shipment of apples from this port went forward by the steamer Evangeline, which sailed for London on Saturday. A London firm, which gave a well-known buyer an order to secure 10,000 barrels of Gravensteins, Blenheims, Ribstons and Kings, has since cabled to send the three latter varieties only. The price offered at the orchards for these selected varieties was $2, and some have been secured at this figure, though many orchardists are refusing to sell unless the Gravensteins are taken also.

A branch of the Bank of Nova Scotia has been established at Strathcona, N.W.T. A regular branch has been established at St. Andrew's, N.B. This was formerly conducted as a sub-branch of St. Stephen's.

The People's Bank of Halifax has lost a valued member of its agency staff in the death of its Bathurst manager, R. H. MacDonald, which occurred recently in a hospital at Montreal. He was a Prince Edward Islander, the son of Senator MacDonald. His place has been taken by Mr. F. P. MacKay. H. W. Pearman, second teller at Halifax, succeeds Mr. MacKay as manager at Port Hawkesbury.

Halifax, 7th September, 1903.

THE DOMINION EXHIBITION.

IN THE MANUFACTURERS' BUILDING.

Having seen this handsome structure early and late—when it was nearly empty of people, and when it was nearly filled with them, we cannot too much praise the foresight of the authorities in making its dimensions and arrangements what they are. Light, space, roomy passage-ways—all are in abundance. And one effect of furnishing exhibitors with ample space for their displays has already been to make those displays more than ever striking. The array of textiles near the western end made by various woolen manufacturers, worthy as it is in the intrinsic excellence of fabrics in texture and color, is still more attractive because the goods can be so well seen.

Remarkable is the variety of objects connected with the making of paints, varnishes, and stains exhibited near the centre of the building by the Canada Paint Company. Resins, gums, ochres, colored earths and their bottled products on one side; Elephant brand paints, floor paints, graphite paints for bridge and other railway work on another; cold-water kalsomine—ought it not to be calcimine, from the Latin word *calc*, (chalk)—and scores of painted sample shingles on a third, with a smiling fairy godfather giving away thousands of Mr. Munro's toy fans. This exhibit, which is under the charge of Mr. W. H. Evans, is always crowded.

A temple with white pillars and crimson and gold roof, festooned with hops and ornamented with gilt beavers, contains hundreds of bottles, great and small, of the product of the well-known Dominion Brewery Company. Oaken barrels and kegs of graduated sizes, with gilt hoops, surmount each other, reaching nearly to the roof. And everywhere confronts the spectator, "Jubilee Ale"—"Davies' Export Ale"—"Special Pale Ale"—"White Label Ale"—"Dominion Bottled Porter," with medals and prize certificates galore. Mr. Ross may well be proud of this handsome exhibit.

The Christie, Brown Co. biscuit exhibit is sure to attract attention year by year, because of the remarkable number and variety of sorts shown. This year, the handsome exhibit appears to very good advantage, for it can be better seen than at some former exhibitions. John Taylor & Co.'s plain and fancy soaps, and John Taylor & Co.'s perfumes, both "Made in Canada," appear in neat pavilions near the north door. The London brewers have creditable and uncommon displays.

The Gurney Foundry Company, Limited, Toronto, have, as usual, a fine miscellaneous exhibit of stoves, furnaces, and the like. The Metal Shingle and Siding Co., of Preston, Ont., who make metal coverings and ornaments for ceilings and walls of houses, etc., have an exhibit which is worthy of a second look. It is worthy of note that the "Spanish tiles," which make such a pleasing feature to the eye on the roof of the Manufacturers' Building, were made by this company. The Cowan Co., Limited, Toronto, is another of those who are making a special feature at the Fair of the motto, "Made in Canada." Their cocoas and chocolates are a credit to their name. The Brown Bros., Toronto, show a varied assortment of ledgers and office books, pocket books, ladies' leather bags, and so forth, of their own excellent production.

Many of the booths are arranged with special view to the effectiveness of night display, having abundance of electric lamps. The United Electric Co., of King Street West, is furnishing a portion of the lighting for the Exhibition.

A neat method of showing the effect of tastefully painted exteriors of dwellings is that adopted by A. Ramsay & Son, Montreal. Half a dozen miniature wooden houses, each three or four feet long, are painted in grays or olives, their casings of maroon or brown, their roofs of green or copper color. The moral evidently is: Use Ramsay's Mixed Paints.

The Milner-Petrolia Wagon Co., of Petrolia, Ont., exhibit a fine lot of wagons of all kinds for farmers' use. They put in a highly improved modern plant only last December.

The Shuttleworth & Harris Company, of Brantford, make a conspicuous exhibit, as usual, of their famous Bow Park brand of cheese.

THE COMING EXHIBITION IN MONTREAL.

News reaches us that arrangements are making progress towards a successful Exhibition in Montreal in the near future. We outlined some weeks ago the probable constitution of a committee, which should formulate plans for so desirable an event. As an earnest of their intended activity in this direction, a group of members of the provincial directorate and of the Montreal city council have already visited the Toronto Fair and obtained data which should help them to make intelligent plans. It is agreeable to observe, too, that the Business Men's League, of Montreal, is taking hold of the project in an active spirit. Mr. Miles and Mr. Evans are on its committee. The Board of Trade and La Chambre de Commerce of that city each appoints a committee of five. The mayor and eight aldermen represent the municipality. Other organizations assisting are the Council of Arts and Manufactures, of Quebec, and the Licensed Victuallers, the Horse Show Association, and the Horticultural Society, the delegates from the last-named being Messrs. R. Wilson Smith and W. M. Ramsay. No fewer than six agricultural societies of neighboring townships have appointed committeemen; the Grand Trunk Railway have named Mr. W. E. Davis their passenger traffic manager; the C.P.R., Mr. A. H. Harris; the New York Central, Mr. F. E. Barbour; the Vermont Central, Mr. J. E. Bentley. A strong feeling is being evoked among the citizens of Montreal generally in favor of a really worthy Exhibition, next year or the year after, in that city.

OLD FIRMS IN HALIFAX.

Editor Monetary Times:

Sir,—Your correspondent, in his Halifax letter in your issue of 28th August, makes a statement which shows that he is not thoroughly informed as to our province and city. He states: "In a comparatively new country like Nova Scotia, it is somewhat unusual to find a firm continuing uninterruptedly in business for almost 100 years." That is not the case, as the following list of Halifax firms will show:

Black Bros. & Co.,	wholesale hardware merchants, ..	Founded 1815
John Tobin & Co.,	wholesale grocers and wine merchants, "	1825
Bauld Bros. & Co.,	wholesale grocers, ... "	1816
Kelley & Glassey,	wholesale wine merchants, ... "	1818
Alex. Keith & Son,	brewers, ... "	1820

I have not the exact figures as to when the two following firms were founded; but William Stairs, Son & Morrow, wholesale hardware merchants, were founded about 1790; and Kenny & Co., wholesale dry goods merchants, were founded some time within the first quarter of the century.

These firms are the largest firms in the city of Halifax, to-day, and are doing by far the largest business in their respective lines; and are all continued and managed by the descendants of their original founders.

If I had time to think, I could name many firms in Nova Scotia who have been doing business for over half a century. We may not grow so rapidly as they do in the West; but you can see from the list I have given you that we have great staying qualities.

HALIGONIAN.

Halifax, 1st September, 1903.

EDMONTON.

From a visitor to Edmonton in July and August, we have heard a most glowing account of the activity of that up-to-date town. Twelve business blocks have been erected and three or four hundred dwellings, brick being plentiful. People from the States are looking for tracts of land, and the belief is general that there is a great future for Edmonton. In fact there was a land boom on when he was there, and the prices being paid by merchants and even by banks (there are branches of seven in the place), for building lots on the principal streets were, as it appears to us, absurdly high. This sort of fever will subside however—not without loss to some persons who are bound to be caught at the subsidence of the boom, as always happens—and then Edmonton will go on and prosper in a sedater way, for she has a fine country around her, into which a fine class of settlers are steadily going. This week we learn that the municipality desires to borrow $225,000, on debentures repayable in forty and twenty years, from 1st January next, at four per cent. Of this total sum, $80,000 is for "waterworks, already in operation;" $60,000 is for "sewerage, already in operation;" $55,000 is for electric light and power, "the light system is already in full operation, and producing a revenue more than sufficient to meet the required annual payments." The remaining $30,000 is for a bonus to the Canadian Northern Railway, which is establishing shops and yards in the town. From pamphlets forwarded to us by the secretary-treasurer of the place, we learn that the present debenture debt of Edmonton is $69,782, and local improvement debt of $17,-124; besides which there is a floating debt of $10,000. There is a sinking fund of $17,788. The value of property for assessment purposes was $3,208,100 in the year 1902, and there were cash assets of $20,998. There are five thousand inhabitants. The tax rate for the present year is 16½ mills for the Protestant, and 15 mills for the Roman Catholic residents. Extracts from Ordinances of the Northwest Territories are contained in the pamphlet in question, which we can forward to any one desiring to peruse them. They appear to cover the $225,000 sought to be borrowed, making special provisions that debenture holders of the $55,000 have a distinct lien upon the electric light plant, as well as upon the municipality generally.

VISITING ACTUARIES.

Most of the foreign delegates to the recent meeting of the Society of Actuaries, in New York, made a flying trip to Niagara Falls and Toronto on Wednesday and Thursday. They were escorted westward by the Canadian members of the body, Mr. Macaulay and Mr. Macdougald, of Montreal; Messrs. Sanderson, Macdonald, Goldman, and Bradshaw, of Toronto, brought across the lake and lunched at the King Edward yesterday. The visitors numbered some 84, a number of ladies having accompanied the party.

We have not at hand the names of the European actuaries present, other than British, but hope to print a full list next week. Among the distinguished men of the party were Mr. Schooling, of the Prudential; Mr. Carment, of the Australian Mutual Provident; Mr. Hughes, president; Mr. Hardy, past president, and Mr. Wiggins, ex-secretary of the British Institute. The visitors had had a round of festivities in New York, but were not too tired to express in warm terms their gladness at having seen at least one Canadian city. They left at 4 p.m. by boat for Montreal. Mr. J. K. Macdonald presided at the banquet, and many happy responses to the toast of "Our Guests" were made by the visitors, British and foreign.

FINANCIAL MATTERS.

One day last week, unusual cargoes left the port of New York, on Friday, the 4th, there sailed the steamers Nubia and Sagami, for the Philippine Islands, carrying 10,465,000 silver coins, aggregating in currency value $1,075,000. The coins were packed at the Philadelphia mint in little iron-bound kegs, each containing $2,500. To guard against possible attack by pirates both ships are equipped with six four-pounders. They sail by the Suez Canal route.

A mail bag containing letters and packages of value was recently stolen from the mail wagon at the Moncton, N.B. station. This is the third theft of this kind at Moncton in the last two or three years.

A letter from Aylmer, Ont., states that a private banker of that town, Mr. W. Warnock, has sold his private banking business to the Sovereign Bank, which opens a branch there, with H. A. Ambridge, who has been manager of the Molsons Bank there for fifteen years, as manager.

The Americans are not as willing to learn as they might be. It is not the part of cleverness to be stubborn in refusing the lessons of experience. At the time of the Chicago World's Fair, some of the banks of that city tangled themselves up in advancing too heavily for Fair purposes. When the Pan-American Exposition at Buffalo came, at least one bank there went down by reason of commitments in connection with that spectacle. Now, we hear, the St. Louis banks have advanced so much on account of the Louisiana Purchase Exhibition of 1904, that they are suffering from financial stringency. The Government of the Republic has, it is said, loaned them $2,500,000 in order to tide them over this stringency, taking as security for the advance bonds to twice that amount. Whether it is the financial system of the United States, or the too liberal folly of St. Louis bankers that is to blame for the stringency, it ought not to be left to Government to help the bankers of a particular district out of a financial hole.

Excavation is being made for foundations of a building for the Eastern Townships Bank, on Main street, Richmond, Que. The building is expected to be ready in a few months.

The other day a money order was sent from one Cunard vessel to another in mid-ocean, by Marconigram, this being the first case recorded of the Marconi system being put to such a use.

INSURANCE NOTES.

Mr. R. I. Griffin, who in conjunction with Mr. C. W. I. Woodland, manages the Canadian interests of the Employers' Liability Assurance Corporation of London, has just returned from a trip to the Pacific Coast in the interests of that concern. The outlook all along the line, according to Mr. Griffin, is very good, and it is expected that this year's business will exceed by far that of 1902.

A number of French gentlemen, principally of Montreal, have been chosen directors of a new life assurance company, to be known as La Sauvegarde, a French word, meaning the Defence, or the Safeguard. Its capital is placed at one million dollars. Present offices, 26 St. James street, Montreal. The names of the directors are as under: Mr. G. N. Ducharme, president of the Provincial Bank; Mr. Justice Ouimet, Hon. Senator Beique, Ald. H. Laporte, Hon. Senator Dandurand, Hon. L. N. Perodeau, and Dr. E. P. Lachapelle, Montreal; Mr. N. A. Belcourt, M.P., Ottawa; Mr. G. E. Bedard, advocate, Quebec. At the organization meeting, Mr. Ducharme was elected president; Mr. Justice Ouimet, first vice-president; Senator Beique, second vice-president; Mr. H. Bourassa, M.P. for Labelle, secretary-treasurer. We understand that Mr. P. Bonhomme, of Montreal, is to manage the company.

Mr. F. Clement Brown, managing director of the Metropolitan Fire Insurance Company of this city, returned last week from a trip to Europe, having been absent for about two months.

In giving a list of fires which have occurred in paper, pulp and straw board mills, the Journal of Commerce says: "It will be noted that several important losses have occurred in wood pulp mills, indicating that there is a serious hazard outside of the rag hazard, which has been looked on as the great hazard in paper mills. With a reported loss of about three million dollars in three years it is evident that this is a non-paying class."

Advertising, says an exchange, is business insurance—your policy lapses when your premiums cease.

We have before referred to the congress of assessment fraternal companies at Milwaukee last week. On Tuesday, August 27th, the National Fraternal Congress elected Edwin O. Wood, of Flint, Mich., president, and M. W. Sackett, of Meadville, Pa., secretary and treasurer. The next congress of the kind is to meet in St. Louis.

The Traveler's Insurance Company, which for some years past has occupied offices in the Lawlor Building, corner of Yonge and King streets, Toronto, has moved into larger quarters in the Manning Chambers, Queen St. west.

There was a story—an unwise story—in the papers about the city of Ottawa having threatened proceedings against the Underwriters' Association for increasing the fire insurance rates in that city. As a consequence of this, it is said, the Perth Mutual Fire Insurance Company has closed its agency at Ottawa and withdrawn from the field there altogether. Referring to this action, Mr. Packett, the manager, said: "We have taken this step because we do not think it safe for a company of our size to accept risks in Ottawa, for there have been a number of large conflagrations there recently, and we have been interested in several, though not heavily."

A St. John paper, speaking, as one would imagine from knowledge, claims that the fire alarm system of the city is utterly useless, that, in its own language, it has "proved its utter rottenness." In more than one section the wire is so decayed that a strong wind would be liable to blow it down. According to reports, the council cannot be induced to remedy this state of affairs. Perhaps a strongly worded protest from fire insurance men may awaken the city to the danger to which it lies exposed.

A tough old fisherman presented himself at an insurance office the other day, and said he wanted to insure his life. He was asked his age, and he replied: "Ninety-four." "What!" exclaimed the clerk; "ninety-four? Why, we cannot insure you at that age!" "Why not?" said the old man. "Why, because of your age," said the clerk. "Get on," said the old salt, "look at the statistics, and you will find that fewer men die at the age of ninety-four than at any other age!"—Exchange.

GROCERS AND PROVISION DEALERS.

The Dominion Fish Company has put up a plant at Selkirk, Man., for the manufacture of fish oil.

Excavation work has started at the Union Stock Yards, at Toronto Junction, for a large slaughter-house, with a capacity for 400 cattle per week, besides hogs and sheep.

There is a continued decrease in the output of turpentine in the South, and the price which was advanced about 4 cents per gallon a week or two ago still shows a tendency upward.

Operations have begun at several of the New Brunswick fruit canning factories. Blueberries are a light crop in many parts, and most of those being put up come from the eastern part of the province.

The Japanese rice crop this year is likely to be very light owing to floods and rainy weather.

New York, Boston, and other ports along the eastern coast of the States seem to be becoming excited over the division of the grain traffic to Montreal. Some of their prominent men are going to hold a conference in order to find a remedy.

The new crop of Smyrna figs is reported to be progressing favorably, and the first shipment has probably already left Smyrna. Cables state restrictions on arrivals during September have been decreased. This has been done by the Turkish Government for the protection of the grower and in order that no glut shall occur in the Smyrna market during September, it is restricting shipments from the interior to that market. This will prevent any exceedingly low prices, and the market is likely to be firmly held.

As a result of the failure of the British fruit crop, says a correspondent of a London daily of 13th August, the foreign shipper this season has got the trade entirely in his own hands. Immense shipments are coming in from the Continent. The receipt of plums, pears, currants, and cherries has been enormous. Over 80,000 packages of French fruit alone were put upon our markets during the past week. More than 60,000 came from Germany. About 25,000 bushels of apples reached us in the same period from

America, Spain, and Russia. As to bilberries, over 45,000 packages of them arrived from Germany and Holland. In six days sixteen steamers brought 124,000 packages from Spain, made up of tomatoes, melons, and grapes chiefly. Large parcels of plums and pears arrived from Belgium, Holland, and Germany. Among the 10,000 boxes of fruit sent from California to Covent Garden were fresh plums and pears, the latter competing chiefly with the supplies from France. Up to the present time over 1,000,000 packages of produce, chiefly fruit, have been exported to England from the Island of Guernsey alone. Some of these growers made as much as 10s. a dozen for their forced peaches, 5s. and 10s. each for their early melons, and 2s. 6d. a pound for their forced grapes. A Canadian now residing in London sends us the foregoing, and asks: "Is there a country called Canada? And why does she not appear in this list?" Canada is probably lumped in with "America" described as shipping apples.

The London Investors' Review had recently an article on Canadian dairy imports. One point it made was that shippers of butter should pay more attention to regularity in shipments, as until they do so they will be at a serious disadvantage with Continental competitors, who have adopted the system of weekly arrivals to meet their customers' requirements.

An English report states that while the weather has not been propitious for hops, yet the crop shows some little improvement. It is, however, ripening but slowly, and it is difficult to make any estimate of its quantity. While there has been no speculative buying of hops, a slight hardening of values has taken place with the necessary gradual reduction of stocks.

Turpentine continues to advance owing to small receipts in the South. The price now ranges between 80 and 85c., or more.

Some Halifax parties have formed a fruit packing company, under the name of the Regal Packing Company. It will deal in condensed, canned and evaporated fruits, and have its headquarters in Montreal.

Mr. T. R. Kerr-Shaw, United States Fisheries Commissioner for the State of Washington, proposes to erect and maintain a hatchery on the Fraser river, having an annual capacity of 50,000,000 fry, provided he has control of it. Supplies, he suggests, would be purchased in Canada, and all labor, as far as possible, engaged in British Columbia. It is felt that something should be done to improve the fishing industry, but the canners do not take kindly to the idea of American control.

Canadian dairy produce is likely to have yet another competitor in the British markets, judging from a report sent out by the British Consul for Poland and Lithuania. The butter from this region is described as being of much superior quality to Russian and Siberian, with which it should not be confused. A trade might also be worked up, he thinks, in bacon and other produce.

Up to August 29th, the salmon pack on the Fraser river, British Columbia, aggregated 197,798 cases, including 150,918 cases of sockeyes, while a pack of 600,000 cases of sockeyes alone had been expected.

DRY GOODS NOTES.

The T. Eaton Co., of Toronto, opened a new factory in Oshawa for the manufacture of whitewear, on the 7th inst. The latest improved machinery has been installed, and the new industry is looked upon as an important one for the place.

The Paris correspondent of the New York Economist sends out the following meanings of the French color terms: Regent—deep orange with a burnt cast. Creme—slightly yellowish white. Reine—light cherry pink. Geranium—bright red with a slightly yellowish cast. Beige—golden tan. Russe—dark green with a vivid tone. Argent—light or silvery gray. Mauve—pinkish lavender. Dahlia—dark reddish purple.

There is a great demand for Newfoundland sealskins, partly owing to the success of some recent tanning experiments. The annual catch during the last few years has averaged about 260,000, while orders this year are already in for nearly 500,000, many of which doubtless will remain unfilled.

From a report to the New York Dry Goods Economist from its Paris correspondent. it appears that a good deal of uncertainty still prevails as to the probable trend of fashions so far as garments are concerned. Whether they will develop toward more fitting lines, or become wider and fuller is still unsettled.

The development of the cotton trade in the interior of British West Africa is reported to be so great that the railway officials have been obliged to run extra trains in order to bring down the large supplies to the coast. There is said to be every prospect of a further increase in the cultivation of cotton.

The home trade movement during the week at Manchester has been fairly satisfactory, although in the linen sections the turnover has not been up to expectations. The export houses engaged in the linen business have, however, met with a fair amount of support, and dress linens for "frocks," have moved off briskly for the West. As far as the home trade in cotton goods is concerned, the Manchester Guardian states, that it does not hear of housewives husbanding their home supply of calico, or of delays by the average man in the purchase of his shirts.

The tone of the Belfast, Ireland, linen market continues very healthy. The volume of business is fully up to the average for the season, and it is expected there will be a considerable expansion in a few weeks. Prices keep very firm. Spinners continue in a good position. New business, says a correspondent to the London Draper's Record, would about equal production, and there are contracts on hand to keep the spindles employed for some time. Tow yarns are scarce, and there is a steady demand for lines. Any change in prices is in an upward direction. In the brown cloth market the turnover is fairly steady and substantial, and prices are fully maintained. Powerloom linens for bleaching are in regular request. The trade in union goods is rather uncertain owing to the peculiar state of the cotton market.

TRADE OPPORTUNITIES.

Canadian Government Office, London, 7th Aug.

A London firm ask to be referred to large Canadian importers of rags for paper-making. A business man in London would like to represent Canadian houses. The names of parties in Canada able to ship ores for German steel works are wanted. A Swiss importer wants to communicate with Canadian exporters of food products. A correspondent in Malta wishes to write to Canadian cattle shippers. A firm of merchants and agents at Calcutta would like to correspond with merchants about dairy business in Canada.

Anyone writing the Monetary Times and enclosing postage stamp may receive the names of the firms and persons above referred to.

London, England, August 14th.—A wholesale fruit and vegetable merchant wants agencies of Canadian shippers, Canadian manufacturers of oak mouldings are asked for by a Glasgow house. An enquiry is made for available supplies in Canada of boiling and cider apples for export. An important firm of cider merchants are making enquiry about Canadian cider. Possibly they would place large orders.

Canada Government Offices, London, 28th August.—A West of England cider maker wants Canadian apples. A maker of ivory piano keys wishes to get in touch with Canadian piano firms. Doors and mouldings wanted from Canadian small joinery factories. An English firm desires to sell wire for springs and mattresses in Canada. A Calcutta house would exchange views and perhaps agency with Canadian house. Canadian makers and exporters of cabin and crew bread asked for. New Brunswick firm is prepared to export birch flooring, over-mantels, etc. A

Canadian engineer in Toronto would represent English or Scotch exporters of machinery. Man living in Nova Scotia would buy apples for firms abroad.

—We have received a circular advocating International Arbitration which is recommended for the careful consideration of their members, by the executive committee or officials of various organizations: The Merchants' Association, New York; the Board of Trade and the Trade League, Philadelphia; the Chamber of Commerce and the Business Men's Association, Boston; the Merchants' Exchange of St. Louis and commercial boards and business men's associations in Baltimore, San Francisco, Milwaukee, New Orleans, etc. Those who advocate arbitration as a means of settling international disputes which cannot be disposed of by diplomatic methods will be pleased to read the recent circular issued to the leading business organizations of the United States by direction of the Lake Mohonk Conference on International Arbitration. The President of this Conference is Hon. J. W. Foster, of Washington, and prominent among its officials are Geo. Foster Peabody, banker, New York; Chas. Richardson and Clinton Rogers Woodruff, Philadelphia. The address expresses the hope that business organizations will aid the committee by distributing copies of the circular to all their members." Copies may be procured by addressing the secretary, Lake Mohonk Conference, Lake Mohonk, N.Y.

—The council of the Halifax Board of Trade last week telegraphed the Canadian Premier and the Maritime members of the Cabinet, asking that the Grand Trunk Pacific contract be amended by inserting the stipulation that work on the Quebec and Moncton section must commence and be completed concurrently with the Western Division, and that all freight for export originating in Canada must be shipped through Canadian ports, winter and summer. The Finance Minister has replied at length, pointing out that the Government and not the company is to build the Eastern section. As to the other matter, it is shown that no change of terms can now be made and that the contract goes as far in the direction of safeguarding the rights of Canadian ports as can be defended from a Western or business standpoint.

—It is stated that the Gooderham-Blackstock Syndicate, which controls the War Eagle and Centre Star mines at Rossland, B.C., have succeeded in devising a means of treating low-grade ores, first by concentration and afterward by a chemical method for extracting metals from the tailings. It looks as if the new process will allow of profitably treating ores assaying as low as $5 per ton, which is a much better showing than can be made in regard to smelting. The directors have therefore decided to erect a 200-ton mill adapted to the process, which can be enlarged according to requirements. The general results likely to accrue to Rossland and other parts of the British Columbia mineral belt by the assurance that $5 ore can be mined at a profit are likely to prove far-reaching.

—A subscriber at Frank, in Alberta Territory, the scene of the recent frightful landslide, complains of the irregular receipt of his paper, which may be in part accounted for by the irregularity of mails and trains for some time after the disaster. Matters out there are improving, however, and our correspondent says that "Frank will soon be a lively town again. Inside of a month, probably, the Canadian-American Coal and Coke Company will be shipping 800 tons a day. The Lillie collieries are shipping about 400 tons a day now, and are building 50 Belgium coke ovens, which will cost nearly $200,000. The International Coal and Coke Company, of Paulson, have started to build 100 coke ovens six miles west of Frank."

—At the fourth annual meeting, in Winnipeg, of the Northwest Grain Dealers' Association, the following officers were elected for the ensuing year: President, Mr. Jno. Love; vice-president, Mr. W. W. McMillan; directors, J. H. McConnell, Hamiota; J. Sharp, Moosomin; G. B. Murphy, Carberry; C. F. Travis, Elkhorn; executive, president and vice-president, C. P. Clark, F. Phillips, W. H. McWilliams and Alex. Reid. The balance of the meeting was taken up with discussion on the best methods of getting out this year's crop, and of the various phases of association work. The meeting adjourned at 6 o'clock.

—Pilot Mound, Man., business men have organized a board of trade for the surrounding district. The officers are as follows: President, Charles Crothers; vice-president, J. B. Baird; secretary, Dr. Speechly; councillors, George Dow, W. Endicott, Dr. Ferguson, J. M. Fraser, J. J. Hughes, R. McJannet, J. G. McLean and James Winram.

—The contract has been let, we are told, to a New York firm, for constructing an eleven-story steel-frame building for the Union Bank of Canada in Winnipeg, the cost of which, it is reported, will reach $500,000. The ground floor is expected to be ready for occupation by next May.

CLEARING HOUSE FIGURES.

The following are the figures for Canadian clearing houses for the week ended with Thursday, Sept. 10, 1903, compared with those of the previous week.

Cities	Sept. 10, 1903	Sept. 4, 1903
Montreal	$17,353,759	$19,012,748
Toronto	12,462,726	13,910,875
Winnipeg	3,850,016	4,020,493
Halifax	1,487,834	2,301,507
Hamilton	938,996	1,007,028
St. John, N.B.	927,984	1,101,171
Vancouver	1,228,326	1,342,373
Victoria	490,767	493,596
Quebec	1,727,872	1,653,271
Ottawa	1,740,152	1,903,991
London	705,519	769,782
	$42,913,951	$44,516,835

MACHINERY HALL

AS was to be expected the opening of our permanent machinery exhibition in the old cyclorama building has been amply justified. Every day a large number of visitors are on hand looking over the collection of machinery. In order to meet the convenience of visitors to our city it has been decided to keep open every night until 11 o'clock during the Dominion Fair. If you want to see the very latest in machinery and tools give us a call. Our address is 131-145 Front St. W. The latch string is always on the outside. It would be hard for you to miss the building, we almost touch Union Station. A cordial invitation to all to come around.

H. W. PETRIE.

A HUGE SUCCESS

Its Success Tells All.

Commercial.

MONTREAL MARKETS.

Montreal, Sept. 9th, 1903.

Ashes.—The market is without change. Both pots and pearls are wanted, but there are none of the latter offering, and it would be difficult to establish a close quotation. For first pots from $5.80 to $5.85 can be readily realized.

Cements and Firebricks.—Supplies of German cement are still coming in liberally, in anticipation of the surtax going into effect October 1st. Last week 11,500 bags and 3,180 barrels of German cement were reported, and for week ending to-day, 4,700 bags and 13,700 barrels. Of English cement the arrivals for the past two weeks have been only 800 barrels. Firebricks are moving slowly, but a very fair jobbing trade is reported in cements, with a couple of 1,000-barrel lots being negotiated for. We quote Belgian cement at from $1.70 to $1.95; German, $2.05 to $2.25; English, $2.05 to $2.15. Firebricks, $16 to $22, as to quality.

Dairy Products.—Export business in cheese continues active. The "Iona" alone took out 32,994 boxes to London last week, and the total shipments for the week were 80,515 boxes, as against 73,876 boxes for the corresponding week of 1902. The total shipments for the season thus far aggregate 1,530,081 boxes, being 257,000 boxes ahead of last year. Butter shipments were also fairly large, amounting to 22,502 packages, as compared with 23,929 packages a year ago. Cheese has shown a further gain since a week ago, finest Ontarios being now quoted at 11¼c., with Townships quoting at from 11 to 11⅛c., and Quebecs from 10¾ to 11c. Some Manitoba dairy butter has been offering lately, but runs very unevenly as to quality, prices ranging all the way from 12½ to 15½c. Fine Quebecs are quoted at 19 to 19½c., and Townships at 19½ to 19¾c.

Dry Goods.—Retail payments on the 4th were very fairly met on the whole, a general average being apparently about 65 per cent., which is considered pretty good for the time of the year; city payments were rather better than the country ones. There are not so many outside buyers in town this week, but travellers continue doing well. A circular just issued to the trade by the Merchants' Cotton Co., which says that owing to the declining market for raw cottons they will not for the present show samples for spring, and advising buyers to defer placing their orders, is creating some comment. The Penman Mfg. Co. have advised an advance in certain lines of their knitted goods.

Groceries.—An increasing demand is noted. In sugars there has been no change as yet, but the market is a very steady one at $4.20 for standard granulated, and yellows from $3.50 to $4, these being barrel prices; bags are 5c. a cental less. First lots of new Valencia raisins, via Liverpool, are due in a few days on the "Pretorian," and are quoted in a jobbing way at 7 to 7¼c. for fine offstalk; selected at 7¾ to 8c. The same fruit by first direct steamer, timed to leave Denia about the 12th or 15th, is quoted at 5¾ to 6c. for fine offstalk, from 6¾ to 7c. for selected, and 7 to 7¼c. for 4-crown layers. Fine Filiatra currants by direct steamer are quoted at

THE CANADIAN CASUALTY AND BOILER INSURANCE COMPANY

Full Government Deposit Paid.

President:
ALEXANDER SUTHERLAND, D.D., Toronto,
Vice-Presidents:
H. N. BATE, Ottawa, Director Bank of Ottawa.
W. S. DINNICK, Toronto, Vice-Pres. and Mng. Dir. Standard Loan Co.
A. G. C. DINNICK, - Managing Director.

This Company having deposited $30,000 with the Treasury of the Ontario Government, has been duly licensed to transact the following classes of Insurance [ance

Boiler Inspection — Personal Accident Insur-
Boiler Insurance — Sprinkler Insurance
Consulting Engineers — Elevator Insurance

The patronage of the public is respectfully requested. Correspondence with Insurance Agents and those wishing to engage in the business is invited, and will receive prompt and courteous consideration.

4¼ to 4¾c. California loose muscatels will cost high this year, 8¾c. for 3-crown it is figured, while Malaga goods are estimated to cost about 7c. The tea market is without special feature. Prices of new canned corn and tomatoes are yet unfixed; the packers were to have had a meeting in Toronto this week to discuss the question, but nothing has yet been reported here as to the result of their deliberations. Some wholesalers are not making any quotations at present on salmon, considering it good stock to hold.

Hides.—The market is without special feature. The advance of last week in lambskins to 55c. each is confirmed. Very few calfskins are now coming in, and 11 and 9c. per lb. is still being paid for Nos. 1 and 2 respectively. The demand for beef hides from tanners is just about equal to the supply, and stocks show no accumulation. From 8½ to 9c. is the figure for No. 1 beef hides.

Leather.—Boot and shoe manufacturers are now pretty well advanced with deliveries of fall orders, and it is getting on to a between-season stage, so that there is no special activity in the local leather market. Values in all lines, however, show much steadiness, and quotations as given last week will hold. Makers of dongolas, fancy calf, etc., seem looking for further advance in raw stock.

Metals and Hardware.—Good business is reported in all lines of hardware and metals. In values there are no special changes. Business is reported in Eglinton pig iron at $20, and Gartsherrie at $20.50. Summerlee No. 2 is generally quoted at $20.50, though it is said fair lots have been offered at $20, net terms ex-wharf. Bars are steady at $1.95. The strike among the plate workers in Wales has had no effect as yet on local prices, and it is said Canadas can be done at $2.40 for 52 sheets, and black sheets at $2.35. Ternes are easy at $6.75 to $7, and some fair transactions have been reported under the inside figure. No noteworthy change is reported in tin, lead or copper.

Oils, Paints and Glass.—Turpentine has shown further marked advance, it being figured that present laid down cost would exceed 80c., and some are now disposed to quote 85c. in a jobbing way. Linseed oil remains in weak, unsatisfactory shape. Stocks of glass are not very full, but new supplies are close at hand. We quote as follows: Single barrels, raw linseed oil, 50 to 51c.; boiled, 53 to 54c., net, 30 days, or 3 per cent. for 4 months' terms. Turpentine 83 to 85c. single barrels. Olive oil, machinery 90c. to $1; cod oil, 35 to 37½c. per gallon; steam refined seal, 50 to 55c. per gal.; straw, do., 45 to 47c.; castor oil, 7½ to 8c., for machinery; pharmaceutical do., 8½ to 9c.; lead (chemically pure and first-class brands), $4.85 to $5; No. 1, $4.60; No. 2, $4.40; No. 3, $4.15; No. 4, $3.90; dry white lead, 4½ to 4¾c. for pure; No. 1 ditto, 4 to 4¼c.; genuine red ditto, 4¼ to 4½c.; No. 1 red lead, 4c.; putty, in bulk, bbls., $1.80; bladder putty in barrels, $1.90; ditto, in kegs or boxes, $2.40; 23-lb. tins, $2.55; 12½-lb. tins, $2.65: London washed whiting, 40c; Paris white, 75 cents; Venetian red, $1.50 to $1.75; yellow ochre, $1.25 to $1.50; spruce ochre, $1.75 to $2; Paris green, 14c. in bulk, and 15c. in 1-lb. packages; window glass, per 100 ft., $3.50 for first break, $3.70 for second break, and $4.20 for third break; per 50 feet, $1.95 for first break; $2.05 for second break.

TORONTO MARKETS.

Toronto, Sept. 10, 1903.

Chemicals, Drugs, etc.—Prices are well maintained in the local drug market, and a fairly good trade is being done. Opium and quinine remain in the same state as before reported. A Manchester advice says that the general demand for chemicals in the English market is at present slow, especially in the textile branches, but with a resumption of normal conditions in the cotton trade, which may come soon, a good fall business is looked for. In heavy alkalies values remain steady, but the demand is not active. Ammonia alkali is very firm. Sulphate of copper has advanced in sympathy with the metal, and a good business is being done. Baltimore reports speak of a good average trade being transacted in fertilizer chemicals.

Dry Goods.—Large numbers of visitors are to be found in the wholesale dry goods emporiums, seizing the opportunity presented by cheap Exhibition rates to the city. Staple goods continue very strong at the recent advances, and there is no downward tendency visible

J. J. W. Deuchar, F.F.A., F.I.A., General Manager and Actuary of the Norwich Union Life Assurance Company, speaking of investments says:

"It may serve to indicate the great importance of obtaining a good return on the investments, if it is realized that one per cent. of increased interest on the funds of a company will, on the average, have as great an effect as a saving in expenditure equal to 10 per cent. on the premium income, while, if an office could count on realizing 5 per cent. interest in place of 3, it might reduce its premiums some 30 per cent., or double its bonuses."

Mr. Deuchar does not name THE GREAT-WEST LIFE; but the above statement exactly describes the happy position of its policy-holders.

whatever. Good sales are being made, and, judging from the indications, are likely to continue. Payments have been fully up to the average, and requests for renewals comparatively few. The trading in millinery has been very large.

Flour and Grain.—A steady and apparently rising market prevails for flour, and 90 per cent. patents are quoted at $3 to $3.05, in buyers' bags, middle freights, with choice brands held a little higher. Both bran and shorts hold steady. Oatmeal continues without change. Wheat has gone 1 to 2c. higher, and is in good demand. Oats are 1c. higher, and firm at the advance. Other quotations for grain keep without change. Not very much is coming into market yet.

Fruits and Vegetables.—With the exception of one or two days, when picking was interfered with by the rain, receipts of fruit in this market have been extremely heavy. Prices have had some difficulty in keeping up to profitable figures. Peaches are very plentiful and grapes are beoming so, but plum shipments are now declining, giving values a tendency to advance. Prices may be quoted as follows: Oranges, California late Valencias, $4 to $4.50; Messina, $2 per half-box; Sorrento, $1.50 per three-quarter box, $3 per box; lemons, $2.25 to $3.50 per box; bananas, Jamaica firsts, $1.50 to $1.75; apples, 10 to 18c. per basket, $1 to $1.25 per barrel; grapes, Champion, 20 to 25c. per small basket; Moore's, 35c.; pears, 20c. per basket; Bartlett, 25 to 35c.; peaches, Crawford, 30 to 50c.; yellow, 30 to 35c.; white, 20 to 25c.; plums, 15 to 25c.; cabbage, $1.25 per bbl.; celery, 30 to 40c. per dozen; cukes, 15c. per basket; egg plant, 40c. per basket; green corn, 8 to 9c. per doz.; onions, 20c. per dozen; peppers, green, 30c., red, 60c. per basket; potatoes, 45c. per bush.; tomatoes, 15 to 25c. per basket; sweet potatoes, $3.50 per barrel; watermelons, 15 to 20c. each; muskmelons, 25 to 30c. per basket; Rocky Ford canteloupes, $3.50 per crate.

Groceries.—A rushing trade is being done in general groceries. Sugar remains unchanged. New canned tomatoes are beginning to come in, the usual quotation being around $1.10. Valencia raisins are quoted at 8½c. The state of the market for currants and other dried fruits is too unsettled as yet to admit of definite quotations. California fruit, too, though opening prices have been made, is hardly settled enough to state definitely what conditions are likely to prevail.

Hides and Leather.—A weak market is to be noted for hides. For lambskins and shearlings the demand is good. Calfskins are steady. In tallow there is no change. Leather shows a more active demand, with a large number of buyers in town. Possible advances shortly are talked of.

Live Stock.—A somewhat firmer tendency was noticeable in the cattle market this week. But few lots of export were offered. Trade in butchers' cattle was brisk, the quality of those offered, which were not very many, being good. Stockers and feeders were in no great supply, but the demand was equally limited. Some fair milch cows were shown, which sold at from $30 to $48. Calves remained steady. Sheep were firm, and lambs showed an advancing tendency.

Provisions.—For really good dairy rolls and creamery prints the demand is good. Cheese is firm at 11 to 11½c. Eggs are steady at 15c. There is a good demand for choice, fresh-killed poultry. Chickens are quoted at 8c. per pound, fowls 6 to 7c., ducks 7½ to 8¼c., and turkeys about 10c. Smoked meats are in keen request.

Wool.—No export demand exists for fleece and the market is quiet. For pulled wools the enquiry is fairly goo

Continued Progress

During the last few years the North American has made marvellous strides in all Departments tending to its upbuilding, which can readily be seen by the following figures, showing a comparison of

Three SEPTENNIAL Periods

Year	Cash income	Assets	Policies in force
1881	$ 39,613	$ 88,763	$ 1,221,712
1888	263,691	666,919	7,927,564
1895	581,478	2,300,518	15,779,385
1902	1,270,840	5,010,813	30,947,961

A strong progressive Canadian Company giving excellent returns to its policy-holders, therefore making it a desirable Company for agents to represent. Three active agents wanted.

NOTICE TO SHAREHOLDERS

The twenty-second annual meeting of the shareholders of this Company for the election of directors and the transaction of business generally, will be held on Wednesday, the seventh day of October next, at the principal office of the Company at Montreal, at twelve o'clock noon.

The Common Stock Transfer Books will close in Montreal, New York and London, at three p.m., on Tuesday, 1st September. The Preference Stock Books will also close at three p.m., on Tuesday, 1st September. All books will be re-opened on Thursday, 8th October.

By order of the Board.

CHARLES DRINKWATER, Secretary.

Montreal, 10th August, 1903.

The Canadian Pacific Railway Company

Dividends for the half-year ended 30th June, 1903, have been declared as follows:—

On the Preference Stock, two per cent.

On the Common Stock, three per cent.

Warrants for the Common Stock dividend will be mailed on or about 1st October, to shareholders of record at the closing of the books in Montreal, New York and London respectively.

The Preference Stock dividend will be paid on Thursday, 1st October, to shareholders of record at the closing of the books at the Company's London Office, No. 1 Queen Victoria Street, London, E. C.

The Common Stock Transfer Books will close in Montreal, New York and London at 3 p.m. on Tuesday" 1st September. The Preference Stock Books will also close at 3 p.m. on Tuesday, 1st September. All books will be re-opened on Thursday, 8th October.

By order of the Board.

CHARLES DRINKWATER, Secretary.

Montreal, 10th August, 1903.

Mercantile Summary.

We are informed that the Good Roads Machinery Co., of Hamilton, has recently sent two of its No. 5 stone crushers to Montreal. One of these went to a contractor, while the other was bought by the city. This firm sends machinery all over Canada, and are all the time laying plans for the bringing of product up to date in every respect.

The Canadian Pacific and Canadian Northern Railroad companies give notice that they intend to increase the rates for grain storage in their lake-front terminal elevators to the following: Elevating, including fifteen days' storage and insurance against loss by fire, per bushel, ¾c.; storage for each succeeding thirty days and insurance against loss by fire, per bushel, ¾c. This the grain men consider extortionate, and they will do their best to obtain a reconsideration.

It is interesting to learn that the assets of the British Columbia Permanent Loan and Savings Company have now increased to $950,000. That company has made, we are told, over three hundred loans, amounting to over $300,000, since the 1st of April of the present year, all of them on choice first mortgage securities at 8½ per cent. per annum interest. The demand for loans indeed is so great that the company is continually refusing first class loans, as it is found impossible to finance all the applications which come to hand. The income for the months of June, July and August, the company tells us, was over $185,000.

THE GREAT WEST PERMANENT LOAN AND SAVINGS CO.,

274 Portage Ave., Winnipeg, Man.

Permanent Preference Stock of the par value of One Hundred Dollars per Share is being rapidly subscribed for at a **20** per cent. premium. This stock bears Five per Cent per annum, paid half-yearly. It also participates in the profits in excess of said five per cent. Profits paid yearly.

Five per Cent. Full-paid Stock (is an excellent investment), withdrawable in three years.

Money to Loan on First Mortgage on Real Estate on reasonable and convenient terms.

W. T. ALEXANDER, - - - President.

Mercantile Summary

The Canada-Atlantic Transit Company, of Chicago and Depot Harbor, Ont., which now runs four large steel freighters between those points, is contemplating the addition of two new vessels for passenger service, also the building of a large hotel at Depot Harbor.

It seems that hematite, or bog iron, the supposed absence of which has acted in the past as a deterrent to the establishing of steel works in British Columbia, does after all exist there. Analyses have been made of ore found some little way back in the vicinity of Quatsino Sound, and they show that it is actually true hematite. Magnetite exists also in abundance.

The Toronto Railway Company's receipts for the month of August amounted to $193,669, or $27,314 (over 16 per cent.) more than in the same month last year. The city's percentage is $23,240.

Some time ago Mr. W. E. Backus, of Minneapolis, agreed to develop half of the water power on the Canadian side of Fort Francis. The arrangement fell through, however, whereupon other companies endeavored to obtain for themselves the privileges which had been given the former. A conference of those interested including representatives of the Ontario Government, has now been held, and Mr. Backus and his confederates have agreed to go ahead with the work without further delay.

Certain it is, and many years of careful experience are back of the statement, that hay fever and kindred annoying and troublesome summer affections, distressing to so many thousands all over the country, recurring as regularly as July and August, are absolutely unknown in the "Highlands of Ontario." Thousands of people go to Muskoka, Georgian Bay or the Lake of Bays every year for nothing else but to avoid hay fever, and find perfect immunity from the ailment, and many by going there regularly for a period of a few years are said to be permanently cured. Hay fever booklet can be had free for the asking by applying to J. D. McDonald, District Passenger Agent, Grand Trunk Railway System, Union Station, Toronto.

The Canadian Association of Opticians held a two days' convention and a banquet in Toronto last week, and listened to several interesting papers. The following officers were elected for the current term: Prof. S. Grant, Montreal, president; Mr. E. A. Lewis, Toronto, first vice-president; Mr. W. H. Kearney, Renfrew, second vice-president; Mr. A. C. Skinner, Sherbrooke, Que., third vice-president; Mr. W. C. Forbes, St. Thomas, fourth vice-president; Mr. Alex. Moffatt, Brantford, secretary-treasurer; Executive Committee, Messrs. W. G. Maybee, St. Catharines; Alexander Roy, Belleville; E. Culverhouse, Toronto; T. N. Brown, Toronto; H. L. Batting, Toronto, and F. E. Luke, Toronto; Membership Committee, Messrs. E. Culverhouse, H. J. Geiger, W. L. Batting and F. E. Luke, all of Toronto.

Mercantile Summary.

THE American Seeding Machine Co., Cleveland, O., has been authorized to do business in Ontario, with a capital of $200,000.

ALFRED H. POST & Co., which firm acts as forwarding agents for the Canadian Manufacturers' Association, with offices at 6-10 Bridge Street, New York, have just opened an office at 308 Congress Street, Boston.

CHRISTIE BROS. & Co.'s trunk and casket factory at Amherst, N.S. has been destroyed by fire. The loss is heavy, as there was an unusually heavy stock of lost their tools. It is estimated at between $30,000 and $40,000, with insurance of $15,000.

ON Thursday of last week the two grand stands and the bar at Hanlan's Point, Toronto Island, were completely destroyed by fire at a loss of about $15,000. The larger grand stand was insured for $3,000 and the bar and contents for $1,500.

Two new development companies have recently been organized in Ontario: the New Ontario Farm and Town Sites Syndicate Limited, Toronto, capital $300,000; and the Vera Mining Co., Limited, Sault Ste. Marie, capital $1,000,000.

THE output for the Crow's Nest collieries for the week ending Sept. 11th was 16,258 tons; Coal Creek, 6,219 tons; Michel, 5,891; Morrissey, 4,148; total, 16,258. Average daily output, 3,251 tons. All the collieries were idle on Labor Day. Total output same week last year, 8,231 tons. Average daily output same week last year, 1,371 tons.

We take pleasure in acknowledging the receipt of The Manufacturers' Manual of Tariff Information, published by Colin C. McPhee, Montreal. It contains the customs tariffs in full of Canada, the United States, Germany, France and Belgium. Not only this, but it has a very complete comparative index showing, opposite each article, the page in the book in which the particular duty applying to it in each country is set forth. There is also an interesting chapter giving many "industrial reasons for a revision in the Canadian tariff," but this is an argumentative subject into which we need not go at the present moment.

THE Lake Nipissing and French River district is, owing to the wild, rugged grandeur of its scenery, the health-giving properties of the atmosphere, the primeval wildness of the surroundings and the splendid fishing and hunting grounds, attracting thousands of sportsmen who do not care for the gaieties of the modern summer resorts, but prefer the untrodden forests and the pleasures to be derived from out-door life. Black bass, maskinonge and pickerel fishing unexcelled. Handsome illustrated publications sent free upon application to Mr. J. D. McDonald, District Passenger Agent, Grand Trunk Railway System, Toronto.

Mercantile Summary.

WM. PETER'S flour mill at Carman, Man., together with the Northern Elevator Co.'s property, has been destroyed by fire. Loss on mill $18,000, insurance $10,000; loss on elevator, which contained no grain, $5,000.

THE Canadian Pacific Railway Company is about to start a new steamship service to Antwerp. Vessels are to run bi-monthly in the winter to St. John, N.B., and tri-monthly in summer to Montreal and Quebec.

P. H. Ross, long in business as a grocer at Lunenburg, N.S., is reported to have assigned. Four years ago he was in embarrassed shape, and then compromised at 25 cents on the dollar, but seems never to have picked up much since.

THE output of the Rossland, B.C., mines for the week ending the 12th inst. was 8,970 tons, divided as follows: Le Roi, 5,220 tons; Centre Star, 1,710; War Eagle, 1,380; Le Roi No. 2, 220; Jumbo Spitz, 60; I. X. L., milled, 50. Total for the year up to date, 267,827 tons.

MR. J. M. BELL, who has just returned from Kesagami Lake, about fifty miles south-east of Moose Factory, reports that he discovered along the lake shore large quantities of lignite or fine, highly-carbonized peat, occurring in the shape of cliffs from twelve to sixteen feet in height. The deposit, he says, runs for several miles.

THE net earnings for the Sao Paulo Tramway Company for the first six months of this year were $436,949 as against $326,786 for the same period of 1902. It is satisfactory to note, too, that operating expenses showed a very substantial decrease, being in the aggregate smaller by 9 per cent. in spite of the great growth of earnings. The net earnings for the half-year, after providing for payment of bond interest, are equal to 8¼ per cent. on the total capital stock.

ONE of the most prominent country failures of recent years in the Province of Quebec is that of Pagnuelo & Frere, of St. Hyacinthe, who have assigned upon the demand of Viau & Frere, manufacturing confectioners. The firm has been in existence some thirty years, and has done a large and profitable business as jobbers and retailers of groceries and liquors, as well as being interested in the Yamaska House, the leading hotel of the place. Unfortunately they were induced some few years ago to invest quite largely in the Red Bluff Mining Company, of Colorado, and kept on putting further capital from time to time into that concern hoping to save their original investment, with the result that the profits of years have thus been swallowed up, and their assignment followed. Their merchandise liabilities are said to be comparatively small, but they owe heavily to their bankers, some $55,000, it is said, as well as to friends, the total liabilities aggregating about $125,000, as near as can be at present estimated, with assets of about $30,000.

HALIFAX.

Mercantile Summary.

FROM Halifax, N.S., we learn of the assignment of J. K. Munnis, an old-time clothier of that city. He has been in business there some thirty-five years, but with varying success. In 1887 he was reported as compromising at 33 1-3 cents on the dollar, and again in 1893 at a larger rate. His present liabilities are put at $18,000.

THE Canadian Pacific Railway has secured a ninety-nine year lease of the Lindsay, Bobcaygeon and Pontypool Railway, to come into operation as soon as the road is completed. It runs from Burkton on the C.P.R. to Lindsay and then north to Bobcaygeon, a distance of forty miles. At the annual meeting held a few days ago Mr. W. T. C. Boyd, of Bobcaygeon, was elected president, and Thomas Stewart, of Lindsay, secretary.

W. D. HAMILTON, who is proprietor of the International Hotel, at Sault Ste. Marie, has been compelled to make an assignment owing to "poor travel." It is a significant fact that but a few weeks ago we reported in these columns the failure of Sault Ste. Marie's other large hotel, the Algonquin, due to the same cause. Both were $3 per day houses. In the same place, Cook & Co., general storekeepers, have recently assigned.

RECENT compromises among traders in Quebec Province have been proposed or arranged as follows: Eugene Galarneau, grocer and dealer in hardware, Pont Rouge, is offering 40 cents, namely, 25 cents cash and 15 cents at three months on liabilities of $6,531. In the matter of M. Goldenburg, clothing, etc., Grande Mere, lately insolvent, an offer of 30 cents on the dollar is made to creditors by his father—J. E. Caron grocer, Hull, offers 40 cents on liabilities of about $600.

LUDGER LACOMBE began storekeeping at St. Victor de Tring, Que., about a years ago, buying out L. Doyon & Co. He had been a farmer, and realized a moderate amount from the sale of his farm and stock, but was entirely without business training, apparently not possessing even ordinary natural ability. Complaints have been heard from time to time as to his neglect of correspondence with regard to his engagements, and a demand of assignment has now been made upon him by the Gault Bros. Co.

IN January, 1900, the Toronto File Co. succeeded to the business of Bertram & Co. One of the firm had been in the employ of the predecessors for six years. The other partner was, and is still, employed by the Nordheimer Piano Co. They had very little means of their own, and to make the purchase borrowed from the Bank of Toronto $2,000, which institution to secure themselves took a chattel mortgage. The business not proving a success, the bank has foreclosed on the mortgage, and is now in possession.

LIFE COMPANY FUNDS AND EXPENSES.

Editor The Monetary Times:

Sir,—In a recent issue of The Monetary Times there appeared an advertisement which read as follows:

J. J. W. Deuchar, F.F.A., F.L.A., General Manager and Actuary of the Norwich Union Life Assurance Company, speaking of investments, says:

"It may serve to indicate the great importance of obtaining a good return on the investments if it is realized that one per cent. of increased interest on the funds of a company will, on the average, have as great an effect as a saving in expenditure equal to 10 per cent. on the premium income, while, if an office could count on realizing 5 per cent. interest in place of 3, it might reduce its premium some 30 per cent., or double its bonuses."

Mr. Deuchar does not name The Great West Life, but the above statement exactly describes the happy position of its policy-holders.

As a life insurance agent who takes some interest in the business, I have taken the trouble to verify the statement made in this advertisement, and as it is to my mind most important to the welfare of life insurance as a business that the public should be protected from wild, reckless or untrue statements which in the ordinary course of events they are unable as a general thing to verify or disprove, I take this opportunity of laying before your readers a few figures from the Government report for last year, from which they can judge for themselves as to how much faith it would be wise for them to place in the advertisement of the Canadian company referred to.

First of all it will be noticed that the eminent actuary referred to, Mr. J. J. W. Deuchar, of the Norwich Union Life Assurance Company, makes the statement that an increase of one per cent. on the funds of a company will, on the average, have as great an effect as a saving in expenditure of 10 per cent. on the premium income, Now, I find by reference to the Annual Insurance Digest for last year, published at the Post Magazine office, London, England, that the total funds of the Norwich Union Assurance Company at the 31st December, 1901, amounted to £4,622,746, one per cent. upon which would amount to £46,227. The total premium income for the year 1902, exclusive of annuities, amounted to £465,353, 10 per cent. upon which would be £46,535, showing that Mr. Deuchar's figures as regards his own company were very nearly correct. However, out of curiosity I have applied the same test to that well-known

The Canada Business College,
D. McLachlan & Co.
Chatham, Ont.
To the Business Man:
Do you require the services of a Stenographer or Bookkeeper? We have been supplying some of the best business houses for years with competent office help. As we have served these people, so can we serve you. Give us a trial at your next vacancy.
Hundreds of earnest, honest, capable young men and women come to us every year to secure this preparation. Our position gives us an excellent opportunity of distinguishing between the wheat and the chaff. We would supply you with wheat. We let the chaff take care of itself. It does not pay us to recommend the chaff.
Yours for business,
D. McLachlan & Co.

What we have done for others we would like to do for you.

During the 11 months ending June 1, we placed 345 of our students with representative business houses. Graduates of this School occupy some of the choicest positions of trust on the continent. We train them so practically that there are no failures among them; this gives us the confidence of business firms.

If you have sons or daughters needing business training, write for our catalogue, which is acknowledged to be the handsomest business college catalogue issued in Canada.

REDUCE INSURANCE

Progressive Concerns have them made by

The Geo. B. Meadows Toronto, Wire, Iron and Brass Works Co., Limited, Toronto, CANADA.

Scottish Mutual Company, the "Scottish Widows' Fund," and in this case I find that the company's funds at the same time amounted to £16,258,085, one per cent. of which would give £162,580. Their total premium income, exclusive of annuities, during the year 1902 amounted to £1,064,390. It can easily be seen in their case a gain of one per cent. in interest would have amounted to approximately 15 per cent. on the premium income.

These examples will suffice to show that Mr. Deuchar's statement as applied to old-established companies is perfectly correct. Now, I would call your attention to the fact that in the advertisement referred to we are told that the same statement exactly describes the position of the Great West Life. There is nothing left to be inferred by the reader. The statement is made in bold, black type, and I presume that no one can doubt but that it appears under the full authority of the management. Let us see how it agrees with the figures given in the manager's sworn report to the Insurance Department. I find by referring to page 86 of the Abstract for 1902 that the total assets of the Great West Life amounted to $1,536,837, one per cent. of which would give the sum of $15,368. Again, on page 91 I find that the net premium income of the Great West Life, exclusive of the sums received for annuities, amounted to $485,628, 10 per cent. of which would give us the sum of $48,562, or something over three times the amount that would be gained by an increase of one per cent. on the total funds; in other words, a gain of one cent upon every dollar of funds owned by the Great West Life during the year 1902 would have been equivalent to the saving of a fraction over three per cent. of the premium income.

If these figures are incorrect, I stand open to correction; if they are correct, it appears to me that they convict the management of the Great West Life of either wilfully attempting to mislead the public as to the standing of their company, or of most inexcusable negligence in not taking the trouble to verify the figures involved in their statement before placing it before the public as a standard by which their company might be judged.

I am, Sir, yours faithfully,

JNO. Y. ORMSBY,
General Insurance Agent.

THE MANUFACTURERS' CONVENTION.

Of the various conventions of a business kind which have lately been held in Toronto, none exceeds in importance or perhaps even in interest the gathering this week from all over the Dominion of members of the Canadian Manufacturers' Association. Something like 300 out of a total membership exceeding 1,200, were in attendance, and their deliberations covered a period of three days. The address of the retiring president, Mr. C. E. Birge, of Hamilton, was delivered yesterday. That gentleman, while illustrating by statistics the growth and activity that prevails, made a point in asserting that manufacturers have done their share towards the existing prosperity of the country by creating a market for the products of the farm. The preference given to British goods by the Canadian Government has been supported, as a rule, by the manufacturers, although it has been a thorn in the side of some of our industries. Still more, they suffer from the abuse of the preference by German and other firms which have their products shipped to Great Britain and transhipped thence to Canada to take unfair advantage of the preference. Comparing our trade with the United States with our trade with Britain, and alluding to the efforts now being made across the Line 45, to work up reciprocity with Canada, Mr. Birge tersely says: "Thanks to Providence and our own integrity, we have learned to stand alone;" and we can get along without those reciprocal relations with the United States which we long sought in vain.

He then makes a plea for tariff revision, and gives reasons therefor. He looks forward to a period when times will not be so good as now on either side of the Lakes, and when this country may be made a slaughter market by the larger country to the south unless we protect our normal manufactures. What he says, too, about competition among Canadian factories and the necessity for factory-government and for ascertaining the cost of goods turned out, is well worthy of careful heed.

At the reception on Wednesday evening in the Legislative Buildings, the Premier of Ontario sounded some notes of agreeable sound to lovers of Canadian autonomy and to believers in Canadian progress. "We must stand together," he said, "province to province. What benefits one should benefit all. The prosperity of Canada does not depend wholly on the agriculturist. Agriculture is one of the great props of our prosperity, but if we send our raw material abroad to be made into the finished article we are pumping the life-blood out of our country." The best judges of what is best for the country should be the Canadian people. How to attain that best is the problem of to-day. Strive to excel as manufacturers, said Mr. Ross, There is room for you at home, for we still import a hundred million worth of goods; there must be room for you abroad, for of Canada's total exports only five per cent. goes to countries outside the British Empire and the United States. Finally, said the Premier, touching the Chamberlain proposals: "We don't know what John Bull is going to do. We believe he'll do the kindly thing with Canada, but he sometimes hesitates before he makes a step forward. We could whisper in his ear that he might give us a preference; we could whisper in his ear that he might send us some of his millions of surplus population. Anything he can do for Canada would be a good investment, as there is no part of his dominions more loyal than Canada."

THE COTTON GOODS SITUATION.

A certain degree of unsettledness has developed in the cotton goods market. Last week representatives of three of the leading cotton manufacturing companies met together in Montreal, and, after considering the situation, two came to the conclusion that they would be justified in raising prices of several staple articles by from ⅛ to ¼c. per yard, and cotton blankets by 5c. per pair, or at the rate of about 7½ per cent. It may be explained that it is the custom to make prices in the cotton trade on a basis of the average price of the raw material, and as at the time the proposal was made, raw cotton of the kind required could hardly be obtained under 13c., while the basis upon which the new proposed prices were actually

made was 12c., it was thought that these would be fully warranted. A third party at the meeting however, objected to this course, on the ground that the trade would not stand any further lift in prices, and on the same day that the wholesalers were notified of the new advanced schedule, this company sent out a circular advising delay in purchasing cotton goods, there being in its opinion, a likelihood of declines in the raw material which would justify a waiting policy.

This action is looked upon by a considerable section of the trade as certainly not warranted by the circumstances. It is understood that none of the concerns interested has over-much raw cotton in hand, and that the one which is advising the waiting policy has less even than the others. Should "futures" show a marked decline, the wisdom of its course will have been verified, but if they do not, the position of that company will be distinctly awkward. And, in spite of recent marked fluctuations in raw cotton, it is still far from sure that any real continued drop in values will come about in the near future. Only last Monday there was a rise of several points.

One thing is certain however, namely, that the bearish circular of the cotton mill in question has brought about a degree of uncertainty, only too easily made use of by prospective buyers, who like to seize upon such points, even when they are not wisely taken. We would suppose, however, that the dry goods trade, as a general rule, will find that the actual demand throughout the country will be too great to allow them to rest with unstocked shelves, in the belief of a barely possible decline in prices in the indefinite future. For the chance of a still further upward move is equally tangible, to say the least.

CANADIAN WESTERN GRAIN.

The secretary of the Winnipeg Grain Exchange, Mr. C. N. Bell, sends us under date 8th September, some figures and data respecting the receipts of grain at Winnipeg which are of more than usual interest. He prefaces them with the remarks which follow: "I think that but few of our own people fully realize the volume of grain that is exported from Manitoba and the Northwest Territories. The data relating to the grain inspected in this city during the grain fiscal year ending 30th August, 1903, has been compiled and a reference to it reveals the fact that Winnipeg receipts of wheat for the past year greatly exceed those of Chicago or of Duluth-Superior." He then appends figures to show that more wheat of the crop of 1902 was marketed than in either of the United States cities named. Thus:

	Bushels.
Winnipeg, wheat	51,833,000
Duluth-Superior, wheat	42,406,923
Chicago, wheat	37,940,953

Mr. Bell's letter goes on: "It will now be in order, so far as relates to the grain arrivals at least, to abandon the trite saying that 'Winnipeg will some day be a second Chicago,' for Chicago makes a poor showing as compared with this great wheat handling centre."

The items of different grades of wheat which go to make up this remarkable total of 51,833,000 bushels are next given. It is well to notice at this point that of the quantity mentioned about one-fifth, (10,540,000 bushels) was grown in the territories of Assiniboia, Alberta, and Saskatchewan, and four-fifths (41,293,000 bushels) in the province of Manitoba.

Statement of grain inspected of the crop of 1902, from September 1st, 1902, to August, 1903:

Wheat—	Cars.	Bushels.	Per cent.
No. One hard	21,757	21,757,000	42
One northern	14,432	14,432,000	28
Two northern	6,378	6,378,000	12
Three northern	6,359	6,359,000	12
Number four	1,718	1,718,000	
Feed	322	322,000	6
Rejected one	420	420,000	
Rejected two	266	266,000	
No grade	116	116,000	
Rejected	41	41,000	
Condemned	24	24,000	
Total	51,833	51,833,000	100

Of oats, the quantity inspected was 3,054,000 bushels. About thirteen cars graded Extra No. 1, while of No. 1 there was 1,300,500 bushels; of No. 2 white, 1,407,000 bushels; No. 3 white, 160,500 bushels; the remainder being 2 mixed, feed, rejected or no grade.

The total of barley inspected was 565,200 bushels, of which four cars was No. 2; 42,000 bushels No. 3 extra, 264,000 bushels No. 3; about 180 cars "feed," and a small quantity no grade or rejected.

Of flax, about ninety per cent., or say 574,000 bushels, graded No. 1; 68,000 bushels No. 2, and 13,000 rejected.

Only one-tenth of the oats was grown in the Territories, namely, 268,500 bushels, while Manitoba produced 2,785,500 bushels. The Province also grew all the barley except 3,600 bushels.

The grain yield for all our Canadian prairie country is thus summed up: Grown in Manitoba, 45,182,100 bushels; grown in the Territories, 10,935,100; total 56,117,200 bushels. This was inspected as under:

On the Canadian Pacific Railway:

	Cars.
For Fort William	32,650
For Winnipeg	7,601
For all rail, east	2,218
For Duluth via G. N. R.	2
For Duluth via Soo line	269
For Minneapolis via Soo Line	29
For Minneapolis via G. N. R.	40
For Vancouver	202
Total	43,333

On the Canadian Northern Railway:

	Cars.
For Port Arthur	9,755
For Duluth	1,310
For Minneapolis	514
For Seattle	93
Total	11,672

Of this total of 55,005 cars, it is worth noting, only 2,519 cars or something like 4½ per cent. was

bound for American ports or cities. The great bulk, say 42,405 cars, was destined for Fort William and Port Arthur, the two Canadian ports on Lake Superior.

PRAIRIE CROP PROSPECTS.

A day or two after our last report about the crop was printed there came news of one of those sudden drops of temperature to which parts of our prairie country are subject. There were storms of wind and cold rain over many of the Northwestern States of the Union, doing great damage. Manitoba also suffered from rain and snow. Much apprehension was felt lest the very large proportion of grain uncut or yet in stack should be irretrievably injured. Later information helped to dispel these fears. Damage has been done, but it is not extensive damage. Our customary Winnipeg despatch of Thursday noon says this week: The latest news from the country concerning the crops is somewhat reassuring after the reports of great damage which it was feared the storm of last Saturday and Sunday had entailed. The latest advices tend to relieve anxiety, for they are generally hopeful and indicate a minimum of damage. Threshing will be greatly delayed generally, but the favorable weather which has prevailed since the storm should prove the saving of the country.

PROMISING TOO MUCH.

Some enquiries have come to us about the responsibility of companies professing to offer humble homes to thrifty persons on extraordinarily easy terms. And the enquiries we have made about the methods of one or two such companies did not convince us that they were to be commended. They promised too much, in the first place, and their contracts were too complicated to be understood or conformed to by the class the companies profess to benefit.

We now learn that the Ontario Registrar of Loan Companies has received complaints from this Province and from British Columbia, respecting the operation in both provinces of a company calling itself the Dominion Co-operative Home-Building Association. It began business, it seems, in British Columbia, but came east and opened an office in the Yonge St. Arcade, Toronto. The Registrar, having determined that the company in question was breaking the law, had a case laid in the police-court on Monday last. The Magistrate convicted the company of carrying on business under a title calculated to "deceive and mislead" the public. In registering the conviction, Col. Denison spoke very plainly as to the misleading character of the company's literature and other professions to the public:

"Here on your prospectus you have," he said, "the words, 'Dominion Co-operative Home Building Association, registered partnership. Officers: W. J. Holden, president; G. R. Holden, first vice-president; A. J. Lawrence, second vice-president; A. E. Fawcett, secretary; H. H. Jones, treasurer; general manager, H. H. Jones; accountant, A. E. Fawcett; supervisor, G. R. Holden; organizer eastern division, A. J. Lawrence.' You admit there are now only three of you in the company, that you have no capital, and that you have only an ordinary partnership. Now what is the meaning of those high-sounding names and that organization if it is not to impress the people that you are some big, strong institution, if it is not to 'deceive and mislead the people' in contravention of this Act?"

The company's defence is that it is not guilty of any violation of the Ontario Loan Corporations Act, which requires that there shall be an authorized capital of $300,000 with at least $30,000 actually paid up. This concern, it is contended, not being a company but a partnership of three individuals, can do the business they are doing, namely, not lending on real estate, but receiving money from persons who wish to buy real estate at some future time. And an appeal from the magistrate's decision is to be taken to the Divisional Court. The lawyer for the Co-operative Home-Building Association admitted that it had no capital, and that it neither borrowed nor lent money on real estate. The concern claimed, however, to proceed on the lines of the "Rochdale Co-operative Co., of England," a society doing business under the "Industrial and Providence Societies' Act," of 1893, which made them an incorporated body, required to make returns in a form prescribed by the act, and compelled to have their accounts audited by an auditor authorized by the Government. Here is a sketch of the plan upon which the company proceeded:

It would receive payments of $2.50 per month per $1,000, and of this sum forty cents went to expenses, ten cents to reserve fund and $2 to the home fund. After twenty-four months the "contract holder," which the holder of a certificate was called, was to receive a loan of $1,000 to buy a home with, or a home was to be bought for him when his turn on the waiting list arrived. During the period he would have paid into the concern $60, and while they promised to pay interest at 6 per cent. on this money the holder of a certificate had, when the twenty-four payments were made, $8.56 less than he had paid in. If, however, for any reason the subscriber failed to make his payments the money was not returned, except after twenty-four months, and under certain conditions.

This scheme, however it may look in a prospectus and however attractive it may sound to a laborer or a poor widow, does not commend itself to the business mind as a desirable or secure one for anybody but the people who are handling the money and conducting the company.

Objection was taken by the prosecution, we observe, to the association using a name so closely resembling the old Dominion Building and Loan Association, which was better known than the new concern. There was a second charge made against the concern, namely, that of carrying on a loan and share business, and failing to register properly at the Ontario Legislative buildings, as the law requires such companies to do. This charge is meanwhile allowed to stand over. It is alleged that this concern operated as far back as February without registering at all, in August it was registered with four names as a partnership. Since that date the partnership has, we are informed, been dissolved and a new one registered with three names.

Of the other concerns which are offering to relieve persons "from paying rent or interest," we have received a booklet of the Canadian Co-operative Alliance, head office, London, but there is nothing on or in the booklet to tell who the persons are that de-

sire to have members pay an enrollment fee of $4 to them and then pay so much a month. Then there is the Estates, Limited, whose home-office is in Toronto. Its contract is a most voluminous affair, requiring sixteen sections and 84 lines to express all its provisions. We are not furnished with any names in this case either. As a broad general advice we would say pay no money into any such concern without learning who the men are that manage it.

A STRAIGHT "COUNTER."

In a controversy, profanity is not permissible; calling of names is no argument; slang is in bad taste. But a man must have some outlet for his just indignation when his sense of fairness is outraged. And such a vent has been found by Mr. Joseph Brown, general manager of the Bell Organ & Piano Company, of Guelph, in a letter to the secretary of the Amalgamated Woodworkers' Union of that city, dated 5th September. Some days or weeks ago, Mr. Brown deemed it necessary to reduce the wages of some carvers on the cases of organs and pianos, by reason of the fact that the fashions to-day call for a less ornate exterior than used to be deemed necessary. Plainer goods are, in fact being called for. Because of this action taken, affecting some carvers in the factory, the Union raised a row, and questioned the right of an employer to arrange his own affairs. Mr. Brown replies in Anglo-Saxon language as follows:

Sir,—I am pleased to learn from yours of yesterday that what the Woodworkers' Union now desire is a "fair and just settlement." I interpret this to mean as high a wage for the men out on strike as the Woodworkers' Union can possibly screw out of me.

This is now the second time that your union have put a pistol to my head. The first time I gave my workers concessions, partly because I was in sympathy with the half-holiday movement. These concessions, as my workers know, aggregate about $200 per week, or close upon $10,000 per annum. Now, when I find it necessary, in order to minimize the loss on some organs, to make a reduction in the wages of 25 of the men, your union steps in and practically says, you will give these men a wage higher than the proposed reduced rates; a much higher wage than can be got for the same class of work in Guelph; a much higher wage than the class of work they do is worth, or else we shall wreck your business, or try to do so. That is just in plain English tantamount to what you said in your letter to me of 31st August, and now, after the manner of Mr. Pecksniff, you say you only want justice! Permit me to tell you that your union does not know what justice means. At any rate you do not act as if you did. Had you done so, you would have ordered the men back to work long before now.

* * * * * * * * * *

I have said above that the first time your Union put the pistol to my head they drew from me about $10,000 per annum. You have a second time called upon me to stand and deliver, but I think you will find you have drawn a blank this time.

It has been my endeavor all along to act justly. I have never had any idea or intention of acting otherwise, and I trust I will continue to do so, the aggravating methods of the Woodworkers' Union notwithstanding.

I have never asked any of my employees to accept a less wage than is being paid in Guelph for similar work. On the contrary, I have exceeded justice and stretched the point to generosity by paying in the past and I am still doing in certain cases, a higher wage than is current in Guelph for a similar class of work.

Then Mr. Brown goes into particulars, proving that he has paid his men more than they could earn elsewhere, and as much, certainly, as he could afford. He advises them, indeed, to accept the $2 a day he offers, and closes with the following plain-speaking:

I take this opportunity to inform the strikers that I have been so disgusted with their action and the action of your Union that I have decided, as far as I possibly can, to cease making the styles of organs that do not pay. Accordingly, when we do resume operations in the organ factory, fewer men will be required. Out of the 25 strikers I regret to inform you that I can only find employment for sixteen of them. If any sixteen of these men desire to work at the rate of wages above offered they will be good enough to call on Mr. Laughlin, the superintendent, and arrange with him as to the work that is to be done for these wages.

THE WESTERN UNION OF FIRE UNDERWRITERS.

It must be taken as an undoubted compliment to Canada, and an especial honor done to J. J. Kenny, vice-president of the only two Canadian fire insurance companies that belong to the association, that so important a body as the Western Union of Fire Underwriters of the United States held their meeting this year in Toronto. Hitherto the meeting has always been held in some American city. The body which assembled here this week, convening on Wednesday, is probably the most influential association of fire insurance in America. The men are for the most part general managers or department managers of leading companies, representing all states west of Ohio, and as far as the Rockies. They came from practically all over the Union, from Atlanta to Cincinnati, from New York to Chicago. The chairman of the convention is Mr. Blackwelder, who is president of the Union.

In his annual address, the president pointed out that the nominally 25 per cent. increase of rates imposed by the Underwriters in America last year had not proved at all so severe as many policy-holders complained. For example he pointed out that the figures furnished by Mr. Beath, the president of the National Board of Fire Underwriters, showed that this advance actually produced an average increase of nine cents, or about 8 7-10 per cent. The advance applied mainly to long-considered under-rated classes. Besides this, any improvement made in risks was recognized in the shape of reduced rates, so that this increase has simply turned the underwriting account from one of unbroken loss, for a period extending over five years, to one of small profit for 1902. In fact, it only places the rates about 4 per cent. higher than in 1894.

Much progress has been made during the last six months, says Mr. Blackwelder, in improving and systematizing certain features of the fire insurance business. Carefully prepared schedules have been applied and ratings have been perfected. This, he hoped, was the beginning of a permanent and effective system, not subject to sudden changes. What is desired by the public in this and other directions is stability and order. It is far from likely, then, he argued, that reasonable business men would take of-

fence at some increase in rates of premiums which for ten years indicate only so small an underwriting profit, as less than one-half of one per cent.

Every possible attention has been shown the visitors by the Toronto underwriters and their friends. They were taken to see golf, polo, bowls on the green (at the Island), rowing, canoeing; they were driven about the city to the hunt club, and to the kennels; they were taken at 1 p.m., yesterday, out on Lake Ontario for luncheon on board the steamer "Kingston." And this last is the reason why writing at 3 p.m., Thursday, we cannot give the names of the new officers of the Western Union, who are to be elected when the banqueters return from the placid bosom of Lake Ontario.

THE FIRE WASTE.

It is usual to expect light fire losses in the month of August, because statistics show August to be one of the months of the year in which the fewest fires occur. And this year the August fire loss in the United States and Canada has about maintained its recorded average, being $8,428,000, as compared with $8,334,000 in August, 1901, and $7,425,000 in August, 1902. We copy below the tabulation of the Journal of Commerce and Commercial Bulletin, which shows the losses for the first eight months of the years 1901, 1902, and 1903:

	1901.	1902.	1903.
January ..	$16,574,950	$15,032,800	$13,166,350
February .	13,992,000	21,010,500	16,090,800
March	15,036,250	12,056,600	9,907,650
April	11,352,800	13,894,600	13,549,300
May	22,380,150	14,866,000	16,366,800
June	9,590,000	10,245,350	14,684,350
July	15,740,000	10,028,000	12,838,600
August ...	8,334,000	7,425,550	8,428,350
Totals	$113,000,150	$104,559,400	$105,032,200

The eight months of the present year already passed have not been very severe upon the Underwriters, compared with some preceding years. For example, in eight months of 1900 the burnings destroyed property worth $127,206,250, which was twenty-two millions more than this year this far. Happily, Canada does not appear in the list of biggest fires of last August; Cincinnati, Boston, Louisville, Chicago, have that prominence. There were only twenty-one fires exceeding a destructiveness of $100,000 each.

FOURTH INTERNATIONAL CONGRESS OF ACTUARIES.

It was no ordinary gathering of gentlemen who were assembled in New York for a week to consider life assurance affairs. It was a congress of scientific men from all over the world to compare and discuss actuarial work and method. And it is not easy to exaggerate the importance of such men's deliberations. It was the fourth convention of the Institute of Actuaries. To the men who brought so large a representation of this gathering over to Canada, enabling them to see something of Toronto, Montreal, Quebec, we should feel thankful. But a brief notice appeared in our pages last week of the advent of these gentlemen, and to the names of those mentioned as composing the Canadian Entertainment Committee, should be added that of Mr. J. F. Junkin. We now supplement what we said last week of this event with a fuller list of the dignitaries present.

David Carment, F.I.A., F.F.A., of the Australian Mutual Provident Society, Sydney; Samuel Loewenberg, editor Austrian Review, Vienna; Fritz Bauer, Austrian Phoenix Life, Vienna; Chas. Chutz, secretary Assicurazioni Generali, Trieste; Omer Lepreux, delegate of the Government, Brussels; Amedee Begault, vice-president, A.A.A., Belge, Brussels; Charles Buls, LL.D., Brussels; Florimond Halkar, Brussels; Charles Lembourg, assistant actuary, Compagnie Belge d'Assurance; M. Tardit, delegate of the French Government, Paris; Jean Bosler, delegate Institute French Actuaries, Paris; H. Duplaix, L.S.M., actuary d'Assurance Generales; Leon Masse, actuary, la compagnie Le Soleil; Adolphe Davidson, B.Sc., Cor. Mem. I.A., Fr., Paris; Dr. Eicken-Addenhausen, and H. Broecker, delegates, the German Government, Berlin; H. Grunwald, delegate Ger. Soc. Ins. Science, Cologne; Arthur Gunckel, same society, Elberfeld; Corneille Landre, Holland Inst. Act., Amsterdam; J. F. Westerberg, manager First Life Assurance Co., Rotterdam; Dr. James Raffman, actuary, First Hungarian General Assurance Co., Budapesth; Prof. G. Bottini, Milan; M. M. Johannessen, A.I.A., Bergen, Norway; A. Palmstrom, actuary, "Brage," Christiania, Norway; Fred. Rosselet, actuary, Swiss Federal Bureau of Assurances, Berne, Switzerland; Sven Palme, Government delegate, Stockholm; Fritz Trefzer, Government delegate, Berne.

The remainder of the list consists of men perhaps better known to the general reader of insurance literature in Canada or the States, namely, the English, Scotch and American actuaries of companies known in our midst. Besides such a galaxy as those we named last week, Schooling, Hughes, Hardy, Carment, Wiggins, there were H. W. Manly, F.I.A.; A. F. Burridge, F.I.A.; George King, F.I.A., F.F.A.; Ernest Woods, F.I.A.; John B. Tennant, F.I.A.; James D. Watson, F.I.A., London; N. B. Gunn, president of the Faculty in Scotland, Glasgow; James Chatham, F.F.A., F.I.A., of Edinburgh; Geo. C. Stenhouse, F.F.A.; Wm. A. Sim, F.I.A.; Arthur R. Barrand, F.I.A., London; Joseph Burn, F.I.A., London; L. M. Cathles, Edinburgh; James Chisholm, F.I.A.; A. G. Donald, F.F.A.; Alex. Latta, F.F.A., Birmingham; James Meikle, F.I.A., and Wm. Young, F.F.A., Edinburgh; F. T. Neilson, F.I.A., London; Miles Alexander Dawson, New York.

It would not be, perhaps, delicate, to repeat the expressions of satisfaction and good-will which fell from the lips of many of these gentlemen regarding what they saw of Canada. But the fact is indisputable that while to many of the European gentlemen this was a first visit to this Continent, and to still more of them a first visit to Canada, they were impressed with the restful character of Toronto's residential quarter, and greatly admired the prosperous solidity of Montreal. It is certain that these already well informed people have added to their knowledge by their brief visit to the Dominion.

THE PRICE OF MANITOBA WHEAT.

Many people are talking of "dollar wheat" as among the probabilities of this season. Their opinion is based upon the undisputed scarcity of last year's wheat, of which there is certainly less in hand than is normal for this period of the year; upon the possibility of, all told, a comparatively light crop in the West of America, in addition to a considerable shortage in the British and some of the Continental crops; and upon the fact that farmers in many localities are showing a tendency to follow the example of their industrial contemporaries and are forming associations to help each other in standing out for higher prices. Already it is announced that in Minneapolis the other day wheat reached the price of a little over $1 per bushel, and several of the large flour mills have closed down owing to inability to get enough to keep them running. Still

more recently millers gave as high as $1.05 in Toronto. But these should not be allowed to pose as illustrations of the true situation; the causes being local and practically, so far as the whole country is concerned, of a fictitious character. Since then the market in Chicago has become at times easier, in spite of spasmodic attempts to keep the price going upward.

While no doubt a good deal can be said to favor the possibility of higher prices as, for instance, the fact that the past few years of prosperity should better enable the farmers to hold their wheat back this year if they wish to do so, we do not think there is much probability of $1 per bushel being reached. The reason upon which the pleasing assumption is based, the present shortage, is not in our opinion a very good one, for it is a thing which happens to some extent every year, though it is true that the consumption, up to date, of the previous year's crop has this year been more than usually complete. The farmers just now are very busy; they have no time to make arrangements for moving their wheat; when they do, the shortage will very rapidly become less. At the same time, the indications point to the probability that farmers' receipts for their wheat crop this year, though the latter be considerably less than that of 1902, will be nearly on an equality with it owing to higher prices realized. But this may easily happen and yet dollar wheat, that is, a dollar per bushel for the producer, be still some way off.

OUR SAINT JOHN LETTER.

The death last week of Mr. John H. Parks removed an esteemed and worthy citizen of St. John and the pioneer cotton manufacturer of Canada. Mr. Parks started life as a civil engineer, and in 1861 formed a partnership with his father, the late Mr. William Parks, and an elder brother. As representative of William Parks & Sons he went to England, purchased spinning machinery, and installed it in a mill built for the purpose. The yarns manufactured here had an immense sale, and during the progress of the American war the business boomed. For many years the Messrs. Parks practically controlled the business, and they built a second mill, but later came reverses, and recently the property passed into the hands of a local syndicate, who are now managing the two mills with success. Mr. Parks was a good citizen, taking an interest in all matters that were for the public good. For many years he held the position of president of the Provincial Rifle Association. One of the sons of the deceased, a graduate of Kingston Military College, who went to South Africa with the Mounted Rifles, remained there, now holding an important position in the railway service under Sir Percy Girouard.

The building boom in St. John continues, and every few days there is news of some new property purchase for the erection of modern buildings. Much of the development is taking place in the vicinity of the railway station, a section now largely occupied by small wooden houses. Quite a number of these are being demolished to make room for new buildings, and when work now under way is completed this section will be greatly improved. In one block three immense buildings are now being put up, the Estabrooks Tea House, Canadian Drug Company, office and store, both of five stories, and a six story store and warehouse for John O'Regan, wholesale liquor merchant. Almost across the street from these the new office and power house of the Street Railway is building, while within a stone's throw is the Carnegie Library. These five buildings will represent an expenditure of fully $250,000.

The Young Men's Christian Association completed a few days ago the purchase of the historic Chipman lots, adjoining the new library. They will tear down the house used by the present King when he visited St. John, and on the site will erect an $80,000 building. Plans are being considered, and there will not be any unnecessary delay about getting to work.

The city council at a special meeting this morning granted the Dunn Pork Packing Company a twenty-one year rental of five acres of land in Fairville, just outside the city limits. On the site the Hon. A. T. Dunn and his associates will build a pork packing factory to take the place of that destroyed by the Musquash fire. The site is a desirable one, and the new factory will be of a much more modern type than that recently destroyed.

Another important action taken by the city to-day was the final passage of the agreement under which Mr. George Robertson and his associates in the Imperial Dry Dock Company are to build a dry dock in the Carleton millpond. The passage of the agreement will enable Mr. Robertson to get on with the work he has so long stuck manfully to, and he expects to put out a call for tenders in a very short time, and to have work commenced before the snow flies. The dock is to be about 700 feet long. Mr. Robertson will get a Dominion Government subsidy of 3 per cent. on the cost for twenty years, a provincial subsidy of $5,000 a year for forty years, and a city subsidy of $2,500 a year for forty years, as well as a free site from the city. It is believed that he will not have any difficulty in floating the bonds under these guarantees; in fact, there is a report that the Bank of Montreal is willing to advance the money necessary, about $1,000,000.

The St. John Street Railway Company recently began an extension of its line through Lancaster and Carleton, on the western side of the harbor. The line is now completed through Lancaster to the city boundary—Carleton being a portion of the city, but the work has been stopped there pending an agreement with the city of the terms under which the railway can run down Rodney wharf to the ferry landing. This matter will likely be satisfactorily settled in a few days, and then the work will be rushed along, as the street railway company are anxious to have cars running to the steamboat terminals before the winter trade begins.

The New Brunswick Southern Railway Company has been granted leave to lay its tracks along Union Street, Carleton, and down Dunn's Wharf, so called. The company will abandon its present track down South Rodney wharf, which has been let go into decay, as it is likely to be torn down to make room for further deep water berths.

The city of St. John and the Government of New Brunswick united in welcoming here a number of the Chamber of Commerce delegates from all over the Empire. They were given a very cordial welcome, and spent a pleasant three days in the Province, seeing much of the country and gathering valuable information about trade and other matters. An equally cordial welcome awaits any of the other delegates who may come this way.

* * *

Saint John, N.B., 15th Sept., 1903.

THE HAMILTON EXHIBITION.

Hamilton, Ontario, is an ambitious city, and the things she aspires to do she usually carries through with success. The "Made-in-Canada" Exhibition, which has been going on there this week, and which was brought about largely through the instrumentality of Mrs. P. D. Crerar and the ladies of the Hamilton Chapter of Daughters of the Empire, was no exception to this rule, and the idea seems to have met with a heartily "crowded" response. It opened on Monday, with many prominent men in attendance, including His Honor the Lieutenant-Governor, Premier Ross, Hon. J. M. Gibson, Mayor Morden, Mr. C. A. Birge, president of the Canadian Manufacturers' Association, and others. One interesting feature of the Fair was the drill hall, which was converted in a wonderfully pleasing manner into an old English street, with about forty windows, each of which displayed the products of one particular factory. As in all cases these factories were located in Canada, the credit to the country was emphasized. The list of exhibitors includes the following names:

The Cowan Company, Toronto; John McPherson Company, Hamilton; Hamilton Cotton Company, Hamilton; Pure Gold Manufacturing Company, Toronto; Galt Knitting Company, Galt; Harriss & Co., Rockwood; T. Upton & Co., Hamilton; Slater Shoe Company, Montreal; Tolton & McKay, Toronto; Meakins & Sons, Hamilton; Bovril Company, Toronto; Caldwell-Boyd Company, Lanark; Chadwick Bros.,

Hamilton; Canadian Packing Company, London; C. Turnbull & Co., Galt; Crompton Corset Company, Toronto; Penman Manufacturing Company, Paris; the Tuckett Company, Hamilton; D. Morton & Sons, Hamilton; Hamilton Coffee and Spice Company, Hamilton; R. Soper & Co., Hamilton; Iron Ox Remedy company, Walkerville; Dominion Corset Manufacturing Company, Quebec; Grafton & Co., Dundas; E. W. Gillett Company, Toronto; Watson Manufacturing Company, Paris; Corticelli Silk Company, Toronto; Toronto Carpet Company, Toronto; Colonial Bleaching and Printing Company, Montreal; Holt, Renfrew & Co., Quebec; furs, Cumming & Sellers, Toronto; Model Bakery Company, Toronto; St. Charles Condensing Company, Ingersoll; Gowans, Kent & Co., Toronto; Brown & Wigle, Kingsville, woollens; A. & R. Clarke, Toronto, leather.

VANCOUVER'S PROGRESS.

What one hears of the rapid growth of cities in the far West, whether in the United States or in Canada, is apt to make him sceptical as to the facts of the case. But to any one who has seen Tacoma or Seattle, Vancouver or Winnipeg, it will soon be apparent that circumstances and forces which we in the sedater East are unacquainted with, develop these Western towns and cities in a really marvellous way.

The city of Vancouver is progressing very rapidly at present. It is generally expected, says a recent letter to The Monetary Times, that the increase of population for the year will amount to about five thousand; and the value of buildings erected during the year is expected to exceed the record of any past year. Business in almost all lines appears to be in a healthy condition, and a great deal of building is going on, railway stations, department stores, and the like. We learn that the British Columbia Permanent Loan & Savings Company has recently purchased for the sum of $27,000, a lot on the corner of Hastings and Abbott streets, Vancouver, 66 feet by 132 feet. On this they purpose erecting a big office building; part of the ground floor to be occupied by the company and also by "The Pacific Coast Fire Insurance Company," which is controlled by the same officers and directors. It is described as one of the best business corners of the city, being "as central as the corner of King and Yonge streets in Toronto." The big Woodward departmental store building is now being erected on the opposite corner. The new terminal station of the Great Northern Railway will be within about two blocks from this point. All street-car lines converge there or near there.

SOME ASPECTS OF STOCK GAMBLING.

Stock gambling is really the only form that is eminently respectable. Here the doctor can work shoulder to shoulder with the preacher, the elder, the churchwarden, the class-leader, the widow and orphan, or the fellow who has the widow and orphan's money. We understand that the preacher is more scientific in his methods than the innocent doctor, and becomes therefore the shrewder speculator; he knows more about selling short. We learn from experts that in stock margin gambling it is more satisfactory to sell what you haven't got than to buy what you don't get.

Of course, in the long run, the large dealers capture the pots. They then become great philanthropists, pillars of churches, and by common consent occupy the highest seats in the synagogue. Occasionally, however, even the top notchers come to grief, but strong influences come to their rescue. The press loudly proclaim that they are men of undoubted integrity. The banks help them in various ways and assume an "attitude" that has a "reassuring effect." In troublous times things sometimes become unhinged, but gradually "stability" comes. This is well explained in a certain instance in one of the leading papers as follows: "The cause making for stability is the fact that many weak holders have been wiped out, and their places taken by strong interests, fully able to protect themselves." The devil may take care of the small holders; the press, the banks and the people in high places don't bother much about them.—Exchange.

MANUFACTURERS' EXCURSION.

The excursion of the Manufacturers' Association, all rail by special train from Toronto to the Pacific coast, promises to be one of the most delightful of recent years. Somewhere between 160 and 175 persons, members and their wives, are booked for the trip, which starts on Saturday, 19th September, at noon, and ends on Saturday, 10th October. The route pursued will be the main line of the C.P.R. going west, with detours to Strathcona and other northern points. Returning from Victoria and Vancouver, the Crow's Nest route will be taken, enabling the visitors to see the famous Kootenay mining country, and coming east parts of southern Manitoba off the main line, also traversing a part of the C.N.R. to Fort Francis and Port Arthur. An official of the C.P.R. will accompany the party, Mr. C. N. Bell, of Winnipeg, than whom no one is better informed about the great West, having watched its growth for many years, will be one of the guests; and the secretaries of the Association and its branches will be, as they always are on such occasions, the smiling servants as well as the willing monitors of the family-like party.

ROUTE OF THE TRENT VALLEY CANAL.

Some enquiries made of us concerning the subject of Mr. Culverwell's letter from Peterboro, of September 1st, on this subject, resulted in our requesting that gentleman to give us some more detailed information as to the route of the canal. This he has done in the following paper: The line of the canal leaves the town of Midland, on Matchedash Bay, a natural harbor on Georgian Bay—the route either passing across the country a distance of twelve miles, or following the Severn river to Lake Couchiching, passing the town of Orillia on through into Lake Simcoe, and leaving on its left the town of Barrie, with a population of 5,000,—both of these lakes being navigable. The route of canal then leaves Lake Simcoe near Beaverton, following the valley of Talbot River, then is raised by a hydraulic lift-lock (now almost finished) some fifty feet and strikes across the country for five miles to Balsam Lake, which is the summit level, the Cameron Lake, passing the town of Fenelon Falls at its end, and into the Fenelon River, which carries it into Lake Scugog, leaving on its right the thriving town of Lindsay, which has a population of 7,000. It next enters Pigeon Lake, after passing through Bobcaygeon, the home of "Brother Smiff," of the "Bobcaygeon Independent,"—then on through Buckhorn Lake, dropping down Buckhorn Falls, on through Deer Bay and Lovesick Lake, where it reaches the magnificent Burleigh Falls, which have a drop of 28 feet. The route then follows the beautiful Stony Lake and goes onward into Clear Lake, thence through Katchawanooka Lake, arriving at Lakefield, (after passing through a 70-mile stretch of lakes). The line then passes down the Otonabee River to Peterborough and its suburb Ashburnham, which have a population together of nearly 15,000. The canal here drops by a hydraulic lift-lock down into Little Lake, and follows the beautiful Otonabee River with a navigable stretch of 18 miles into Rice Lake. From Rice Lake the route will either cut across the isthmus 12 miles to Port Hope, which has a population of 5,000 and a harbor on the eastern end of Lake Ontario; or will follow the Trent River route (which will be used in portions only) which would be canalized, while on the other stretches of the Trent River the canal would be diverted across country. In the one case above Healy Falls where the route would leave the river above the falls and enter again at Crow Bay, (one mile below) where it is proposed to place another lift-lock, the enginers in a survey several years ago reporting the lay of the land as most favorable for such a structure—and after leaving Crow Bay the route would cut across

country for a distance of 11 miles, with a drop of 166 feet. Then would follow another stretch of river to be canalized, arriving at last at Trenton.

THE STEEL AND COAL COMPANIES.

Though the plan is still subject to the approval of the shareholders of both companies, the following will give an approximately accurate idea of the understanding which, after an immense amount of discussion and consideration, has been arrived at by the directors of the Dominion Iron & Steel Company, and the Dominion Coal Company. The coal company is to pay to the steel company $2,635,000; is to assume the current liabilities for wages, supplies, etc., of the coal department of the steel company's business; and is to receive the benefit of the current cash assets of the business, consisting of accounts receivable, coal on hand and in transit stores. These assets are believed to be thoroughly good value, and should realize, after payment of current liabilities, something like $1,500,000. It may be taken, therefore, that the coal company pays the steel company about $1,135,000 for the surrender of the lease and breaking of the contract for supplying coal. It is hoped to put the steel company's finances on a better footing by the release of its capital, and by placing at its disposal the proceeds of the second mortgage bonds to the amount of $1,500,000, whereby it will be enabled to complete the needed finishing mills and washing plant. A new contract for coal will be arranged on practically the same basis as to price as under the old lease. The steel company, however, will make concessions whereby the coal supply will be limited to a plant such as that at present in existence or in contemplation, and whereby at the end of four years slack coal may be supplied instead of run-of-mine, where equally suitable. It is expected that with this new agreement in force, the problem of the managers of the steel company will be a simpler one than heretofore. They will be able to devote their entire efforts to the economical operation of the steel plant, with nothing but its expenses and fixed charges to provide for.

FINANCIAL MATTERS.

Depositor, Toronto.—So far as we know, the telegram from Ottawa, September 15th, to which you refer, is quite astray. There is in our opinion no likelihood of a general advance in the rate of interest to be paid on deposits by Canadian banks. To take such a step would be to violate an arrangement long ago made by the banks with the Government.

A despatch which comes by Canadian associated press cable, and is dated London, yesterday, describes a meeting of the Council of Birmingham Chamber of Commerce. At that meeting, out of 89 members representative of trade districts, replying to questions put by letter, 58 said that preferential trade would favor the products of manufacturers in the United Kingdom, and would enable them to sell goods more largely to the colonies. Ten members stated that the preference conferred no benefit, two declared that they did not suffer from foreign competition in the colonial markets. The remainder of the replies contained no expression of opinion on preferential tariffs.

INSURANCE ITEMS.

An interesting insurance case has just been settled in Cape Town. The Supreme Court has decided that the death of a rebel while engaged in fighting His Majesty's troops, does not invalidate his life insurance policy.

Mr. Geo. E. Gates, of the head office of the Canada Life has been transferred to the Hamilton branch of that company, where he has been appointed accountant. He was presented the other day, by his friends at head office, with a gold watch, suitably inscribed.

The Winnipeg Free Press had the following last week as an item of local news: A sorter employed at the post-office was discovered by a friend the other evening in his "diggings" looking very rueful indeed. "I'm in a frightful hole," he said. "I went to see two doctors yesterday and got a medical certificate from each. One was a certificate of health for a life insurance company, and the other was a certificate of illness to send to the chief with my petition for a week's leave of absence." "I've often done that myself," said his friend; "what's the matter?" "Matter? Why, I mixed the certificates in posting them. The insurance company has my certificate of ill health, and the chief has my certificate of good health."

We do not know what the Mystic Region is yet, but Mr. Spawn, of Brandt Lakes, South Dakota, has been suing the Bankers' Union Life Assurance Company, of Omaha, on a policy on the life of his late wife. He says he presented proofs of death, and was told that the policy had been transferred to the Mystic Region, as to which he remarks that if this was done it was without his knowledge. As the lady is unfortunately dead there is opening for discussion here. What, and where is, the Mystic Region? If Mr. Spawn will explain we shall be glad. At the same time it may be one of those mysterious orders which are only to be found in the western and southern states of America, such as the Knights of the Mysterious Cave or the Rulers of the Southern Cross, *et hoc genus omnes*. Even the more serious orders, such as the Woodmen of the World and the Knights of Pythias, are objects of mild criticism, not to say derision, but we think the Mystic Region comes right on top.—London Review.

TRINIDAD PRICES.

According to last reports to hand, the Port of Spain markets for breadstuffs were well stocked with recent arrivals, although prices kept steady. There was a fair demand for all grades of flour, and all grades of both bakers' and extra quality were gradually improving in sympathy with late advices from this continent. Cornmeal was scarce, and recent landings brought $4.25 to $4.40. For porkstuffs the enquiry was light, and prices were easier. The stocks of family beef already in hand were in excess of actual requirements, and no advance was likely until these should have been disposed of. Cheese, both Canadian and American, were in over supply. Oats, corn and oatmeal were firm. No new arrivals of pitch pine had taken place, but American white pine had been coming in regularly. Nova Scotia white pine and spruce were in light supply, and recent small arrivals were being taken up at good prices. Old crop Canadian potatoes landed in poor condition did not bring enough to cover freight, but small lots of new had sold at $1.50. Consumption of butter continued light. Stocks of codfish had been augmented by recent arrivals. Haddock was selling slowly at $12, while for pickled fish there was but little enquiry.

CANADA'S AMBITION.

Canada is ambitiously inclined toward having, even if she has to pay for it, a shipbuilding industry. It is the opinion of the Liverpool Journal of Commerce that the fine vessels which used to be turned out of the St. Lawrence yards of the sea-bound provinces were in their day ships of which any country might well be proud. Liverpool has harbored hundreds of these craft, and the "blue-noses" were ever welcome to the port, for they were splendid, well-kept ships, and their custom was eagerly sought after by the tradesmen of Liverpool, and was well worth having. Owing to the displacement of wood for the better and more durable steel in ship construction, the ring of the live-oak mallet has practically ceased in the once busy yards of the Nova Scotia mainland and Newfoundland. Fewer ships bearing the Canadian legend on their sterns are to be seen every year, and this will continue until eventually the class of ship now so decorated will be a thing of the past. But before that time arrives Canada will have her steel ships ploughing the main and supplanting

those now rapidly dying out. With the development of the iron and steel industry in the Dominion, the laying of keels, the bending of frames, and the rivetting of shipplates will follow as a natural consequence, for the Maritime Provinces will continue to breed seamen and shipbuilders just as has been the case in the past, and is at the present time. This is a period of transition, but it does not appear that it will be very long before the sounds of the shipyard will again be stirring the air centres suitable for ship construction. It is expected almost daily that the Dominion Government will offer an increased bonus to the firm or company which will establish a competent shipbuilding plant in the country. The amount already offered has not had the effect of inducing builders to lay down a plant, but the movement now afoot to increase the amount on offer to a sum which will enable an enterprising concern to see its way to start will have the desired effect. Nova Scotia is keen on advancing the scheme, and the decision now rests with a Government which certainly has the best interests of industrial Canada at heart, and which cannot be charged with niggardliness in forwarding the Dominion's welfare. The Dominion Iron and Steel Company is undoubtedly in the best position to take the matter up, and negotiations will be commenced with the company immediately it is decided to offer sufficient inducement. Nova Scotia would benefit immensely by the establishment of a large shipyard there, hence the evident anxiety of the local Government to secure the assistance of the Ottawa Government.

THE I. O. F. REFUSED.

Comment upon the decision of Mr. Linehan, Insurance Commissioner of New Hampshire, was recently made by the Mirror, of Manchester, in that State. It appears that Mr. Linehan refused to renew the license of the Independent Order of Foresters to do business in that State, as a fraternal society. Endorsing this action of Mr. Linehan, the Insurance Press, of New York, has this to say: "We take no stock in the fraternal froth and brotherhood blubber. The sweet words of Oronhyatekha about the fraternal bond are to us only a device to attract the outside. The lodge system, in our estimation, is only an ingenious scheme to impart a 'club atmosphere' to membership. The picturesque ritual is but a side dish—a relish, as it were—to make the taste of assessment insurance more palatable. The Independent Order of Foresters is an assessment association, and the promotion of its affairs does not appear to be without regard for the pride, power and purse of the management. All of which to a certain degree is permissible, provided the management openly declares its purpose and does not pose as toiling solely for the benefit of the 'beloved brethren.' But we do protest against the masquerade of the I. O. F. as a fraternal order when in reality it is operated under a system in poor and incorrect imitation of the principles of regular insurance companies."

ANSWERS TO ENQUIRIES.

J. R. F., City.—The statistical items mentioned under the heading "Free Raw Materials" on page 246 of issue August 21 were taken from the Government Blue Book, issued this month by the Customs Department at Ottawa, under date June, 1903, a valuable and timely issue. The complete Blue Book, containing full tables, will not be issued for some months yet.

A. C., Fredericton, asks how far back silver money dates. We may say that, according to Woodward and Cate's Dictionary of Chronology, silver money was first coined at Rome in 269 before Christ. Gold was not coined in Rome until 207 B.C. The first coinage of gold in England was about 1344 Anno Domini; in France it was earlier. Roman coins were in use in Britain until the Saxon kings made small silver coins called Sceattas. What were known as silver pennies were cut in two to form half pennies and into four to form farthings.

—A branch of the Bank of British North America has been opened at Estevan, N.W.T., under the temporary management of Mr. A. D. Severs.

GROCERS AND PROVISION DEALERS.

Mr. J. J. Murray, formerly connected with the Canadian Pacific Railway Company, is reported to be about to erect a large cold storage warehouse near the C.P.R. station in Winnipeg.

For Canadian cheese in the Old Country, recent advices said there was a good demand without any speculative feature. Spot prices for white were 50 to 51s. per cwt., and 51s. for colored.

The Montreal Grocers' Association has elected officers as follows: President, Mr. Chartrand; first vice-president, E. Limoges; second vice-president, J. Menard; treasurer, Arthur Bastien; hon. secretary, Ald. Turner.

There is a great scarcity of Canadian salt in Ontario. The price now quoted at the mines is 95c. per bushel against 60c. formerly, but it is hard to obtain at any time. We understand, however, that the famine is being relieved to some extent by arrivals from the Uuited States, which sell at a reasonable price.

Latest reports from London, England, stated that there had been an improvement in the demand for Canadian butter, but not sufficiently so to affect prices. Choicest salted brought 92s. to 94s., and saltless, 96s. to 98s., but several complaints were heard as to the latter becoming mouldy. This is a condition, it is significantly added, in which Australian and New Zealand butters are never found, for they are kept at a much lower temperature than the Canadian.

Messrs. Gordon, Ironsides & Fars, the well-known Canadian cattle dealers, have, we hear, purchased a 200,000 acre ranch in Mexico, upon which they expect to raise a herd of 20,000 breeding cattle. Mexican cattle shipped into Canada have in the past been, often somewhat low grade, but this has been due more to carelessness in management, etc., than to any intrinsic demerit in the southern country for cattle raising, for some recently shipped are reported to be going into the winter in as good condition as native Canadian cattle.

The meat-exportation scheme of Mr. Seddon, Premier of New England, is coming in for a good deal of attention in England, and some abuse. According to his calculations, each depot in the Old Country will, at the end of the third year, reap a profit of no less than 48⅞ per cent. Naturally, the London wholesale meat dealers do not like the scheme, and many of them call it ridiculous, as indeed such an enormous profit appears to be. The retailers, however, seem to look upon the idea with more favor, only they advise Mr. Seddon to direct his attacks not upon themselves, but upon the wholesalers who form a "meat ring" throughout the United Kingdom. They are, themselves, they claim, bound hand and foot, by this "ring."

According to the Cincinnati Price-Current, there is not much change in the quality of hogs offered, the supply being moderate. Total Western packing, 300,000, compared with 335,000 the preceding week, and 290,000 two weeks ago. For corresponding time last year the number was 245,000, and two years ago 325,000. From March 1st, the total is 10,505,000, against 9,700,000 a year ago—an increase of 805,000. The quality is irregular, a portion of the offerings being unsatisfactory. Prices have been advanced, prominent markets at the close averaging $5.80 per 100 lbs., compared with $5.60 a week ago, $5.65 two weeks ago, $7.45 a year ago, and $6.45 two years ago. The speculative provision market was more active the past week, and some gain in values was noted. On the closing days of the week under review the most of the advance was obtained. Exports are said to be gradually enlarging. The export movement of products the past week shows a slight gain over the preceding week, and an increase over the corresponding week last year. The tone of the market in general is firmer, and domestic markets are stronger than a week ago.

DRY GOODS NOTES.

Cotton rope has advanced a little, and the price is now about 15 to 16c. per pound. Window cord is quoted at 26 to 30c., according to quality.

The Montreal Cotton Company has elected Mr. Charles Garth, president, to succeed the late Mr. A. F. Gault. Mr. S. H. Ewing was elected vice-president, and Messrs. Hamilton Gault, and H. Markland Molson, directors.

Prices for wool in the Boston, Mass., market continue very firm, though some of the mills are holding off purchasing in the expectation that lower prices must prevail before long; as a result, there is no speculative purchasing.

The Sea Island cotton crop for 1902-3, is figured at 105,955 bales, or, 22,281 bales more than that of 1901-2. The largest previous crop was in 1896-7, when it was 104,557 bales. All this year's output has already gone into consumption, including a small quantity left over from last year. This year's production is a little off color on account of continued rains, but all grades have a uniformly gool staple.

John Macdonald & Co., Toronto, who are the regular agents for Crum's prints, have secured a lot at a price which will enable them to sell them to the trade at the old price of 10c. per yard. Owing to the state of the cotton market, the manufacturers are likely to advance the price of such goods at any time, and when the stock of the above house is exhausted it will be unable to supply the goods at present low prices.

The Calico Printers' Association, of Great Britain, find themselves in possession of a surplus of £380,000, after making provision for interest on debentures, and placing £50,000 on the reserve fund for closed works. This is a new story, for in the year ending December 31st, 1901, there was a shortage of £106,000 on the amount required to pay debenture interest. The profit for the last half-year appears to have amounted to £160,180, a dividend of 2½ per cent. was declared.

INDUSTRIAL ENTERPRISE.

The Manitoulin Portland Cement Co., Windsor, with a capital of $1,000,000, has secured an Ontario charter. Among the provisional directors are Messrs. T. G. Ellis, of Windsor, and H. G. Field, of Detroit.

Messrs. Givan, Sherry, and Patrick have sold their coal property, at Maccan, N.S., the Jubilee mine, to Walter M. Magee, and a party of Boston capitalists. The mine at present producers between 30 and 40 tons of butiminous coal per day. The new owners will add modern machinery and develop it so as to produce 500 tons per day.

The Concentrated Flake Potato Co., of Janesville, Wis, contemplates putting up a branch at Stratford, Ont. It will put up potatoes for the market in a shape very similar to breakfast foods; the process used being the invention of Mr. Frank Bunyan, formerly of Stratford, and recently manager of the company in Janesville.

—Mr. E. W. Day, of the Employers' Association, recently sent out a circular to all workshops, factories, etc., in which hands were engaged, asking for reliable particulars as to the actual number of hands required by each firm, and the special branch of the business in which they were needed. The replies received indicate that not less than 6,000 work-people are now required to fill actual requirements in Toronto alone.

—Representatives of several of the largest producers' associations in the United States met together in Chicago a few days ago, and decided to form a kind of farmers' union. The idea is to found a monster exchange by which the producers of the country expect to control the markets, build elevators, establish packing houses, organize banks, maintain schools, and improve the highways. The associations are said to be backed by $100,000,000.

—The gentleman chosen to replace the late Senator James O'Brien on the board of the City and District Savings Bank, of Montreal, is Mr. Robert Archer.

—At a meeting of the board of the Molsons' Bank, held in Montreal on Tuesday last, Mr. William Cassils McIntyre was chosen a director of that institution, to replace the late Samuel Finley.

—According to reports of the C.P.R. colonization agents and others, the number of people who have gone into New Ontario and the northern part of Quebec province has been very large of late. They came chiefly from Eastern Canada and Massachusetts, and other eastern states, and settled chiefly in the Labelle district.

—A recent visitor to this country was Mr. W. A. Carlyle, who a few years ago was professor of mining in McGill University, at Montreal, and afterwards connected with the Le Roi mine in Rossland. Since then he has been mineral manager of the famous Rio Tinto copper mines in Southern Spain, at the head of 16,000 men, which have been a phenomenal financial success in recent years.

—A deputation from the board of the Bank of Nova Scotia, consisting of Messrs. Charles Archibald, vice-president; G. S. Campbell and J. W. Allison, visited Toronto during the present week. It is understood that they are accompanying Mr. H. C. McLeod, the general manager of the bank, on a trip to the Pacific Coast and return. The bank has branches at Winnipeg, Edmonton and Strathcona, in the prairie country.

—After all that has been said of the increased crowds at the recently closed Dominion Exhibition—and it is marvellous how the attendance continues to increase from year to year at this Toronto Fair—one is naturally anxious to see the figures. The actual atendance this year ranged from 16,000 the first day, to 93,000 on September 7th. The attendance on Monday, Tuesday, and Wednesday of last week reached 231,000, equal to 77,000 per day. The total of visitors was 540,000. The following table gives returns of last year's attendance in comparison with this year's:

1902.		1903.	
Sept. 1	21,000	Aug. 29	16,000
Sept. 2	27,000	Aug. 31	42,500
Sept. 3	18,000	Sept. 1	26,500
Sept. 4	19,000	Sept. 2	31,700
Sept. 5	20,300	Sept. 3	33,400
Sept. 6	41,000	Sept. 4	26,000
Sept. 8	57,000	Sept. 5	42,500
Sept. 9	26,000	Sept. 7	93,000
Sept. 10	81,000	Sept. 8	75,000
Sept. 11	58,000	Sept. 9	63,000
Sept. 12	15,000	Sept. 10	31,000
		Sept. 11	23,000
Total	383,000	Sept. 12	37,000
		Total	540,600

CLEARING HOUSE FIGURES.

The following are the figures for Canadian clearing houses for the week ended with Thursday, Sept. 17, 1903, compared with those of the previous week.

Cities	Sept. 17, 1903	Sept. 10, 1903
Montreal	$20,734,036	$17,353,759
Toronto	15,737,228	12,462,726
Winnipeg	4,576,660	3,850,016
Halifax	1,771,265	1,487,834
Hamilton	1,191,136	938,996
St. John, N.B.	995,720	927 984
Vancouver	1,462,503	1,228,326
Victoria	809,542	49 ,767
Quebec	1,689,365	1,727,872
Ottawa	.....	1,740.152
London	806,449	705.519
	$.....	$42,913,951

Its Success Tells All.

THE FINANCIAL SITUATION.

Aemilius Jarvis & Co., Toronto, in their weekly letter, dated September 11th, say:

The New York market during the past week has been devoid of any material excitement. Trading has been very light, and various reasons are given why this is to be looked for. A comparison of the prices at present existing, both locally and in New York, with those of a year ago, affords material from which can probably be constructed the true reason for the present inactivity. Activity in the market depends for its backbone upon the general public, and the very serious fall in all securities has crippled the public to such an extent that until the average trader retrieves his position and forgets in some measure the hurt he has suffered trading cannot become general. In our own markets the excitement of the week has been furnished from a source which seems to be continually ready to give us some financial acrobatics, namely, the Coals and Steels. It seems unfortunate that any confidence the public retains in the securities of these companies should be continually shaken by the sharp breaks and rises which are so frequently manipulated.

Henry Clews & Co., New York, in their special of September 12th, say:

Midsummer conditions, which favored inertia, are beginning to show evidence of gradually passing away, hence the stock market is entering a period when increased activity may be reasonably anticipated. Vacations are about over, and the all-important uncertainties regarding the crop and monetary outlook will soon be a matter of history. A good many operators will shortly return reinvigorated and much less pessimistic than when they left for rest and recuperation; and they will also find a better undertone to the market than witnessed for many months past. This change is, of course, due to the fact that the market was severely tested by the great break in July and August, which exposed the weak spots, shifted stocks from weak into stronger hands and forced a more wholesome though painful readjustment to new conditions. Such readjustments invariably drive prices below the normal level and the better class of securities usually suffer severely because they best protect the weak stocks. Unquestionably, therefore, there are a number of good railroad securities which are selling below intrinsic value, even after making full allowance for the differences between conditions now and two years ago

Commercial.

MONTREAL MARKETS.

Montreal, Sept. 16, 1903.

Ashes.—There has been no recent weakening of values, nor any increase of offerings. We quote first pots at $5.80 to $5.85; seconds, $5.40 to $5.50. For pearls it is still difficult to establish a definite quotation, though probably $6.50 could be readily realized.

Cements and Firebricks.—Another heavy week is reported in German cements, receipts since last writing being reported at 9,000 bags and 13,580 bbls.; of English cement only 800 bbls. are reported this week; firebricks, 92,500. Prices remain as quoted last week.

THE CANADIAN CASUALTY AND BOILER INSURANCE COMPANY

Full Government Deposit Paid.

President:
ALEXANDER SUTHERLAND, D.D., Toronto.
Vice-Presidents:
H. N. BATE, Ottawa, Director Bank of Ottawa.
W. S. DINNICK, Toronto, Vice-Pres. and Mng.-Dir. Standard Loan Co.

Dairy Products.—Last week was again a pretty heavy one for cheese shipments, 107,505 boxes having been taken out by twelve steamships, as against 65,139 boxes for same week of 1902. The total shipments to date aggregate 1,632,356 boxes, some 300,000 boxes ahead of last year's big figures. With the increased output of cheese, butter figures naturally show some shrinkage. Last week's exports were 13,374 packages, as against 32,249 packages for corresponding week a year ago, and for the season the figures are 109,000 packages short of last year's figures at date, namely, 313,070 packages. The cheese market has acquired further firmness since a week ago, and for finest Ontarios from 11⅜ to 11½c. is now the figure, with fine Townships quoting at about 11¼c., and Quebecs at 11 to 11⅛c. For butter there is good demand from both local and export buyers, and fancy Townships would range up to 20¼c., with fine Quebec creameries at from 19¾ to 20c., and ordinary ditto at from 19 to 19½c.

Dry Goods.—The unseasonably warm weather has deferred the retail demand for fall stuffs and wholesale trade is hardly so brisk as a week ago, but a very fair trade is still being done. Payments are reported fair to good, and there is a continued absence of noteworthy failures. Values in all lines are firmly sustained.

Flour.—Owing to the pronounced strength of the wheat market, and the comparatively limited stocks of flour offering, the market has taken a stiff upward movement, prices being advanced by millers generally from 15 to 25c. a bbl., making present quotations for choice patents from $4.65 to $4.80 per bbl., and strong bakers' from $4.35 to $4.50.

Groceries.—Owing to some slackening in the demand for refined sugars at New York there has been some cutting in prices among the refiners there, with the result that there has also been some decline in the local market, prices having been reduced 10c. a cental on all grades yesterday. This makes the present factory price for standard granulated $4.10, in barrels, with yellows ranging from $3.40 to $3.90; bags, 5 cents less. The demand for molasses is somewhat slow just now, but prices are very firm, some houses quoting 42c. for Barbados in single puncheons. Agents for Denia firms are still cabling orders for Valencia raisins, to be shipped by the Escalona, which vessel was expected to have sailed about the 15th, but she is not yet filled up, and, as the voyage from Gibraltar takes a round three weeks, she will hardly be due here for a month yet. Some 3,000 half boxes of Valencias are to hand by the Pretorian, via Liverpool, and are being jobbed at 7½c. for fine off-stalk. There is a good volume of business being done in Sultanas, owing to good quality and low prices. Grenoble walnuts are showing gradual decline; filberts and almonds steady. Tea importers report a rather quiet demand, but jobbers are doing a good business with the country, and all prices are steady.

Hides.—No change of any kind is reported. Business in calfskins is now a mere bagatelle. In beef hides there is a fair movement, with dealers buying No. 1 at 8½ to 9c. Lambskins remain at 55c.

Leather.—Local demand is rather quieter if anything, no large dealings being reported in general lines, but shipments abroad of sole continue fairly liberal, and no changes are noted in quotations.

Metals and Hardware.—A continued good volume of business is reported in all lines, and no important changes are noted. The Glasgow market for pig iron continues very firm, but it is anticipated that importations of Scotch iron will show some falling off from this out, as Canadian furnaces are overtaking the accumulation of orders, and the Hamilton people are reported as seeking orders at $20 for No. 1 and $19.50 for No. 2, net terms delivered. In bars, hoops, etc., there is no change. The strike among the Welsh plate workers is settled, and prices are unaltered. Some business is reported in Terne plates at something under $6.75 for a fair lot, but in an ordinary jobbing way the above figure is considered low enough. Ingot tin is rather firmer at 31½c. for Straits; copper steady at 14¼c.; lead, $3.10, and still scarce; spelter firm at $5.75.

Oils, Paints and Glass.—Turpentine continues to gain in stiffness under reduced output, and there are some who would prophesy that the dollar mark is

J. J. W. Deuchar, F.F.A., F.I.A., General Manager and Actuary of the Norwich Union Life Assurance Company, speaking of investments says:

"It may serve to indicate the great importance of obtaining a good return on the investments, if it is realized that one per cent. of increased interest on the funds of a company will, on the average, have as great an effect as a saving in expenditure equal to 10 per cent. on the premium income, while, if an office could count on realizing 5 per cent. interest in place of 3, it might reduce its premiums some 30 per cent., or double its bonuses."

Mr. Deuchar does not name THE GREAT-WEST LIFE; but the above statement exactly describes the happy position of its policy-holders.

likely to be reached ere long. The linseed oil market is still in unsatisfactory shape, with sales of raw oil reported as low as 48c. for fair lots. We quote as follows: Single barrels, raw linseed oil, 48 to 49c.; boiled, 51 to 52c., net, 30 days, or 3 per cent. for 4 months' terms. Turpentine, 83 to 85c., single barrels. Olive oil, machinery, 90c. to $1; cod oil, 35 to 37½c. per gal.; steam refined seal, 50 to 55c. per gal.; straw do., 45 to 47c.; castor oil, 7½ to 8c., for machinery; pharmaceutical ditto, 8½ to 9c.; lead (chemically pure and first-class brands), $4.85 to $5; No. 1, $4.60; No. 2, $4.40; No. 3, $4.15; No. 4, $3.90; dry white lead, 4½ to 4¾c. for pure; No. 1 ditto, 4 to 4¼c.; genuine red ditto, 4¼ to 4½c.; No. 1 red lead, 4c.; putty, in bulk, bbls., $1.80; bladder putty in barrels, $1.90; ditto, in kegs or boxes, $2.40; 23-lb. tins, $2.55; 12½-lb. tins, $2.65; London washed whiting, 40c.; Paris white, 75 cents; Venetian red, $1.50 to $1.75; yellow ochre, $1.25 to $1.50; spruce ochre, $1.75 to $2; Paris green, 14c. in bulk, and 15c. in 1-lb. packages; window glass, per 100 ft., $3.50 for first break; $3.70 for second break, and $4.20 for third break; per 50 feet, $1.95 for first break; $2.05 for second break.

TORONTO MARKETS.

Toronto, Sept. 17, 1903.

Dry Goods.—The sorting season is now on in full blast, and reports as to its character are good. Wholesalers are selling both plain and fancy cotton goods at old prices while present stocks last, but as soon as these are exhausted there is no doubt prices will be higher. Prospects for manufacturers' clearing lots are not bright; job lines will be fewer and less important than in former years. Many orders were given by Exhibition visitors—more than in previous years; these are looked upon with great satisfaction, as house orders are naturally the most profitable of all.

Flour and Grain.—Though cables from the Old Country show no particular advance, the flour market is very strong, and Manitoba brands have been steadily rising during the last week. Bran and shorts both keep steady, as does also oatmeal. Wheat has gone up 2 to 3c. for Manitoba, while Ontario remains unchanged. Barley and oats are 1c. higher. There is little or nothing doing.

Fruits and Vegetables.—Large quantities of fruit have again been in evidence. The warm weather brought about easier conditions, and a good deal had to be rushed out to save quality. Peaches are plentiful, and grapes are becoming so. Canteloupes are plentiful at 25 to 50c. per case. Apples still fetch from 12½ to 20c. per basket. The English apple market is firm. Other prices may be quoted as follows: Cocoanuts, per sack, $3.70 to $4; oranges, late Valencias, $4.50 to $5; lemons, Verdelli, $3 to $3.50; bananas, 8's, $1.40 to $1.75, 1st, $1.75 to $2; extras, $2 to $2.50; sweet potatoes, $4.50 per barrel; egg plants, 10 to 20c. per basket; tomatoes, 12½ to 17c. per basket; celery, 35 to 40c. per dozen; gherkins, 25 to 30c.

Groceries.—The expected decline in sugars has come, and they have declined 10c. The movement continues comparatively slow. In other lines of groceries a good trade is passing, but no feature presents itself for particular comment.

Hides, Skins and Leather.—A somewhat better market exists for hides and skins, and there is no accumulation of stocks. Sheepskins have advanced to 55c. As to leather, the prospects are promising for a good fall trade. Prices are firmly held.

Live Stock.—Under the stimulus of a demand fully equal to the moderate receipts trade at the cattle markets this week was active and prices kept steady with no difficulty. Few export cattle offered, and they were mostly of No. 2 grade; but prices kept up. Butchers' cattle were all cleared up, though a slightly easier feeling would be discerned for inferior grades. Stockers and feeders are quiet. Few milch cows offered, but prices kept the same. The demand for calves was brisk.

Povisions.—Choice dairy rolls are scarce and wanted, and good creamery prints sell well to take their place. Ordinary offerings are fair. Cheese is about steady and the market is without feature. The demand for eggs has been good in spite of the hot weather, and the market is good at 16c. for choice fresh laid. Poultry receipts are not large. There is a great scarcity of sal[illegible] partly owing to irregular shipments from the west. Not much is doing in hops, nor is much business expected till the new crop begins to move. In smoked meats the trade being carried on is a brisk one.

Wool.—Pulled wools are in good demand from domestic mills at steady prices, but there is no export enquiry for fleece, and, indeed, dealers claim they have given more for it here than it would fetch in the United States. Cables from London report wool auction sales openings show unchanged prices for merinos and fine crossbreds, while medium and coarser grades show a 5 to 10 per cent. advance.

Hardware.—The only change in prices is in glass, where the dealers have been able to make a slight revision. General trade is very good, and prospects for the fall are flattering. The movement in metals is good. Iron and steel prices are now about normal, and are likely to remain about the same for some time to come. Glasgow advices recently to hand speak of a firm market for pig iron, consumers having been buying more freely again.

EMPLOYERS' LIABILITY ASSURANCE CORPORATION,

Continued Progress

During the last few years the North American has made marvellous strides in all Departments tending to its upbuilding, which can readily be seen by the following figures, showing a comparison of

Three SEPTENNIAL Periods

Year	Cash income	Assets	Policies in force
1881	$ 39,613	$ 88,763	$ 1,221,712
1888	263,693	666,919	7,927,564
1895	581,478	2,300,518	15,779,385
1902	1,270,840	5,010,813	30,927,961

A strong progressive Canadian Company giving excellent returns to its policy-holders, therefore making it a desirable Company for agents to represent. Three active agents wanted.

Life Insurance Men

who can write from $10,000 to $100,000 of business in a year, if they wish to secure a good agency, will find it to their advantage to communicate with THE ROYAL-VICTORIA LIFE INSURANCE CO. **Liberal Commissions Paid.** A good opportunity for new men to enter the business. All correspondence confidential if desired.

Address The HEAD OFFICE, Montreal.

RIGHT and FAIR

THE right plans of Life Insurance, honest in purpose, correct in principle; fair methods of dealing with policy-holders and agents, impartial in treatment, just in settlements—all cardinal aims of the management of the UNION MUTUAL

UNION MUTUAL LIFE INSURANCE Co.
Portland, Maine.

FRED E. RICHARDS, President. ARTHUR L. BATES, Vice-President.

Good Agents always welcome; satisfactory territory open for men of that stamp.

ADDRESS:
HENRI E. MORIN, Chief Agent for Canada, 151 St. James St., Montreal, Canada.

For Agencies in Western Division, Province of Quebec and Eastern Ontario, apply to
WALTER I. JOSEPH, Manager, 151 St. James Street, - Montreal.

Mercantile Summary

THE Government of West Australia is going to create the office of Director of Agriculture. A good man for such position will be sought in Canada and the United States.

DR. ADAMS, of Embro, Ont., and some Woodstock capitalists, have formed a company to manufacture automobiles, and have taken possession of the Wilson tannery building in the latter town, which they will use as a factory.

A VESSEL has just been completed in Newcastle-on-Tyne, for Messrs. Marks & Co., of Port Arthur, Ont. She is specially constructed for plying on the St. Lawrence and Welland canals, between Montreal and the Upper Lake ports, and measures 256 ft. over all, with beam 42 by 25 ft. Her cargo capacity is 3,000 tons dead weight, and she is intended to carry 100,000 bushels of wheat.

THE American Locomotive Company suggest that under certain conditions they would be willing to erect, in addition to the locomotive factory at Longue Pointe, Que., large ship building and bridge building works. They have already asked the Harbor Board to construct a new wharf at Longue Pointe. The company employ at present over 1,500 men, and if the proposed works are carried through some 4,000 would be required.

IN last week's Toronto Sunday World there was a very interesting letter from Mr. J. Alex. Culverwell, of Peterborough, about the Trent Valley canal, and describing the advantages sure to accrue to the whole country from its completion. This is the canal the route of which was decided by the Imperial Government to be the most economical waterway between the upper lakes and the port of Montreal. As was mentioned in a former issue, this canal has the largest lift-lock in the world. Mr. Culverwell concludes his letter with the remark, "Let the Trent Valley canal be completed without further delays," and adds, in adaptation of the words of that great railroader, Sir William Van Horne, "The grain-hopper is full, but the present spouts are small."

THERE is a quarrel between the town of Midland, Ont., and the local Electric Company, arising through municipal ownership. The town was to take over the plant, at a price to be fixed by arbitration. A board of arbitrators made a valuation of $9,629, but the company now objects on the ground that one of the arbitrators was the town solicitor, and that the town was indebted to him. This the corporation denies, and the municipal officers said that in view of the award and the prospective purchase the town has already spent $8,000. The company, on the other hand, claims that its plant is worth $20,000, but the town is applying for an order enforcing the award and for leave to pay into court $8,689, which with $940 costs, makes up the amount of the award. It declines to become responsible for any costs.

MONTREAL & TORONTO

Mercantile Summary.

In Stratford, Ont., a new company is being formed to manufacture lager beer, ale, porter, etc. Messrs. Macpherson & Davidson, of that place, we understand, are interested.

Late failures in Eastern Ontario are noted as follows: D. Morrison, general storekeeper, Glen Robertson, has assigned. He succeeded his father, with whom he formerly clerked, in 1900, but before taking over this business he had carried on a grocery business for a short time in Ottawa. He was also interested in a carriage making business, carried on under the style of the Glen Robertson Manufacturing Co., which is not thought to have resulted in much profit.—C. A. Burris, carrying on business in Brockville as a florist, has also assigned after an endeavor to compromise liabilities of $1,500 at fifteen cents on the dollar.—Lemuel Wilson and Arthur Colborne, of Vankleek Hill, doing business in the general store line and as dealers in agricultural implements, under the style of the Wilson & Colborne Co., have turned over their estate to the assignee. The business was only started in the spring of 1902, and the account has not been reported as an overly prompt one. —Leonce Gauthier, of Grande Baie, Que., is reported as offering his creditors 55 cents on the dollar at three, six, nine and twelve months, secured. Some ten years ago he succeeded his father, who had been previously unsuccessful.—Two years ago J. O. Massicotte, general merchant, removed from St. Narcisse de Lotbiniere to Chicoutimi. The change has not been attended with good results, and his assignment is now reported as the result of an investigation into his affairs by a firm of Montreal accountants. ——A petition has just been filed in court asking for a winding-up order in the matter of the Grocers' Manufacturing and Trading Co., Limited, of Montreal. The company was only incorporated in the spring of 1902, with an authorized capital of $25,000, of which but a small proportion was paid up in hard cash, it is said. The business has been of a limited character, and recently a lack of harmony developed among several of the promoters.—H. Breitman, of Montreal, a small manufacturing furrier, recently reported as offering his creditors 35 cents on the dollar, has apparently been unable to carry through the arrangement and has now assigned.—After a five years' experience as a grocery clerk Charles Fortier started business on his own account just two years ago. He, however, has not made a success of it, and has been asked to assign, owing, it is said, about $3,000.—J. A. Cantin, formerly a dry goods traveller for a Montreal house, began business for himself in Quebec in the spring of 1895. He became involved in February, 1900, and then arranged to pay his creditors 40 cents on the dollar, liabilities being $17,350. He is now again in trouble, and has assigned to Kent & Turcotte, Montreal.

Mercantile Summary.

THE Midland Towing and Wrecking Company's tug Reliance, built in Collingwood, has been destroyed by fire near John's Island. She was valued at $40,000, with insurance considerably less.

A PROPOSAL is being made by a syndicate whose representative is Mr. A. J. Andrews, to develop the power of the Assiniboine river, and sell either it or the entire plant to the city of Winnipeg.

WE hear from Montreal that the Singer Sewing Machine Company is contemplating the erection of another factory near Montreal, its present one in Ste. Cunegonde having become too small. They are said to be very favorably impressed with a site in Lachine.

THE International Coal and Coke Company, which owns extensive bituminous coal lands in Alberta on Crow's Nest Pass Railway is about to put in a plant capable of an output of 2,000 tons daily. The town which will grow up when these works are in operation is to be known as Coleman.

WE understand that Major R. G. Leckie, son of Mr. R. G. E. Leckie, the well-known mining engineer, of Sudbury, and Lieut. Guy Kirkpatrick have obtained from the Indian and Foreign Offices of the British Journal a prospecting license for 3,700 square miles of the richest mineral lands in Somaliland, and will set up an assaying plant near Berbera.

THE Superior Portland Cement Co., Limited, held its annual meeting in Toronto the other day. It was stated that good progress was being made at Orangeville with building preparations, etc. The following were elected as directors for the ensuing year: Dr. B. E. McKenzie, president; Thos. McCarty, first vice-president and superintendent of building construction; W. H. Jackson, second vice-president; D. B. Brown, general manager; Geo. McIntyre, secretary-treasurer; W. H. Hunter, John Holborn, R. J. Daley.

CONSTRUCTION work at the Granby mines in British Columbia has practically ceased, and the enlargement of the smelter to six furnaces has been accomplished, says the Boston News Bureau, without the creation of any floating debt, the net earnings of the company having been sufficient this year to pay for the enlargement of the plant. The company began the operation of four furnaces in July, and in that month produced 1,200,000 lbs. of copper from its own mines, and 500,000 lbs. from custom ore. It will soon start up two additional furnaces, making six in all, and should handle 60,000 tons of rock per month, and earn between $90,000 and $100,000 per month net. The Granby Company is developing its own coal fields, and this year will be able to obtain its coke supplies at a cost not exceeding $5 per ton, as compared with $7 per ton, which it is now paying. Every dollar in the price of coke makes a difference of fifteen cents per ton in the cost of handling the crude ore in the smelter.

LIMITED,

Manufacturing and Wholesale Stationers.

43 to 49 Bay Street, Toronto.

Mercantile Summary.

THE Novelty Manufacturing Co. is the name of a new company recently established to engage in the manufacturing of all kinds of novelties. Among other things this firm is making at its premises, 78 King Street East, Toronto, are a new form of trouser hanger and a collapsible wall seat for use in offices, stores, etc., both of which devices possess points of merit.

THE Belleville Portland Cement Co., Limited, which was incorporated under Ontario laws recently with an authorized capital stock of $1,000,000 preferred and $1,500,000 common, has some good men behind it. The proposition seems also to have some very good points. In the first place, the cost of bringing together the various raw materials required in the manufacture will be peculiarly small, while the site of operations is directly upon a lake navigation route and within easy distance of the Grand Trunk Railway. Experiments already made serve to show that the tensile strength of the cement turned out by this company is nearly double that required for a cement to pass muster as an ordinarily good article.

ADVICES from Rossland state that an important strike has been made at the White Bear Mine, the whole of one side of the shaft, considerably below the 850 level having been found to be in solid ore. This is a demonstration of the manner in which the ore bodies are expanding as depth is secured, the indications being that before the 1,000 foot level is reached the entire shaft will be in ore. The work in the shaft is to be continued steadily. Good progress is being made, we hear, both in the deep levels and on the surface, where construction is being actively prosecuted on the new headworks and compressor plant.

CALGARY, Alta., ratepayers a few days ago defeated a by-law to raise $20,000 debentures for a municipally owned electric light plant.

THE Toronto Railway Company is making great preparations for improved facilities. At the power house four new batteries of boilers, two new directly connected engines, and two immense new dynamos, attached, are being erected, by which an addition of 3,200 horsepower will be secured. To secure still additional power during the busy hours, a storage battery with a capacity of 3,000 ampere hours is also being erected. To enable the company to distribute the extra power on the routes as required between forty and fifty miles of the best and heaviest feed wire is being rapidly strung in place on the different current sections. The total cost of these improvements will exceed probably $750,000. A number of additional cars are being turned out ready for the winter service, and of these fifteen or sixteen will be cars which by mere changing of the sides and seats can be used as winter or summer cars. Thousands of tons of steam coal for the power house and a large quantity of anthracite for car heating are now being stored.

Mercantile Summary.

MORDEN, Man., ratepayers carried almost unanimously a by-law to bonus the Manitoba Cement Co. The company is granted exemption from taxes, and is given a free site of twenty-two acres.

J. J. TURNER & SONS, manufacturers of sails, tents and awnings, at Peterboro, Ont., were agreeably surprised the other day to receive by same mail an order for goods from Nelson, B.C., and one from the other extreme of the continent, Glenwood, Newfoundland. The latter order came from a firm controlled by the Vanderbilts.

A UNIQUE advertising scheme was one carried out in Toronto during the Exhibition by the Colonial Typewriter Co., of Peterborough. An object ten feet high and of the shape of an ink bottle was moved up and down the principal streets by a man concealed inside, and naturally attracted a great deal of attention. The idea was to advertise "Japanese Ink," made by this firm.

THE London, Aylmer and North Shore Electric Railway Company, of New York, which operates between London, Ont., and neighboring towns, to the town of Aylmer, Ont., along the north shore of Lake Erie, has filed a mortgage to William Warnock, banker, of Aylmer, and the Guardian Trust Company, of New York. The mortgage and bonds bear the date of April, 1903, and are for twenty years.

THE Montreal Street Railway Company is trying to make a bargain with the city. It offers to remove the snow, water the streets and sweep dust from the streets on which their cars run in return for the extension of its franchise for thirty years; it also wants the power to arrange under reasonable restrictions with other companies about matters affecting the use of the streets which they run on. At the end of thirty years, in the event of expropriation by the city, it is to be agreed that the city will acquire the whole of the undertakings owned and managed by the company. The company further agrees to sell workingmen's tickets at the rate of ten for a quarter, good at certain hours of the morning and evening, and the new obligations are to be in lieu of all taxes except such as all joint stock companies are required to pay.

THE Imperial Steel and Wire Company, Limited, incorporated for the purpose of establishing an up-to-date wire rod mill, wire drawing, wire nail, wood screw, back and wire fencing plant at Collingwood, Ont., are offering $40,000 of stock to the public, $60,000 of preference stock having already been applied for. It is offered at par, $10 per share, with a bonus of one share of fully paid-up common with each. At the present time there is no mill in the country of this description, and the steel slabs and billets which are turned out at various points in Canada have to be shipped away to be converted into the finished articles and then re-imported. Such a factory as that proposed by the above company would obviate this state of things. Its finances are being looked after by the North American Securities Company, Toronto. One feature which may be worth noting is that since the company was formed and the profits of the business figured up the Dominion Government has granted a bounty of $6 per ton on wire rods, which would add, on present estimates of output, no less than $180,000 to the net profits, a nice little nest-egg in itself.

PETERBORO', Ont., town council has entered into an agreement with the Peterboro' Radial Railway Company, by which the latter is given a franchise to operate a street railway in that town, to extend over a period of thirty years from July 1st, 1904. The tracks of the defunct Peterboro' and Ashburnham Railway Company will be used, and the new company agrees to have the system in operation not later than July 1, 1904. The rolling stock equipment and income of the railway is to be exempt from taxation during the life of the franchise, and the contract for street lighting for

ten years will probably be given to the Peterboro' Light and Power Company, an allied company, the net annual cost per light of 2,000 candle power to be $46.66. The capitalists interested in the street railway are those identified with the American Cereal Company, including Hon. Senator Geo. A. Cox. It is said that the work of equipping the road will be proceeded with at once, and orders are now being placed for the necessary rolling stock and generators. The company is spending $250,000 on a new dam and power house, where the power to operate the railway will be generated.

TWO STOCK EXCHANGES.

THE Century Magazine has an interesting comparison of the New York and Berlin Stock Exchanges. One thing which would surprise a visitor to the latter would be the large number of outsiders present; he would be surprised to see the Boerse attended by quite two thousand persons, including clerks of banks, newspaper men and even visitors like himself. Also, he would be interested in the immense size of the hall—three hundred feet long, divided by colonnades into three sections, one of which is assigned to the Produce Exchange. On one side of the hall several doors open into a grassy court, shaded by trees and surrounded by a pillared lobby, where brokers sit in dull summer days and float their latest stock of anecdotes. That shaded court is suggestive of deeper differences between the New York Stock Exchange and the Berlin institution. In New York the number of members is fixed, and is small in proportion to the immense volume of business done; in Berlin there is a great horde of small dealers, and the amount of trading is much less than in New York. Owing to the easy terms of admission, the Boerse becomes a mere place where traders meet to effect their transactions. There is no sale of seats. In fact, no membership fee exists, but only a small yearly tax is collected, which varies from time to time as the expenses of the organization require. Contrary to New York practice, membership is largely held by companies and firms. Nearly all the banks of the city, for example, are members, and the more important ones keep above a score of their employees on the floor. Thus the individual New York broker, as a rule, counts for vastly more than a member of the Boerse. New York is concentrated, is intense; Berlin disperses its energy, and is comparatively dull. It knows nothing of those great days of triumph or disaster that render the annals of Wall Street picturesque; and it lacks our large, daring operators who startle the country with their bold schemes.

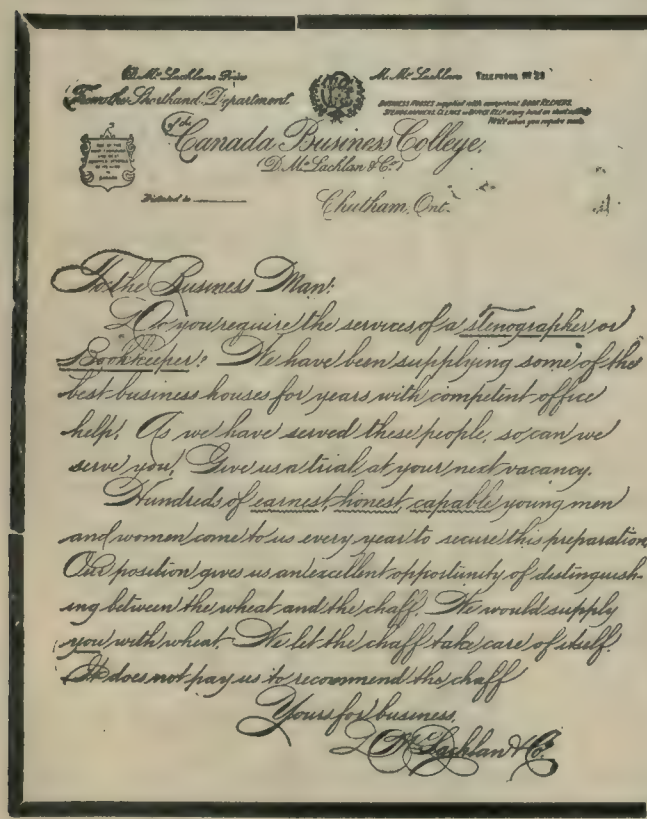
Canadian Bank of Commerce Building, **Toronto.**

IN PRAISE OF CANADA.

The following is a paragraph from a letter from the special correspondent of Commercial Intelligence at the Osaka (Japan) exhibition:

Perhaps the most striking display in the whole exhibition is that of Canada, which has a whole building to itself. Of course, agricultural produce almost monopolizes the building, but some fine exhibits of manufactured goods are to be seen. The most successful has been that of the famous Manitoba "No. 2 Hard" flour, and bread from this is baked "while you wait," under the superintendence of a Canadian baker, who has a number of Japanese assistants under him. An enormous amount of interest is being taken in this exhibit by the Japanese, more especially as the Canadian Commissioner keeps the fact well to the fore that it is possible to obtain 65 lbs. more of bread from a barrel of this flour than from any other. The Commissioner has been overwhelmed by applications from Japanese bakers, who are anxious to learn how to bake bread from Canadian flour and by Canadian methods. The day's "bake" is sold every evening to the visitors, and there appears to be a tremendous rush for it. Taken altogether, I should think that Canada's show is the most successful, and appears



Canada Business College
D. McLachlan & Co.
Chatham, Ont.
To the Business Man:
Do you require the services of a Stenographer or Bookkeeper? We have been supplying some of the best business houses for years with competent office help. As we have served these people, so can we serve you. Give us a trial at your next vacancy.
Hundreds of earnest, honest, capable young men and women come to us every year to secure this preparation. Our position gives us an excellent opportunity of distinguishing between the wheat and the chaff. We would supply you with wheat. We let the chaff take care of itself.
It does not pay us to recommend the chaff.
Yours for business,
D. McLachlan & Co.

What we have done for others we would like to do for you.

During the 11 months ending June 1, we placed 345 of our students with representative business houses. Graduates of this School occupy some of the choicest positions of trust on the continent. We train them so practically that there are no failures among them; this gives us the confidence of business firms.

If you have sons or daughters needing business training, write for our catalogue, which is acknowledged to be the handsomest business college catalogue issued in Canada.

to have produced an impression on the Japanese mind which is likely to bear good fruit so far as Canadian exports are concerned. In addition to flour, there is a good display of canned meats, fruits, biscuits, wines, furniture, wire rope, sails, soaps, minerals and timber. A section of the Canadian Pacific Railway Company's sleeping car attracts considerable attention, as does a fine model of one of the famous "Empress" steamers which is shown on a miniature of the Inland Sea. . . . The whole show is a magnificent testimony to Canadian enterprise, which does not hesitate to spend money in advertising the country's products. I may say that Canada was awarded the first prize for the best the exhibition.

The most useful book in the financial world is

Hawkesbury, Ont.

Tenders for Debentures.

Town of Pictou, N. S.

Sealed tenders will be received by the undersigned until twelve o'clock noon, on Friday, the 16th October next, for the purchase of Fourteen Thousand Seven Hundred Dollars Town of Pictou Electric Light Debentures.

Debentures will be issued under authority of Chap. 109 of the Acts of the Legislature of Nova Scotia, 1903, and redeemable in thirty years from the date thereof. They will bear interest at the rate of Four per centum per annum, payable half-yearly, at the Town Office, Pictou.

Denomination:—Fourteen of One Thousand Dollars each, and one of Seven Hundred Dollars.

Purchaser to deliver debentures free of charges to the Town of Pictou.

By order of the Town Council.

FRED. MacKARACHER,
Town Clerk.

FINANCES.

Aemilius Jarvis & Co., in their letter of September 18th, 1903, say:

The crop situation has during the week been brought into almost disproportionate prominence as a factor in the stock markets. That there is much uncertainty as to the future of the crops cannot be denied, but we believe the stories of severe damage already done have been much exaggerated and to a considerable extent are manufactured for the purpose of "bearing" the market. They have the effect of making traders and investors timorous, and any serious setback to the crop would probably produce even more depression than it would intrinsically warrant, as this aspect of the case has been so much advertised recently. The best judgment we can form as to this is that if there is no unlooked for and unusual spell of bad weather, the crop, taken as a whole, should be a very good one. Until the situation is more settled in this respect, traders would do well to confine their attention to such stocks as would be least influenced by crop reports, good or bad. On the local Exchange trading has been very light, no special security being traded in to any great extent.

Henry Clews & Co., New York, say: No change can be detected in the monetary situation. Crop demands are beginning to assert themselves and bank reserves to decline in consequence. Loans continue at high level in spite of stock market liquidation, but this appears to cause no concern among bankers because of the strength and character of their principal borrowers. The fall is usually a period of strigency in the money market, and the last two years have witnessed rates as high as 10 to 20 per cent. in the first half of September; but this season there have been no flurries of consequence so far, though temporary higher rates would cause no surprise. No extreme stringency, however, seems to be anticipated in spite of unsatisfactory features, for the reason that speculative demands are small and will not be encouraged, and the knowledge that the Treasury will liberate $40,000,000 of cash if necessary effectually wards off unnecessary concern. One thing is certain, that the money market is adequate to all legitimate requirements, and that demands of a questionable nature will receive scant consideration.

Have you ever used our

THE Montreal Transportation Company's sawmill and machine shops, and A. C. Knapp's boat moulding shop, all near Cataraqui Bridge, Kingston, were destroyed by fire on the 20th inst. The loss to the company was about $12,000, partially insured.

SHIPMENTS of ore from Rossland district of British Columbia for the week ending the 19th inst. were as follows: Le Roi, 6,000; Centre Star, 1,500; War Eagle, 1,230; Le Roi, No. 2, 320; Jumbo, 250; Spitzee, 30; I.X.L. (milled) 250. Total for week, 9,580 tons; year to date, 277,407 tons. It may be stated that the 4,000 gallon oil tanks at the Le Roi No. 2 concentrators have now been charged, and the plant starts this week. The Canadian Pacific is building spurs to the War Eagle and Centre Star mill sites. The ore shipped from Grand Forks over the Kettle Valley Line last week totalled 1,271 tons.

CROP PROSPECTS.

Our Winnipeg correspondent telegraphed yesterday at noon as below: Continued favorable weather since recent storm has about restored everything to normal condition again. Threshing is in full swing once more. The grain is turning out in good condition, but will suffer a point or two in grade. A careful estimate of loss to crops from recent storm places losses in Manitoba of not more than 10 per cent. in quantity. In territories where considerable portion of crop was uncut, loss will be heavy, but will not exceed twenty per cent. This loss is offset by increased values, and it is fully expected the cash value of this year's crop will equal if not exceed last year's.

Mr. C. N. Bell, secretary of the Winnipeg Board of Trade, now estimates that the wheat crop this season will be about 47,000,000 bushels in Manitoba, and in the Territories about 16,000,000 bushels. Last year's western wheat crop was about 65,000,000 bushels, and the farmers realized for it about $36,000,000. This year, as estimated above, their net receipts are likely to be a little larger, with a somewhat similar total yield and larger acreage, owing to the prices promising to be better.

MR. CHAMBERLAIN'S RESIGNATION.

It is more than a week since the news of Mr. Chamberlain's resignation was sprung upon the world, and even yet its immediate cause and an exact idea of the situation it is likely to produce in British politics are difficult matters to formulate. Probably no closer understanding is likely to be reached than that intimated in his own letter to the Premier, namely, that he could carry on the needful work of educating the country from the outside, while the present Government, unhampered by the presence in its inner folds of an acknowledged heretic, would sympathetically hold the fort against the Huns and Vandals until such time as the work should be complete. His bold step looks at first like a leap in the dark, but it is well to remember the Colonial Secretary is an "old parliamentarian hand," whose rough guesses are often equal to other men's accumulated wisdom; certainly, at any rate, his reputation for daring and self-sacrifice has received further confirmation. Unmistakable at the present time, not only in Great Britain, but in the outlying parts of the Empire, is the belief that something emphatic has to be done to preserve its unity and to keep the Mother Country from falling into the rear of the march of industrial nations. What that something shall be is another story, however; difficulties loom up on every side. It is significant in Mr. Chamberlain's letter of resignation that his perception of the present impossibility of his plan hinges upon that part relating to a preference for the colonies. This, however, is because the country, i.e., Great Britain, is not ripe for such a plan; but what of the colonies themselves? We are aware that to a limited extent, Canadians have expressed their sympathy, but this has been with the general principle of some plan which while uniting them more closely with the Mother Country will help the whole in its fight against the world.

Mr. Chamberlain has said that any scheme he may formulate will depend for its success upon the co-operation of the colonies, and no doubt he thinks he will obtain it. Does he, however, rightly diagnose the feeling of the colonies, and do the colonies themselves know what they would be asked to give? Canadians, doubtless, will be glad to gain a preference for their foodstuffs in the great British market over foreign nations, but as we apprehend Mr. Chamberlain's plan, they will have to give something tangible in return; no mere mock preference, but a sufficient cut off their ordinary tariff to allow this country becoming a good market for British manufactured goods. Yet this is exactly what our manufacturers in the rightful exercise of their attempt to develop native industries will move heaven and earth to prevent. On another page will be found a letter taking up another phase of this subject, though, for ourselves, we would suppose it to be Mr. Chamberlain's ultimate aim to make the proposed preference intercolonial, as our correspondent suggests. The crux of the matter is: can so many divergent interests be unified? Some action along the lines of placing Great Britain on terms of equality with the rest of the world seems absolutely necessary; but what we would impress on Canadians

is the necessity of very careful thinking lest, in their desire to remove obstacles from the path of Imperial progress, they immolate themselves on the other horn of the dilemma, the loss of their absolute fiscal independence.

THE SOO COMPLICATIONS.

Affairs at Sault Ste. Marie are still in such a shape of chaos that it is impossible to foretell how they will end. The Soo is now feeling the effects of a policy of "carrying all its eggs in one basket," or rather, of conveying all its baskets in one wagon, which has now broken down. But in this case, in a town of the Soo's lusty youthfulness, such things cannot be helped, and cannot justly be charged against any particular unwisdom on its part. That its combined great industries may be put very speedily on the path to resumption is the hope and wish not only of those interested directly in that part of Ontario, but of the whole country, to the prosperity of which such a fiasco as that existing in the Clergue enterprises is something of a blow. It seems absurd that plants on which some fifty millions of good dollars have been spent, and which are admittedly among those of the best and most modern calibre in the world, should have to close down for lack of a little working capital, or at any rate owing to the impossibility of finding enough money to pay off a comparatively small mortgage. That the enterprise should already have earned good profits, with such a small proportion of the capacity of the plants in actual use, makes the situation peculiarly aggravating. Since the crash we have heard complaints to the effect that the originators of the plans for the Soo had made them too complete, too stupendous in their nature. However, most fair-minded people will pay but little attention to this very human habit of sneering at a dead lion—or let us hope he may be sleeping. Let them remember, at any rate, that these points in Mr. Clergue's designs, their wonderful coherence and completeness, were precisely the ones which, at the time of their first execution, received most admiration. That these allied industries should have fallen to their present low estate, and worse, that the management finds itself unable to pay arrears of wages is painful to contemplate; but an indefinite close-down would be such an overwhelming disaster, that it appears simply inconceivable that such a thing can happen, even under the present black aspect, the only view in sight.

INSURANCE COMMISSIONS.

The insurance business is one which has many sides, and many of its interests are at the first glance mutually conflicting to some extent. For example, there is the agent, a very important factor in insurance success. He has his grievances, things, at any rate, which some agents would like to see altered. In the first place, in many cases there is no restriction as to who should and who should not canvass for business. From many agents' point of view, this should not be. The person authorized to do the work should be protected, and no person should be allowed the commission except the recognized agent of the company. One of the reasons why so many agents have gone out of the business is because of the way the business is conducted at the present time, whereby everybody is allowed to canvass. So many sub-agents are appointed, and the managers of loan companies get the commissions instead of the agent who does the work. We judge of these grievances from correspondence and conversation with persons actually employed as agents.

A large manufacturing company allows one of its clerks to do all the insurance. He will go to the agent and find out "how much is in it for him." In one case we hear of, the last time a certain firm's insurance came due, forty thousand dollars of this insurance was given to an outside agent to place. The young man who gave the insurance doubtless received the benefit of the commission instead of the authorized agent of the company. This system, from an agent's standpoint, is wrong, and no company should allow it. If the business were put on a more restricted basis the agents would not be compelled to work half as hard, and they would make more money, while the companies would get better business with less losses.

THE BANK STATEMENT.

We present below a condensation of the monthly statement of Canadian banks for August, 1903. It is compared with the bank statement for the previous month, and shows capital, reserve, assets and liabilities; average holding of specie and Dominion notes, etc.:

CANADIAN BANK STATEMENT.

LIABILITIES.	Aug. 1903	July, 1903
Capital authorized	$97,046,666	$96,326,666
Capital paid up	77,617,886	77,093,666
Reserve Funds	48,289,780	48,122,212

Greatest amount notes in circulation during month	61,600,333	60,640,008
Loans to directors or their firms	10,960,294	11,209,805

DRY GOODS AND THE GERMAN SURTAX.

Dry goods are a branch of trade in which the influence of the recently imposed surtax on imports from Germany will be particularly felt. We say "will be," because in the majority of cases stocks of such goods are only now becoming exhausted and were bought before the surtax came into force. These importations mainly comprise such goods as clothing, embroideries, colored cotton fabrics, hosiery, velvets, etc., these items in 1902 totalling in value to nearly $244,000; fancy articles such as birds, fringes, lace and nettings, toys, ornaments, etc., amounting to $392,000; fur manufactures, $359,000; gloves and mitts, $165,000; silk manufactures, $363,000; wool socks, yarns and clothing, etc., $884,000. Altogether, quite an imposing list.

It is an interesting question what will be the exact effect of the additional duty on such goods coming from Germany. The difference it must needs make will certainly be marked in sufficiently large measure, and British manufacturers ought to reap considerable advantage. For an illustration, take the case of an article on which the ordinary duty would be say $10. Coming from Germany the duty would be 33 1-3 per cent. more, or say $13.33. On the other hand, coming from Great Britain, under the preferential tariff the duty would be 33 1-3 per cent. less, or $6.67. Thus, the German article would have to pay in customs duties, on landing in this country, just double what its British competitor would have to pay. Since present stocks were bought, prices for most of such lines have gone up in any case, owing to the increase of cost of raw material and of labor, and when to this is added the increased surtax, it may be justly supposed that the final price would be practically prohibitive. At any rate, it is safe to say that retailers wanting German productions in the future will only be able to obtain them at a greatly enhanced price compared with that at which their present stocks were purchased; and the probability is that some such goods he will be unable to obtain at all.

MADE-IN-CANADA.

"Made-in-Canada," is a phrase which has come up very prominently of late in connection with several functions, and it is a pleasing sign of the times that this should be the case. The day has gone by when Canadians would only wear or make use of articles produced in their own country when there were none other, and better, to be had. It is true that there are still people in this country who think it gives a fashionable or superior cast to their custom to ask for imported goods in preference; it is true also that sometimes these same people get, unknown to them, a really Canadian-made article which they give themselves the privilege of paying for at imported rates. Nevertheless, these people are growing rare, and "made-in-Canada" is being rewarded, in constantly increasing measure, with the patronage it increasingly deserves.

But there is another side to the story. Patriotic purchasing and loyalty to Canadian industries are all very well, but in order to wear well, they have to be backed up by quality; not only ordinary to fair, but by best quality. We are fully aware that Canadian manufacturers, many of them, have now brought their knowledge and their methods to such a pitch that they can well afford to invite comparison, in their best lines, with the productions of the best masters of their various arts in the world. But the cry must ever be "forward." There are keen competitors, and some of them have superior advantages. The United States for example has an immense home market which, owing to the cheapening of production caused by a proportionately large demand, makes it profitable to the manufacturer to add an absolutely perfect finish to his goods; in such a large population, too, the fountain of inventions and improved processes is perennial. We as a people have perhaps inherited the Britisher's fault of resting on our oars, of leaving well enough alone, forgetting that standing as we are is equivalent to falling back. "Made-in-Canada," therefore should be a phrase meaning the best—and cheapest that can be found; which, alas, is often far from being the actual fact.

We make these remarks in no disparaging spirit, but rather with a view to encourage still more strenuous efforts. None will admit more readily than ourselves the wonderful progress which has been made in Canadian manufactures during recent years, and none can more heartily subscribe to the doctrine contained in those three words which, rightly interpreted, mean so much to the future development of this Dominion. But because we are such believers in our own possibilities is precisely the reason that we speak of the room for improvement. A certain point of vantage reached, it is not well to waste too much time looking back and exclaiming "behold, see the distance we have come." Rather should we cast our eyes forward and husband our strength for the journey yet ahead. There should be a limit to the habit of clapping oneself on the back, even though this be pleasant. Mr. Preston recently called down a good deal of animadversion upon his head because, seeing that Canadian butter shipped to Britain was not so good as that of some other countries, he had the temerity to say so. But was not such an action more likely to lead to future perfection than if he had taken the easier course of leaving his fellow countrymen in a fool's paradise of self-complaisancy, which leads to nowhere except commercial extinction. Made-in-Canada should mean not a mere passably good article, but equal to the very best that can be made.

THE LABOR QUESTION.

During the past few days the attitude of labor, and the attitude of other parties whose interests come in contact with those of labor, have engrossed more than a usual amount of attention. At the meeting of the Canadian Manufacturers, this question of labor shared with tariff revision, the lion's share of interest. In such an assemblage of men, representing as they do industries giving employment to tens of thousands of hands, it was no wonder that this should be a problem which looms large, more especially at the present time when conditions have recently arisen which "threaten the very foundations of business stability and the happiness of thousands of homes." These are the words of the past-president, Mr. Birge, and that their import is not exaggerated will be con-

ceded by all who, having leanings either to one side of the controversy or the other, will enquire candidly into the state of the case. Perhaps it is too much at the present time to expect that there will not be occasional unfairness in the view which an individual employer may take under provocation as to the rights of his workmen to join a union. At any rate, the position of the manufacturers as a body is put very sensibly when they acknowledge not only the right of unions to exist, but admit that any labor organization which seeks by honorable means to improve the working man's position, to perfect his skill as a mechanic, and make him a more useful citizen, is doing a praiseworthy service. Can any more than this be asked? We believe that there are few employers of labor in Canada, taken at a time when they were not being harassed in body and mind by the attempts of irresponsible demagogues from the United States to run their business, but would readily acknowledge the ipso facto right of men to join together for their mutual advantage. But the trouble with the unions is that they do not always rest there; they want to manage not only their own interests, but those of the manufacturer as well. They want to have the say as to whom he shall employ, and when and how; they would limit not only the number of hours' work to be done per day, but the quantity of work done each hour. Rightly do the manufacturers judge that if the unions are given free headway, they will ruin their business; but what the unionist workmen apparently do not see is that they will ruin themselves as well.

Last week it was the opportunity of the employer. This week the other side to the controversy is given an opportunity to state its case. The Dominion Trades Congress, which met on Tuesday, in Brockville, Ont., is an important body, the delegates present representing organized labor in all parts of the Dominion. We are glad to see that it is the opinion of the president of this organization that on the whole employers and employed are coming closer together, and fully agree with him that this can be brought about more rapidly by a proper understanding of the relationship of one to another, and a due regard to the rights of each. He takes sensible ground, too, when he dwells upon the possibility of both sides meeting with honor and satisfaction to both. When the labor leaders, however, talk about the formation of employers' unions and the bitter attitude sometimes taken by them towards the unions, they should calmly ask themselves, who is to blame for that? Who started the fray? The employers, if they had let things go the way the unions were trying to force them, would ere now have found themselves with neither employees nor factories. Aggressive action on their part was rendered necessary by grasping methods on the part of labor.

Still, as intimated at the beginning, there is hope for the whole body politic so long as the respective leaders of the two great parties of capital and labor can each see so clearly the true merits of the other side as is shown to be the case in some of the recent speeches at Toronto and at Brockville. Mutual understanding is what is needed more than anything else; perhaps we should say a desire to arrive at a mutual understanding. This point conceded, we can afford to wait.

GOOD ROADS.

The loss to farmers and producers generally throughout this country, caused by the general poorness of our highways, must run up into millions of dollars every year. Wear and tear upon good horse-flesh, breakages in vehicles, certainly cut out a considerable percentage of the profit on many industries, while the value of the time wasted in trips to and from town, which on fair roadways should occupy only half the time required at present or can now only be made at the cost of ruinous depreciation of the goods conveyed, must be simply incalculable. Town and city councils, farmers, manufacturers, and people generally seem to recognize these facts, and yet it must be confessed that but little progress is being made towards a remedy. Public opinion appears ripe for the authorizing of the outlay required; yet except in a very few cases, the initial outlay is delayed. Meanwhile, the aggregate of waste—of time, energy and money—grows larger, with constantly expanding industries and population. It has for some time been realized that the various townships, county councils, and other bodies interested in the matter are at a disadvantage in finding out in detail the best and cheapest methods of road construction, and now another strong effort is being made to induce the Dominion Government to take the matter up and establish a departmental division devoted to this object, in the same way that the United States Government has already done with good results. It is a move in the right direction and we wish it full success, not only in its immediate but in its ultimate aim, for nothing conduces more to the best interests of civilization than highways which are good at all seasons of the year.

THE LUMBER TRADE.

The chief difficulty which Ontario lumbermen find at the present time in the prosecution of their business, is the absence of transportation facilities. The railroads in many cases refuse cars suitable for lumber requirements, or delay supplying them while grain shipments are so heavy. Apart from this there is no feature especially worthy of attention. Prices are steady and the demand is good, and would be better if it were not for the aforesaid obstacle. The latter applies to Quebec province as well. As to Manitoba, we hear from Winnipeg that the lumber market is scarcely so active as it was, and there is a tendency towards easing off in prices. In pine this feeling is more particularly marked, and Americans are said to be supplying requirements at prices which are a dollar or more lower than the price asked a month ago. At the same time it should be said that quotations are nominally unchanged. Spring orders are beginning to come in.

It is interesting to hear, as we do from across the line, that the exportations of sawed lumber from this country into the United States during the year which ended with June 30th last, amounted to 719,135,000 feet, valued at $10,569,066, or at the rate of $14.91 a thousand. In 1902 664,751,000 feet were imported, valued at $9,228,970, or $13.95 a thousand. In 1901 the importations were 490,571,000 feet, and the valuation $6,343, 865, or $12.93 per thousand. Thus we see that within three years there has been a notable gain in respect to both the quantity imported and the price at which it has been sold. The lumber consists mainly of pine and spruce. The increase of importations in two years, 228,305,000 feet, or over 31 per cent. An advance from an average of $12.93 a thousand to $14.91 in two years is not to be despised, though, of course, it is in a large measure offset by

enhanced cost of stumpage, labor and operating expenses generally.

We have received Farnworth & Jardine's (Liverpool), circular of 1st September, which says the arrivals from British North America during the past month have been 35,365 tons register, against 51,198 tons register during the corresponding month last year, and the aggregate tonnage to that date from all places during the years 1901, 1902, and 1903 has been 304,368, 314,067, and 308,015 tons respectively. Business for the past month has been inactive, and the quiet tone which has prevailed during previous months shows little alteration. Imports, with few exceptions, have not been excessive, the deliveries fairly satisfactory, and stocks generally are not large, but prices all round are high, and buying is restricted.

Referring more particularly to pine timber, waney has arrived more freely, chiefly on contract, and goes largely direct into consumption; stocks are moderate, and values continue very firm. Square pine has also been imported on a large scale, but the demand is rather quiet, and stocks are sufficient for present requirements; values are steady. Of red pine there have been no imports; there is only a limited demand, the deliveries have been small, and the stock is inadequate. The arrivals of oak have been moderate, and the deliveries show improvement, but the demand is inactive, and stocks are ample; prices are steady. There has been a small import of elm, and rather more enquiry; the deliveries have been fairly satisfactory, stocks are moderate, and values are firm. For ash, the demand is dull. Of pine deals, the arrivals have been on a large scale, the deliveries, however, have been fairly satisfactory, but stocks are increasing; there is little change in value to report. The demand for red pine deals shows no improvement; the stock is sufficient.

With regard to New Brunswick and Nova Scotia spruce and pine deals, the arrivals during the past month again show a marked decline as compared with the corresponding month last year, namely, 15,560 standards against 25,000 standards; the deliveries have been satisfactory, stocks are within a reasonable compass, and the improvement in value reported in our last has been well maintained. The arrivals of birch have been moderate, chiefly from Quebec; the deliveries have been fair, prices are steady, and the stock is fairly light. Planks have arrived more freely, also the deliveries show improvement, and the stock is moderate, still prices rule very low.

THE MANUFACTURERS' CONVENTION.

The annual meeting of the Canadian Manufacturers' Association, held in Toronto last week, may be described emphatically as the most successful one in the series. Our last issue contained some comment on the retiring president's address and the reception in the Parliament Buildings, and we will now proceed to give a brief resume of some of the other interesting features of the reunion. An important portion of the first day's work consisted in the meetings of various sections for the election of officers and the discussion of points of interest. The following gives the result of these elections:

Agricultural Implement Section—Chairman, H. Cockshutt, Brantford; vice-chairman, R. Harmer, Toronto; secretary, R. J. Younge. Manufacturing Grocers—Chairman, R. A. Donald; vice-chairman, W. A. Mitchell; secretary, J. F. M. Stewart. Cement Section—Chairman, J. M. Kilbourn; vice-chairman, F. G. B. Allan. Gold and Silver Section elected Thomas Rodden, chairman; George H. Lees, vice-chairman; R. J. Younge, secretary. The engine and boiler manufacturers met for the first time and elected: Chairman, R. O. McCulloch, Galt; vice-chairman, Edgar McDougall, Montreal; secretary, J. F. M. Stewart, Toronto.

The report of the treasurer of the Association showed that the total expenditure for the year had been $11,171, and that the revenue had been such as to enable it to put by a surplus of $1,798. The membership now numbers 1,272, an increase during the year just past of 270, or about 27 per cent.

The report on railway and transportation matters next came up, Mr. Thom, chairman of the committee, beginning his remarks with a statement of his own experience, in which in shipping goods from Vancouver he had had to pay 50 per cent. more than if it had been via New York. The unprecedented railroad development under way or projected in Canada was fittingly touched upon, and the principle of the new Railway Commission appointed by the Dominion Government heartily approved. The appointment of a permanent railroad expert on the Association's staff was also recommended.

The report of the Copyright Committee concluded with a resolution, which passed unanimously, that the Association strongly urge the Dominion Government to take up the question of copyright with the proper authorities in England, and press for recognition of the right of Canada to make her own laws on the subject of copyright, without which her rights as a self-governing colony are incomplete.

The subject of tariff revision came up, and, as hardly needs to be said, was one of the primary interests of the meeting. The resolution under this heading passed at the last annual meeting in Halifax was reaffirmed as follows:

That the changed conditions which now obtain in Canada demand the immediate and thorough revision of the tariff upon lines which will more effectually transfer to our workshops the manufacture of many of the goods which we now import from other countries. That, in any such revision the interests of all sections of the community, whether of agriculture, mining, fishing or manufacturing, should be fully considered, with a view not only to the preservation, but to the further development of all those great natural industries. That, while such a tariff should primarily be framed for Canadian interests, it should nevertheless give a substantial preference to the Mother Country, and also to any other part of the British Empire with which reciprocal preferential trade can be arranged, recognizing always that under any conditions the minimum tariff must afford adequate protection to all Canadian producers.

The Tariff Committee also placed themselves in opposition, except in very special cases, to the granting of bounties as a substitute for reasonable and permanent protection; also to the idea of any reciprocity treaty with the United States affecting Canadian manufacturing industries. The formation of a permanent tariff commission of experts was recommended, to have constant supervision of the tariff policy and changes. Some exception was taken to this proposition on the ground that a tariff should be looked upon as a permanency for at least five years, but the majority favored the clause as it stood. The labor question, which brought forth prolonged discussion, is referred to in another place.

The money question next came up for discussion, and the feeling of those present was in favor of taking steps to keep out the influx into this country of such large numbers of United States coins. The enactment of a Dominion Insolvency Act was again asked for. The election of officers resulted as follows: President, George E. Drummond, Montreal; first vice-president, W. K. George, Toronto; Ontario vice-president, H. Cockshutt, Brantford; Quebec vice-president, Hon. J. D. Rolland, Montreal; Nova Scotia vice-president, D. W. Robb, Halifax; British Columbia vice-president, John Hendry, Vancouver; Manitoba vice-president, E. L. Drury, Winnipeg; Northwest Territories vice-president, W. S. Fisher, Calgary; treasurer, George Booth, Toronto.

The Toronto members of the Executive Council are: Messrs. J. O. Thorn, W. P. Gundy, J. P. Murray, R. J. Christie, Frederic Nicholls, C. N. Candee, J. K. Osborne, Wm. Storie, A. W. Thomas, A. F. Rutter, A. S. Rogers, Thos. Roden, J. S. King, P. H. Burton, E. C. Boeckh, G. M. Wickett, W. B. Tindall, George H. Hees, J. W. Cowan, R. A. Donald, H. Wright and W. B. Rogers. Montreal members—C. C. Ballantyne, F. Birks, J. P. Black, S. S. Boxer, James Davidson, J. S. N. Dougall, S. W. Ewing, J. T. Hagan, Joseph Horsfall, William McMaster, D. Morrice, jr., R. Munro, G. W. Sadler, George A. Slater, William Strachan, F. W. Thompson, Howard Wilson, J. R. Wilson. Quebec Province—G. E. Aylot, G. A. Vandry, C. H. Carrier, E. B. Eddy. Nova Scotia—J. F. Stairs, H. L. Hewson, C. M. Crockett, A. Dickie. British Columbia—D. R. Ker, J. G. Woods. New Brunswick—C. McDonald. Manitoba—E. F. Hutchings. The Ontario executive is yet to be elected.

INSURANCE RUMORS FROM THE SOO.

The reports which have come to hand from Sault Ste. Marie concerning the wholesale cancelling of insurance policies held in that town, owing to the serious state of things which has arisen there, have been greatly exaggerated. It is true that the insurance companies are displaying great caution, as is only natural at a time when the moral hazard has grown proportionately so much larger than in an ordinary place and at an ordinary time. But this caution they have shown for months past, ever since, in fact, the precarious situation of affairs at the Soo became manifest to them, which it did at an early day. To speak generally of insurance in Soo property as having been cancelled is altogether beside the mark. Several companies have sent their inspectors to the scene, but many of these probably have merely gone a few days ahead of the time at which they would be making their customary visits in any case. At any rate, there has been no concerted action to withdraw insurance. That the companies have been prepared for some such state of things as at present exists is shown by the raise in rates a short while ago. Some few cases no doubt there are in which policies have been cancelled, or considerably reduced, and some more in which new insurance has been refused, but this has mainly been in cases where other companies had refused to carry the insurance any longer. This probably represents the whole extent of the truth behind the alarmist rumors which have proceeded from the Soo this week.

OUR HALIFAX LETTER.

The Halifax Exhibition, just ended, was one of the most successful held, both in point of attendance and exhibits. The weather was delightfully fine during the entire eight days, during which over 90,000 people passed the turnstiles. To Toronto, with an attendance of half a million, this may not seem very large, but it beats the record of our previous shows by several thousands. Doubtless more people would have visited the city had not farmers and orchardists been very busy harvesting their crops. Unfortunately as no grants were made the Exhibition Commission in advance there will likely be a deficit of upwards of $5,000 in the finances, which under the agreement will be made up in equal amounts by the Provincial Government and the Halifax City Council, under whose joint auspices the show is annually held.

The Provinces have received the Chamber of Commerce delegates, and much good is expected to result. Halifax extended the usual hospitalities, including a harbor excursion, a public dinner and a visit to the Provincial Exhibition.

The near approach of the winter season, and with it the increase of steamship traffic which annually results at this port, finds no improvement in the very unsatisfactory condition of the railway terminals at Halifax. Over a year ago representation was made to the Department and Government, and a number of improvements urged, but so far little or nothing has been accomplished. Some seven or eight months ago a committee of the Board of Trade reported on some elaborate changes in the pier arrangements, both at Richmond and Deep Water. A delegation of the Board of Trade visited Ottawa and interviewed the Minister and members of the Government, and brought back a favorable answer. Subsequently the Government submitted a slightly different plan, which the Board accepted, but nothing has yet been done—not even the necessary repairs have been made to prevent existing facilities from falling into decay. Not long since the officials in charge of the Immigration Department at this port reported that the accommodations for the large number of immigrants coming here each winter and spring were inadequate, and asking that enlarged quarters be constructed. It is said that owing to the limited accommodation for housing immigrants in transit permission to land has had to be withheld several hours, thus detaining steamers longer than would otherwise have been necessary. No doubt the resignation of Mr. Blair as Minister of Railways accounts for a good deal of the delay in providing the improvements so urgently needed in the terminal facilities at this port. From whatever cause, it is now apparent that our steamship interests will be compelled to suffer for another season at least.

As a millinery centre Halifax is each year coming into greater prominence. The attendance at the fall openings was large last week, and the buyers remained a longer time than usual. They were not only admirers, but very large buyers, the sales being much in advance of former years. There are now three up-to-date wholesale millinery houses here, whose buyers make semi-annual trips to European and American fashion centres, and the milliners of the Province no longer find it necessary to go abroad for their requirements. The workroom idea, where visiting milliners can remain as long as they desire and make up for themselves pattern hats from the imported models shown has proved a great convenience, and the facilities in this line now afforded are very largely made use of by milliners from provincial points.

At the annual convention of Dalhousie University last week Prof. Woodman gave an address, entitled "Ideals of Our School of Mines," in which reference was made to the appointment of Mr. F. H. Sexton as Professor of Metallurgy. The extension course, or summer mining school, held at Sydney, was very useful in preparing men seeking promotion in their calling, and will be repeated next year, possibly at Glace Bay.

The mining exhibit at the Provincial Exhibition is very highly spoken of by practical men. What is needed now is a building in Halifax, so that a permanent exhibit of the mineral wealth of the Province may be provided for the inspection of the thousands of summer visitors who annually come this way.

The collieries of the Nova Scotia Iron and Steel Co. at Sydney mines now have an abundant water supply, a pipe having been laid a distance of some four miles to tap the North Sydney supply. The contract for installing the water works system at Springhill mines has been awarded the Maritime Construction Company, of which T. A. McLean, Charlottetown, is manager. The price was over $80,000.

Fall trade conditions were never brighter. The apple crop exceeds the record for both quantity and quality. Buyers are paying $2 per barrel for the entire run of orchard, though quite a number refuse to sell, preferring to consign their fruit direct to London and Liverpool commission houses and take the result of the auction sales. All our provincial manufacturers are filled with orders, and in every department greater activity is in evidence than perhaps ever before.

Halifax, N.S., Sept. 21, 1903.

THE BENEFITS OF CONVENTIONS.

Our Nova Scotia correspondent, referring to the visit to Halifax of the delegates to the recent Chambers of Commerce Congress, mentions some incidents coming under his notice which serve to show how Canada's trade with the rest of the Empire is likely to grow as a result of such visits and such broadening of mutual acquaintance. For instance, dairy products and fish are two articles that Nova Scotia has to sell and South Africa is compelled to buy. The visit of the delegates to Halifax gave a South African importer an opportunity to get into touch with one of our largest exporters of dairy produce. Contrary to his intention, for he was closely wedded to Danish and Dutch butter, after comparing notes and qualities the South African left an order in Halifax which may lead to yet others, and open up the way for a flourishing trade between Halifax and the Cape. Before leaving this visitor became so convinced that Nova Scotia could supply products that would suit the requirements of his trade that he excused himself from attendance at one of the functions tendered the delegates on the ground that he had some business to attend to, and, visiting a fish exporter, left an order for a shipment in this line also. I have no reason to doubt that other incidents of a like nature occurred which in future years will have been proved to have been the starting of a great interchange of commodities between the two colonies. There is not the slightest reason to doubt that the visit has been similarly beneficial in other parts of Canada, and that a healthy enlargement of trade will result.

A NEW IDEA IN SCHOOLS.

The first school in Canada embodying the principles of consolidation and transportation was opened at Middleton, N.S., a little while ago. The credit of introducing the consolidated school idea into Canada belongs principally to two men, namely, Sir William C. Macdonald, of Montreal, and Prof. Robertson, of Ottawa. Sir William's earlier gifts for the advancement of education went to the universities. Following this a princely donation gave rise to the schools for domestic and mechanical science. Later his attention turned to the improvement of rural education. The first result is the school at Middleton, a consolidation of eight country school sections. The eight sections for the next three years will pay the average amount raised by them the years previous to consolidation, and all the other expenses of buildings, equipment and maintenance will come out of the Macdonald fund. Eleven vans collect the children and carry them to and from the school, the longest route being six and a half miles. Mr. G. B. McGill, the principal of the new school, together with the other Macdonald teachers, spent the past winter at Chicago, Ithaca and New York preparing for the responsible position he is now filling. He also took a summer course at Clarke's University, Worcester, Mass. The close relation which in the United States the transportation of pupils has borne to the "good roads" movement and free rural mail delivery gives additional importance to the experiment now entered upon at Middleton.

PREFERENTIAL TRADE.

Editor Monetary Times:

Sir,—During the recent Manufacturers' Convention no one followed with more interest than the writer this most important subject. It seems to me that one phase of the question of the most paramount importance has hardly been touched upon.

I make the statement unreservedly that preferential trade between Great Britain and her colonies, unless this preference be intercolonial, will be ruinous to commerce between the colonies. We would have a wheel without a rim, of which Great Britain would be the hub. It would mean the building up of great industries in Great Britain, which would consume our raw materials, to be distributed among the colonies under preferences that we cannot compete with; it would cause England to become the workshop, the factory and the foundry, while we could only chop the wood or dig in the ground for the raw material. The great development in our manufacturing industries would stop. If we attempted to carry on trade with our sister colonies, we would have to make a sacrifice of our profits to counteract the preference given to goods of British manufacture. Canada, now taking a stand as a manufacturing nation, could ill afford such a situation. The time, money and energy spent by the Government, the manufacturers and others to foster and extend intercolonial trade would soon be counteracted. Canada started the ball rolling by granting a preference to the Mother Country; South Africa, not to be outdone, has just followed suit; no doubt other colonies will do likewise. But unless this preference is made intercolonial, as well as British, it will be mistaken kindness and disastrous in its results. To make use of an analagous illustration, what would be the situation, supposing each individual State in the United States of America charged a 50 per cent. duty on all manufactured products from their sister States, while the State of New York admitted raw material free and all other States admitted goods manufactured in New York State free, putting up the duty wall against every other State in the Union. Where would the factories be? New York State could not hold them.

Would you rather sell your raw material to England, or would you prefer to sell your manufactured goods to Africa and Australia? There can be but one answer. It is time for Canada to act and take a strong stand in this matter. Let us set the example by granting to all British colonies the same or like preference that we grant to the Mother Country, and at the same time urging the necessity of this policy throughout the Empire. Drop the cry of "Canada for Canadians" (a selfish motto at the best); change it to "Canada for the Empire;" believe and stand for an intercolonial rather than British colonial preference, and we have a rim for our wheel that will make us strong and united. J. A. WELLS.

FINANCIAL ITEMS.

The Sovereign Bank has opened a branch at Belmont, Ont.

The Traders' Bank of Canada has opened an agency at Embro, Ont.

The City and District Savings Bank, Montreal, to fill the place in its directorate of the late Hon. James O'Brien, has elected Mr. Robert Archer.

The finance committee of the Maisonneuve, Quebec, council has been authorized to dispose of the new issue of $100,000 debentures on the best terms obtainable, provided it be not below par.

It has been remarked that New York will never supplant London as the financial centre of the world as long as a few money kings who control the market deliberately set to work to destroy values because they have quarrelled among themselves. The observation deserves thought.

The Molsons' Bank has elected Mr. Wm. Cassils McIntyre, as director, to take the place of the late Mr. Samuel Finley. Mr. McIntyre is one of Montreal's most prominent business men, being senior partner in the wholesale dry goods house of McIntyre, Son & Co., also president of the Dominion Woolen Manufacturing Co., besides being a director of the Windsor Hotel Co., and of the Dominion Bridge Co.

A list of the contributories of the insolvent Atlas Loan Company, just laid before the Master-in-Ordinary, at Osgoode Hall, discloses fifty-eight names of people who are liable for sums varying from one hundred to several hundred thousand dollars. We note that Mr. A. E. Wallace, president of the company, is set down as having 5,254 shares in his name, with an unpaid balance thereon of $480,400. We understand that he claims to hold a large number of these shares as agents for Ames & Co., whom he seeks to hold liable. The total amount owing is about $750,000.

Much comment has been made on the action of the Bank of England in raising the rate of discount a full point to 4 per cent., early this month. It is significant as to the peculiar financial conditions which the directors recognize as reigning in Europe, though these are altogether different from those which prevail on this continent. The Bank of England's stock of bullion and coin, at the present time, is fully $10,000,000 less than was the case a year ago, while the reserve is over $7,000,000 less. The heaviest withdrawer of coin is Germany, whose Government expenditure lately has been more than its revenue.

INSURANCE NOTES.

The Union Life Insurance Co. has opened an office at Peterborough, making three industrial companies now doing business in that city.

The formation of a Montreal Street Railway Mutual Benefit Association has been officially authorized by the Provincial Government. Its aim is to furnish the means of subsistence to members unfit for the company's service on account of sickness or bodily wounds. To provide grants for the widow, children or representatives of a deceased member, and to provide a pension for old or invalid members.

The Royal Victoria Life Insurance Company, Montreal, held a board meeting one day last week, and elected Hon. Robert MacKay as one of its vice-presidents, and Mr. Chas. F. Smith as member of the board of directors. They also took the opportunity to pass a resolution expressive of the very high esteem in which they had held their associate, the late Mr. Samuel Finley, and of the deep regret they felt in his loss.

STATEMENT OF BANKS acting under Dominion Gov't charter, for the month ending Aug. 31, 1903.

		CAPITAL			LIABILITIES

J. M. COURTNEY,
Deputy Minister of Finance

At the time of going to press last week we were unable to record the result of the election of officers for the Western Union of Fire Underwriters, who held their convention last week in Toronto. We are informed they are as follows: Mr. J. S. Blackvelder, Chicago, president; Mr. C. L. Andrews, Detroit, vice-president, and Mr. John Marshall, Chicago, secretary-treasurer. The next meeting of the union will be held the second Wednesday of April next in Atlantic City, N.J.

GROCERIES and PROVISIONS

The market for coffee, so far as futures are concerned, seems to be improving somewhat in spite of bearish cables to hand in New York from Brazil.

We hear that the steamship "Escalona" is on her way to Montreal from Denia with 1,030 tons of currants, 71,000 boxes of Valencia raisins, and 5,532 cases of Spanish onions. Another fruit boat, the "Bellona," is expected to leave Patras early in October.

The Denia market for new crop Valencia raisins has opened with prices quoted for shipment by the first direct vessel to Montreal, as follows: Layers, 25s. 6d.; selected, 23s. 6d.; fine off-stalk, 20s. 6d., and off-stalk, 19s. 6d. These figures, as compared with the opening ones of the season 1902, show a decline of 4s. per cwt., which was expected, the prospect this year being for an average yield of good quality, while last year the crop was a very small one. There has been no important change in currants. The market locally is quiet, the demand for new crop fruit being somewhat limited, with fine Filiatras offering at 14s. 6d.; Patras at 17s. 3d., and Vostizza at 21s. for shipment by first direct vessel. The Greek market at late reports was active with a firmer tone and an advancing tendency. Early cuttings of the new fruit show up very fine as to color, though somewhat disappointing in size.

DRY GOODS NOTES.

Messrs. M. Fisher & Co., of Montreal and Toronto, importers of worsteds and tweeds, are establishing commodious warehouses in Winnipeg, which will be under the charge of W. D. LeBoutillier.

A large majority of the ratepayers of Orillia, Ont., voted in favor of granting a $5,000 bonus and free site to the Dominion Linen Milling Co., Limited. The company, which has a capital of $50,000, will at once build a factory to employ 100 hands.

Millions of dollars are going into the cotton manufacturing business in the South, and New Englanders seem to be those who are chiefly supplying the capital, as they were years ago in the case of the West. High-grade investments in the South, not only in mills, but in transportation and banking enterprises, are reported to be netting 7 to 8 per cent. quite commonly.

The correspondent of the Drapers' Record, stationed in Belfast, Ireland, says that the tone of the linen market in that centre continues good, and the volume of business shows a quick, steady improvement. The reports from the different flax centres are not particularly encouraging. Prices of yarns have become more firm, and orders received are well in excess of production. Linen yarns are in greatly increased demand in nearly all numbers. Continental spinnings are also quoted at higher rates. The position of spinners may be considered as unusually strong, and any changes in rates are expected to be still further upward. Brown cloth is in growing request. Powerloom linens for bleaching have sold somewhat more freely. There is a quiet sale for cloth for dyeing and Hollands. Unions are beginning to move freely once more, the reports from the cotton market indicating lower prices. Orders for dress goods for next season are coming to hand to a satisfactory amount. Household linens are still in rather quiet demand, but damasks continue to sell steadily. Handkerchiefs are in moderate request. Export business is quietly expanding.

The Hamilton Cotton Company has sent out a circular stating advances in chenille curtains, table covers, etc., and the Penman Company has advanced some lines of half-hose.

The raw cotton market the last few days has been almost purely that of the professional speculator. Varying weather reports have conduced to this end. The highest points on September and December reached latterly were 11.48 and 10.01c., respectively; on October, November, and January, they were 10.10, 9.99, and 9.97c., respectively.

A report from Nottingham, Eng., says that September has not brought any change for the better in the prospects of the lace trade. The outlook in many branches is gloomy, and however much people try to account for it by blaming the unsettled weather, foreign competition, and the high price of cotton, they do not get any nearer to a solution of the problem—how to improve trade. The present appears to be one of the periodic fits of depression that overtake the lace trade, and doubtless it will pass away, as others have done before it.

—A permanent commercial exhibition of Canadian foods and other products is to be opened at Crystal Palace, London, next month. It is intended to provide the public of Great Britain with a much-needed opportunity for inspecting and handling Canadian goods. Arrangements will be made for the sale of samples of food products, the booking of orders for any article shown, and the free distribution of price lists and literature. The exhibit is conducted by the Permanent Colonial Exhibits Co., 15 Coleman Street, London, E.C.

—Our attention is called by "Estates Limited," Toronto, to the fact that our article of last week on various home-building concerns manifested some misapprehension as to the former's object. In the first place, they point out that the names of the officers of that concern appear on all their prospectuses. As to their plan of procedure, they inform us that their old form of contract has been withdrawn, and that now they are simply carrying on a regular real estate business, agreeing for a certain sum, payable in instalments, to build a specified house.

—Vancouver, B.C., employers are up with the spirit of the times, a spirit which has been forced on them! The employers of five hands and over have been combined into a very strong association, with J. G. Woods, president, and A. E. Goodman, secretary. The retail merchants have also combined, with A. E. Lees, president, and A. E. Goodman, secretary. The ship-owners of Vancouver also combined, with E. H. Heaps, president, and A. E. Goodman, secretary. Four newspaper publishers in the city also joined forces this week, for protection. There were previously combined the shingle manufacturers, the lumber manufacturers, the building contractors, box factories, the master plasterers and the master painters. All these different bodies are to affiliate with the employers' association, so that all employers in the city of Vancouver will be able to meet at the call of one chairman if an emergency should demand it. It is a case of more than two playing at the same game.

CLEARING HOUSE FIGURES.

The following are the figures for Canadian clearing houses for the week ended with Thursday, Sept. 24, 1903, compared with those of the previous week.

Cities	Sept. 24, 1903	Sept. 17, 1903
Montreal	$19,064,960	$20,734,036
Toronto	13,569,521	5,737,228
Winnipeg	4,450,316	4,576,660
Halifax	1,648,078	1,771,265
Hamilton	1,008,433	1,191,136
St. John, N.B	1,140,857	995,720
Vancouver	1,525,378	1,462,503
Victoria	601,417	809,542
Quebec	1,532,577	1,689,365
Ottawa	1,841,384	1,979,427
London	756,347	806,449
	$47,139,268	$51,753,381

Its Success Tells All.

Commercial.

MONTREAL MARKETS.

Montreal, Sept. 23rd, 1903.

Ashes.—Offerings of pots are still very light, and in pearls there have been no sales for some weeks past. For first quality of pots quotations still range about $5.85, with seconds at about $5.45, but for pearls it is difficult to establish any certain price.

Cements and Firebricks.—Fire bricks are dull, but a good aggregate of jobbing sales is reported in cements. We quote: Belgian, $1.70 to $1.95; English, $2.05 to $2.15; German, $2.05 to $2.25; firebricks, $16 to $22.

Dairy Products.—Cheese exports last week again reached liberal proportions, outgoing steamers taking some 64,000 boxes to London alone, and total shipments were 106,371 boxes. There was also a good export movement in butter, 19,383 packages being shipped, but as compared with last year's exports at date, are about 110,000 packages short. Cheese prices continued to advance after last writing, though the upward movement appears checked at the moment. For fine Ontarios, 12¼ to 12½c. is quoted; fine Townships, 12⅛ to 12⅜c., and from 12 to 12¼c. is quoted for Quebecs. In the butter market there has also been advance since last report, with the higher prices very fairly held. Fancy Townships creameries are held at 21 to 21¼c., with ordinary goods ranging down to about 20c.

Furs.—Prices for fall caught furs have not yet been fixed, and will not be established until the results of the London October sales are known, so that new quotations may hardly be looked for till about the middle of November. Canadian buyers, just returned from Nijni-Novgorod Fair, report very high figures asked for lambskins, with the result that purchases have been exceedingly light, as compared with former years. Squirrel, ermine and other Russian furs are also reported very high.

Dry Goods.—Some few cancellations of orders are reported from the North-West, in districts where the damage to the crops has been the more pronounced, but on the whole the business being done is of very satisfactory character. There appears to be a pretty general agreement that remittances are not quite so good as expected, and it is hard to account for this satisfactorily, but failures are remarkably few. The Hamilton Cotton Co. advises an advance in chenille curtains, table covers, etc., and the Penman Co. has advanced certain lines of half-hose. Though the Merchants' Cotton Co. has not regularly withdrawn the much criticized circular letter of a fortnight ago, advising buyers to hold back orders, in view of possibly lower prices, they are reported as actually quoting advanced figures for sheetings, pillow cottons, and other lines.

Groceries.—The cut in sugar prices, noted last week, was only put into effect by the St. Lawrence Refining Co., and as the Redpaths did not follow suit, the general quotation for standard granulated in barrels has been re-established at $4.20, with yellows ranging from $3.50 to $4; bags 5c. less. Some good business has been passing in teas, one large sale of some 1,700 full chests of Indians and Ceylons being reported. Ceylon greens are quoted a farthing up in London, and all grades of Japans are held very firmly. The combination prices for canned tomatoes and corn have at last been fixed, the figures being $1.05 for the former, and 90c. for the latter, delivered at wholesale centres,

THE CANADIAN CASUALTY AND BOILER INSURANCE COMPANY

Full Government Deposit Paid.

President:
ALEXANDER SUTHERLAND, D.D., Toronto.
Vice-Presidents:
H. N. BATE, Ottawa, Director Bank of Ottawa.
W. S. DINNICK, Toronto, Vice-Pres. and Mng. Dir. Standard Loan Co.
A. G. C. DINNICK, - Managing Director.

This Company having deposited $30,000 with the Treasury of the Ontario Government, has been duly licensed to transact the following classes of Insurance

Boiler Inspection	Personal Accident Insurance
Boiler Insurance	Sprinkler Insurance
Consulting Engineers	Elevator Insurance

The patronage of the public is respectfully requested. Correspondence with Insurance Agents and those wishing to engage in the business is invited, and will receive prompt and courteous consideration.

Chief Engineer, - - - A. M. WICKENS.
Superintendent of Agencies, - J. G. BEAM.

with 10 per cent. rebate to those who do not buy outside of the association. The "Escalona" is cabled as having left Denia on the 20th inst. with 1,030 tons of currants for this market, 71,000 boxes of Valencia raisins, and 5,532 cases of Spanish onions. The second direct fruit boat, the "Bellona," will be on the berth for loading at Patras about the 5th prox.

Hides.—Prices remain as last quoted, but it is expected lambskins will be advanced next week to 65c. A very fair business is reported in beef hides.

Leather.—Boot and shoe manufacturers are now through with fall deliveries, and are turning their attention to the getting up of spring samples, so that in the leather trade matters are comparatively quiet, but values are all steadily held.

Metals and Hardware.—There is no abatement of the activity in these lines. With regard to prices few important changes are noted. Copper is a shade easier, with the jobbing quotation now standing at 14c.; ingot tin is also a little lower at 31c. for Straits; lead steady at $3.10. Antimony has been steadily declining for some time, and has reached the lowest figure known for some time, in fact the present quotation of 7c. is said to be about the lowest on record. In pig iron, bar iron and steel there is nothing specially new. Boiler plate is steady at $2.10, and tank steel at $2.10. There has been some cutting in Terne plates, some sales of fair lots being reported at $6.50, though $6.75 is the general quotation. For Canada plates $2.45 is generally asked, and $2.40 for No. 28 black sheets, though it is claimed by fair buyers that better figures can be got.

Oils, Paints and Glass.—Turpentine continues to be very stiffly held, 85c. being the general quotation for single barrels. Linseed oil is still low. Belgian makers of glass are reported a little easier on quotations, but local prices are unchanged. In other lines there is nothing new. Quotations are as follows: Single barrels, raw linseed oil, 48 to 49c.; boiled, 51 to 52c., net, 30 days, or 3 per cent. for 4 months' terms. Turpentine, 85 cents; single barrels. Olive oil, machinery, 90c. to $1; cod oil, 35 to 37½c. per gal.; steam refined seal, 50 to 55c. per gal.; straw do., 45 to 47c.; castor oil, 7½ to 8c., for machinery; pharmaceutical ditto, 8½ to 9c.; lead (chemically pure and first-class brands), $4.85 to $5; No. 1, $4.60; No. 2, $4.40; No. 3, $4.15; No. 4, $3.90; dry white lead, 4½ to 4¾c. for pure; No. 1 ditto, 4 to 4¼c.; genuine red ditto, 4¼ to 4½c.; No. 1 red lead, 4c.; putty, in bulk, bbls., $1.80; bladder putty in barrels, $1.90; ditto, in kegs or boxes, $2.40; 23-lb. tins, $2.55; 12½-lb. tins, $2.65; London washed whiting, 40c.; Paris white, 75 cents; Venetian red, $1.50 to $1.75; yellow ochre, $1.25 to $1.50; spruce ochre, $1.75 to $2; Paris green, 14c. in bulk, and 15c. in 1-lb. packages; window glass, per 100 ft., $3.50 for first break; $3.70 for second break and $4.20 for third break; per 50 feet, $1.95 for first break; $2.05 for second break.

TORONTO MARKETS.

Toronto, Sept. 24th, 1903.

Chemicals, Drugs, Etc.—Business in the local drug trade is active, and indications point to a satisfactory fall season. Morphia continues very active, but opium, on the other hand, is falling. Quinine is firm for the present, but it is difficult to forecast what course it is likely to take in the future. Sulphate of copper is stronger. Cod liver oil is still very firmly held, but the consumption is growing less.

Dry Goods.—Fall business has been interfered with to some extent by the continued warm weather, but everyone in the trade looks forward to good business for the fall. Mail orders coming to hand already, as well as the reports of commercial travellers, scattered throughout the country, give evidence of this. No further changes have been made so far as prices are concerned, but staples, especially cottons, hold very firm, and there is hardly any chance at all of their coming down in value for some time to come.

Flour and Grain.—Great firmness prevails in the flour market, and the export demand has increased notably, though cables remain at about the same figure or very little higher than last week. Winter patents are in light receipt. Ninety per cent. patents fetch $3.05, middle freights, in buyers' bags. Choice

J. J. W. Deuchar, F.F.A., F.I.A., General Manager and Actuary of the Norwich Union Life Assurance Company, speaking of investments says:

"It may serve to indicate the great importance of obtaining a good return on the investments, if it is realized that one per cent. of increased interest on the funds of a company will, on the average, have as great an effect as a saving in expenditure equal to 10 per cent. on the premium income, while, if an office could count on realizing 5 per cent. interest in place of 3, it might reduce its premiums some 30 per cent., or double its bonuses."

Mr. Deuchar does not name THE GREAT-WEST LIFE; but the above statement exactly describes the happy position of its policy-holders.

Managers and Underwriters

brands are a little higher. Millfeed, both Manitoba bran and shorts, are higher and somewhat scarce. Not much change is to be noted in oatmeal. Wheat is unchanged, but is fairly firm. Barley is nominally unchanged. Oats are 1c. higher. Peas are from 1 to 2c. higher, and are in better demand. Rye, corn, and buckwheat are unchanged, with nothing doing. Very little grain of any sort is moving; the farmers being busy.

Fruit.—Heavy offerings of fruit have made their appearance on this market during the week, and an easier feeling has been manifested. Peaches are very plentiful at 20 to 60c. per basket, according to grade and quality. Apples are 12½ to 20c. per basket. Pears are 17½ to 30c. per basket. Canteloupes are 25 to 50c. per basket. Other quotations are: Cocoanuts, per sack, $3.70 to $5; oranges, late Valencias, $4.50 to $5; lemons, Verdilli, $3 to $3.50; bananas, 8's, $1.40 to $1.75; 1sts, $1.5 to $2; extras, $2 to $2.50; sweet potatoes, $4.50 per barrel; egg plants, 10 to 20c. per basket; tomatoes, 12½ to 17c. per basket; celery, 35 to 40c. per dozen; gherkins, 25 to 30c.

Groceries.—Sugars are moving with some degree of freedom at the changed quotations noted in our Prices Current. Canned corn, new crop, is coming forward in small quantities but cannot be obtained under 90c. New tomatoes are about $1.05. Canned salmon is almost "out of sight," the prices are so high. Lobster cannot be obtained under $1.90, and is scarce at that.

Hides and Leather.—Some improvement may be noted in the market for hides. Stocks have not accumulated to any extent, and there is a moderately good demand. The prospects for a good fall leather business are good.

Provisions.—Butter is a good deal higher in sympathy with export demand, and cheese is in the same position, the demand for both being good. The smoked meats trade is active at about the same prices. Eggs are firm and in good demand.

Wool.—Hardly and domestic fleece is

wanted for export. Stocks of pulled wool, however, are fairly well cleaned up, and little is arriving. At the London auction sale on Monday last the offerings numbered 14,007 bales. Fine grades were very firm and were taken by home and continental buyers. American representatives secured fair lines of medium and fine cross-breds at the highest rates of the series. Medium scoureds and faulty were irregular. Fine merinos sold at an advance. Cape of Good Hope and Natal scoureds sold in buyers' favor.

THE grape industry holds out a chance for the obtaining of a big prize. The American Grape Acid Association, of San Francisco, is offering $25,000 for the discoverer of a satisfactory and profitable process for extracting tartaric acid out of grapes. Tartaric acid is worth from thirty to forty cents per pound, and can be made just as well from the poorer as from the good qualities of grapes. At present large quantities are imported into the United States from abroad, and it is hoped to not only put a stop to this importation, but to improve the status of the vine-growing business as well.

What We Have We Hold!

That this Company's Investments have always been "WISELY AND PROFITABLY" made is proved by the fact that the

UNPRECEDENTEDLY SMALL LOSSES

sustained, since the organization of the Company in 1870 up to the present time, would not, all told, amount to

One-Tenth of One Per Cent.

of its present assets!

A good reason, among others, to insure in

Head Office—WATERLOO, ONT.

The Mutual Life
OF CANADA

REPORT OF THE DIRECTORS OF
THE BANK OF BRITISH NORTH AMERICA
TO THE PROPRIETORS.

The Court of Directors submits the accompanying Balance Sheet to the 30th June last.

The Profits for the Half-year, including, £3,941. 5s. 5d. brought forward from last account, amount to £36,696. 6s. 9d., out of which the Directors have now to report the declaration of an Interim Dividend of 30s. per share, payable, free of Income Tax, on the 2nd October next, being at the rate of 6 per cent. per annum, leaving a balance of £5,405. 15s. 5d. to be carried forward.

The Dividend Warrants will be remitted to the Proprietors on the 1st October next.

The large purchase of Dominion of Canada Bonds has been rendered necessary by the continued expansion of the Note circulation of the Bank, the Bonds being held for deposit with the Dominion Government as provided by Section 51 of the Bank Act, 1901. The premium paid on the purchase, amounting to over £4,000, has been written off out of the profits of the half-year.

The following appropriation from the Profit and Loss Account have been made for the benefit of the staff, viz.:—

To the Officers' Widows' and Orphans' Fund..£513. 14s. 0d.
" " Life Insurance Fund.....£400. 0s. 0d.
" " Pension Fund.....£376. 17s. 4d.

Since the last report Branches have been opened at
Toronto Junction
Rosthern
St. Catherine Street, Montreal

and Sub-Branches at
Weston (sub-branch to Toronto Junction)
Longueuil (sub-branch to Montreal)
Duck Lake (sub-branch to Rosthern)

and a new office has been opened in Sparks Street, Ottawa, the old office in Wellington Street being retained as a Sub-Branch.

London, 1st September, 1903.

NOTE.—The latest monthly Return received from Dawson City is that of the 30th May, 1903, and the figures of that return are introduced into this account. The balance of the transactions for June with that Branch has been carried to a suspense A/c. pending the receipt of the June accounts.

We have examined the above Balance Sheet with the Books in London, and the Certified Returns from the Branches, and find it to present a true statement of the Bank's affairs.

ESTABLISHED A. D. 1720.

THE LONDON ASSURANCE
Head Office, Canada Branch, Montreal.

Total Funds, - - - $20,000,000

FIRE RISKS accepted at current rates.
Toronto Agents:
S. Bruce Harman, 19 Wellington Street East.

THE
NATIONAL LIFE
ASSURANCE CO. OF CANADA

This progressive Canadian Company wants agents in Nova Scotia, Quebec, Ontario, Manitoba and North West Territories. Apply HEAD OFFICE, Temple Building, TORONTO.

Something Really New in LIFE INSURANCE.

THE
ADJUSTED INDEMNITY POLICY
ISSUED BY
The NORTHERN LIFE
Assurance Company
has no equal!

It gives the necessary Home Protection for less money than the Regular Policies. Write for Booklet explaining it.

JOHN MILNE, Managing Director.
Head Office, - London, Ont.

Continued Progress

During the last few years the North American has made marvellous strides in all Departments tending to its upbuilding, which can readily be seen by the following figures, showing a comparison of

Three SEPTENNIAL Periods

Year	Cash income	Assets	Policies in force
1881	$ 39,613	$ 88,763	$ 1,221,712
1888	263,691	666,919	7,927,564
1895	581,478	2,300,518	15,779,385
1902	1,270,840	5,010,813	30,927,961

A strong progressive Canadian Company giving excellent returns to its policy-holders, therefore making it a desirable Company for agents to represent. Three active agents wanted.

North American Life
Assurance Co., Home Office, TORONTO, Ont.

DIVIDEND NOTICE.

Notice is hereby given that a Dividend of THREE per cent. on the ordinary shares of the Company for the half year ended June 30th, 1903, has been declared, payable October 15th, to shareholders of record of September 30th.

Also that an interim dividend of TWO per cent. on the preferred shares of the Company for the quarter ending September 30th has been declared, payable October 15th, to shareholders of record of September 30th.

The transfer books for both classes of shares will be closed on and from the first to the fifth of October, both days inclusive.

By order of the Directors,
HENRY RITCHIE,
Cashier.

New Glasgow, N. S., Sept. 10th, 1903.

Mercantile Summary.

The Pacific Bottling Works, Vancouver, B.C., is a company recently incorporated, with a capital of $50,000, to buy out bottling businesses in Vancouver and Victoria, and carry on the business of brewers and maltsters.

Another fire took place at Hanlan's Point, Toronto, on the 25th ult., in which the power-house, waiting-room, and two wharves of the Toronto Ferry Co. were destroyed. Other property had a narrow escape. The loss was between $15,000 and $20,000, covered by insurance.

The Peoples Building and Loan Association,

LONDON, Ont.

The Directors have authorized the issue of

$100,000

Permanent Stock at a premium of $3 per share. Par value $100 per share. Pays dividend of 6 per cent. per annum, payable half-yearly. Also

$50,000 Debentures

payable in gold, with coupons attached, bearing interest at from 4% to 4½%, according to time of investment. Guaranteed by First Mortgages on Real Estate.

Annual Reports, Application Forms, etc., upon application.

JUDGE EDWARD ELLIOTT, President.
WM. SPITTAL, - - Secretary-Treasurer.
A. A. CAMPBELL, - - Managing-Director.

THE GREAT WEST
PERMANENT LOAN AND SAVINGS CO.,

274 Portage Ave., Winnipeg, Man.

Permanent Preference Stock of the par value of One Hundred Dollars per Share is being rapidly subscribed for at a **20** per cent. premium. This stock bears Five per Cent per annum, paid half-yearly. It also participates in the profits in excess of said five per cent. Profits paid yearly.

Five per Cent. Full-paid Stock (is an excellent investment), withdrawable in three years.

Money to Loan on First Mortgage on Real Estate on reasonable and convenient terms.

Mercantile Summary

THE Dominion Line's Boston steamers have now been formally taken over by the White Star Line.

THE Globe Casket factory, in London, Ont., was on the 25th ult. damaged by fire to the extent of $3,000.

THE Bell Telephone Company is about to erect a five-story extension to its building in Montreal, at a cost of $126,000.

SOME United States capitalists are said to be interesting themselves in a deposit of molybdenite recently discovered in the vicinity of Lac Seul, Ontario.

THE Canadian Pacific Railway has just placed an order for one million dollars worth of passenger equipment to be turned out at the Hochelaga shops. Probably this is the largest order ever placed by a railroad for passenger equipment alone.

THE Canada Atlantic Railway Company announce that, in conjunction with the Canada Transit Company, they will establish a line of passenger steamers and a series of hotels, to accommodate the constantly increasing tourist traffic pouring into the Georgian Bay, Muskoka and Algonquin Park regions.

THE Montreal Street Railway Company's net earnings for the past eleven months do not show up very satisfactorily, having been $781,025, compared with $802,295 for the same time last year. This is due to the large increase in operating expenses, these having risen from $1,040,946 last year, to $1,218,968 this year. The surplus available for dividends, for the same reason is less by $4,869.

A SOMEWHAT better demand is springing up for ocean grain space, though freights still remain low. Quotations are as follows: Liverpool, 1s., and primage September, 1s. 1½d. October; London, 1s. 4¼d. October; Glasgow, 1s. 1½d. to 1s. 3d., October; Avonmouth, 1s. 3d., October; Manchester, 1s. 3d., October; Antwerp, 1s. 3d. to 1s. 6d., October; Leith, 2s., October; Dublin, 2s. 3d., October; Belfast, 2s. to 2s. 3d., October; Rotterdam, 1s. 6d., September. There is no change in flour rates, and the demand for space is fair. We quote: Liverpool, 10s. and 5 per cent. primage; London, 9s. 9d.; Glasgow, 7s. 6d.; Leith, 11s. 3d.; Aberdeen, 15s., and Cardiff, 10s.; Belfast, 13s. 6d.; Dublin, 12s. 6d. The demand for room for provisions is good and rates show no change. Cheese—Liverpool, is 22s. 6d.; London, 25s.; Glasgow, 26s. 6d.; Leith, 25s.; Aberdeen, 25s.; Cardiff, 25s., and Bristol, 27s. 6d. Butter—Liverpool, 27s. 6d.; London, 30s.; cold storage, 45s.; Glasgow, 31s. 6d.; C.S., 46s. 6d.; Bristol, 32s. 6d.; C.S., 47s. 6d.; Leith, 30s.; Aberdeen, 30s.; and Cardiff, 30s. Hams, bacon and lard—Liverpool, 12s. 4½d.; London, 15s.; Glasgow, 15s. 9d.; Bristol, 15s.; Leith, 15s.; Aberdeen, 17s. 6d.; and Cardiff, 15s.

MANY new processes for the manufacture of rubbers have come to grief upon being tested on a commercial scale. The Atlantic Rubber Shoe Company, of Boston, however, was organized a year or two ago, for the purpose of making such goods under the H. J. Doughty patents, by which, it is claimed, they can be moulded by machinery at a saving in cost of one-third, compared with the old methods. We now hear that this company has completed the building of a large plant in Providence, R.I., to employ over a thousand hands. It has some good men behind it.

Mercantile Summary.

THE Great Northern Railway is about to build a six-story hotel in Vancouver.

THE Hamilton Oak Tanning Co., Limited, has been authorized to increase its capital from $65,000 to $125,000.

CAPT. REID, of Guysboro, N.S., is reported to have discovered an extensive deposit of hard coal of excellent quality at Fortune Bay, on the Labrador coast.

WE regret to hear of the death of Mr. Samuel Rogers, president of the Queen City Oil Company, Toronto. He was born in 1835, near Newmarket, and was a brother of Elias Rogers.

PLANS are being prepared for the erection of a large up-to-date hotel at London, Ont., to cost $250,000. We hear that a large proportion of the stock has already been subscribed by commercial men.

THE annual meetings of the Montreal Terminal and the Chateauguay & Northern railways were held last week. The old board of directors was elected as follows: Mr. Denis Murphy, of Ottawa, president; Mr. H. M. Melville, of Boston; vice-president, and Mr. J. P. Mullarkey, of Montreal, managing director.

THE British Columbia Electric Railway Company last week declared the first of its new form of dividends, by which the employees share in the company's profits. Each man was presented with a cheque for $25, and the management hope that next year this amount will be materially increased.

NEW YORK capitalists have joined together to operate the extensive plaster quarries at St. Ann's, Cape Breton. A railway five miles long will be constructed from the plaster deposits to tide water, at North Sydney. A large pier containing pockets will also be built, and steamers will be chartered to convey the product to New York.

WHAT is said to be the largest locomotive in the world is now under construction at Schenectady. It will carry a weight of 270,000 pounds directly on the six pairs of drivers, and it will have no small trucks, or bogies. This gives an unprecedented power of adhesion to the track and will obviate most of the slip that is characteristic of all locomotives which derive their traction power from the friction of propelled wheels upon a smooth steel track. This huge machine is for the B. & O. line, and is really a double engine. The three forward pairs of drivers will be attached to a rigid frame and driven by low pressure cylinders. The three rear pairs of drivers will be in another rigid frame and they will be driven by the high pressure cylinders. The two frames will be articulated together so as to accommodate themselves to the curves. The entire driving-wheel base will measure 30 feet 6 inches in length, but each of the two rigid wheel bases will measure but 10 feet in length. Its design is an adoption of one of the European types of locomotive.

Mercantile Summary.

TWIN CITY Rapid Transit Railway earnings are growing satisfactorily. The gross earnings during the year up to September 25th, were $2,750,736, as compared with $2,426,176 for the same period of last year.

CAMERON & Co., general merchants of Finch, Ont., have assigned to J. C. Milligan, of Cornwall. A. P. Cameron, the virtual owner of the business, failed in 1898, and has since done business in the name of his sister Jane Cameron.

BRIGHTMAN & Co., tanners, Peterboro, Ont., have under construction a brick addition to their tannery, which when completed, will give them twice the space they now occupy, and enable them to employ more men than heretofore.

HON. J. OUIMET and others of Montreal, have formed a company to be known as La Societe Generale de Canada, with a capital of $1,000,000, for the purpose of working, selling, dealing in mines and mining rights, smelting of minerals and manufacture of articles from the minerals, constructing mills and machinery. They will also hold and sell timber lands, and manufacture timber, sell wood pulp and articles manufactured from it, also navigate vessels in connection with the operation of their works.

FAILURES in the Province of Quebec have been few of late. Theriault & Theriault, of Griffins Cove, on the Gaspe Coast, who have only been in business since last spring in a small way, have assigned.——A. Lajoie, of St. Fulgence, on the north shore of the Gulf of St. Lawrence, who carried on a small store, with the assistance of his wife and daughter, also running a small sawmill and a trading schooner, is reported insolvent. The account has been always found a somewhat slow one.——Ludger Lacombe, general dealer, St. Victor de Tring, reported as assigned in a late number, is offering his creditors 50 cents cash.——H. Drouin, of Beauce Junction, another recent insolvent, is offering 35 per cent. on liabilities of about $3,000.

MR. GEORGE JOHNSON, the Dominion Statistician, has something to say with regard to the statement made by Mr. Thom, of the Liverpool Corn Exchange, to the effect that Canada's average export of wheat was only 6,000,000 bushels during the last six years, and that the British market the average export of Canadian wheat fields. Mr. Johnson points out that the average export o Canadifan wheat and flour to Britain during the last six years has been 21,140,000 bushels, not 6,000,000. Canada produced in 1902 96,618,272 bushels. Of this 37,000,000 bushels were exported, 8,000,000 bushels were used for seed, and at six bushels per head, which is a high estimate, 32,760,000 were used for home consumption, which would leave over 19,000,000 bushels fed to animals, etc., which might have been exported, if there had been sufficient inducement.

Mercantile Summary.

THE annual report of the Soo Railroad shows the gross earnings for the year from all sources to be $7,293,743; increase over last year, $1,036,151; operating expenses, $3,719,923; net earnings, $3,573,820; increase over last year, $257,856; fixed charges, taxes, etc., $1,909,323; surplus, $1,664,497. The officers elected are: President, Thomas Lowry; vice-president, John Martin; second vice-president and general manager, E. Pennington; secretary and treasurer, C. F Clements; auditor, C. W. Gardner.

ON Labor Day night, at the illumination of Montmorency Falls, three balloons were liberated, each one of which contained a tag—one entitling the finder to a box of Sweet Caporal cigarettes, another to a box of Glorias, and the third to a box of Red Cross smoking tobacco. A newspaper item informs us that one of these tags was found by a resident of L'Ange Gardien in the woods nearby, and has since been redeemed by the American Tobacco Co., for a box of 500 Sweet Caporals. This is the first tag reported found, and L'Ange Gardien is about seven miles from the spot at which the ascensions occurred.

IT is stated in Vancouver that the survey for the route of the proposed Coast-Kootenay Railroad is now finished, and that construction work will begin at once. The total length of the line will be 370 miles, and it will run east from Vancouver, cross the river at New Westminster, through Chilliwack, to Hope, thence to Nicola and to Mildmay, at which point it will connect with the Canadian Pacific and Great Northern.

THE Lakefield Portland Cement Co., at Lakefield, Ont., have just completed the enlargement of the works to double their former capacity. They have added 1,500 horse-power electrically developed from the falls of the Trent, which are in the vicinity. This company was one of the first to go into the cement making industry.

Laurie Corliss Engines
— AND —
Feed Water Heaters.

Ever alive to the many wants of his numerous patrons, H. W. Petrie, of Machinery Hall, Front street, Toronto, has made arrangements to carry, in addition to his already large stock, the well known Laurie Corliss Engines and Feed Water Heaters. No doubt many machinery men will be interested in this announcement, and be glad to call and inspect them at Toronto's leading machinery emporium.—Don't forget the address—Machinery Hall, 131 Front street, Toronto, near Union Station. An attendant is there up to eleven o'clock each night. No trouble to show you around.

R. M. MELVILLE, TORONTO.

Mercantile Summary.

THE Cornwall, Ont., Furniture Company's factory, built less than a year ago, was, we hear, quite seriously damaged by a wind storm, which swept over the district last week.

FROM Quebec we learn of the assignment of Joseph Shink & Co., dealers in dry goods and small wares, to Brophy Cains & Co., of Montreal. Mr. Shink was formerly one of several partners in a prominent retail dry goods concern, known as "A la Quebeckoise," who failed in July, 1902, and he subsequently started up again in business, under cover of his wife's name.

IT is reported from Ottawa, that H. W. Wilson, of late doing a retail dry goods business in the name of his wife, has become involved, and is expected to make an offer of 75 cents, on liabilities figured at about $11,000. His business record in the past has apparently been a rather checkered one. He was reported as having been closed out under chattel mortgage in 1898, and was also reported as having compromised in 1896, and as requiring indulgence on a previous occasion.

THE Berlin Robe & Clothing Co., Limited, has received an Ontario charter. Its capital is $100,000, and the provisional directors are Wm. John McMurty, of Galt; George Moore, of Waterloo; George Redpath Barrie, of North Dumfries Township; Walter Turnbull Barrie, of Milwaukee; and Robert Barrie Moore, of Waterloo. Another company which has received a charter is the Metropolitan Soap Company, with capital of $40,000, and head offices at Toronto. The provisional directors are Frederick Thomas Weir, James Watt, Abraham Cheeseman, and Frederick William Little, of Toronto, and Robert Richard Hall, of Peterborough.

THE RICHEST TRADE UNION IN THE WORLD.

The richest trade union in the world, a unique and powerful organization, is located in New York city. On account of its unparalleled success in maintaining the principles of unionism against all economic antagonists it is not usually classed among the other labor bodies, but any one who applies to it the ordinary rules of classification will see at once that it properly belongs to the trade union species.

Strange as it may seem, and prophetic of a labor millennium, this prosperous trade union actually owns its own hall—a magnificent building that cost, land and all, over $9,000,000. This beautiful "People's Palace" is located on Broad Street, and has become one of the sights of the metropolis. It is built of white marble, exquisitely carved, with tall columns supporting the front portico. The main hall, in which the union holds its regular meetings, is 144 feet long and 109 feet wide. No convenience that money can buy has been forgotten, as the members believe that labor has as much right as capital to the time-saving inventions of the present day.

This trade union hall is lighted and heated by electricity. A ventilating apparatus of the latest kind supplies it with 12,000,000 cubic feet of air every hour. To enable the members to keep in close touch with their employers, the hall is equipped with 247 miles of elec-

tric wiring, 6 miles of pneumatic tubing, and also with 1,200 telephones—one for every member. In addition to these, there are two huge annunciators in the main hall, so that if an employer wants one of the men he may be found without the loss of any valuable time.

It has often been charged that the initiation fees of trade unions are too high. Some have called down upon themselves a great deal of censure because they raised the fee to the sum of $300. But this extraordinary union which we are considering not only limits its membership to 1,200, but has succeeded in raising the initiation fee from $15,000 in 1893 to $80,000, which was the amount paid by the last successful applicant. The union cards of this labor organization are, therefore, worth the incredible sum of $96,000,000.

As may be imagined, this union is a firm believer in short hours and high wages. It discovered many years ago that eight hours a day were too many to allow a skilled worker to do his best work; and consequently kept up a persistent agitation until it reduced its working time to five hours a day—from ten o'clock until three. It has always shrewdly insisted that its members be paid a commission instead of a weekly or daily wage, and in this regulation, perhaps, is the secret of its prosperity. In the busy seasons these men frequently make from $5,000 to $30,000 a day, being the only employees in the world who can command $6,000 an hour for their services.

This union excels all other labor bodies in the strictness of its discipline. Even though it charges a fortune for admittance, it suspends or expels any member who is discovered working for less than the union rate of pay. Any

The Reason Why
Manufacturers Locate at
PETERBOROUGH.

A great American manufacturing concern recently erected in Peterborough a Canadian branch factory —having a capacity of 800 hands—for export and Canadian trade, and the following letter, written to the "Peterborough Examiner" gives the reason why.

"We notice in your issue of Saturday, September 27th, "1902, a statement by Mr.———— at the meeting of the "Peterborough Board of Trade, that we were induced to "locate here through the influence of one man.

"Please permit us to state that Mr.——— is incorrect "in making a statement of this kind, privately or publicly, "and evidently speaks without full knowledge, or, in fact, "without any knowledge whatever on the matter, and "in correcting this mis-statement permit us to assure "you and the public that our Company came here "**on account of the natural advantages "of Peterborough,** which are the **geographi-"cal location, railways,** the **water power,** "and the **Trent Canal,** which we were assured "would be shortly completed, and which, when finished "and in operation, will, in our opinion, secure to Peter-"borough all the industries that your city can com-"fortably take care of."

Peterborough now offers in addition—
Free Factory Sites and Low Taxation.

Electric Power — Lowest Rentals.
N.B.—Freight Tariff has been lowered lately at Peterborough.

one who deceives a fellow-member with regard to a job is also liable to be expelled. The strong feeling of the solidarity felt by the members of the union is shown by the fact that when they work for one another they charge only one-fourth, and in some cases one-sixth, as much as their usual rate.

Like all other labor organizations, this union has never been incorporated. It has always maintained that its word of honor was sufficient in the keeping of an agreement. It has also found that by being unincorporated it has a better control over its members, being able to expel any culprit without being dragged into the courts.

What! You say this is merely a walking delegate's dream! Not at all. The name of this most prosperous of all trade unions is the New York Stock Exchange.—Herbert N. Casson, in The Independent.

THE ATLAS LOAN COMPANY.

We have by no means heard the last of the direful consequences of queer financing in St. Thomas. At the hearing of the Atlas Loan case before the Master-in-Ordinary at Osgoode Hall this week the following somewhat startling statement was made by a retired farmer, who had been a depositor and shareholder in both that and the Elgin Loan Company:

"I have lost the savings of years, the money intended to keep me in my old age. With others who have suffered through the collapse of these concerns, we desire that you, the Master, come to St. Thomas, that all books and other documents be brought there so as to save us the expense of coming to Toronto, and that you investigate the affair to the very bottom. I, with others, believe that fraud, forgery and other offences were committed by some one or some people, and that the man now in jail was not the most guilty. In February I was told that the reserve fund amounted to $264,000, that the company did not deal in margins, and that no such dealings would be indulged in. On the faith of this statement I paid in $1,264. This has all been lost. I am prepared to swear out an information on these lines."

The list of creditors of the Atlas Loan whose claims have been proven to the satisfaction of the liquidator, total no less than 900, besides several which are unproven. There are a number of depositors' claims, which will not be dealt with until the question of the unpaid stock and other claims against said depositors are definitely arranged, These depositors' claims approximate $35,000. The claims of currency debenture holders against the company, which have been proved to the satisfaction of the liquidator, number forty, and aggregate $130,000. There are claims filed by debenture holders, but not yet approved, for $52,191, by the Elgin Loan Company $61,500, the Merchants' Bank $59,732, Huron and Erie Loan Company, London. The Elgin Loan Company hold as collateral security 375 shares of Dominion coal stock, not yet valued. The Merchants' Bank claim is in course of settlement. There are 45 claims of sterling debenture holders, who reside mostly in Scotland, totalling $60,000. One of these is the Refuge Industrial Insurance Co. for $24,333. There are about $125,000 worth of claims filed by reserve fund depositors to be dealt with yet, as well as a number of general creditors, their claims totalling $15,000.

ENGLISH VS. AMERICAN WOOLENS.

A tailor was discussing the superiority of English to American cloth. "This superiority, say what you please to the contrary, does," he declared, "exist, especially in trouserings—in those fabrics, as strong as a board and as soft as silk, for which we don't hesitate to pay eight dollars a yard. English trouserings are better than ours for the same reason that Bavarian beer is better than ours; they undergo an ageing process which we don't use, because we want to do things quickly, because we want to keep turning over our money fast. The wool used in these fabrics has aged three, four, and sometimes even five years. A manufacturing firm buys it, washes it, and stores it in well-lighted and dry warehouses for six months. Then it is taken out and washed again, afterwards being returned to its storage rooms for another half year, and so the process goes on till the wool has been freed from all life and from all impurity. This wool weaves into a cloth that is strong—without being harsh—a cloth that is at once thick and firm and soft, and that won't shrink. We could make in America just such cloth; we have the skill, and we have the machinery and the materials; but we are not willing in this country to lock money up for three or four years, and that is what must be done in the making of the best fabrics.—Philadelphia Record.

THE STOCK MARKETS.

All over the world. the financial conditions are peculiar. General business for the most part continues good, or, in the case of Europe, not markedly bad; harvests promise satisfactory returns; industries are engaged full blast. Yet the securities market is so depressed that no bottom appears to be beneath the fall of prices. In Britain, operations have been seized with a dull apathy, and even consols have been so heavy as to suggest anxious forebodings in the minds of some. In New York, in spite of tremendous efforts on the part of big interests, the industrial stocks have been steadily going down, a decline interrupted only by occasional reactions which are themselves but the prelude to still heavier breaks. The above is a statement very similar to the recent history of our own Stock Exchanges. An apparently irresistible movement downward; apparently also no real reason, in the business and industrial outlook of the country, for such a tendency !

One feature of the situation which perhaps conserves the common weal, is the fact that the speculative public is out of the market. The good advice to keep from speculating is usually given too late to be of any value—that is, when people have just been hard hit by a collapse in stocks. We would endeavor to improve upon this advice by offering it to them before the get-rich-quickly fever permeates their blood, as it is sure to do on the next rising market. As to the investing public, another class altogether from the speculative, different counsel may apply.

FINANCIAL REVIEW.

The great pressing financial question of the present time is as to the money required for moving the crops, and especially the heavy crop of the Northwest. This question has to be dealt with every August and September that comes along; but formerly it occasioned no uneasiness whatever. Up to last year the banks, taken collectively, had power to issue notes far beyond any possible requirement for this purpose. For, of course, as we showed last month, the question is one of a supply of circulating notes; for nothing else will answer the purpose. But last year a very extraordinary development transpired, namely, that the circulating power of the banks was nearly exhausted owing to the enormous demand from the Northwest. The banks very wisely determined to meet the possibility of a recurrence of this position by an increase in their capital. New capital has been actually paid in to the extent of $7,400,000. They will now, therefore, have an ample supply of currency, and be able to provide for the moving of crops without the slightest disturbance to the general monetary position. The amount of circulating power at their disposal on the 31st of August was $17,200,000—a sum which is certain to be amply sufficient. The banks, no doubt, will have provided a supply of actual bills fully equal to their additional circulating power. This question, therefore, may be considered as settled.

As to the value of the crops of the country as a whole, there can be little doubt that the quantity available for sale by the producers will bring them more money than the crop of last year. When we wrote last month, the actual outcome of the crop of the Northwest was a very uncertain quantity. The weather, as we said, might make a difference of millions, in fact, so it has. The storms have not by any means been so severe in their effects as was at one time feared. We may be thankful for that. But the damage has been sufficient to make a difference of two or three millions in value at least. The quantity, too, is not so large as last year; but the additional price will fully make up for these drawbacks; and we are still of opinion that our estimate that some forty millions of money would be realized from the whole crop of all kinds may be approximately reached. If it falls short of this, the additional value of the crop of Ontario and the other Provinces will fully make up for it.

It is absurd to fancy this enormous amount of money will all be available at once, and poured upon our money market en masse; it will be realized very gradually, during the course of the whole of the financial year now commencing; coming in from time to time

all the way on till the next harvest. But it will come in; and it will, as we have said, set a thousand wheels of finance and commerce in a hundred places in active motion. Unless some extraordinary contrary development takes place, it is sure to result in money being abundant for all legitimate business purposes for a year to come. But it by no means follows that it would be safe to discount the future for a longer period than that. To set to work and establish either business or speculative enterprises that will entail constant demands for more and more money during the next four or five years would be the very fanaticism of optimistic expectation.

We may call attention to the figures of the comparative statement of the banks. They show that the fall business had begun to move by the end of August. The changes, however, were not great. There will, however, be, undoubtedly, considerable expansion in circulation, deposits, discounts and reserves, during the fall and winter months.

THE CROPS.

Our Winnipeg correspondent wired yesterday forenoon to the following effect: Weather this past week has been ideal; threshing has been general over the whole west this past week; it is well under way and the grain is coming into the elevators in abundance. The wheat is nearly all grading 1 and 2 Northern, but with good prices prevailing, the country is coming out all right, and the farmers have little to complain of.

THE RIOTS AT THE SOO.

That to destroy property in default of receiving wages due from the owners thereof is an absurd and unwise act; that it hurts the chances for a speedy resumption of work; that it injures not only the good name of the Soo, but that of Canadians as an orderly, law-abiding people; are theses which no one will deny. However, there is another side to the story. The lumberjack is proverbially a reckless character, as the author of the "Blazed Trail" so graphically describes, and as is shown in countless histories of this greatest of pioneer industries in a new country; but he has good points; recklessness is a quality which colors both his virtues and his vices. Generous, and if necessary, self-sacrificing to a fault when well treated, his worst passions are aroused the instant he becomes conscious that he is being used as a tool or treated in any way unfairly. The management of the Soo industries knew of these characteristics, or should have known about them. Yet what have they done as their share of endeavor to minimize what at the best could only be a lamentable state of things? Nothing but promise to pay the men their arrears of wages on a certain date; cause them to gather together in the town in a dangerous state of excitement, and without adequate provision against the chance of starvation; and then calmly break the aforesaid promise. Knowing the character of the men they had to deal with, could fatuity go further? Arrangements should have been made at all hazard for paying the laborers, at any rate, by the date promised; ill-luck, or even bad financial management is a poor excuse for the company's lack of elementary precautions against the disgrace which has actually occurred.

TOO MUCH POLITICS.

Party politics may be a necessary curse, as somebody has said; the probability being that at the present time any alternative would be worse. Surely, however, this is no excuse for the obtrusion of the politician's partisan spirit into matters which cannot be described as political under any proper system of names in existence. Yet this is what is being done in this country, and it is jeopardizing its best interests. Things and influences are judged, not from the standard of what they are, but from that of their relation to one or the other of the two political parties. Two instances come to our notice at the moment. One is regarding the quality of Canadian butter. Now, on the first blush, it would appear that butter and politics were as wide asunder as the poles. Not so, however. Among the several people who, in the hope of spurring the shippers to better efforts, have pointed out that Canadian butter was often not so good as that from other countries, there happened to be Mr. Preston. This was enough for persons of the opposite political party: Canadian butter had been pronounced bad by an official of the Dominion Government; therefore, Canadian butter must be the best in the world. All this would be laughable, were it not for the fact that the real issue becomes obscured, to the possible serious detriment of a great industry.

Another illustration of what we mean comes to hand in the comments heard "on the street," as to the disastrous state of things at the Soo. According to these, Mr. Ross' Government is directly responsible for what has occurred, and it was sadly remiss in its duty in not taking upon itself to pay the men. Be this as it may, an independent observer is forced to the conclusion that the fault-finders' remarks in the vast majority of cases are prompted, not by a regard for the facts, nor by a desire to suggest a practicable way out of difficulties, but by a temptation to make political capital out of an unfortunate contretemps.

Both the above illustrations are drawn from the same political side; but we doubt not that, were the other party in power, similar remarks would apply. It is the fault of the partisan spirit which is allowed to enter into all questions however far removed they should be from politics. And meanwhile, it is the truth which suffers.

CANADIANS IN THE TROPICS.

Talking with a gentleman who has just returned frum Cuba, he told us we would be surprised at the remarkable number of Canadians now to be found sprinkled over that nascent republic. This is not so strange, however. The originator of the railroad scheme which will probably help the island to develop into the richest country for its size in the world is a Canadian, or almost one; the converters of the old time tramway of Havana into an electric system hail from Canada. Canadians are to be found, too, in Mexico, where they are engineering the biggest electrical power in the country; while Brazilians ride in electric cars introduced by Canadians, and so do fellow-Britishers in Trinidad.

We hear some people complain; Canadians, they say, should develop their own country first, and there is plenty of scope for this. True, but we have now reached to national proportions, and the sooner we realize it the better. In a population as large and strenuous as ours now is, there will always be a certain percentage whose blood calls aloud for something outside usual experience; something which appeals to the everlasting cry for new fields to conquer; people, too, who have the instinct for climates not found above the 45th parallel. It is the penalty we pay for adolescence. Mistakes will be made, but the nation will be the gainer in the end—in added knowledge, in a freer outlook on the world's affairs, in that intangible effect of culture which means gradual death to the barren spirit of provincialism. Therefore, let us not spurn the rising spirit which has carried the Anglo-Saxon race to the world position it occupies to-day.

CONDITIONLESS FIRE POLICIES.

A well-known fire insurance company in Great Britain having decided to issue a policy which shall be free from the ordinary restrictions, some papers there have begun to advocate the abolition of such in all policies. The chief reason advanced for such a suggestion is apparently on the score of popularity with the masses of insurers. No doubt they certainly would be popular, though it is a question whether the final result would be equally popular. Another thing urged in favor of the cancellation of restrictions is that they are seldom read in any case; but this, with any unsatisfactory consequences to the insured party, can hardly be laid at the door of the companies.

It must be remembered, however, that in every form of insurance very much depends upon the moral hazard, just as much probably as upon the innate dangerousness of the premises under consideration, owing to inflammability of contents, proximity to other premises of a peculiarly inflammable nature, or the risky nature of the business carried on therein. Also it is precisely a knowledge of these elements which enters into a wise placing of restrictions, or lack thereof, in any given case. And it is well to bear in mind that the very company which is referred to as having introduced conditionless policies is very careful to limit these to a few classes of risks, where certainly they are not required very imperatively. This is a very different thing from what some of the advocates of an absolutely unlimited policy are thinking of.

The fire insurance companies would, no doubt, be glad to do away with conditions, if it could be done with any degree of safety. But the very nature of the business demands them in some degree. Life insurance has now been brought to such a degree of science that it has been found possible to do away practically with all restrictions. But other forms of insurance are on a somewhat different footing. Take the casualty business, for example. If it is to be put upon a basis of value such as will appeal to the public, and offered at such price as to tempt it to purchase, limitations, and strict ones at that, are absolutely necessary. In its degree, the fire hazard is similar. Given a flat rate for all sorts of conditions, present or to appear in the future, the companies would have to make such a charge for their accommodation that the public would never be induced to insure at all. The chances for fraud are another part of the story.

THE IMPERIAL TARIFF SCHEME.

One or two readers of our article on Mr. Chamberlain last week appear to think that we are opposed to his scheme for building up the Empire. Far otherwise, however; it seems to us that something along the lines suggested is absolutely necessary if the Empire is to prosper, nay, even hold its own, against a constantly strengthening world-opposition. And it is because we recognize its vast importance, and because a slip in the wrong direction is, to our mind, fraught with such serious consequences, that we try to point out such a scheme's difficulties, rather than its advantages, which speak for themselves. Any plan that for one of its steps makes use of an alleged feeling in the colonies, which proves afterwards to have been non-existent, makes a false start, which, we believe, will do more harm not only to the plan but to the cause of Imperial unity, even than a delay of five years. Therefore, we say, make very sure of the actual feeling in the colonies, without whose favor, on its author's own showing, the scheme cannot hope for success; but he would certainly be a bold man who should declare it, at this time, that Canada either understands what would be required of her, or is willing to grant it.

Now, any revision of a tariff is attended by tremendous and by subtle difficulties, even when that tariff's walls surround one country only. The change which is welcomed by one set of manufacturers is apt to wreak havoc with the interests of another; the boon to one province or state is the blow to other parts; and mutual interests and injuries are so bound up one with another, that it needs a daring prophet to say where under-working influences begin and where they will end. If this be so in the case of one self-

contained country, how infinitely more difficult will be the task of making a tariff, however slight, for an Empire—for a vast system, the provinces of which are divided by thousands of miles of ocean, have sometimes the same, sometimes diverse products, are possessed of climates and resources and peoples, the most similar and the most dissimilar in the world The labors of Hercules were as nothing compared with the task in store for the framer of a tariff for the British Empire.

Yet we do not despair. One point is apt to be forgotten: Mr. Chamberlain has not yet actually formulated his plan; it may be different from what the public has been led to believe. One thing, however, we as Canadians have to bear constantly in mind: no amount of loyalty to the Mother Country will save us from blame attaching to any careless handling of the interests of Canada. First, let us study out the problem as it affects us here in Canada; let Australians do likewise with Australia; we can leave Great Britain to unravel the puzzle as it comes home to her; the final result will thus be the less likely to require undoing.

THE SITUATION IN FURS.

Our forecasts as to the scarcity of Persian lambs proved correct; last year's business finished with practically not a skin to be obtained. The position this season is that fine skins of every class are in keen demand in all countries, and in most cases, at increased prices. Higher prices were paid by the collectors in far-off countries; the trappers, ignorant as they are of the ordinary affairs of life, apparently being told by some instinct, that their particular commodity has become of greater value. The fur trade is cosmopolitan, and peculiarly affected by world-wide conditions. Business throughout the world has for the most part been good, which has resulted in good prices for furs, but these having reached higher values than ever before, people have thought that they would go still higher. For two years past, the Bokharans have made extra money from their lambskins. At the Nijni-Novgorod fair, however, this year, they found a check to the upward march of prices; buyers hesitated to operate. Only about 7,000 bales of Persians were bought, and of these only about 1,500 were of very high quality. All the world will want the latter; and they will not only retain their high value, but their present prices will probably look cheap by the end of the year. On the other hand, the lower grades, which form the bulk of the season's purchases, may or may not recede, according to the consumption. One thing should be borne in mind by Canadian purchasers, namely, that if they did not consume one single skin, the markets of the world would remain unaffected.

The high prices are certainly not the result of manipulation, as they are being paid both by the Russians and by the Tartans themselves. It seems probable that we, as a people, have not fully appreciated the intrinsic value of a good skin as clothing. When its warmth and durability are taken into consideration, it will be seen that the prices of the past have perhaps been pitched in too low a key. At the same time, it is likely that Canadian fur wearers will be among those most considerably affected by the present continued rise. The peoples whose greatly increased demand has largely brought about the present situation chiefly apply furs as trimmings to other materials. A rise of a dollar or two per skin does not therefore make any material difference; whereas, in the case of a fur overcoat, where a dozen or more skins come into play, the enhancement becomes very marked.

As regards linings, practically all sorts show a considerable increase in value; and Canadians are calling for these more than ever. We have referred in a previous article to the demand for automobile coats, and these interfere with our low-class trade to a certain extent. One fur which sells very well in Europe just now is Canadian mink, but complaints are heard that the standard of value reached last year was too high. So it will depend upon the profit made this season whether its prevalence will continue. It would appear risky for trappers to expect such extreme values as those of last year. It is interesting to note that a fur in considerable request in England is moleskin. The mole is a very small animal, however, and the cost of preparing the skin is high; so the spreading of the fashion to other parts is hardly probable, unless some substitute be discovered.

THE HARDWARE TRADE.

The volume of trade during the past week or two has been large, but perhaps not more so than was the case at this time last year. Prices keep very firm, but so far there have been no changes. The chief articles being ordered just now, as is natural enough at this time of the year, are guns, rifles, ammunition, etc., though deliveries have been delayed in some cases, owing to the manufacturers being rushed. The rolling mills are swamped with orders for nails, and find some difficulty in keeping pace with the demand. Lanterns, too, are in extra brisk demand. Barbed and galvanized wire were for a time a little easier owing to a slight decline in the United States, but the old prices have been re-imposed. Trade in these lines is going on quite briskly. Baling wire is still being called for. A very good sorting trade is being done, but it presents no special features.

The Canadian Wholesale Hardware Dealers' Association held their fifth annual convention in Toronto last week, when the following officers were elected: President, Mr. F. O. Lewis, Montreal; vice-president, Mr. John Bowman, of London; secretary-treasurer, Mr. Jas. Hardy, Toronto. We understand that, though a good many subjects were discussed, no important decisions connected with the trade were arrived at.

The metal trades are in a fair condition, things having now settled down to a more normal condition than was the case a little while ago, more particularly as regards pig iron. For the moment, this article is a little weak in local markets. Prices, however, remain the same. Bar iron is also easy. For galvanized and black sheets, and Canadian plates, the demand seems to be improving. Tin fluctuates from day to day. For copper, the demand is very fair. The demand for cement seems to grow each week, the price at factory remaining around $2.25.

According to the last reports from Great Britain, there was a flat market for Cleveland warrants, the closing quotations marking a loss of about 1s. per ton on the previous week. Consumers again were buying freely, and makers were being pressed to keep up their deliveries, whilst the public stores continued to be drawn upon.

As to the state of things in the United States market, the following extract from a recent article in the Iron and Machinery World, of Chicago, will give a good idea: "Everybody is scared to death, is the way one sales agent for iron and steel expresses the situation. He proceeded to

explain that buyers refrained sedulously from ordering material, not because they do not need it, but because they were led to believe that prices would decline. This condition applies generally in all buying territory, east and west, north and south. It is a temporary condition which must be followed by lively buying as soon as the consumers turn back to their requirements and cease watching the quotations of securities. There is observable in other directions a curtailment of output. Individual furnaces are beginning to blow out. Mills generally are running at slower speed, and in some instances suspensions of operations are occurring. There have been reports of reductions in the price of steel that are without foundation. At least some of these reports are put in circulation or magnified for the purpose of aiding in the bear raid on securities. In reference to pig-iron, a note of discord is the fact that the price of southern iron is lower in some of the eastern markets than in the Chicago district. Once before the southern makers made the price for seaboard delivery $1 lower than the price for Chicago delivery, for the ostensible purpose of driving out foreign iron. The discrimination was not relished by western buyers and did not last."

PRINCIPLE IN BUSINESS.

Recently there was a convention in New York of the National Educational Association, and a discussion arose out of the subject of the proper length for a collegiate course, in which several notable educational leaders took part, including President Butler, of Columbia, and President Eliot, of Harvard. One speaker, Prof. West, pointed out that the chief danger to liberal education at the present day was commercialism, the feverish pursuit of what pays, as the one end of life. There is certainly a tendency at the present day to lengthen out the educational training for a business career. And there can be no doubt that this tendency is in the right direction. Of special importance is it, in this age when business is such an important factor in the world, that those entering a business career should have some training in the principles of philosophy. Their minds should be grounded in the ethical principles which underly all right living.

The danger that threatens our business life is not dishonesty in its grosser forms. On the contrary, the old adage that "honesty is the best policy" is one of the corner-stones of business. Never was the standard of honesty higher than it is to-day. There probably is less stealing than there has ever been in any age of the world. Moreover there is a high appreciation of the value of a man's word. It has a commercial rating. But, nevertheless, modern business needs above all things a code of recognized principles that shall control men in their business relations to each other, as buyers and sellers, as producers and consumers, as employers and wage-earners. By this we do not mean a code of principles based on the law of necessity and utility, but one based upon the law of right in its higher interpretations. As business becomes more and more powerful, in fact the controlling factor in life, there needs to be, directing and restraining it, more of the higher law of justice and truth. There is manifest in commercial life an impatience and disregard of law when it interferes with the progress of the great transaction immediately in hand. There is a tendency to sacrifice all else to success. In no other way may a knowledge and appreciation of true principles be better obtained than by early instruction in an educational institution conducted on safe and sound lines.

THE LIVE STOCK MARKET.

Trade at both the Montreal and the Toronto cattle markets this week has shown considerable improvement, owing to a marked enhancement of values in Chicago. This has caused American buyers to turn their attention to the Canadian market, with the last few days' firmness, as a natural result. British cables show a very weak market, with prices tending lower. And this state of things is not improved by the high quotations for ocean freight, which, with cattle selling at 1 to 1½c. per pound lower than a year ago, is yet equal to something like 15s. per head higher than then. At the same time, the shipments of cattle from the port of Montreal have been considerably more this year than last, having been, up till Saturday last, 110,356, as compared with 52,113 for the same period of 1902. Of United States cattle shipped from Montreal so far this year, the numbers have been 40,456. The following will serve to show the run of prices, so far as the local market is concerned. It refers to choice quality; special extras fetching a little more, and common somewhat less: Export cattle, ex-choice, $4.70 to 4.80; do., choice, $4.40 to $4.60; do., others, $4.20 to 4.30; do., cows, $3.10 to 3.70; inferior cows, $2.50 to 3; butchers' picked lots, $4.40 to 4.50; do., choice, $4.10 to 4.25; do., fair to good, $3.75 to 4; do., rough to common, $2.25 to 3.10; good cows, $3.25 to 3.50; rough, do., $2.50 to 3; bulls, export, heavy, $3.50 to 4; do., medium, $3 to 3.40; do., light, $2.75 to 3; stockers, 800 to 950 lbs., $3.25 to 3.70; do., light, $2.50 to 3; do., common, $2.25 to 2.75; feeders, short keep, $3.60 to 4; do., medium, $3.40 to 3.70; do., light, $2.75 to 3; milch cows, each, $30 to 50; export ewes, per cwt., $3.40 to 3.50; do., bucks, per cwt., $2.50 to 2.5; culls, each, $2 to 3; spring lambs, each, $2.50 to 3.75; do., per cwt., $3.75 to 4.10; calves, per lb., 4c. to 5½c.; do., each, $2 to 10.

The British Board of Trade returns show that the live stock trade of that country has been materially changing of late. The chief point is with regard to the comparative shipments into Britain from Canada and the United States during the first six months of this year. The latter country sent over 32,000 less than was the case a year ago, while Canadian exports jumped from 26,776 to 68,606. It should be remembered, however, that the embargo against cattle shipments from Portland and Boston, which was the chief cause of the changed conditions, has now been removed, so that the above ratio is not at all likely to remain good British imports of live sheep from Argentina grew considerably, numbering 82,941 during the two months that the ports were opened. Those from Canada numbered 18,103, a large increase, but only a mere indication, no doubt, of what this branch of the trade might become if it were fostered.

GREAT NORTHWEST TELEGRAPH COMPANY.

The chief feature of the annual meeting of the Great Northwestern Telegraph Company, in Toronto, on Wednesday last, was the retiring of Mr. H. P. Dwight from active management, though it is pleasing to state that he will, as president, continue to take an active interest in the company's affairs. Mr. Dwight, who was born in New York State in 1828, has been connected with telegraphy practically all his life, and indeed to many is known as the "Father of Canadian Telegraphy." His successor will be Mr. Isaac McMichael, formerly manager of the Minneapolis and Northwest districts for the Western Union. He expects to take up his new position on November 1st. The statements submitted at the meeting showed that the year ending June 30th last had been the most prosperous in the history of the country. Officers were elected as follows: President, H. P. Dwight; vice-president, Adam Brown; general manager, Isaac McMichael, directors Richard Fuller, A. S. Irving, W. C. Matthews, James Hedley, H. N. Baird, Col. R. C. Clowry, Hon. Wm. McDougall; secretary-treasurer, George D. Perry; auditor, A. C. McConnell.

—The New York Credit Men's Association, who held their annual meeting last week, have now 512 members compared with 456 a year ago, and are doing a lot of admirably useful business in the community. Officers were elected as follows: President, Charles E. Meek, National Lead Co.; vice-president, Malcolm Graham, Jr., F. O. Pierce Co.; treasurer, Edw. E. Huber, Eberhard Faber.

THE COAL AND STEEL COMPANIES.

The Dominion Coal Company's shareholders met together in Montreal on the 25th ult., and ratified the action of their directors in cancelling the agreement with the Dominion Coal Company. It is believed by those interested that its prospects are rendered materially brighter by this step, though its floating indebtedness is largely increased, owing to having to pay off the Steel Company. This amount, however, is provided for by means of a two year loan. The directors acknowledge that during the period when the coal property was being operated by the Steel Company, development work was carried on vigorously, the amount expended on the property from March 1st, 1902, to July 31st, 1903, having been nearly $1,700,000. The president, Mr. James Ross, entered somewhat into the question of profit and loss as regards the cancellation of the lease. The coal company could, under its terms, re-enter upon its property after default in payment of rent, which the Steel Company could not meet, and upon such re-entry it could acquire all improvements etc. Yet the directors considered it would be best for everybody concerned to come to a friendly arrangement with the other company, thus avoiding legal complications with their losses and delays. At the same time, with the modified coal contract now made, some of the ambiguous and dangerous features of the old lease are removed. So, while a sum is paid by the Coal Company which is perhaps considerably in excess of the value of the acquired assets, yet this is offset by the immediate regaining of their property, and by the making of a new contract on more favorable terms. We gather from the statement of the company's position that the aggregate liabilities have increased to a greater extent than the liquid assets by the sum of $1,093,018.68. As against this increase there has been a capital expenditure on the property of nearly $1,700,000, and the common stockholders have received $1,500,000 in dividends. Or during the seventeen months the Steel Company was in possession of your property, the shareholders of common stock received $1,500,000 in dividend, $1,700,000 was spent in improvements on the property, and the indebtedness of the company has only been increased $1,100,000. The magnitude of the Coal Company's operations is shown by the fact that its gross earnings are at present about $8,000,000 per year, while its output of coal has doubled within three years.

On the same day took place a meeting of the Dominion Iron & Steel Company, at which the action of the directors in abrogating the lease of the Coal Company's plant was approved. Authority was also given to issue second mortgage bonds to the extent of $2,500,000, of which amount the directors have already subscribed $1,500,000. Mr. J. H. Plummer, chairman of the committee of management, explained that the lease of the Coal Company had proved disastrous to the Steel Company, because, to carry on a coal business successfully, it was necessary to carry some $2,000,000 of liquid assets. It was satisfactory to think that a corporation in the position such as that in which they found themselves had been able to sell out its assets at par. At a subsequent meeting, it was decided to pass the regular dividend on the preferred stock, due on October 1st, as the present earnings would not warrant its continuance. It is hoped, however, that with the completion of the mills and consequent increased earnings, dividends may be resumed. It, however, bears a cumulative dividend at the rate of 7 per cent.. per annum, payable semi-annually, on October and April 1st. So that while its passing will mean the immediate saving of $350,000 yearly, the relief is only temporary, as the dividends are cumulative.

OUR ST. JOHN LETTER.

The city of St. John has arranged with a Mr. McLean, a naval architect, to prepare plans for a new ferry boat. Since the inauguration of winter shipping business, traffic between the east and west sides of the harbor has grown rapidly, particularly the team traffic, and an improved ferry service has become a necessity. Mr. McLean has advised a steel boat, 140 feet long, and suggests that she be built in England, shipped out here in sections, and put together under his directions. Mr. McLean is a Scotchman, now resident in New York. For his plans the city will pay him $800, and he will get $50 each month for the expenses of a trip of inspection to see how the work of construction is progressing. The estimated cost of the ferry is $75,000. There are many in the city who think that a wooden boat, equally well adapted for the service, could be built for half the money, and they regard as very much of an extravagance the capital expenditure of from $75,000 to $100,000 that is only going to permit of the carriage of two teams more than are carried on the present boats, built more than thirty years ago. While the city has agreed to have Mr. McLean prepare the plans, it has not yet committed itself to the project of having the boat built in England, and if there are Canadian builders anxious to figure on the job, it would pay them to get into communication with the civic authorities.

There is considerable feeling among owners of private wharves in the harbor of St. John over the action of the Railway Department in renting to Messrs. Wm. Thomson & Co. a portion of the I.C.R. deep water wharf, as a terminal for the steamer Senlac, which the firm is building to run between St. John and the South Shore of Nova Scotia. The private wharf owners contend that the wharf was built for export trade, and that as the Government property escapes taxation, it should not be rented in competition with private properties. The Messrs. Thomson are pushing along the work on the steamer, and expect to launch her in a few weeks now, and to have her on the route probably before the first of the year.

The destruction last week of the river steamer David Weston has brought about some changes in the river service. The steamer Majestic, which has been running between St. John and Georgetown, has been purchased by the Star Line, owner of the David Weston, and is now on the St. John-Fredericton route. It is expected that the Star Line will build a new steamer during this winter, and will then keep the Majestic as a spare boat for picnics, etc., in midsummer, and for service in the spring and fall when it is not desirable to operate the larger boats.

A second river tragedy, more appalling than the burning of the David Weston, was threatened on Monday, when the St. John Board of Trade gave an excursion trip to the Chamber of Commerce delegates, who arrived here Saturday night. The party, about a hundred and fifty all told, including forty-five visitors and many of the leading citizens of St. John with their wives, went up river on the steamer Crystal Stream. Leaving the main river, the steamer was turned into the Kennebeccosis, a route with which the officers were not familiar. When near Rothesay a sunken rock was struck. Fortunately the steamer did not ground, but slid over into deep water. Then it was found that she was taking water faster than the pumps could throw off. Those who realized the condition of affairs said little, but devoted their energies to keeping the boat on an even keel, while the officers ran her with all speed for the dock, which was safely reached, but not before the water had risen almost to the grate bars of the furnaces. The English guests who were hurried ashore, did not realize that there had been imminent danger of sinking. Five engines and tugs had to be summoned to keep the steamer afloat, while a diver went down and made temporary repairs.

The erratic course of the Daily Telegraph on the Transcontinental railway question, has revived talk of a new Liberal paper in St. John. Recently it was to be an evening paper to oppose the Globe, because it did not endorse the New Brunswick Local Government. Now it is a morning journal that is talked of to take the place of the Telegraph, as the chief Government organ in this province. Whether or not anything comes of the talk remains to be seen, but there is at present much speculation over the future course of The Telegraph.

The fall fairs now being held in different sections of the province bear evidence of the constant improvement that is taking place in agricultural matters. The reports are

that exhibits of grains, roots, and stock are superior to previous shows, and that there are everywhere evidences that farmers are taking a deeper interest in the matter of improvement on all lines. It is significant that one New Brunswick farmer this year took his herd of Jerseys to the Sherbrooke Fair and swept the boards, defeating men who for several seasons have been carrying all before them at the St. John and Halifax exhibitions.

New Brunswick is just now being visited by many sportsmen in search of the moose, deer, and caribou, which abound in our woods. The shooting season opened on September 13th, and already St. John and Fredericton taxidermists have received many fine heads to mount. The game seems more plentiful than for years, and some unusually large specimens have been secured. The majority of those who come here to shoot are Americans, principally from Boston, New York and vicinity, and last year the Government received more than $12,000 from game licenses. An even larger amount is expected this year.

St. John, N.B., Sept. 29th, 1903. * * *

THE CANADIAN MANUFACTURERS' EXCURSION.

We have received from a member of the party of manufacturers on their way west, a postcard bearing the date September 26th, which reads as follows: "On train southward from Edmonton since 10 last night. Beautiful country—warmest receptions. Spending to-day at Calgary, tomorrow at Banff. Delightfully harmonious party of 166, of whom 48 are ladies.

"Have just come in sight of the mountains, and people are neglecting breakfast in their excitement. We publish a paper on board the train daily."

We note that the publication in question bears the euphonious title of "On-the-Go," and is "published by the single married men of the C.M.A." Needless to say, it is a journal of marvellous design.

OPPORTUNITIES FOR CANADIAN TRADE.

All the world appears to be crying out for our produce, if we will only be wise enough to snatch the opportunity while it is held out, and to nurse it when once grasped.

Mr. J. G. Jardine, the Canadian trade commissioner in South Africa, points out, for the benefit of Canadian shippers, that condensed eggs, desiccated and tinned, are attracting large sale in South Africa, where fresh eggs sell from 3s.6d. to 7s. 6d. a dozen. They consist of eggs, from which the superfluous water is extracted, and sugar added. By adding a little water and beating briskly, it is hardly possible to tell it from the ordinary fresh egg. They are packed for the South African market in hermetically sealed tins containing one pound and upwards, a pound being equivalent to fifteen eggs.

An article in a German newspaper draws attention to the opportunities offered for the sale of building material and furniture in Johannesburg, Transvaal, South Africa.

The display by the Canadian Department of Agriculture at the recent Exhibition at Osaka, Japan, has resulted in trebling the shipments of butter from the Government creameries in the northwest of the Flowery Kingdom this year. The trade with China is also developing, and the shipments to the Yukon are largely increased. There is room for a much larger expansion, however.

English cider manufacturers are interested in the prospects of being able to get supplies of cider apples from this country. They are also asking for samples of dried apples, such as supplied to continental cider makers. One Devonshire man, we hear, has the idea of establishing a cider factory in this country.

Mr. J. S. Larke, the Canadian trade commissioner in Australia, says there should be a good demand in that country for Canadian wheat and flour, owing to the long-continued drouth. Speaking of the class of goods required in Australia, Mr. Larke says they should be packed in the smallest possible space, as freight rates on Canadian goods have in some cases put them out of the market altogether. He instanced the case of a bookcase which had been shipped from New York. This had been manufactured by the American firm so that it packed into half the space that a Canadian case which competed with it on the Australian market, took, and the result was that the American article sold at from $6 to $8 less than the Canadian manufactured.

It is pointed out that Cardiff, Wales, presents splendid openings for Canadian fruit and produce, one estimate saying that 20,000 boxes of Canadian butter and over 5,000 boxes of cheese could be disposed of in that district every week.

The Canadian Commercial Agent, at Birmingham, Eng., advises his Government that in dozens of stores in that city he had not seen a single case of Canadian goods. He tells of a conversation with a large importer, that if Canadians would put up pork and beans, so that they would go on the market a little cheaper in price than Heinz's, there was an enormous market awaiting such goods in the Midlands, and so with every class of vegetables.

Among enquiries recently received are the following:

A commission merchant wishes to be placed in touch with exporters of apples, of which he could handle 1,000 barrels per week, and turkeys, of which he can handle 300 cases in feather or plucked, sixteen to a case, to arrive about 10th December. Communication is desired with manufacturers of best spruce deals 2½-in. wide preferably, delivered in Glasgow or Liverpool. A Midlands firm wishes to communicate with firms in Canada selling pork trimmings, pigs' feet, pigs' heads, chawls, ox tongues, head cheese, hog casings, etc. Wanted a representative in Canada for the sale of tubes, etc., also lamps.

A commission agent in Great Britain wants agency for sale of canned goods, cereals, flour, etc. A firm in Great Britain wishes to appoint an agent in Canada for the sale of water tube irons. Commission agent in Great Britain is prepared to handle large quantities of apples; is desirous also of opening up machinery for export and home trade. Wanted, to negotiate with shippers of poultry and fish from Canada.

A manufacturer of different classes of pottery is anxious to know in what part of Ontario or Quebec can the material be found in its raw state? A firm of lead manufacturers is willing to undertake the handling of lead from a mine, would establish works, and is in a proper shape to manufacture sheet lead, ingot and pipe, and would like to hear from some municipality in the West where shipping facilities are good. Can handle almost the entire output in Great Britain. A gentleman connected with large glass works in Great Britain would like to correspond with municipalities in Canada as to opening a factory. He is prepared to take out about 50 workmen and their families, purchase one hundred acres, and build cottages for his men.

A Yorkshire firm wants the names of Canadian houses open to buy serges direct. A Gloucester firm making a speciality of indoor and table games desires business openings in Canada. Dublin gentleman asks names of Canadian manufacturers of hosiery and woolen goods desiring representation in Ireland. Enquiry is made for the names of owners of crude asbestos mines in Canada. A Paris firm wishes to be placed in communication with producers of Canadian wood pulp and other goods desiring to be represented in that city. Would also act as buyers of French goods for Canadian houses. A Manchester firm asks to be placed in touch with Canadian producers of graphite. A Newcastle-on-Tyne firm wishes to hear from Canadian manufacturers of closet seats. Linen manufacturers are prepared to appoint resident Canadian agents.

Further particulars may be obtained by sending addressed envelope to this office.

—The Rolla L. Crain Company, Ottawa, makers of loose-leaf systems of ledgers, etc., are putting in a full equipment for the Home Savings and Loan Company, Toronto, whose inauguration under a banking charter will take place at an early day.

FINANCIAL ITEMS.

The Union Bank of Canada has opened a branch at Mount Brydges, Ont.

A correspondent informs us that the Ontario Bank at Peterboro is remodelling its premises. When the work is completed, he says, the branch will be among the finest bank offices in the Province.

The sub-agency of the Bank of British North America, at Weston, Ont., is moving into more commodious quarters. It is under the charge of Mr. A. C. Weir, and being the only bank in that locality is already proving a great boon to the whole countryside.

From one of our travelling representatives we learn that the business men of Omemee, Ont., would welcome the opening of a chartered bank in their village. There is not even a private bank, although the population is 800 and the place is prosperous.

The semi-annual report of the Bank of British North America shows that the profit for the last half year's business was £36,696, out of which the directors declared an interim dividend of 30s. per share, being at the rate of 6 per cent per annum. The reserve fund is £390,000, deposits and current accounts amount to £3,339,054, notes in circulation £522,836, total assets £8,367,468.

A new idea is responsible for the organization in Washington, of the Bank Depositors' Insurance Company, for its aim is to insure bank depositors against loss at a premium of $4 for every $1,000. From a Canadian point of view we should not think that there is very much hope of success for such a company, for it seems likely to unsettle people's confidence in the banks without the probability of obtaining any large amount of business for itself.

A cable from London says that subscriptions are invited for the Grand Trunk's issue of £750,000 four per cent. guaranteed stock. The issue price is £97 10s. per £100, 10 per cent. on application, 25 per cent. on allotment, 30 per cent. on December 1st, 1903, the balance on January 1st, 1904. The interest rate is four per cent. allowed above payments to be paid January 1st, 1904. Application, with a deposit of £10 per £100 nominal share applied for, is to be made to the Glyn, Mills & Currie Company, London.

INSURANCE NOTES.

We note that the Pelican and British Empire Life Insurance Company is now empowered to do business in this country. Mr. Alfred McDougall has been appointed chief agent for the company in Canada, with headquarters in Montreal.

Grizzly Peter—"Did yer hear about Bronco Bill tryin' to defraud th' life assurance companies?"

Hurricane Bob—"Nope, how?"

Grizzly Pete—"Got heavily insured an' then called Alkali Ike a liar."—Judge.

We understand that Messrs. G. J. F. Marter & Son have decided to continue in the position of Toronto city agents for the London and Lancashire Fire Insurance Company, of Liverpool, heretofore occupied by them. Mr. Alfred Wright, the Canadian manager, has left on a two-weeks' trip to Winnipeg, in the interests of the company.

There comes to hand this week a little booklet setting forth what is known as "The Parable of Reel-Thing." The story is interesting, and is rendered more so by the addition of several pictures which remind one of Flaxman's Homer brought up to date. All parables are supposed to have a moral, and that of this one is: Insure in the Etna Life of Hartford, from whom the book can be obtained.

The Insurance Institute, of Montreal, has made arrangements whereby members wishing to avail themselves of the examinations held by the Federation of Insurance Institutes of Great Britain and Ireland may take the papers and undergo examinations. A list of subjects and application forms containing particulars may be obtained from the assistant secretary. These examinations embrace fire, life, and accident insurance in all their aspects, and afford an opportunity to young insurance men to qualify themselves for the highest positions in the profession.

The recent increase in insurance rates in London, Ont., appears to have caused the citizens of that place to begin asking themselves serious questions. The Board of Trade is looking into the question of purchasing new fire engines and putting in a second main, which is deemed highly necessary, bearing in mind the occurrence of last spring, when the present main broke, and the city was without any real protection against fire for some time. The matter of better fire protection upon which lower insurance rates hang, is likely to be taken up by the council.

The Health Department of an American city says that female lives are 10.6 per cent. better risks than male lives, and asks why do not insurance agents take advantage of the fact? We have heard one reason why they should not, though it is hardly a chivalrous one. Briefly stated, the reason is, that women have an objection to insurance unless they have become aware that their health is in danger. According to this—whether it be true or false, we do not pretend to know—the women who insure are bad risks, and those who do not insure are good risks.

The fire last week on Toronto Island, the second serious one within a month, draws attention to the lack of fire-fighting equipment possessed by that locality. Some time ago it was estimated by Mr. R. Newman, that the cost of a steam fire barge, with pump, would be $1,500, and the cost of maintenance, including coal, not more than $4,700. Considerable civic work could be done by the barge, the revenue from which would help to offset this cost, while the crew could help in keeping the bathing places, etc., in repair, besides which it might render service in inspecting the water-front life-saving appliances. Such a vessel would render property on the Island very much safer, while it would be a valuable adjunct also to the city's fire protection.

GROCERS AND PROVISION DEALERS.

On the 24th inst., all the big Minneapolis flour mills closed down, owing to a refusal of the "loaders" to work more than eight hours per day. The millers declare that such a change would throw their whole business out of gear, and that rather than accede to the men's demands they will close the mills indefinitely. About 2,000 hands are affected, and this number may be increased largely by trouble with the coopers, baggers, and bakers of the city.

A London report of 18th ult., re Canadian butter, stated there was a good healthy demand, especially for fresh arrivals and saltless, which was in light supply. An early rise in prices was expected. Choicest salt was fetching 95 to 96s., with occasionally a shilling more. Saltless 98 to 101s.; finest salt sold at 93 to 94s. For Canadian cheese, in spite of the high prices which are 5s. in excess of last year, a good demand existed.

Late reports from Essex county speak of the probability of a short crop of tobacco this year, owing to rot in the young plants, and bad weather conditions. It is now estimated that the yield will not go much beyond 700,000 pounds, as against 1,000,000 pounds last year. The quality is also said to be poor, though prices are likely to be kept up in spite of this fact, by the shortage.

DRY GOODS NOTES.

Halifax mercantile circles are lamenting the death of Mr. John Murphy, senior partner in the wholesale dry goods firm of J. & M. Murphy, which took place in the sixtieth year of his age. The deceased was a director of the People's Bank of Halifax.

Probably few people realize the extent to which the desire to enlarge the cotton supply is making itself manifest in different parts of the world. Especially is this the case in the British West Indian colonies. British Guiana, too, is another country in which the culture of cotton is receiving serious consideration. That it is admirably adapted to the

industry is proved by its past history, which shows that at one time the colony exported 10,000,000 pounds annually. A Cotton Growers' Association has been organized, and everything points to success.

The Dominion Cotton Company has issued a circular advising an advance of from 5 to 12½ per cent on all the products of their Hochelaga mill, including grey and bleached sheetings, pillow cotton, quilts, towels, yarns, and warps.

The offerings at the London wool auction sales on the 28th ult. amounted to 12,899 bales, including a large supply of medium grades. Competition was spirited and prices were maintained. Faulty scoureds were rather irregular. Slipes were in keen demand. Cape of Good Hope and Natal grades were in fair request, and several parcels of first greasy three-quarter breds were taken by American buyers.

The New York Dry Goods Economist says that the radical decline in China exchange has not been followed as yet by proportional concessions in raw silk in the Canton and Shanghai markets. Steam filatures continue higher than comparative grades of European silks, and tsatlees are proportionally higher than other varieties. The tendency is in the buyers' favor on other China and Canton silks, and recent cables are said to have contained some offers very close to buyers' ideas. The outlook is for an early resumption of business in these silks. The Japanese silks have been the only active varieties again. They are the only silks that have sold for distant delivery, yet the few transactions of this sort that have been consummated have been put through at close to spot prices.

—Latest reports say that Mr. Clergue has arranged with the Soo banks, through the mediation of the Ontario Government, to pay the men in full at once.

—In England an association has been formed under the name of the Institute of Directors. Its objects are to afford a means of communication between directors of public companies, on matters of mutual interest; to arrange meetings for reading of papers and the discussion of topics relative to directors' duties and responsibilities; to watch over company legislation and promote what may be desirable as well as endeavor to check what would be injurious, and to collect literature of value to directors.

—The Dominion Association of Chartered Accountants held their annual meeting in Montreal last Saturday. It was decided to hold, some time this year, a conference as to what should be the attitude of accountants with respect to prospectus figures, the sufficiency of published financial statements, the treatment of goodwill and other questions. The following officers were elected for the coming year: President, John Hyde, Montreal; first vice-president, W. H. Cross, Toronto; second vice-president, A. W. Stevenson, Montreal; treasurer, John MacKay, Toronto; secretary, A. F. C. Cross, Montreal; council—Henry Barber, Toronto; John C. Browne, Ottawa; W. Simms Lee, Halifax; F. S. Sharpe, St. John, N.B.

—As the aftermath of what will perhaps prove to have been the historical Congress of Chambers of Commerce of the Empire, at Montreal, the delegates, on their return from an eye-opening trip through Western Canada, were tendered a reception in Montreal by the members of the Chambre de Commerce. The welcome which was extended the delegates was not so different from many which they have received in some of the other parts of Canada, but was significant in that it showed forth the feelings of an important section of the Dominion's population; a section speaking another tongue, but living in peace and good-will with the majority, under the protecting folds of the British Flag.

—A timid advertiser will never be a successful advertiser. The moment a merchant goes into an enterprise in a half-hearted spirit, he chills the iron which ought to be struck when it is hot, and kills all chance of shaping the metal to the form of success. Only courage and enthusiasm will impart the magnetism so essential to satisfactory results, and if an advertiser does not possess these he would better be content with the small triumphs to be gained in the most conservative channels. "Be bold, be bold, be bold," was originally applied as the course to be adopted for those desiring success in politics and war, but never was it more applicable than to-day as the proper policy for the man who would win success in business.—Printers' Ink.

—Alderman Spence, of Toronto, has a scheme for buying the street railway. He suggests that the amount of money received in percentage from the railway, over and above that required to pay the interest and sinking fund on the street railway pavement debt, should form a fund for the purchase of the line at the expiration of the present franchise eighteen years hence. The money paid by the city as allowance for track pavement last year was $962,666 gross, $708,019 sinking fund, and $254,647 net. It is estimated that the city's revenue from the street railway this year will be about $260,000, several thousands more than the net pavement debt. For that matter it will not be long before this debt is practically wiped out. The result will be that the city's net revenue from the street railway franchise will be $225,000, or considerably more if the company's receipts continue to grow as they have done in the past. Mr. Spence's conclusion is that at the time the Toronto Railway Company's agreement expires, the city will be in possession of $4,000,000, with which to purchase rails, plant and equipment.

THE CANADIAN MERCHANT MARINE.

According to a list recently published by the Dominion Department of Fisheries and Marine, the total number of vessels on the registry books on December 31st last, was 6,836, of 652,613 tons register; which is an increase of 44 vessels, and a decrease of 11,870 tons register compared with 1901. Assuming the average value to be $30 per ton, the value of registered shipping last December would be $19,578,390. Of these, steamships numbered 2,289, their gross tonnage being 303,353 tons. The port having the largest number of vessels on its register was Quebec, with 654, of which 500 are sailing vessels, while Montreal has the largest tonnage, 91,347, and Toronto, the largest number of steamers, 240, which is an increase of twenty over the previous year. The number of new vessels built and registered last year was 316 of 30,216 tons register, and of a total value, estimating the new tonnage at $45 per ton, of $1,359,720. Of these 140 were built in Nova Scotia, 60 in Ontario, and 36 in British Columbia. Among the chief owners of tonnage, Canada stands eighth among the nations; Great Britain, United States, Germany, Norway, France, Italy, and Russia being before her.

CLEARING HOUSE FIGURES.

The following are the figures for Canadian clearing house for the week ended with Thursday October 1st, 1903, compared with those of the previous week:

	Week Ending Oct. 1st, 1903.	Week Ending Sept. 24th, 1903.
Montreal	20,097,708	19,054,960
Toronto	14,529,774	13,569,521
Winnipeg	4,593,061	4,450,316
Halifax	1,630,282	1,648,078
Hamilton	772,142	1,008,433
St. John	965,007	1,140,857
Vancouver	1,519,364	1,525,378
Victoria	512,815	601,417
Quebec	1,239,530	1,532,577
Ottawa	1,429,098	1,841,384
London	794,116	756,347
	$48,082,897	$47,139,258

JOSEPH MARTINEAU, hardware retailer, Montreal, has assigned. He first began business in the spring of 1899, in succession to his father, who has accumulated a fair competence. He, however, failed in October, 1900, and an arrangement was then made by which the father agreed to take over the liabilities, and settle the same on extended terms.

THE following list gives a record of the patents which have been granted to Canadian inventors in this country and the United States: A. Blake, moulds for casing brake shoes; W. J. Walsh, book holders; T. E. McCollum, car brakes; E. Michaud and C. Desjardines, bouquet holders; G. V. Gzowski, mould boards of ploughs; H. J. Anderson, pneumatic stackers; F. W. Fryer, heat non-conducting joints for handles of metallic vessels; J. Standinger, harrows; J. A. Williams, cattle guards; A. R. Bissett, coal bucket releases; J. S. Scott, hot water coolers; E. A. Manny, canal lock gates; H. Hamelin, baby gates; W. Cross, washing and drying apparatus for photographic films; W. Byrd, machines for cutting and welding pipes, tubes and flues; A. A. Dickson, peat presses; J. Dudley, propellers for vessels; W. G. Anderson, display cabinets; M. H. Miller, process of sugar making; I. W. W. Plewes, advertising devices for vehicles; J. H. Thomas and B. Broughton, power hammer; E. T. Tolhurst and W. Wilson, incubators and brooders; W. Cox, vibrators; J. Armstrong, hinges; J. S. Leitch, packages for holding salted peanuts; J. L. Kieffer, needle guide mechanism for sewing machines; T. Tetreault, medicinal compound to be used as an anticholeric; S. E. Chapleau, refrigerators or cold storage structures; J. Brissette, hot water heaters; A. E. Henderson, roller bearings; A. M. Crunican, air motor or windmill; O. Zeph, stoppers; G. Graham, devices for shifting threshing machine bodies; A. G. Roberts, car fenders; C. W. Stokes, sectional cookers.

KAY'S | Canada's Greatest Store for Floor Coverings. | KAY'S

The Very Best Floor Covering

FOR YOUR OFFICE

is our linoleum and cork carpet. As floor coverings for public buildings or offices, these are absolutely unsurpassed. They are easily kept clean, hygienic, and with good wearing qualities. We can supply a neat, attractive design for the smallest office or the largest public building. Carrying an immense stock, as we do, we are able to quote most satisfactory prices. In planning the decoration of your offices consult us, and see our display.

We have an immense showing of office and library furniture such as you will find nowhere else in Canada. There is so much that is new and distinctive in our stock that you cannot fail to appreciate its worth.

JOHN KAY, SON & CO., Limited
36-38 King St. W., Toronto, Can.

THE SOVEREIGN LIFE ASSURANCE COMPANY OF CANADA

AUTHORIZED CAPITAL $1,000,000.
INCORPORATED BY SPECIAL ACT

FULL GOVERNMENT DEPOSIT.
HEAD OFFICE, TORONTO.
OF THE PARLIAMENT OF CANADA.

A. H. HOOVER, PRESIDENT.
R. SHAW WOOD, 1ST VICE-PRESIDENT.
WILLIAM DINEEN, 2ND VICE-PRESIDENT.

ROBERT E. MENZIE, TREASURER.
ALEX. DAVIDSON, M.D., MED. DIRECTOR
SIDNEY H. PIPE, ACTUARY.

THE Accumulation Policies issued by the Sovereign Life Assurance Company of Canada are absolutely free from conditions, and guarantee the most liberal Extended Insurance, Paid-up and Loan Values annually, after being two years in force. First-class contracts can be secured by reliable energetic men as Managers, District and Local Agents throughout the Dominion. Address with full particulars and references.

A. H. HOOVER, President and Managing Director.

The Enormous sale of

OLD CHUM

Cut Plug

Smoking Tobacco

Proves its Superior Quality.

NEW ENTERPRISES.

Local London, Ont., capitalists have joined together for the purpose of establishing a hide glue factory in the north side of that city.

Messrs. Hogg, Carmichael and other Collingwood parties have organized a company, with a capital of $90,000, to build a furniture factory at that place, to employ between 100 and 150 men. Some of the contracts for buildings, machinery, etc., have already been awarded.

Mr. A. W. Fraser, of Ottawa, is said to be at the head of a syndicate recently formed in Winnipeg to put up a million dollar flour mill at Keewatin, having a capacity of 3,000 barrels per day.

The St. John, N.B., Ladder Company have secured the rights for the wagoner patent extension ladder for the Maritime Provinces, and will erect a factory in the above-named city for its manufacture.

Barrie ratepayers have declared themselves in favor of granting a loan of $20,000 to the Barrie Carriage Company, in addition to a free site, water and light for twenty years.

The Grand Trunk Railroad has decided to erect large shops at Allandale, Ont. A site has also been purchased for extra yard accommodation, and for the erection of coal chutes of large capacity.

FROM THE ENEMY'S VIEW-POINT.

A Buffalo correspondent of the Marine Review, referring to the manner in which the St. Lawrence route has been cutting into the grain trade of eastern ports makes the following remarks: "If the roads were grasping all the grain at a low rate, as they were till lately, there would be little for the canal to do and there would be no cry that the St. Lawrence route was taking all the grain. Some good people are saying that the new scare is a good thing, as it shows the average business man the need we have of an enlarged canal, but it of course has no impression on the farmer, who is the chief opponent of the project. He does not want to help the cities in any way lest they run away from him still further. The vote is pretty sure for canal enlargement though. There is an effort to shut off the Montreal route by the reduction of 1 cent a bushel on export rail grain from Buffalo, but that is hardly enough to accomplish it, as there is a rate of 3 cents against us. The canal has reduced its rate only ½ cent, which shows that there is a belief that there will be grain enough to keep the little fleet busy at that figure. With the 1,000-ton barge ready to carry grain at 1 cent a bushel—the cost is figured at only about a half cent—there would be no Canadian route possible. This is really the first time that the Canadian route has made any inroads upon us. It would be very interesting to know just how much money had been spent by the Canadian Government to accomplish this advantage. It is an advantage, too, that can be snatched away at any time, without the aid of a canal, for the roads used to carry for 2 cents the grain that they have asked 5 cents all summer for, out of this port to tide water. Of course, the canal boatmen starved then and they would again, if anything like it should be repeated."

THE CANADIAN CASUALTY AND BOILER INSURANCE COMPANY

Full Government Deposit Paid.

President:
ALEXANDER SUTHERLAND, D.D., Toronto.

Vice-Presidents:
H. N. BATE, Ottawa, Director Bank of Ottawa.
W. S. DINNICK, Toronto, Vice-Pres. and Mng.-Dir. Standard Loan Co.
A. G. C. DINNICK, - Managing Director.

This Company having deposited $30,000 with the Treasury of the Ontario Government, has been duly licensed to transact the following classes of Insurance

Boiler Inspection — Personal Accident Insurance
Boiler Insurance — Sprinkler Insurance
Consulting Engineers — Elevator Insurance

The patronage of the public is respectfully requested. Correspondence with Insurance Agents and those wishing to engage in the business is invited, and will receive prompt and courteous consideration.

Chief Engineer, - - - A. M. WICKENS.
Superintendent of Agencies, - J. G. BEAM.

Commercial.

MONTREAL MARKETS.

Montreal, Sept, 30, 1903.

Ashes.—Owing to the extreme lightness of supply prices of first pots are again firmer, and as high as $5.95 has been paid for desirable lots. Neither in second pots or pearl ashes have any recent transactions been reported.

Cements and Firebricks.—A good sorting business is reported in cements; bricks are dull. Receipts last week were 5,000 bbls. and 18,300 bags of Belgian cement, and 35,000 firebricks. For week ending to-day receipts are 640 bbls. and 22,192 bags of Belgian and German cement, 656 bbls. of English cement, and 82,956 firebricks. Prices are steady.

Dairy Products.—Butter shipments to Britain last week were quite liberal as compared with figures of former weeks, aggregating 30,216 pckgs., but the total for the season thus far is still 114,000 pckgs. short of the figures a year ago at this date. Cheese shipments keep up well, 79,504 boxes having been exported last week, and the total for the season is 1,818,231 boxes, being 321,000 boxes ahead of the figures just a year ago. The steady late advance in cheese appears to have reached its limit, and the market is showing a little easiness, though choice Westerns are still quoted at 12 to 12¼c. on spot; Townships, 11⅞ to 12⅛c.; Quebecs, 11½ to 11¾c. Butter quotations showed some stiffening after last writing, and, though enquiry from abroad has apparently been checked by the higher prices, still the market may be called a pretty firm one at 21¼ to 21¾c. for fancy Townships, with good to fine ranging from 20½ to 21⅜c.

Dry Goods.—Wholesale business continues of a satisfactory character, and city retailers report a good trade except on the occasionally warm days. Failures are remarkably few, and thus far few applications for renewal favors on paper maturing the 4th prox. are noted. Under date Sept. 28th the Dominion Cotton Co. advises an advance ranging from 5 to 12½ per cent. on all the products of their Hochelaga mill, including grey and bleached sheetings, pillow cotton, quilts, towels, yarns and warps.

Groceries.—A good seasonable movement is reported in this line. Recent cables advise a strong upward tendency in Valencia raisins, the quantity of full standard fruit being short of the estimates first made. Malaga fruit is also much firmer, owing to increased demand arising from the fact that California Muscatels are very high in price this year. Currants, which were a little off, have recovered to the highest point of the season. Sultanas remain cheap. It is yet too early to quote figs, but comparatively few Comadres will be brought in this year, owing to surplus stocks being carried over. For sugars there is continued good demand; prices remain as quoted last week, and outside

BLIND

Typewriters are out of date. The manufacturers of these machines know it, and are struggling hard to incorporate "visible writing" in their machines. Meantime business men appreciate the merits of the **UNDERWOOD**, and, as a result, our business has almost doubled.

J. J. W. Deuchar, F.F.A., F.I.A., General Manager and Actuary of the Norwich Union Life Assurance Company, speaking of investments says:

"It may serve to indicate the great importance of obtaining a good return on the investments, if it is realized that one per cent. of increased interest on the funds of a company will, on the average, have as great an effect as a saving in expenditure equal to 10 per cent. on the premium income, while, if an office could count on realizing 5 per cent. interest in place of 3, it might reduce its premiums some 30 per cent., or double its bonuses."

Mr. Deuchar does not name THE GREAT-WEST LIFE; but the above statement exactly describes the happy position of its policy-holders.

markets for raws are reported firm. The canners' combination has declined to book further orders for tomatoes and corn until it is more definitely seen how the crop turns out. It is said some of the smaller packers in this province have asked $1.25 for tomatoes.

Hides.—As anticipated last week, lambskins have been advanced, the present figure being 60 to 65c. In hides there has been no change of late.

JOHN A. ROSS, - - - - - Inspector.

Leather.—Trade in this line is still comparatively quiet, local shoe manufacturers not being free buyers as yet. Quebec manufacturers also are not in the market to any degree, as jobbers have not yet placed orders to any extent for spring footwear. Prices in all lines are well sustained.

Metals and Hardware.—Good business is reported by all dealers in these lines. As regards values, few changes are reported. Ingot tin has shown further easing off, and is now quoted at 29½c. in a jobbing way for Straits; copper steady at 14c., and lead at $3.10. Antimony continues to rule low at 7c. It is reported that cast iron, steam and hot water fittings, of which considerable quantities are imported from the United States, are being offered at considerably lower prices. Pig iron inclines to easiness. No. 1 Summerlee is quoted at about $20, and No. 2 at $19.25 to $19.50. There is little English iron available owing to a scarcity of tonnage from shipping ports. The new furnace at Londonderry is not yet blown in, but is expected to be in blast shortly. Bars are steady at $1.90 to $1.95; bar steel, $2.10, and cast steel 7½ to 7¾c.

Oils, Paints and Glass.—Orders are said to be coming in well. There is no improvement in the linseed oil market and cut prices still prevail. Fish oils very dull. Turpentine firmly held at high prices. Stocks of glass rather low, but full new supplies are about due. Quotations are as follows: Single barrels, raw linseed oil, 48 to 49c.; boiled, 51 to 52c., net 30 days, or 3 per cent. for 4 months' terms. Turpentine, 85 cents; single barrels. Olive oil, machinery, 90c. to $1; cod oil, 35 to 37½c. per gal.; steam refined seal, 50 to 55c. per gal.; straw do., 45 to 47c.; castor oil, 7½ to 8c., for machinery; pharmaceutical ditto, 8½ to 9c.; lead (chemically pure and first-class brands), $4.85 to $5; No. 1, $4.60; No. 2, $4.40; No. 3, $4.15; No. 4, $3.90; dry white lead, 4½ to 4¾c. for pure; No. 1 ditto, 4 to 4¼c.; genuine red ditto, 4¼ to 4½c.; No. 1 red lead, 4c.; putty, in bulk, bbls., $1.80; bladder putty in barrels, $1.90; ditto, in kegs or boxes, $2.40; 23-lb. tins, $2.55; 12½-lb. tins, $2.65; London washed whiting, 40c.; Paris white, 75 cents; Venetian red, $1.50 to $1.75; yellow ochre, $1.25 to $1.50; spruce ochre, $1.75 to $2; Paris green, 14c. in bulk, and 15c. in 1-lb. packages; window glass, per 100 ft., $3.50 for first break; $3.70 for second break, and $4.20 for third break; per 50 feet, $1.95 for first break; $2.05 for second break.

TORONTO MARKETS.

Toronto, Oct. 1, 1903.

Chemicals, Drugs, etc.—The volume of trade being done in local drug circles is fair; prices remain steady, but there is no very special feature to report. Quinine and opium are both in moderate supply. British reports speak of a fairly good export demand for some lines, but domestic wants are of a hand-to-mouth order.

Flour and Grain.—The firmness in flour continues, and, indeed, the tendency is still towards higher prices. Car lots of ninety per cent. patents fetch $3.05, in buyers' bags, middle freights, with extra brands a little higher. Millfeed is firmer, while oatmeal is steady. Ontario wheat has gone down from 1 to 2c., while Manitoba is dull at unchanged quotations. Barley and oats are 1 to 2c. lower, and dull at the decline. Peas and rye unchanged. Not very much is moving.

Fruit and Vegetables.—Arrivals of fruit are gradually falling off, but the demand continues good and prices keep steady. Peaches are plentiful, and sell at 20 to 35c. Grapes are now coming in in large quantities. Cape Cod cranberries sell at $9 per bbl. Other prices may be quoted as follows. Cocoanuts, per sack, $3.70 to $5; oranges, late Valencias, $4.50 to $5; Jamaica oranges, $6.50 to $7 per bbl.; lemons, Verdelli, $4 to $4.50; bananas, 8's, $1.50 to $2; firsts, $2 to $2.50; extras, $2.50 to $3; sweet potatoes, $3.75 to $4 per bbl.; tomatoes, 20 to 25c. per basket; celery, 30 to 35c. per doz.; cucumbers, 15 to 20c. per small basket; gherkins, 40 to 90c.; Spanish onions, $2.75 to $3 per large case, and 90c. to $1 for small.

Groceries.—A good business is being done throughout the country. In canned salmon, cohoes are hard to obtain under $1.35. Canned tomatoes are nominally $1.05, but we have heard of more having been paid. Dried fruits will be arriving within the next week or so, and prices will be better fixed then. Teas continue high priced, but not very much business is passing. Sugars remain unchanged from last week; the movement is fair.

Hides, Skins and Leather.—A somewhat easier market prevails for hides, though prices remain generally the same. Sheepskins continue at 55c. Calfskins are steady. Tallow is unchanged. Prospects for a good fall's leather trade are good, but for the moment it is slow.

Provisions.—Both butter and eggs are showing the effect of a good brisk demand from the Old Country. Dairy butter has gone up to 16 to 17c.; prints, 18 to 20c., while creamery boxes fetch 18 to 20c., and prints 21 to 22c. Eggs are held at 18 to 19c. for new laid, 16 to 17c. for pickled. Cheese is firm around 12c. Receipts of poultry are larger and prices are easier. A good demand exists, however, in all lines. Smoked meats of all sorts are in request, and it is likely will continue so till navigation closes.

Continued Progress

During the last few years the North American has made marvellous strides in all Departments tending to its upbuilding, which can readily be seen by the following figures, showing a comparison of

Three SEPTENNIAL Periods

Year	Cash income	Assets	Policies in force
1881	$ 39,613	$ 88,763	$ 1,221,712
1888	263,691	666,919	7,927,594
1895	581,478	2,300,518	15,779,385
1902	1,270,840	5,010,813	30,927,961

A strong progressive Canadian Company giving excellent returns to its policy-holders, therefore making it a desirable Company for agents to represent. Three active agents wanted.

North American Life
Assurance Co., Home Office, TORONTO, Ont.

ON the 2nd inst. a disastrous fire took place in Ottawa, in which the Eclipse Office Furniture Company's large factory in the central part of the city was destroyed at a loss of about $60,000. The insurance was $40,000, on building, machinery and stock. We understand that the factory will be rebuilt at once.

Mercantile Summary

THE receipts from customs entries at Winnipeg during the month just closed aggregated $216,895, as compared with $200,379 for the corresponding month of last year.

MR. JOHN GALT, C.E., of Toronto, is preparing plans for a new waterworks system to be installed at St. John's, Nfld., at a cost of $150,000, also for a new sewerage system and other improvements.

ON the 30th ult. the Prescott elevator was formally handed over to the new Prescott Terminal Company, the purchase price of $28,000 having been paid The original sum of money invested in this elevator was about $370,000. The barges had already been sold for $92,000.

IN a heavy storm at Fort William, Ont., on the 3rd inst., one of the large steel bridges of the Canadian Pacific Railway's new coal handling plant was blown down and wrecked, with a large portion of the plant. The loss is about $30,000, and comes at a very inconvenient season of the year.

CHAS. H. CRAMP has resigned his position of president of the William Cramp Sons Engine and Shipbuilding Company, Philadelphia, with a desire, as he himself puts it, of "creating conditions more favorable to personal comfort." He has been chosen, however, as chairman of the board, a new office, and H. S. Grove has been elected president in his stead.

THE report of the Ottawa and New York Railway Company for the six months ending June 30th last showed passenger earnings of $45,373, as against $40,070 in the preceding year, and freight receipts of $34,897, as against $24,696 last year. With the mail subsidy this makes total receipts of $83,167, as against $64,465 last year. The number of passengers carried was 94,221, and the freight 105,049,075 pounds.

THE Canada Atlantic Railroad's gross receipts for the six months ending June 30th last amounted to $868,226, an increase, compared with a similar period of 1902, of $62,161. The number of passengers carried was 160,263, as against 158,345 the year before, whilst receipts from passenger traffic were $135,175, an increase of $8,143. The freight totalled 1,298,620,500 pounds as against 1,726,740,940 during the same period of the previous year, but receipts therefrom showed a considerable increase.

A NEW company has been formed to take over the Sentinel-Review of Woodstock, with "Billy" Taylor, late business manager of the Montreal Herald, as president and managing director, and A. Balmer Watt, who has been the city editor of the Sentinel-Review for some years, and who is a son of Sheriff Watt, of Brantford, as vice-president. Mr. A. Pattullo, M.P.P., and Mr. J. F. Mackay, the former owners of the paper, both retire. Under Mr. Taylor's energetic management we are sure it will even add to its reputation as a successful, up-to-date newspaper.

Up to the 28th ult. the number of buildings for which permits were issued in Winnipeg during the present year was 1,127, their value being $5,235,700. Last year up to the same date they numbered 888, of a value of $2,213,100.

An Ontario charter has been granted to the Toronto Automobile Manufacturing Company, Limited; share capital, $50,000. The provisional directors are: Charles Trow, John Noble, John W. Siddall, Andrew G. Ross, and Alexander J. R. Snow.

Mercantile Summary.

The town of Springfield, N.S., is projecting a new water system, which, it is estimated, will cost about $85,000.

The Canadian Monne Plow Co. is about to erect an extensive implement warehouse in Winnipeg at a cost of $20,000.

Parke, Davis & Co., manufacturing druggists, are building a $20,000 addition to their branch factory at Walkerville, Ont.

The customs revenue of the Dominion for the month of September last amounted to $3,756,705, or an increase of $615,675 compared with that month last year.

Dawson & McEwen, of Rosthern, Sask., have purchased the flour mill of James Sanders at Wapella, Assa., and after refitting it on a modern scale will operate it in future.

The Port Huron Engine and Thresher Company have bought 172 acres of land, part of the Sarnia, Ont., Indian Reserve, for $35,000, and will establish thereon a large branch of their works now.

It is now stated by the Canadian Pacific Railway management that one-quarter of the million dollars which the company intended to put into rolling stock before next spring would be devoted to the construction of sleeping cars, the remainder being represented by dining cars, first-class coaches, suburban coaches and baggage cars. The company has decided to abandon some of its contemplated improvements in the eastern part of Montreal, owing to inability to acquire land at a reasonable price.

The half-yearly report of the Grand Trunk Railway Company, issued last week in London, shows that in passenger earnings there was a gain of £80,000, in mails and express one of £13,000, and in freight and live stock £307,000. The cost of operation increased by £389,000, owing chiefly to the rise in the price of fuel. The number of passengers carried on the line showed an increase of 335,000. We understand that the new issue of guaranteed stock has been considerably over-subscribed.

The syndicate organized to convert $200,000,000 of United States Steel 7 per cent. stock sinking fund bonds became dissolved last week, according to the original terms, but by consent of a great majority of its members its powers have been extended until July 1, 1904. Withdrawals from the syndicate are said to have been small. The terms of the agreement between the Steel Corporation and the syndicate call for a distribution of between $35,000,000 and $40,000,000 of bonds to members of the syndicate. This distribution was made in large part last week. The sum of $5,000,000 was paid to J. P. Morgan & Co. to-day as syndicate managers. This represents a call for 25 per cent. of the $20,000,000 cash to be paid for a like sum of bonds taken by the syndicate at par.

Mercantile Summary.

SEVERAL dwellings in St. Roch, Que., were on the 4th inst. destroyed by fire. The loss was $15,000, partially covered by insurance.

THE Dominion Business College, Toronto, has favored us with a striking map of the world, British possessions being colored a vivid red. Attached is an index to every country, with population and area. There is also a calendar from September, 1903, to August, 1904, inclusive.

THE Allan Steamship Line has placed a contract with a Belfast shipbuilding firm for the building of a turbine steamboat for the Liverpool-Canada mail service, to be the largest and speediest vessel of their fleet. Its length over all is to be 500 feet; gross tonnage, 12,000; indicated horse power, 10,000; speed, 17 knots. This means a shortening of the voyage by twenty-four hours.

THE annual report of the Boston and Maine Railroad shows that the gross earnings of the company (irrespective of leased lines) from operation for the year ended June 30th were $33,738,984.26. The dividends declared were on preferred stock 6 per cent., and on common 7 per cent. The number of passengers carried during the year was 39,049,158. The number of tons of freight carried during the year was 19,084,796. The total number of miles of track operated by the company is 4,012, while that owned only amounts to 1,126, both figures including tracking and sidings.

THE Canadian Pacific Railway is gradually developing the idea of supplying its needs so far as possible out of its own resources. With this in view it has established a mining and metallurgical department in British Columbia, under the superintendency of Mr. W. H. Aldridge, of Trail, B.C. The company has a coal mine property about five miles from Banff, and this is being developed by a force of about fifty men. Prospecting parties are looking over other properties in British Columbia, and already the company has a large number of claims located, from which it expects to eventually get much of the steam coal it will use. No effort will be made, we understand, to supply coal for domestic or commercial uses.

SIR THOMAS SHAUGHNESSY, president of the Canadian Pacific Railroad, should be more or less of an authority on the labor question. It is worth noting that his views are certainly not in harmony with those expressed by some union leaders. He said the other day that one of the greatest difficulties the C.P.R. had to contend against in the west was its inability to get enough workmen and laborers. He felt safe in saying that during this year they could have employed from 3,000 to 5,000 more men than were available; that many more men could have been used in constructing new lines and in making improvements to those already built. All of the line's construction work, he said, was behind owing to this difficulty.

DRESSING BAGS
To those who are looking for unlimited comfort when traveling a fitted bag appeals. As a gift to a friend going away there is no surer way of making him happy.

43 to 49 Bay Street, Toronto.

Mercantile Summary.

A BUILDING contractor of Beauport, Que., A. G. Grenier by name, is reported to be making an offer of 25 cents on business liabilities of about $4,000. He also shows $2,500 of a mortgage indebtedness.

CONSENT to assign has been filed by A. Blancheri, ladies' tailor, Montreal. He is said to have been unsuccessful in New York before coming here in 1895, and a recent attachment was issued against him in connection with some of his old New York indebtedness.—G. Prudhomme, of Montreal, also in a small tailoring way since 1901, has been asked to assign.—P. A. Pelletier & Co., Montreal, in a limited cigar manufacturing business, have been served with a demand in insolvency. Mr. Pelletier was unsuccessful some twelve or thirteen years ago, and has since operated under his wife's name.

FROM Hull, Que., we hear of several cases of business troubles. A demand of assignment has been made upon Genest, Duquette & Co., who are said to show liabilities of $5,000, with apparent assets of $4,000. Genest was formerly in business with one Gagné, and was burned out at the big fire of 1900. He then compromised at 50 cents, but subsequently assigned.—A. J. Kelly, a hardware man of the same town, succeeded his old employer, Mrs. J. G. Marston, for whom he had clerked fifteen years, after the fire of 1900, but has not made a success of it. Latterly his stock has been under seizure under judgment on past due claims, and he is now said to be offering 50 cents on the dollar.—Bedard & Philion, dry goods retailers, have shown signs of financial distress of late, and it is reported are about submitting a statement of their affairs to their creditors. Liabilities are stated at $7,800, with assets nominally $3,300 in excess.

Second Hand Machinery.

It often happens that a man cannot just see his way clear to put money into a new machine. It may be that a good second hand article would suit his needs until he can afford something better. We all know how this is true of most commodities. The piece of second hand machinery has its place in the world and for variety along this line, Machinery Hall, 131 Front St., Toronto, cannot be excelled. One would scarcely believe the great variety of machines kept in stock. You are invited to at least call and see the exhibit. If you do not see what you want just tell Mr. Petrie, the proprietor; more than likely he will find the particular machine you are after. New tools too.

R. M. MELVILLE, TORONTO.

MR. A. INGRAM, of St. Thomas, Ont., who represents a British syndicate with a capital of about $10,000,000, states that they would be quite willing to begin the construction of the Berlin, Waterloo, Wellesley and Lake Huron Radial Railway as soon as the various municipalities interested express their readiness to give reasonable assistance. The Dominion Government granted a charter for such a line some few weeks ago.

T. E. ROBINSON was a moulder in the Noxon Co.'s shops at Ingersoll. In July, 1885, he began a grocery business on his own account. He got behind and in January, 1901, made an assignment. He owed at that time $3,300, and had assets of $1,600. The stock was sold to his wife, who has since been sole owner. Of late, however, the business has gotten behind, and claims have found their way into attorney's hands. Now another assignment has taken place.

THE Ontario Government has now granted a charter to the International Harvester Company of Canada, Limited, of Hamilton. The company's object is to manufacture harvesting tools and implements of all kinds and binder twine; to take over the business and assets of the J. W. Mann Manufacturing Company, Limited, and to purchase the real estate, in the city of Hamilton, of the Deering Harvester Company, and the buildings, plant and machinery in course of construction thereon. The share capital is placed at $1,000,000. The provisional directors are: Henry Carscallen, Edwin D. Cahill, D'Arcy R. Tate, John H. Tilden, John M. Harris, Robert B. Harris, Charles W. Tinling, Frederick J. Howell, and R. L. Haskins.

RECENTLY there was a race meeting near Amherstburg, Ont. The posters were evidently composed by a wag, for one of them reads as follows:

J. E. ROBERTS. - - GEN.-MGR.

THE annual meeting of the shareholders of the Grand Trunk & Western Railway, and its subsidiary lines, was held in Detroit, on Tuesday, and all the old directors re-elected for all the lines except the Detroit & Toledo. For this the officers are as follows: Officers—President, Chas. M. Hays; vice-president, Benj. Norton; superintendent, S. W. Knapp. Directors—Chas. M. Hays, Montreal; Benj. Norton, Toledo; Frank W. Morse, Montreal; Jas. L. Frazier, Frankfort, Ind.; Clarence D. Whitney, Toledo; A. B. Atwater, Detroit.

THE 16th annual meeting of the Canadian Railway Ticket Agents is taking place this week, at Sydney, C.B. There will be some changes in the officers of the association this year. The President, Mr. M. McNamara, retires, and will be succeeded by Mr. H. C. Mackay, city passenger agent of the Canadian Pacific in St. John, N.B. The new first vice-president will be Mr. C. E. Morgan, Grand Trunk ticket agent at Hamilton, and Mr. W. H. Harper, Canadian Pacific agent at Chatham, will be the second vice-president. There will be a contest for the office of third vice-president.

LITERATURE AND BOOK-MAKING.

With the October issue of The Critic of New York begins a very interesting series of epistles on literary matters entitled the "Jessica Letters." They promise well. One extract from an admonitory letter written by "Philip," the editor of a prominent journal to the correspondent, who gives her name to the series, will serve to give the reader an idea of the subject treated: Let me say flatly, if I have not already said it, there is no literature in New York. There are millions of books manufactured here, and millions of them sold; but of literature the city has no sense—or has indeed only contempt. Some day I may try to explain what I mean by this sharp distinction between the making of books, or even the love of books, and the genuine aspiration of literature. The distinction is as real to my mind—has proved as lamentably real in my actual experience—as that conceived in the Middle Ages between the life of a religiosus, Thomas à Kempis, let us say, and of a faithful man of the world. But this is a mystery, and I will not trouble you with mysteries or personal experiences. You would write as your Southern mocking-bird sings his "green-tree ballad"; the thought of that bird mewed in a city cage and taught to perform by rote and not for spontaneous joy, troubled me not a little.

MORTGAGES FOR SALE.

We are offering $750,000 worth of FIRST FARM MORTGAGES, bearing interest at SIX PER CENT., for sale.

All kinds of Farm and City Property handled on a commission basis. If you wish to buy or sell property in Western Canada, write us.

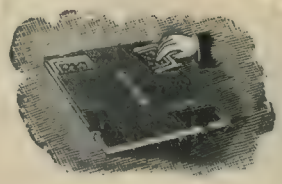
Thomson Beattie, Manager, Winnipeg.

—The concessions available on Canton silks have stimulated buying in that market for both American and European account, and the decline in exchange has helped business in China silks in the Shanghai market. Yokohama has been very quiet, and sellers are displaying a disposition to consider offers at slight concessions. The declines in Asiatic silks, however, are too slight to stimulate active buying for future delivery on manufacturers' account..—N. Y. Dry Goods Economist.

—The Cincinnati Price Current says: The marketing of hogs continues without essential change in numbers. Total Western packing 310,000, compared with 310,000 the preceding week, and 300,000 two weeks ago. For corresponding time last year the number was 265,000, and two years ago 340,000. From March 1st, the total is 11,125,000, against 10,230,000 a year ago—an increase of 895,000. The quality of current marketings is mostly good, and weights generally rather heavy. Prices at the close are practically the same as a week ago, prominent markets averaging $6 per 100 lbs., compared with $6 a week ago, $5.80 two weeks ago, $7.55 a year ago, and $6.85 two years ago.

--The world's railroad mileage is estimated to be over half a million miles, apportioned as follows: Europe, 180,708; Asia, 41,814; Africa, 14,187; North America, 226,503; South America, 28,654; Australia, 15,649—North America leading. The two continents of the western hemisphere, it will be noted, have more miles of railroad than all the rest of the world together; North America alone more than Europe and Asia together. The additions per year to the world's railroad mileage were, during the six years between 1896 and 1901: 9,796 in 1896; 10,747 in 1897; 10,864 in 1898; 13,530 in 1899; 10,798 in 1900; 16,947 in 1901—1901 having been, as will be seen, a phenomenally active year in railroad building.

PLANET WHIST TRAYS



If you play whist use our trays that are enclosed in neat boxes at the following prices:

No. 16 containing 16 Trays..$5.00.
No. 20 " 20 " .. 6.00.
No. 24 " 24 " .. 7.00.

This tray is highly recommended by the best known whist players in Canada, and is undoubtedly the best in the market.

MR. CHAMBERLAIN'S PLAN.

No longer can it be said that Mr. Chamberlain's scheme for unifying and strengthening the Empire through a system of preferential tariffs has not been made sufficiently public to admit of discussion. His great speech at Glasgow on Tuesday evening laid down its general principles, though details on some important points are still in shadowland. Briefly stated, the programme which is expected to mean so much for the whole of Great and Greater Britain is as follows: A tax of not more than two shillings per quarter on foreign wheat, but no tax on wheat coming from British possessions; no tax on corn; a tax on flour sufficient to give preference to the miller in order to revive an ancient industry, and to prevent the exodus from country to town; a general tariff averaging ten per cent. on manufactured goods, which would bring into the Exchequer about £9,000,000 per year, to be used for remission of taxes; five per cent. on foreign meat and dairy products, except bacon, a food in universal use among the poor; a substantial preference to the colonies on wines and fruits. The orator then went on to suggest the remission of three-quarters of the tax on tea and half of that on sugar and coffee, which, he contended, would more than offset the proposed new duties on food, even should the latter all fall on the consumer, which he denied. Tremendous cheering, we are told in the despatches, followed the announcement that there would be not only no increase in the cost of living, but probably an actual decrease. A commonplace issue, seemingly, upon which to hang the fate of a world-wide Empire! But then it is a reversal of the policy with which Great Britain has braved the world for two generations—and to some extent is now being worsted.

From the British standpoint, trade, which is the national life-blood, is moving in the wrong direction, and this tendency is becoming more marked with each succeeding year. That something must be done to prevent it, and at the same time knit the whole fabric of the Empire together in strong ties of commercial self-interest nobody disputes. Except for one thing, we know of no valid reason why the plan proposed should not reach the desired goal; but this provision is a very important one, and so far as this country, as one of the colonies interested, is concerned, it is the primary issue needing to be decided. In spite of a desire to see eye to eye with Mr. Chamberlain in this matter of mutual trade, we cannot help doubting whether the undisputed best interests of the Mother Land as a manufacturing country and those of Canada as a rising nation can be made to lead along parallel lines in the way suggested.

Mr. Chamberlain stated his belief that, in return for a moderate preference, the colonies would not only reserve to Britain the trade already enjoyed by her, but, as there were several articles produced by her which the colonies did not know how to make, they would also arrange their tariffs so as not to start industries already in existence in the Mother Country. Now, how is it possible to reconcile with this proposition the known and expressed wish of the manufacturers of this country? What about our cotton spinners, our woolen mills? What about half a dozen other industries the instant the preference to British goods is sufficient to allow the latter to enter the country in any quantity? And if the preference be not sufficient to allow British manufactures to enter Canada, of what avail will it be to the British manufacturer?

THE WESTERN HARVEST.

Our Winnipeg correspondent wired yesterday at noon to the following effect:

"General rains throughout the west forepart of week just ended retarded threshing operations considerably, and the crop is moving slowly. The fine weather of the past few days will bring the movement into a normal activity again. Farmers this year have learned the value of stacking their grain instead of leaving it in the shock."

From other sources we learn that, owing to the cause above suggested and to the fact that farmers have been holding back for higher prices, it is very doubtful if as much wheat will reach Lake Superior terminal ports before navigation closes as was the case last year. On the Canadian Pacific lines the deliveries

have been very light, and some railroad authorities predict a blockade unless the movement be speedily augmented, although transportation facilities are much better now than last season.

MORE PROTECTION FOR WOOLENS.

Once again is heard a loud cry to Mr. Fielding, calling for increased duties on woolen goods. The Canadian woolen industries, it is claimed, are rapidly being ruined; they cannot compete with British factories; mills are closing down on every hand. Now, while there is a degree of truth in these contentions, there is also a large amount of falsehood; and, unless the two are carefully separated, we believe that the spirit of partisanship which prompts the mixing of the two ingredients will result in serious injury to the interests which it is desired to benefit. One of the high-tariff newspapers recently published a list of twenty-six woolen mills in this country which had closed down, either permanently or for an indefinite period. The paper in question, however, did not mention that of these mills the majority had closed down long before the preferential tariff was ever heard of, or that in some cases they were shut up simply because their plants had been removed to other places. What is a Minister of Finance to say to an argument so clumsily expressed?

Plain truth obliges us to declare that three-fourths of the woolen mills of this country have nothing to complain of whatever. Some of them are running night and day; others are adding to their capacity. Broadly speaking, the blanket, carpet and knitting sections of the trade are fairly prosperous.

On the other hand, it cannot be disguised that the manufacturers of tweeds are in a sorry plight. They are butting against the British manufacturers in an industry of which they are the acknowledged masters; the one trade in which Britons have not lost ground. And our mills are doing it under peculiarly discouraging circumstances. The Canadian manufacturer has to send thousands of miles for his machinery, besides which he has to pay duty on it, cost of packing, freight, etc.; he has to pay interest on his investment at say 6 per cent. against 4 per cent. in Britain; his labor costs on the average 40 per cent. more than that of his rival, and his increased expenses taken together certainly offset the protection he now receives, 23 1-3 per cent. But besides this, there are other considerations. The British tweed manufacturer can make the finest goods in the world; but he is also an adept at turning out, with a beautifully finished appearance, shoddy stuff that is not worth the labor of making it up. Then again, under the preferential tariff, not only British but German goods creep into this market by the most ingenious of methods.

Now, an increased duty of something like 10 per cent. net, or perhaps five cents per pound net, would doubtless do a good deal to remedy this state of affairs, and we think the tweed makers are entitled to consideration. But to make the need for a higher tariff on tweeds a casus belli for a general increase all round is altogether different, and calculated not only to defeat its own purpose, but, what is more to be regretted, to postpone the granting of relief to the class which really needs it.

BRITISH TRADE AND INCOME.

In view of the present vigorous discussion of proposed changes in Britain's time-honored fiscal policy, the Board of Trade's recently published blue book on British and foreign trade is particularly interesting. It presents an amazing mass of statistics as to various subjects, to digest the whole of which would require the expenditure of much time and labor. But the section which for most people will possess the most interest is that treating of the comparative growth of exports and imports. To take one case, according to tables given the exports from the United Kingdom to the United States declined from $145,000,000 in 1890 to $97,500,000 in 1902, while the imports rose from $485,000,000 to $635,000,000. During the same time total exports to foreign countries declined to the amount of $90,000,000, though, when the exports to the colonies are included, this decline is seen to be not more than $5,000,000. It is worthy of note that fifty years ago the proportion of British exports to countries in which the doctrine of protection was in force was 56 per cent., as compared with 44 per cent. to the others, while last year the proportion was 42 per cent. to the protected countries and 58 per cent. to the others. Too much attention, however, should not be paid to this feature, as, from the relative changes which have taken place in various countries which are and have been great purchasers of British goods, the conditions have been too unstable to admit of any satisfactory comparison.

The blue book attempts to give an explanation of the excess of imports over exports, which, more often than anything else on the part of our neighbors to the south and others, is held to be an unmistakable sign of the decline of British commercial supremacy. According to the compiler, it is a fact that while this excess is on the average about $800,000,000 per year, there are other factors to be taken into account which largely equalize matters. For one, there is the income received from foreign investments, which may be calculated at over $312,000,000; and again, there are in earnings of the British merchant fleet engaged in foreign trade, which may be put down at $450,000,000. Certain it is that John Bull is not feeling the pinch of poverty yet by a wide margin, for we find on examination at another source that his gross income for the fiscal year 1901-2 was £866,993,000, as compared with £657,087,000 in 1894-5, or an increase in seven years of about 43 per cent. Not a bad showing for a period during part of which he waged one of the most expensive wars in his history.

At the same time we do not see that the above explanation is altogether satisfactory, or that it can be expected to silence the critics who make a disparaging point of the growth of imports at the expense of exports. The probability is that investments abroad mean the growth of industries to compete with those already established in Britain. We remember reading the argument of a prominent economist who contended that exports represented the amount of profits and employment created for a country outside itself, while imports, on the other hand, were the sign of the profits and employment which a country created for the outside world. According to this argument, and to a comparison of British exports and imports, Great

Britain at the present time is giving a great deal more employment and profit to foreigners than they are giving to her. But the question is a very abstruse one.

STAPLE DRY GOODS.

The advances which were made just about a month ago in several lines of cotton goods did not include pillow cottons and sheetings. Now, pillow cottons have been advanced one cent per yard, and bleached and unbleached sheetings one half cent per yard. This announcement gives a finishing touch to the situation in staple cotton goods, which, during the last four months have all experienced advances. Stocks are not heavy, so it will not be long before the enhancement in value will be felt by the consumer. The reason given for the change is the rising cost of raw material. Spot cotton, it may be remarked parenthetically, went up 1¼c. in New York last week almost in one jump. Since then, however, it has fluctuated considerably, and the decline has been marked, though this cannot, from the nature of the case, make any real difference to the position of the manufacturers for some time to come.

A feature of the trade, so far as some lines are concerned, such as children's apparel, is the slowness of deliveries, and it would appear that this slowness has caused an increased rush for the articles in question, owing to a belief that prices would go up again before new orders could be given. The manufacturers claim that they in their turn have been hampered by the non-delivery of yarns and of packing cases.

General trade for the most part has been good, though set back a little during the last few days by the warm weather. The unaltered tendency to advance prices seems to have caused a sort of rush on the part of wholesalers to get goods in stock with as little delay as possible; and has brought about an increased demand. It is not only in Canadian-made goods that values have been rising; it is the same with British and foreign articles. Many have made sharp advances. Retailers throughout the country seem to have arrived now at a true realization of the state of affairs. They report prospects for a busy fall season very good indeed, and they are meeting their payments in good shape.

THE COUNTRY FAIR.

Synchronous with premature morning frosts, with the gradual russeting of the trees' foliage in early fall, appear the signs in agricultural communities of friendly rivalry. The voice of the noisy huckster, or Aunt Sally man, the cackling of no less vociferous prize poultry, the rattling step of the trotter are heard in the land; while, wending their way along the rural roads are seen many-shaped waggons, resplendent with their loads of mammoth, high-colored vegetables or luscious fruits. It is the day of the country fair. Despised by some because its erstwhile importance has been diminished by the ever-growing city or Provincial Exhibition, we confess to a lingering love for the good old smaller institution. The country fair fills a real need in many a district, to whose people it presents the only chance in a year for reaping the benefits of competition among themselves. By its aid they are enabled to grasp an idea of the common and individual progress made from year to year, and from its inspiring influence springs the wish to do constantly better in their life-work.

And there is a sentimental interest as well. How often is the spot now occupied by all the joyous, noisy concomitants of a country fair trodden by the feet of the the very man who, in the days long past, hewed a way through primeval forest, the first beholder, perhaps, of that former wilderness; the representative of that noble race of pioneers who, daring all, keeping one aim through obstacles enough to daunt the bravest, have more than any other class of men, perhaps, helped to make our fair Dominion what it is to-day. May the eyes of the first settler continue long to gaze on the final reward of his persistence, and may the days of the fall fair be long in the land!

FROM POLE TO TROPICS.

It has been said that the territory over which the Dominion of Canada holds sway stretches from the 45th degree of latitude up to the North Pole. This was very roughly speaking, however. What would be the result, one may ask, if some foreign explorer should succeed in planting his nation's flag on that cynosure of so many adventurers' eyes? We have already lost Maine; the Alaska boundary has long been a bone of contention; probably the "discovery" of the North Pole and taking over by the United States, for example, of adjacent country would prove another fertile source of future wrangling. Certainly such discovery on the part of any foreigner would not increase the prestige of Canadians, who look upon the indefinite North as their natural heritage; would tend to produce an inconvenient feeling of being "hemmed in" on too many sides. The remedy is to find the Pole ourselves. We would not speak so confidently were it not that at this moment one of the very greatest factors in the success of such an expedition, namely, the man to do it, appears to be in our midst to-day. Captain Bernier is a mariner bold, whose general capability is unchallenged; whose plans for just such an undertaking have been carefully made, and have received the approval of geographers, explorers and other authorities to whom they have been submitted. Moreover, by dint of unwearied exertions he has succeeded in collecting a large proportion of the needed funds; would by this time have been in possession of sufficient if certain parties had not been dilatory. Therefore, we say, for the glory of Canada let every assistance be granted the gallant captain.

So much for Canadian expansion northward. The other direction in which we would like to see her influence augmented is to the south. Canada can produce almost all the articles necessary for civilized life except those of tropical origin. But this lack can be rectified. Already in some of the islands of the British West Indies there is talk of annexation to the Dominion; and, seeing they are in climate and productions the natural complement to Canada, there is much to be said in favor of the idea. We need hardly go so far as that, however, at this time. The chief need of the islands is a good market for their produce; they in their turn would gladly take foodstuffs from Canada instead of from the United States, which under existing circumstances they are almost forced to do. A step which would help greatly toward the desired end would be

the establishment of a fast line of steamships, and it is for this that the Jamaican Government is strenuously trying to obtain Canadian assistance. The British West Indian islands have passed through a history which entitles them to the sympathy of the Empire ; by helping them in their commercial strivings, Canada would also gain much for herself. We hope that no hasty consideration will cause the Jamaica fast line scheme to fall through.

WANTED, A DEPARTMENT OF COMMERCE.

It is a strange anomaly that the greatest commercial nation in the world, and another that aspires to become numbered among such, should both be suffering from the lack of efficient governmental departments of trade. Yet this seems to be the fact. Great Britain's huge system of foreign commerce is a shining example of the triumph of the individual in spite of administrative drawbacks; for all the numberless ways in which governmental aid can be given to its development are cumbrously divided between three bodies, viz., the Board of Trade, headed as often as not by a man of no business tastes or qualifications; the Foreign Office, which has usually more than it can properly attend to in dealing with the things which more rightfully come within its immediate scope; and third, the Home Office, whose time is engrossed in looking after matters of legal and domestic concern. Under such a system of muddle which, it might be supposed, in any country other than Britain would have been rectified years ago, it is not surprising that the consular reports which are to apprise manufacturers of golden opportunities should not reach their reputed readers until months after those opportunities have come and gone, nor that the patent laws should be done up in such parcels of red-tape as to encourage the belief that home invention is a capital crime. What is wanted there, according to some of Britain's clearest-headed business men, is a Department of Commerce, at the head of which should be a Minister of the highest Cabinet rank, and whose sole work it should be to facilitate and expand the country's trade, with all that that implies.

And this is what we want in Canada, too. It is true we actually have a Department of Trade and Commerce; but the chief part of the business of this branch of the Executive seems to be little more than the registration of foreign statistics. This, no doubt, is very useful as a sort of milestone by which to judge our own and our rivals' progress; just as comparative philology and the census tables are useful studies. But we want more. This country is in the position of a man who has goods to sell, and wishes to find a good purchaser for the same. We want, then, in a Minister of Trade and Commerce, a man not only thoroughly acquainted with this country's resources and productions, both actual and potential, but who at the same time has an intimate acquaintance with the resources and needs of other countries; not only this, but he must have the aptitude for placing the demand and the supply in touch with one another. Other qualifications are needed, too, but these are the essentials; and until the Department is put upon some such footing this country will suffer in its competition with others, just as Great Britain has suffered for not taking heed of the gospel of efficiency in the past.

MORE ABOUT "OIL GUSHERS."

As long ago as last April we had an article on certain alleged marvellous discoveries of oil in the neighborhood of Chatham, Ont., and drawing attention to the still more marvellous discrepancies existing between statements made in a certain prospectus and the actual facts so far as we could discover them. Copies of the prospectus were circulated far and wide, and flaring advertisements were published in the newspapers not only of Canada, but of the United States and Great Britain as well, the result being that many people bought stock with the idea that they were to make quick fortunes. The sequel has come. A few days ago at Chatham, near the scene of so much gushing wealth, there was a meeting of the shareholders of the Dominion Oil Company, at which it was decided to wind up its affairs, and also to examine the company's origin, and punish any person found guilty of fraud in connection with its organization. It is only fair to state that the present officers claim the management of the company's affairs was virtually forced into their hand nolens volens, and that they knew nothing of its standing when they assumed office. This is a queer state of things for a presumably business organization but at any rate they seem to be trying to do the fair thing so far as lies in their power now, for they now repudiate the prospectus and its contents, and declare them to be untrue, a declaration which they wish published in the Toronto, New York and London papers.

READ YOUR POLICY.

Storekeepers, factory-owners and others, let alone the ordinary householder, often display a most remarkable amount of carelessness concerning the exact agreements made with the companies which insure them against loss by fire. Oftentimes open confession is made that they have not even looked at the conditions governing payment in the event of loss. Would they ever dream of buying or leasing a piece of property, or entering into any ordinary contract, laboring under any such hazy notions as seem to govern them in this particular ? The company makes a bargain. True, but the insured makes a bargain too, if he would only realize it. And it would be greatly to his own interest as well as to that of the other party to the transaction if he would realize it at the beginning instead of, as sometimes, after expensive quarrelling. One of the United States fire insurance companies recently issued a circular letter to its policy holders which gives such good advice in this connection that we think it worthy of reproduction. It reads as follows:

Though the policy is signed by only one party to the contract, it, under no circumstances, becomes a sight draft for its face, and there are mutual obligations involved. The payment of a nominal premium or assessment once or twice a year is not all there is in it. The company does not gamble with you at odds against itself of twenty-five, fifty or one hundred to one, without your assuming some responsibility. The policy is a contract involving a certain sum, the same as a contract to construct an elevator; and, under conditions, it agrees to indemnify you against loss and damage to the extent of your interest in the property described, to an amount not exceeding its face. For those conditions read your policy. Have your contract made for what it is intended, a full protection in event of a fire, after which occurrence, the contract cannot be changed. With a loss you have different conditions with which to comply. In case of a fire, notify every company interested at once, and

don't be uneasy if you fail to see an adjuster get off the next train. Other people are unfortunate as well as you, and it may be a week, possibly longer, before an adjuster can reach you. Claims are taken up in the order in which they occur and are always reached at the earliest possible moment. If there is any property that is not entirely destroyed, you will find it to be your duty to take care of that property and prevent further waste. If the company is found to be interested in the salvage, all expense in handling it is a proper charge against it to the extent of its interest. If the salvage belongs wholly to you, then you certainly should be interested in saving your own property. An excellent rule, as laid down by the courts, and one you cannot go far wrong in following, is to "do what any prudent man having no insurance, would do under similar conditions," remembering that any loss that occurs after a fire, that is due to your neglect, is not chargeable to the insurance company. Having done all possible to save the unburned property, whether real or personal, proceed to make a statement of your loss. Do not assume that the adjusters "can see for themselves that the loss is total." If they were endowed with supernatural knowledge, and could tell you by looking at a pile of ashes just what the property composing them was worth before the fire, there would still be need of a statement of the loss, to file as vouchers with the company's papers, for the scrutiny of the insurance commissioners, auditor of state and interested policyholders. Above all things don't make the mistake of making an exaggerated and unreasonable claim, on the theory that it is necessary to ask for more than what is necessary in order to get what is fair, because you have heard some one say that the "adjusters are bound to cut your claim down anyhow."

SEPTEMBER FIRE WASTE.

During the month of September the total loss from fires in Canada and the United States as compiled at the office of the New York Journal of Commerce amounted to $9,939,450, or over a million and a half dollars in excess of those of the previous month. Usually the underwriters look upon the month of September as one of their more profitable periods, but this year several fairly large properties, fully insured, met with destruction. The losses of the last three years are shown in comparison in the following table:

	1901.	1902.	1903.
January	$16,574,950	$15,032,800	$13,166,350
February	13,992,000	21,010,500	16,090,800
March	15,036,250	12,056,600	9,907,650
April	11,352,800	13,894,600	13,549,000

AWAKE, CANADA!

Mr. J. D. Allan, of Toronto, is a gentleman whose frequent visits to other parts of the globe, combined with his keen insight into all sorts of conditions, render him peculiarly fitted to form a trustworthy judgment as to Canada's position among the nations. He has just returned from one of these trips to England, Germany, Russia, and other countries, and in a conversation with a representative of the Monetary Times was unfortunately able to give point in many particulars to the fears we have more than once expressed to the effect that Canadians are too prone to rest satisfied with past achievements. An unfortunate illustration of this same habit may be traced in the letter on a certain shipment of butter, which appears in another column. Canada by dint of much striving practically ousted American butter from the British market; having attained to that enviable position, like Lot's wife, she looked back and apparently continues looking, forgetting that in order to retain her hold she has to strain every nerve to improve in the race against growing competitors. Mr. Allan likens the position of many people in this country to that of a man who, after some effort, reaches an eminence overlooking a region of great natural beauty, and then goes into idle raptures over the lovely landscape. "Behold," says he, "my beautiful domain, its marvellous wealth of soil and minerals and trees." Yes, Canada is a country of wonderful resources; but they are undeveloped resources, and until they are forced into useful production, Canadians cannot afford to rest. It is in Russia and Siberia that Mr. Allan finds the most alarming state of things so far as competition with Canada is concerned. Russia, which ten years ago sent not a single pound of butter to Britain, now sends 25 per cent. of the latter's imports; and in quality, this article is superior to much of that which goes out of Canada to-day. In Siberia there are two provinces very similar in climate and productions to Ontario, in which there are something like 72,000,000 cattle grazing. And a disconcerting circumstance is that the Russians are the practisers of methods for saving the by-products of live stock, and hereby they make at least 35 per cent. more money out of it than is the case here. The egg industry is another in which Canadians are likely to feel the influence of their Russian competitors more and more keenly as the years roll by. And Russia is a country which we are in the habit of regarding as being a hundred years behind us. Mr. Allan combats the notion which seems to have seized upon us in these latter days that England has her eyes upon us with an ill-repressed longing to grab up everything we have to sell. On the other hand, she is merely looking out for opportunities to buy and sell to best advantage, like other people. The truth is that Canada is a country of immense resources, both naturally and in the capabilities of a sturdy population; but she should not be above watching other nations for what they can teach her, and the price of her ultimate success will need to be unceasing endeavor.

THE TRUST COMPANY.

A great and growing factor in the economy of the body politic of the future, will doubtless be the trust company. In comparing this with another great institution, the insurance company, it has been questioned by a few whether the latter is, in the ultimate, an agency making very strongly for public thrift. Many men only save from their income just as much as is required to pay their insurance premiums, and then rest contentedly in the security of a comfortable policy. Parenthetically it may be remarked that for people who do not save in larger amounts than for the bare requirements of their insurance protection, the good offices of the trust companies will never be required. A true view of the relative positions of these two great financial institutions, however, shows that the trust company supplements the insurance company; is complementary to the other. It does for property, already stored up, what the insurance company does with what the man would store up, granted that the probabilities of his life and its implied work as a producing agency prove to be actual facts accomplished. A writer in the Bankers' Monthly, Mr. Chas. W. Stevenson, in an article on the relation of the trust company to insurance and banking, shows how there is no conflict between the two.

The insurance companies, by gathering from their patrons yearly sums, the contribution of each to all, the savings out of the wages of labor, the purchase-right to the benefits of the whole labor of all, in time of misfortune, have already acquired enormous sums, and are among the strongest and most powerful institutions in the country. To-day they command not only the allegiance of a vast army of workers, but are integers to be dealt with in every study of the assets of the nation. The trust company, coming later in the career of the industrious and active business man, stands ready to take over his entire business, at any time he may desire, or any part, for any lawful and

cumulative purpose. By keeping it in the active business world, by safe and steady investments, the company keeps it at work. Here, by mingling with the whole mass, it retains its vitality and earning power, perpetuates his influence for good, his productive capacity, and at the same time is saved against his own ignorance, inability, or lack of care. Doing these things, the trust companies, more and more, as the individuals, through inheritance or by their own exertions become wealthy, will gather into their own control vast sums of money, large amounts of property, which will affect not only the industrial producing force of the country, but will affect credit, and become a power for the promotion of the good of all. As the property thus brought into control is used wisely, and with a due sense of the importance of the trusts confided, will the individual's interest be subserved, and the welfare of the masses of men be increased.

More and more, as the life of leisure and of culture appeals to the man who has earned a competence, will the need of these institutions, which are to care for his estate, grow. Consequently, with their growth, will grow their power to handle this property for the good of all, and their ability to make it pay, and to invest it safely. So that the trust company may well become a factor in allaying the greed of the individual and the fierceness of competition; and thus prove an important asset in the work of the higher civilization of the future.

THE RISING VALUE OF RUBBER.

News that will be welcomed by Canadians who have recently become interested in rubber plantations, but which will be received with opposite feelings by manufacturers of rubber shoes and other goods, is to the effect that continued advances are the order of the day in the price of the crude article. Boston quotations, we note, are now $1.12 for spot new-river Para, $1.10 for future, and $1.15 for old fine Para. These prices, while representing a somewhat different variety of raw material from that which the new tropical plantations produce, will, no doubt, cause a proportionately stronger feeling in the latter, which, it may be stated, is only a degree less valuable. The reason that the variety of rubber tree usually found in the artificial plantations (which are becoming comparatively plentiful in such countries as Nicaragua, Mexico, Trinidad, etc.), is not Para, which admittedly produces the very highest grade, is that there are one or more other varieties which, while being only slightly inferior, seem to be better adapted to the requirements of cultivation, and which produce larger crops. For several years past, the demand for rubber has been growing, while the sources of supply, owing to careless methods of harvesting on the part of the natives of countries where it grows wild, are becoming scantier. It may be explained that the "crop" of rubber consists of the "latex" or sap of the tree, which is tapped by means of a series of gashes. The above conditions have brought about a steady increase of price during the past several years, particularly during the past few months, in which a rise of 50 cents per pound has been registered.

OUR AUSTRALIAN LETTER.

The prospects for the coming season still continue very good. The rains have not been heavy, and as a whole are below the average, but they are sufficient to keep grass and grain growing. The prices of wool and meat are high, and will compensate for the diminished output. Gold yields for the first half of the year show increases so that the New Year should look upon a different aspect to that of 1903.

The better prospects have put an end to the importation of foodstuffs, flour excepted, from Canada, and the latter is to undergo a test that it has not yet had. Flour is likely to go down to export figures within four months, and in addition there is a duty of two pounds ten per ton. Whether Manitoba can get in despite these conditions is doubted by many. Experts say that it can though it may be in diminished quantities. The stocks on hand and on the sea are presumed to be all that will be required until the harvest is on, and wheat is now offered to millers below cost of landing.

There are the usual complaints over the bad and wasteful packing of Canadian goods. It is a wonder some smart man in Canada does not put his brains into this business, study how to pack economically and safely, and then seek employment as a teacher of the art. If there is such a man to be found it would be profitable for Canadian exporters to get him to teach their packers. Over and over again the manner in which goods have landed, or the unnecessary freight paid has killed a promising trade. Some orders have been taken for Canadian goods, but business though promising for the future is very quiet just now.

There are more politics than business. To the delight of importers the Minister of Customs has withdrawn from the Government. He had a belief that all importers were crooked, and were bent on robbing the Government. Unluckily, he was successful in proving that a very considerable number conducted their business so loosely that to put it mildly a good many mistakes occurred in entering goods at the Custom House. It was not on the matter of administration that he resigned. He is an ardent "Democrat," in the Australian meaning of the term, and he desired the Government to pass an act compelling all trans-ocean steamship companies to pay the Australian rate of wages while they were in Australian waters. The Government has yielded much to his strenuous ways, but this was too much and he withdrew. The next sensation was the resignation of his seat by the leader of the Opposition. The Government had introduced an Election Bill in which a larger proportionate representation was given to the country than to the city in this State. This he declared was such a scandalous and revolutionary gerrymandering that he resigned as a protest. Opposition to his re-election is farcical, but as his appeal is to a city constituency the effect of the appeal may not be very great.

New Zealand is enjoying great prosperity though her trade for 1903 shows a diminished import with increased export. The imports for Canada are amongst the few increases being £53,564, as against £42,178 in the year before. The exports to Canada have gone up also, being £7,381 as against £2,118 in 1901. The chief item is New Zealand flax exported for the manufacture of binder twine. The Government of the tight little islands is charged with an act that won't increase the faith of the Conservatives in Socialistic methods of administration. It was done as long ago as 1898, but has apparently only recently come to public notice. It has a State Life Insurance Department, which has been moderately successful. It is alleged that in May, 1898, £131,660 Government 4 per cents., and £494,300 4½ per cents., in which the funds of the insurance department were invested, fell due, whereupon instead of paying the department the amount of the principal, the Government gave it £625,900 worth of 3 per cent. debentures only, but at that time as now the New Zealand credit was not high, and to sell at par these debentures would require to bear at least 4¼ per cent. interest. The consequence is a loss in interest alone of over thirty thousand pounds, and if the Department should require to realize on these debentures it would entail a further loss of more than twice as much. The policy-holders are naturally sore over this transaction, but they have no redress, and some are surrendering their policies. It is a bad indication of what a Government may do when it is hard up, and will disincline people to make it a custodian of trust funds.

Mr. Reynolds, the General Manager of the Pacific Cable, is in Australia. He rather surprised Australians by expressing his ample satisfaction with the share of business that the Pacific Cable is getting. I cannot find many who share his calm complacency, and with the deficit of nearly half a million dollars to make up, I should fancy not many Canadians would either. He does not appear to see that much improvement can be made in any way. Such facts as that the Pacific Cable does not get a particle of the news business does not appear to concern him or the Cable Board at all. He is interviewing the Government on the extraordinary agreement it has made with the Eastern Extension Co. Nothing will come out of it as the Premier has

publicly declared that he would not refer the agreement to a conference of the representatives of the countries interested in the Pacific Cable. What is needed is that the Pacific Cable Management shall be put on a commercial basis. To show how much this is needed, the Commonwealth Government has been charging five pence per word for terminal charges at this end, but only four pence half-penny per word is charged for cable messages to New Zealand, including terminal charges at both ends. I won't say this extraordinary rate was put on to please the Eastern Extension, but needless to say it did mightily please that company which has control of land lines of its own, and is thus independent of the Government control. So far as known here the Pacific Cable Board did not notice this until a row was raised at this end. Mr. Reynolds will, no doubt, get this altered. Again, a good deal of interest was taken in the American Cup Races. The Pacific Cable was in a position to do a scoop, but not a line came over it to the newspapers. Mr. Reynold's explanation is: "Was not the cable there if any newspaper chose to use it, but you see we cannot collect news." And here is the whole trouble. The cable policy is, take what is brought to it, and be thankful, but to initiate any aggressive work or push for business as the Eastern Extension does: "Really, we can't, you know." The following from the Sydney Trade Review gives an indication of the opinion here: "The subject of the Pacific Cable was touched upon at the annual meeting of the Chamber of Commerce by a member, who said: 'Attention had been called by the President in his address to the opening of the Pacific Cable. The loss on this would be immense, and Australia had a large share thereof to bear. In my opinion it is not that there is not sufficient business to be done which has caused the loss, but because of the mismanagement both in the States and at Home, as compared with the business acumen shown by the Eastern Extension Co.; and it behoved the public, as taxpayers, to speak with no uncertain voice on the subject.' These remarks very tersely sum up the position, and they but confirm, as far as the mismanagement at this end is concerned, what we have repeatedly said on the subject."

F. W.

Sydney, New South Wales, September 5th, 1903.

TRAVELLERS' GUARANTEED DRAFT-CHECK.

The United States Fidelity and Guaranty Company, Baltimore, Md., for which Messrs. Kirkpatrick and Kennard, of Toronto, are the Canadian managers, are making a somewhat novel, but what looks like a highly useful departure. It is in the form of a Travellers' Guaranteed Draft-Check, the object of which is to make it possible for a traveller to have his check or draft cashed anywhere in the United States, Canada or Mexico, without further endorsement or identification than the company provides. To get a check or draft cashed away from home is in the ordinary way a difficult and often impossible task. Banks invariably require identification, and the endorsement of some responsible person known to them, and hotel-keepers and business men, as a rule, have, through frequent losses, become exceedingly averse to cashing checks or drafts, even for men with whom they have become fairly well acquainted. As a means of relief from such troubles, the services offered by the United States Fidelity & Guaranty Co., should be hailed with delight by all persons accustomed to travelling. The nature of the "Travellers' Guaranteed Draft-Check," is explained in its name. For a small consideration the company will furnish a book of checks upon the bank in which the subscriber keeps his deposit or drafts upon the business house with which he is connected, so arranged that each check or draft will be accepted by any bank for a specified amount without further endorsement, the identification of the drawer being contained in the book, and the payment of the check or draft being guaranteed by the company, whose responsibility is known everywhere. Business houses, especially those having large numbers of travelling salesmen in their employ, will find it a useful means of keeping their salesmen supplied with funds. Its adoption will relieve the home office of the work and responsibility of sending out drafts periodically, and it will also secure to the house an extended use of the money required for its salesmen's expenses. That is, instead of reducing his capital by buying exchange to forward to a salesman, who may be far from home, the merchant will have the use of his money until the draft cashed, wherever the salesman may be, is returned for payment. From the traveller's point of view, too, the draft-check should be favored in that it relieves him of the necessity of asking favors of anybody.

OUR HALIFAX LETTER.

It is not an unusual thing in local business circles this autumn, to hear expressions of surprise that such excellent trade conditions exist throughout the Province, notwithstanding the fact that within the last six months very considerable sums of money have been sunk in unfortunate stock speculation. No doubt, much of the prosperity so evident is due to the fact that labor—both skilled and unskilled—is abundantly and profitably employed. There are no idle hands in Nova Scotia to-day, except those who choose to be indolent. There is ample employment and a remunerative wage for everybody capable of following a useful avocation. This is undoubtedly the key to the good business conditions prevailing. The commercial value of the full dinner-pail is being realized. It is the money that is spent, rather than the money that is hoarded, that makes the wheels of commerce move, and so long as the working man has plenty to do, trade will continue buoyant. We can stand a good many losses in stocks so long as the earning capacity of the people is not impaired.

The constantly increasing output of coal is one of the factors tending to a steady improvement in trade. Last year the Nova Scotia miners raised to the surface 4,362,869 tons of coal, valued at the pit head at $8,725,738. If the average cost of raising a ton of coal be $1.50, this means that six million dollars were expended in operating expenses, the chief items of which are labor and supplies. The bulk of these millions, therefore, went into immediate circulation in our coal mining districts. Every additional ton raised means that trade is being correspondingly benefited.

Then look at the improvement in manufacturing recently seen in Nova Scotia. An I. C. R. official recently made the statement that for the first time in the history of the road the west bound freight traffic was in excess of that coming east. That means that these provinces are gradually turning the scale, and that we are sending our manufactures and natural products to the Upper Provinces in greater volume than hitherto. This is amply borne out by the orders on the books of provincial manufacturers. Take a concern in a Nova Scotia town which manufactures wire mattresses. I am told a Toronto house has contracted, or is willing to contract for its entire output. The first order from the Toronto house was for one thousand mattresses. The Amherst car works the other day closed a contract for 400 cars for an Upper Province railway. Nearly every factory in the province is sending goods up to Ontario and further west. Gradually the advantages of Nova Scotia as a manufacturing centre are becoming better known. Here let me point out that there is one industry in Nova Scotia in which a greater advance might be made if the parties concerned only realized the value of co-operation. I refer to the free stone quarries in the north of the province. A comparatively small quantity of Nova Scotia building stone has so far been sent to Montreal and Toronto, notwithstanding the fact that stone of equal quality to that from Indiana can be laid down in Montreal at a cost of from two to three dollars per ton less. If our quarry owners would combine, and maintain a representative at western points, an immense business could be developed. As it is, local jealousy between quarrymen hampers the development of a promising industry.

Travellers who have recently returned from Cape Breton report that outside of Sydney, trade conditions in that section of the province were never better. At Sydney

there has been a slight disagreement between the men and the management, but it is reported to be unimportant.

Lord Dundonald, who has been in the province attending the military camp, at Aldershot, unveiled the monument erected at Canning, in memory of Major Harold Borden, son of the Minister of Militia, who lost his life in action during the South African campaign. While in Nova Scotia Lord Dundonald visited the historic battlefield at Louisburg, where, in 1758, one of his ancestors, the Earl of Dundonald, lost his life, while repelling a French sortie. He expressed surprise that no monument had been erected to commemorate the stirring events which took place at Louisburg in the 16th century. The second company of delegates to the Empire Chamber of Commerce were with us last week. In this city they assisted in unveiling the monument in the Public Gardens, in memory of the Nova Scotia soldiers who lost their lives in the South African campaign, attended a reception at Government House, enjoyed a harbor excursion, and partook of a dinner at the chief hotel. They afterwards visited Sydney.

INSURANCE INSTITUTE OF MONTREAL.

The Insurance Institute of Montreal is a body whose deliberations are always of interest not only to members, but to the insurance fraternity in all parts of the Dominion. Its annual meeting, held in the Windsor Hotel, Monday evening, drew a large attendance. Mr. B. Hal Brown, the retiring president, occupied the chair, and touched briefly on the progress made by the Institute during the three years of its existence. The result in the future would depend, he suggested, very much upon the interest shown by those engaged in the business of insurance. He expressed appreciation of those who had labored with him upon the governing council during the past three sessions in one capacity or another and said that they had spared themselves in no particular in endeavoring to form an Insurance Institute that would reflect credit upon all those interested.

The report of the secretary stated that the past session had been marked by prosperity, and the various meetings had been well attended. The instituting of educational classes had, owing to lack of attendance, been given up, until there was a greater demand for them. The membership now numbered 283. One new feature suggested was that the incoming governing council might seriously consider the best means of extending the membership, so as to include, if possible, the ladies who were members of the staffs of the various companies. The treasurer's report showed the receipts to have been $1,495, and the disbursements $1,131, leaving a balance on hand of $366.

Officers were elected as follows for the year 1903-04: President, E. P. Heaton; vice-presidents, Alf. McDougald, T. L. Morrisey; hon.-secretary, Geo. Lyman; hon.-treasurer, C. C. Hole; governing council—Executive: S. P. Stearns, A. H. Lavers, A. R. Howell, J. E. E. Dickson, P. M. Wickham, J. Gardner Thompson, H. M. Lambert, A. B. Wood, D. M. McGoun, A. J. Dale. Associate: P. F. Mathias, S. A. A. Watt, Allan MacDuff, C. J. Alloway, M. Burke.

A BANKER'S VIEW OF THE SOO.

We have received the following communication which gives what may be called a banker's view of the recent unfortunate occurrences at Sault Ste. Marie:

Even if the collapse be only temporary, as all hope it may be, it will cause immense loss to hundreds of confiding people, and do no little damage to the country as a whole. But the fact is, the whole affair is the consequence of what we may call fanatical optimism with regard to money. The works themselves seem to have been capable of producing all that they were intended for. There is no failure there; so far, so good. But the rock on which the enterprise has split is a monetary one. There seems to have been no proper calculation (with reasonable allowance for contingencies), of the amount of money that would be required to carry the enterprise through dull times. The monetary position did not correspond to the rest of the enterprise. In fact, the whole affair was conceived and carried out on the principle, to speak in homely phrase, of striking 12 o'clock all at once. It was an attempt to plant a full-grown tree, and to anticipate in a year or two what would take 20 years at least to have developed in a natural way. If the projectors had spent one or two millions—a sum which was surely enough as an experiment in an out-of-the-way place, reserving a sufficient margin for contingencies, and letting the enterprise gradually grow in course of years it would, most likely, have continued to be on a sound and stable basis; able to meet all engagements and with money on hand for further and future developments. We have been indebted to enterprising Americans for bringing over capital and skill during the last few years. But capital introduced in this style, and worked according to the worst of modern American developments, does more harm than good. It is to be feared that a good deal of the same criticism may be applied to the Dominion Steel Company also. But it cannot be applied to the Dominion Coal Company, whose position has been attained by gradual growth.

It is a pleasing reflection upon the conservatism of Canadian banking methods that the crash has been without any effect whatever on the country's financial institutions. The company's local cash transactions were carried on through the Imperial Bank, but its debt to the latter is only about $50,000, which we understand, is more than amply secured.

EXPORT TRADE WITH AUSTRALIA.

A correspondent of the Monetary Times in New South Wales, makes some comments on the good opening which exists for an export company with brains at its head, and money behind it, to buy Canadian goods and ship to Australia; he makes as well a general enquiry respecting the Canadian Export Co., Toronto. Our correspondent points out, however, that an ordinary commission agent who has secured, or is securing trade in Australia, is not likely to permit goods which he has sold to be shipped through such a firm, because as a commission house, it is his rival, and he fears that the knowledge gained may be used either to dispossess him of his agency, or to substitute other goods. The operations of some United States concerns seem to have given ground for apprehension on the part of agents. For our part, we understand that the export company in question has been hampered to a certain extent by the unfamiliarity heretofore of Canadian manufacturers, not only with its methods, but, in some cases, with the very basis of an export trade. From this cause it has experienced considerable difficulty even in getting samples, price-lists, etc. Some manufacturers in this country seem to have the idea that export trade consists in sending goods to the farthermost parts of the globe on consignment, and receiving in return a miscellaneous assortment of wool, tallow, and so forth. The up-to-date method, as practised by the company referred to, is to pay cash for the goods wanted, and then to ship them without further trouble to the producers. It is now giving the finishing touches to its arrangements for developing Australian trade on an extensive scale, with depots, show-rooms, etc., at some of the more important centres. This company has also been largely instrumental in organizing the new steamship facilities presented by the Canadian, Australasian and Puget Sound Steamship Company, in connection with the Grand Trunk Railroad, whereby this road will handle freight on a through basis on their own lines as far as Chicago, from there via Northern Pacific to Tacoma, and thence by the new line of steamers to Australia and New Zealand. This should do a great deal to put Canada-Australian trade on a better basis.

INSURANCE COMMISSIONS.

Editor Monetary Times, Toronto, Ont.:—

Sir,—In your issue of September 25th, I note your remarks re Insurance Commissions, and quite coincide with what you say. To give you an instance of how this matter works in one town: There are here several agents, only

four of whom run a general insurance agency, and are dependent upon their insurance business to a large extent for their livelihood. Of the rest, one is a grain dealer, and places all his own business which should be controlled by one of the above agents; another is a lumber dealer who does likewise; another is a bank manager, who should give his attention to the business for which he receives his salary, and the others are lawyers and so forth. Besides this a considerable amount of the insurance of the district is controlled by loan companies and building associations, which do the work which properly belongs to the insurance agent who resides in the district, and devotes his time and attention to that business. As you say, "If the business were put on a more restricted basis, the agents would not be compelled to work half as hard, and they would make more money, while the companies would get better business with less losses." Trusting that the insurance companies will at an early date remodel their present system of allowing others than those who make it their business to carefully look after their interests and devote the greater part of their time and attention to the insurance business, to be appointed as agents. I am,

Yours truly,

"AGENT."

CANADIAN BUTTER.

Editor Monetary Times, Toronto:—

Dear Sir,—A report appears here in the daily press stating that in the Dominion House of Commons to-day Mr. Henderson denounced as a libel on Canadian dairy products the statement by Mr. Preston, the Immigration Commissioner, to the effect that the Canadian butter sold in London was so inferior that he was obliged to purchase New Zealand butter for his own use. This report was dated Ottawa, September 7th.

Now, more harm has been done to Canadian butter by having this mentioned in the House, and therefore allowing it to be cabled over here, than could possibly be done by any statement made by Mr. Preston, because Mr. Preston's statements were made on account of his anxiety to have Canada excel in the trade of this country, and there was so much truth in Mr. Preston's statements which the public would not have known had it not been for bringing up the question in the House. As an instance, I can tell you that I wished to get a sample of Canadian butter for some parties here, who were willing to take 50,000 pounds per week if the sample were satisfactory, and I had one ton shipped over. I had thoroughly discussed this with the shippers, and they informed me that they had thoroughly impressed on the merchants from whom they procured the butter the desirability that the sample should be of the very best. The butter arrived here, and I had it inspected, and it has turned out to be anything but even second-rate butter. In fact, I give you the expressions used in connection with this butter by several people who have tried to sell it for me. It has entirely killed the chances of these people getting the supply from Canada of 50,000 lbs. per week, which they are getting now from Russia. You will see how Canada stands in her own light, and nothing too bad, or too harsh can be said about the methods resorted to by the merchants in Canada shipping stuff to this country. The Canadian Commercial Agent, Mr. P. B. Ball, whose anxiety to promote the trade in this country every one knows, has had a chance to personally inspect this butter and he can vouch for the truth of my statements.

London, England, Sept. 11th. CANADIAN.

The following are a few of the comments made by dealers and others in connection with a ton of butter shipped from Canada to this country (Great Britain). It may be remarked that it had been certified to be prime dairy quality:

"I have seen several people in regard to it, but the butter, I am sorry to say, is rank. Whether it was the quality before shipping, or whether it has been kept in cold storage too long, anyhow, it is not proper stuff."

Another firm says: "Some of it is a poor class dairy butter, very much over-salted, and the balance is a fairly good creamery butter, but somewhat out of condition; we think it would deteriorate quickly after coming out of cold storage."

An expert says: "We have sent to Avonmouth this morning and examined the butters you wished us to see, and report as follows: Condition of the whole parcel is fairly satisfactory. Those marked No. 1 are fair quality butters, though poor in flavor and weak in texture; those marked No. 2 are better texture but poor in flavor.

Another firm, who deal exclusively in butter and cheese, report: "We have sent our man to see the butters, and we find them too stale, and not in any way suitable for our trade; we should not be able to do with them at any price."

TRADE OPENINGS.

The following enquiries relating to trade openings in Canada were made to the Canadian Government Offices in London, during the week ending September 25th. Further particulars may be obtained at the Monetary Times office by sending stamped envelope.

London manufacturers of ladies' costumes, dresses, shirt-waists, etc., want capable agents. An agent about to travel east and return by way of Canada, will be glad to hear of firms interested in several lines of British manufactures. London steel and iron merchant is open to act as buying or selling agent for Canadian firms or public corporations. North of England firms of importers would like to hear from Canadian houses in a position to ship tallows, oils, greases, lard, and other packing-house by-products. Cardiff fruit house wants names of important shippers of Canadian apples, who want an agent. Trading company desirous of obtaining their woodwork from Canada wants addresses of Canadian furniture manufacturers.

FINANCIAL ITEMS.

We are advised that the Bank of British North America has opened a sub-branch at Levis, Que., which will be under the temporary management of Mr. E. F. Racey.

Mr. W. Wallace Jones, of the firm of Buchanan & Jones, stockbrokers, 32 Melinda St., Toronto, has just returned from a most enjoyable visit to the Old Land, the trip occupying about two months.

Mr. H. R. O'Reilly, accountant of the Canadian Bank of Commerce, London, Ont., has been appointed manager of the Galt branch of the same bank, and left to assume his new duties this week. He will be succeeded in the London accountancy by Mr. C. D. Nevill.

Mr. E. S. Clouston, general manager of the Bank of Montreal, who has just returned from a western trip, speaking of the number of branch banks which are starting up throughout that country, is reported to have expressed the fear lest there may be almost too many. The banks, however, he says, are looking ahead, and expect further growth all over. There is a big demand for money.

An Associated Press despatch from New York says that the talk about what would be the dividend on United States Steel common stock has at length been settled by the declaration of the directors of that corporation that it would be reduced from 1 per cent. to ½ of 1 per cent., an action, no doubt, brought about by the falling off in business. On preferred stock the regular dividend of 1¾ per cent. has been declared. The financial statement which was issued this week shows that there has been a decrease of $4,642,668 (September estimated) for the third quarter of the calendar year, compared with the same period last year, and a decrease of $4,339,487 compared with the preceding quarter of this year. On October 1st, 1902, the unfilled orders amounted to 4,843,000 tons. This year on the same date, they amounted to 3,728,742 tons.

The North-Western Securities Company, of Canada, Limited, has bought the plans of the Southern Mutual Investment Company, of Lexington, Ky., and had them copy-

righted in Canada, under a special charter, which gives it power to do a general brokerage and investment business. The latter company has been operating for nine years, and during the last of these, we are told, distributed $1,997,000, and then had surplus assets amounting to $1,100,000, a splendid claim. It issues cumulative and dividend-bearing bonds, maturing in any given number of years. Its policy seems to be based upon that maxim of old-time insurance circles, "We don't want to die to win"; its distributions being made among the living rather than the dead. The company's capital stock is placed at $250,000, and T. M. Ostrom, of Toronto, is the manager.

INSURANCE ITEMS.

Mr. A. Waring Giles, heretofore inspector for the Atlas Assurance Company, Limited, has been appointed local manager of that company's Toronto branch. Messrs. Kay and Banks will continue to act as city agents.

We are informed that the Monarch Cash Mutual Fire Insurance Co., of London, Ont., has completed its fourth month's business, with practically no loss ratio, and with an addition to its reserve fund of several thousand dollars.

The Royal Insurance Company has appointed Mr. C. McL. Stinson, as local manager in Toronto, its office in this city becoming a regular branch. Messrs. Kay and Banks will continue to hold their old position as general agents. Mr. Stinson is well known in the insurance world.

We hear of the organization of a new company in the United States insurance field. It will be known as the Casualty Company of America, with Andrew Freedman, of New York, president, and E. W. De Leon, general manager. It will write liability, steam boiler, accident, health, disability, and plate-glass insurance.

The 34th annual meeting of the Fire Underwriters' Association of the Northwest, took place on the 29th and 30th ult., in Chicago. Several very interesting papers were read, and the following officers were elected: President, H. H. Friedley, Indianapolis; vice-president, F. W. Bowers, of St. Louis; secretary, D. S. Wagner, of Chicago; and treasurer, W. R. Townley, Winnipeg.

The Crown Life Insurance Company, Toronto, is offering for subscription in Canada, $100,000 worth of stock, on the same terms which governed the previous issue of $400,000 worth already allotted. The purpose is to make only one call of 25 per cent. on either the stock now offered, or that already subscribed. Every share sold has been issued at a premium of 25 per cent., so that the total amount of call on each share is $31.25. The company has at present over $2,000,000 of insurance in force.

A member of the Paris fire brigade has invented a new mask, which is said to be a great improvement. It can be fixed to an ordinary helmet, and around the neck by straps. The visor is of mica, protected by wire. In front of the mouth two pipes open, one furnishing fresh air, and the other carrying off what has been breathed. A reservoir worn on the back as a knapsack contains two compartments, one holding two steel jars filled with compressed air, the other one, which is called the lung, and which is connected by copper tubing with steel jars and special mechanism, admits compressed air only at nominal pressure. The mask leaves the ears uncovered. An electric bell gives warning when the supply of air is running out. The apparatus which weighs only twelve kilograms, is to be put into immediate use in the Paris fire brigade.

MACHINERY INSURANCE.

That there should be a wide scope in many branches of industry for the insurance of machinery, seems a reasonable proposition. The electric business, with its extensive wire and cable nets, multitudinous masts and poles, generally exposed to all weathers, should be one opening a big field. But in the other lines it is the same. A chimney blows down, a boiler explodes, or the unexpected rising of a river may, any one of them, cause serious damage to machinery. A company in Germany is now prepared to meet just such cases, as well as compensate for injury caused to machines by the neglect or inexperience of workmen. In return for a moderate premium it is stated that it will write insurance on all sorts of machinery, as well as upon belts, pipes, chains, cables, and other apparatus. The cost will depend upon the total value of the machinery insured, and will vary according to whether the latter is exposed or under cover, and whether it be movable or a fixture.

THE FAILURE LIST.

R. G. Dun & Co.'s compilation of failures for the nine months of the present year, which have already elapsed, makes a very favorable comparison, so far as last year is concerned, and it should be remembered that last year showed an improvement on those previous. The total number of failures up to September 30th last, was 721, the liabilities being $5,332,611. Against this, last year's record for the same period was 840, the liabilities being $9,322,467. On the other hand, the assets involved in the failures this year were only $3,311,529, as compared with $6,672,155 last year. The banking failures, which numbered four, were all in Ontario, and the liabilities amounted to $2,139,225, a large proportion of those for the complete list.

GROCERS AND PROVISION DEALERS.

There has been a further cut of 10c. a hundred in all lines of refined sugars.

A strong market is reported as existing for cloves, pimento, and pepper.

The Brazilian Review estimates that the yield of the present Rio coffee crop will be about 4,000,000 bags, and that of Santos 7,250,000 bags.

A meeting of the Montreal Grocers' Association took place last week, when the following were elected as officers for the year: President, Mr. N. Chartrand; first vice-president, M. Limoges; second vice-president, Mr. Meynard; treasurer, A. Bastien; secretary, J. A. Beaudry. Directors—Messrs. J. Labonte, T. Bergeron, J. H. Paquin, A. Laurendeau.

—A gentleman has several bound volumes of the Monetary Times, which he would dispose of at a reasonable price. They run from the year 1869 up to 1894-95, and are in a very fair condition. Particulars as to dates may be obtained at this office.

—The annual meeting of the Canadian Pacific Railway Company was held in Montreal on the 7th inst. Notwithstanding the large increase in working expenses, the result of the year's operations was stated to be particularly gratifying. The old board of directors was re-elected.

The Board of examiners appointed by the Dominion Government to fix the grain standards, has concluded its labors. Generally speaking, it may be stated that the standards of most grains grade higher this year than last, though there is not inconsiderable grain rejected altogether.

CLEARING HOUSE FIGURES.

The following are the figures for Canadian clearing house for the week ended with Thursday, October 8th, 1903, compared with those of the previous week:

	Week Ending Oct. 8th, 1903.	Week Ending Oct. 1st, 1903.
Montreal	23,374,187	20,097,708
Toronto	15,547,975	14,529,774
Winnipeg	5,047,901	4,593,061
Halifax	1,927,861	1,630,282
Hamilton	1,356,562	772,142
St. John	1,051,433	965,007
Vancouver	1,531,031	1,519,364
Victoria	.....	512,815
Quebec	2,086,853	1,239,530
Otta-	2,360,968	1,429,098
London	989,590	794,116
	.....	$48,082,897

OLD CHUM

Cut Plug

Smoking Tobacco

Proves its Superior Quality.

Sold by all leading wholesale houses.

ANOTHER "JUST SO" STORY.

Once on a time, O Best Beloved, there was an Affluent Individual known familiarly as Uncle Sam. He had his abode in a Great Country wherein was found Everything that man Wants, not to mention a Great Deal that he Ought Not to Want, but Does. Now, Uncle Sam was a very Nice Old Party, and so Trustful that, with the advice of those he counted Great, Wise, and Eminent, he Built a Tariff Wall all around his country and said to his People: "Behold, this wall is for your Protection, and I Trust you not to Chase Each Other about inside it." And hearing this there was some that Shut one Eye while Keeping the other Open, a strange proceeding, O Best Beloved, and one the meaning of which has not been revealed unto me. And time passed, and Uncle Sam waxed ever more Trustful, until he Trusted even those who herded the Cattle and delved for the Coal, and he was made to Pay, Pay, Pay, which he did with a Cheerful Countenance, for as I have related unto you he had an Exceeding Abundance of the Wherewithal, and when the Wherewithal is made with Ease, it goeth likewise with Facility. But it came to pass that, one Hard Winter time, those who were Overseers of the Mines quarrelled with those who went into the Bowels of the Earth to dig, and there arose a Coal Famine, and Uncle Sam waxed Cold, for it was a land where there was Snow and Ice. And, behold, he sat with his feet on the Mantelpiece and used his Intelligence. And, suddenly, he replaced his Feet below his Head, even as a man should wear them, for he had Conceived a Brilliant Idea. And he called together his Great, Wise and Eminent Men and spoke Winged Words unto them. And they all Agreed with one Voice that He was too Trustful and that they were even as the Witless in that they had Built a Wall so high that Coal from the Lands over the Seas could not be brought in. And they hasted unto the House wherein they made their laws, and decreed that the Wall should be Removed. And they removed it, O Beloved of my Bosom, and Behold it was Good. And they rejoiced exceedingly therat and Roasted Chestnuts on Coal from a place called Newcastle until the Evening.—Commercial Intelligence.

THE Pittsburg Steel Company is going to establish a branch at Hamilton, Ont., rumor saying that a contract for power has already been signed with the Cataract Power Co.

THE CANADIAN CASUALTY AND BOILER INSURANCE COMPANY

Full Government Deposit Paid.

President:
ALEXANDER SUTHERLAND, D.D., Toronto,
Vice-Presidents:
H. N. BATE, Ottawa, Director Bank of Ottawa.
W. S. DINNICK, Toronto, Vice-Pres. and Mng.-Dir. Standard Loan Co.
A. G. C. DINNICK, - Managing Director.

This Company having deposited $30,000 with the Treasury of the Ontario Government, has been duly licensed to transact the following classes of Insurance

Boiler Inspection — Personal Accident Insurance
Boiler Insurance — Sprinkler Insurance
Consulting Engineers — Elevator Insurance

The patronage of the public is respectfully requested. Correspondence with Insurance Agents and those wishing to engage in the business is invited, and will receive prompt and courteous consideration.

Commercial.

MONTREAL MARKETS.

Montreal, October 7th, 1903.

Ashes.—There is no increase in receipts, and desirable lots of first pots readily bring from $5.90 to $5.95. There is a continued absence of business in second pots, and pearl ashes.

Dairy Products.—The easiness in the cheese market referred to in last report developed into quite a notable decline, present prices being fully from ⅜ to ½ a cent lower than a week ago, but quotations are now fairly steady at 11½ to 11⅝c. for fine Westerns; Townships, about 11⅜c., and Quebec 11 to 11¼c. Butter is barely so firm as a week ago, 21½c. being about the limit for fine Townships creamery; Quebecs, about 21c.; Western dairy, 16c. Large cheese exports are again reported for last week, thirteen steamships having taken out 108,877 boxes, and the total shipments to date are now close on to the two million mark, with six weeks of open navigation yet. Of butter, the shipments last week were 16,442 packages, as against 6,708 packages for the same week a year ago.

Dry Goods.—Retail payments due the 4th, were very fairly met, several leading wholesale houses reporting the proportion of paper paid at from 70 to 75 per cent. Fur and clothing houses also report a generally satisfactory experience, and only three recent failures are reported in this Province. Travellers continue to do well, and values in all lines are very firmly held. Manufacturers of fingering yarns gave notice of an advance.

Groceries.—On Saturday last, the local refineries announced a cut of 10c. a cental on all lines of refined sugars, making the present factory figure for standard granulated $4.10, with yellows ranging from $3.40 upwards; bags 5c. a cental less. This reduction is due to an easier market for raws, and to a proportionate reduction by American refiners, but there have also been some good sized importations lately of Austrian and Belgian refined sugars, which may have had some influence. There is some moderate enquiry for molasses, of which stocks are light, only one direct cargo of 1,100 puncheons having come to this port this season, as against 10,000 to 12,000 puncheons last year. Importers quote 38c. in round lots, and jobbing prices range from 40 to 42c. No late important transactions are reported in teas, but values are very firm except in low grade Japans, which holders are offering more freely, but the quality is nothing extra. Mediterranean advices indicate that Valencia and Malaga raisins and currants are all steady at late advance. New Smyrna figs are arriving, and are considerably cheaper than last year. The "Bellona," the second direct fruit boat has completed her loading at

Patros, and is now at Denia, whence she sails about the 8th or 9th for Montreal, via Cadiz. Grenoble walnuts rule easy, but a cable just to hand reports quality hardly up to the average.

Hides.—Tanners are reported to be buying quite freely, in fact, it is said the demand is almost more than equal to the supply, and there is at present no surplus stock in store at all. The general price now being paid by dealers for No. 1 beef hides is 9c. Lambskins are steady at 65c. In calfskins there is now nothing doing.

Leather.—Boot and shoe manufacturers are not active buyers at the moment, but some fair sales of dongolas and other light leathers are reported. The export demand for sole, which has been rather dull the last few weeks, is more active, and most of the large sole leather tanners are reported as making good shipments to Britain. Good jobbing sole is scarce and spot wanted, 25c. being obtainable for No. 2. For Mfrs. No. 2 B.A., the quotation is 24c., and 23c. for No. 3, while for prime slaughtered, 27c. is asked.

Metals and Hardware.—A continued good movement is noted in these lines. Prices of iron and iron products rule pretty steady as yet. A sale of a 100-ton lot of No. 1 Summerlee is reported at $21; Gartsherre is quoted at $20.25; Eglinton at $19, and No. 3 Middlesboro at $17.75. A steamer it at present in port with some moderate supplies of English iron, stocks of which were pretty well exhausted. Bar iron and steel, nails, wire, etc., are unchanged. Iron pipe is still comparatively scarce, and is firmly held at $4.81 for inch. Plates and sheets are steady at former quotations. Ingot tin is again easier, and at present is quoted at 29c. for Straits; copper is also a little cheaper, at 14c.; lead steady at $3.10; spelter firm at $5.75; antimony is apparently going to beat the record low price, and is quoted at 6¾ to 7c., apparently owing to the large Japanese and Chinese offerings.

Oils, Paints and Glass.—A first rate business in these lines is reported by most houses. Prices of linseed oil continued unsettled, now being sold down to 47c. Leads also are still being quoted at cut rates. Turpentine maintains all the firmness recently noted. Considerable stocks of window glass are now coming to hand. Quotations are as follows: Single barrels, raw linseed oil, 47 to 48c.; boiled, 50 to 51c., net 30 days, or 3 per cent. for 4 months' terms. Turpentine, 85 cents; single barrels. Olive oil, machinery, 90c. to $1; cod oil, 35 to 37½c. per gal.; steam refined seal. 50 to 55c. per gal.; straw do., 45 to 47c.; castor oil, 7½ to 8c., for machinery; pharmaceutical ditto, 8½ to 9c.; lead (chemically pure and first-class brands). $4.75 to $4.85; No. 1, $4.50 to $4.60; No. 2, $4.40; No. 3, $4.15; No. 4, $3.90; dry white lead, 4½ to 4¾c. for pure; No. 1 do., 4 to 4¼c.; genuine red ditto, 4¼ to 4½c.; No. 1 red lead, 4c.; putty, in bulk, bbls., $1.80; bladder putty in barrels, $1.90;

TIRESOME

Lifting that carriage to inspect the writing. Actual tests made show the daily average to be two hundred times. Think of it! Why not try an **UNDERWOOD?** — The cost is only a trifle more.

J. J. W. Deuchar, F.F.A., F.I.A., General Manager and Actuary of the Norwich Union Life Assurance Company, speaking of investments says:

"It may serve to indicate the great importance of obtaining a good return on the investments, if it is realized that one per cent. of increased interest on the funds of a company will, on the average, have as great an effect as a saving in expenditure equal to 10 per cent. on the premium income, while, if an office could count on realizing 5 per cent. interest in place of 3, it might reduce its premiums some 30 per cent., or double its bonuses."

Mr. Deuchar does not name **THE GREAT-WEST LIFE**; but the above statement exactly describes the happy position of its policy-holders.

TORONTO MARKETS.

Toronto, October 8th, 1903.

Cement.—The demand for cement shows no sign of falling off; indeed, if anything, it has grown even stronger during the last few weeks. Importations have been fairly heavy, but the Canadian article is being largely called for. The price at the mill holds at about $2.25 per barrel.

Chemicals, Drugs, etc.—The business in drugs, locally speaking, keeps up fairly well, with no startling changes to announce either in prices or the call for particular articles. From New York come reports to the effect that the cheap lots of Java quinine now being out of the way, the market for this commodity has a firmer tone. The demand for opium continues light. Interest in cod liver oil is increasing. The price of Union salad oil has been reduced by 2c. per gallon. Advices from Manchester say that there is only a moderate enquiry for chemicals, especially in the textile lines. Values for the most part, however, have ruled steady, and consumers are now sending in more enquiries.

Flour and Grain.—An easier feeling prevails for flour. Ninety per cent. patents sell for $3, in buyers' bags, east or middle freights. Choice brands are a little higher. Millfeed is steady at $17 to $17.50 for shorts, and $13.50 for bran; oatmeal is duller. There has been since last week no appreciable change in the wheat market, which is dull. Quotations are unchanged. Barley continues unchanged. Oats are 1 to 2c. lower, and dull at the decline. Rye is 1c. lower, corn and buckwheat are unchanged. Little business in grain is being done just now.

Fruit.—Quite a large quantity of fruit is still making its appearance in the market, but there is a certain degree of slackness in the demand. Some of the peaches coming forward are not over-good quality, and even the better grades are not in keen demand. A few second-crop Lawton berries sold this week at 12½c. per box. Tomatoes are scarce, but only fetch 15 to 20c. even for best quality. Grapes are fairly plentiful at 20 to 30c. per small basket. Prices on other fruits and vegetables are as follows: Cocoanuts, per sack, $3.70 to $5; Oranges, late Valencias, $4.50 to $5; Jamaica oranges, $6 to $7 per barrel; lemons, Verdelli, $4 to $4.50; bananas, 8s,, $1.50 to $2; firsts, $2 to $2.50; extras, $2.50 to $3; sweet potatoes, $3.50 to $3.75 per barrel; celery, 35c. to 40c. per dozen; gherkins, 40c. to 50c.; Spanish onions, $2.75 to $3 per large case, and $1 for small; cranberries, $9 per barrel; pears, 25c. to 35c. per basket; quinces, 35c. to 40c. There is a great boom in apple shipments, which so far number three times as heavy as was the case last year at this time. Baldwins and Greenings are the chief exports, to be followed in a few weeks' time by Northern Spies. Germany has been paying $6.50 for choice Canadian apples, but the European market, as a whole, is now so swamped with American apples that it will now only pay to ship really good stuff.

Groceries.—No further change has taken place in sugar. The movement may be described as good, seeing that the preserving season is about at an end. The action of the Consolidated Canners respecting terms, etc., is being criticized a good deal by the trade, who find it difficult to make their arrangements ahead. As the above organization controls 90 to 95 per cent. of the country's output of canned vegetables, its views naturally have considerable force.

Hardware.—Trade both in shelf goods and the heavy metals continues very good indeed. Sporting goods are in specially good request. Values of practically all lines remain steady.

Hides, Skins and Leather.—There is a fair demand for all these lines. Sheepskins have gone up about 5c., but otherwise prices remain unchanged. Prospects for a good fall season's leather trade are good.

Live Stock.—A weaker market prevails for several lines of cattle. A good deal of poor stock has been arriving lately, and this has affected the demand. though, for really good animals, both for export and butchers' purposes, the latter is not much to be complained about.

Provisions.—For all the better grades of butter the demand is good. Creamery sells at 21c. for prints, and about 18c. for solids, while dairy, (pound rolls), goes at 16½ to 18c. Cheese is steady around 12 to 12½c. Stocks of smoked meats are light, especially hams, with the result that prices are very firm, barreled meats also are in good request.

Wool.—Holders of fleece seem disposed to keep it for higher prices than buyers believe it to be worth, and so little business is passing. Pulled wools are meeting with a fair demand from the domestic mills, and prices are firm.

THE
NATIONAL LIFE
ASSURANCE CO. OF CANADA

This progressive Canadian Company wants agents in Nova Scotia, Quebec, Ontario, Manitoba and North West Territories. Apply HEAD OFFICE, Temple Building, TORONTO.

Something Really New in LIFE INSURANCE.

THE
ADJUSTED INDEMNITY POLICY
ISSUED BY
The NORTHERN LIFE
Assurance Company

has no equal

It gives the necessary Home Protection for less money than the Regular Policies.
Write for Booklet explaining it.

JOHN MILNE, Managing Director.
Head Office, - London, Ont.

Continued Progress

During the last few years the North American has made marvellous strides in all Departments tending to its upbuilding, which can readily be seen by the following figures, showing a comparison of

Three SEPTENNIAL Periods

Year	Cash income	Assets	Policies in force
1881	$ 39,613	$ 88,763	$ 1,221,712
1888	203,691	666,919	7,927,564
1895	581,478	2,300,518	15,779,385
1902	1,270,840	5,010,813	30,927,961

A strong progressive Canadian Company giving excellent returns to its policy-holders, therefore making it a desirable Company for agents to represent. Three active agents wanted.

With the largest resources of any mortgage corporation, and its funds carefully invested by officers of such experience, its depositors are assured of absolute safety.

WHY lock your money up in a bank to bear an insignificant rate of interest when you can purchase our Debentures, which are issued for one, two, three, four or five years, and bear interest at five per cent. per annum. Half-yearly interest coupons, made payable to bearer, are attached to these Debentures. . . . .

The Debentures are transferable. Remember your money is safe here. There is absolutely no chance for loss. Write us for further information. . . .

THE Mexican Light and Power Company, in which Canadian capital is chiefly interested, has now taken possession of the City of Mexico Electric Light Company's property, formerly owned by Messrs. Siemens & Halshe, German bankers. Good headway is being made in installing the plant necessary for conveying power, etc.

Mercantile Summary

IN Vancouver, during September, building permits were issued to the amount of $138,650, making their total value this year over $1,000,000.

THE Dominion Tar and Chemical Co. began manufacturing at Sydney last week. The company has orders booked ahead for large quantities of creosote, which, owing to the high price of ties, is largely used by United States railways as a preservative. The New York Central has a contract with the Sydney concern for a large quantity of creosote.

THE "Clover Leaf" Mining Company is developing a copper mine near Liskeard New Ontario, and is putting in a good deal of hoisting and other machinery. Mr. Thomas Gibson, director of the Bureau of Mines for Ontario, has come back from that region supplied with a large stock of information concerning mineral deposits, etc., around Lake Temagami and other parts.

THE property of the Dominion Lumber Company, at St. Margaret's Bay, west of Halifax, N.S., comprising some 8,000 acres of spruce and hemlock, with mill, stores, houses, wharves, etc., is reported about to be sold to Mr. Louis Miller, a prominent Scotch lumberman. This gentleman is said also to hold options on some other timber properties in Nova Scotia and New Brunswick. He is one of the chief owners of the lands acquired a few months ago by the Newfoundland Timber Estates Company.

WE understand that the extensions to the Sao Paulo (Brazil), tramway system made as a result of the subscription of $1,000,000 to the stock of the Sao Paulo Company, about a year ago, are now about completed. The track has been greatly lengthened, and many new cars put into commission. The power company has now disposed of its present entire output of 8,000 horse-power and installation is being made at the dam for the generating of the additional 8,000 horse-power that can be taken from it. Of this 4,000 will at once be disposed of. The electric light company has secured a number of good contracts, and has already more than 32,000 incandescent lights in use. A car-shop is also being constructed.

THE Humber Light and Power Company, Toronto Junction, has been reorganized, as a result of the purchase of a large part of the stock by some of the directors and the Stark Electrical Company. Hon. John Dryden becomes president, and Hon. George E. Foster, and A. M. Stark, directors, in place of S. Nesbitt, A. C. Morris, and H. H. Hurd, who had retired from the board. The lighting plant is to be increased to double its present capacity, and a telephone system, the invention of Mr. Stark, is to be established in connection, with, it is claimed, an accompanying great reduction in rates. The price proposed is, we understand, not to exceed $15 for private phones, and $25 for business, with $6 for the initial price of installation.

THE Ogilvie Milling Company held its annual meeting in Montreal last week, Mr. Charles Hosmer in the chair. The year just past was the most prosperous in the company's history. The following directors and officers were elected for the ensuing year: President, Mr. C. R. Hosmer; vice-president and managing director, Mr. F. W. Thompson; directors, Hon. George A. Drummond, H. Montagu Allan, E. S. Clouston; secretary, Mr. Shirley Ogilvie; treasurer, Mr. S. A. McMurtry; auditor, Mr. George Creak.

Mercantile Summary.

ONE of the large mills of the Hastings Shingle Mill Company, at Vancouver, B.C., was last week destroyed by fire. Its capacity was 175,000 feet per day. With machinery, it was valued at $80,000, and the kilns and material would be worth half as much more. The insurance was $50,000.

THE New York and Ottawa Railway is to be sold by public auction at St. Regis Falls on the 20th prox. Considerable interest is felt owing to the fact that the purchase, it is supposed, will include the Ottawa and New York line, the stock and bonds of which are held by the first company. The Delaware and Hudson Railroad is said to be figuring on the purchase, as, by the construction of a connecting line of fifty-five miles from North Creek to Tupper Lake, it would present the most direct route from New York to the Adirondacks and Canada.

STRATFORD, Ont., council have at length arrived at what appears to be a satisfactory agreement with the proposed radial railway, of which Mr. H. M. Sloan, of Chicago, and Dr. McKay, of Ingersoll, are the chief promoters. The suggested agreement is as follows: City to give a 50-year franchise with option by city of purchasing outright after 25 years. Exemption from taxes for 20 years, or after 10 years upon city reaching 20,000 population; five-cent fare, workmen's cheap tickets at certain times; thirty-minute service on certain streets. Arbitration of differences by the Ontario Railway Committee. Company to have the right to furnish light and power. Provision made for replacing roads and rails. The rails to be used not to project above road level. The company to handle passengers and freight traffic; rolling stock and rails to be first-class and strictly up-to-date. The radial railway will run to Mitchell and St. Mary's.

AT the semi-annual meeting of the Grand Trunk Railway, in London, Eng., last week, the president, Sir Charles Rivers-Wilson, stated that although there had been a very large increase in revenue, there had been, owing to peculiar conditions of the times, a corresponding increase in expenditure, which had gone far to neutralize the beneficial results which might have been expected. The time would certainly arrive, he thought, when shareholders would not regret the expenditure of the last few years. Since January, 1898, £2,548,000 had been distributed in dividends. The tide of prosperity might recede, but he was satisfied that the Grand Trunk Railway would derive a lasting advantage from the policy pursued in prosperous times of which they were already reaping the benefit. Referring to his recent visit to Canada and the United States, he saw no reason why the industries of both countries should not continue to develop.

Mercantile Summary.

T. W. HOPKINS, of Barrington, N.S., succeeded to the general store business of his father in 1898. He is not reported as having shown any great aptitude for business, and been found generally slow, and dilatory in payments. He was recently reported as offering his creditors 40 cents on the dollar, but has now assigned.

L. W. MACGILLIVRAY, general dealer, of Gabarus, N.S., has been in business some 15 years, but has never achieved much success. The account has always been described as more or less of a dragging one, and in 1898, he is reported to have settled at 25 cents on the dollar. In August last, he made a similar offer, but the arrangement has not apparently gone through, and his assignment is now noted.

B. NERON, general merchant, also dealing in lumber, at Metabetchouan, Que., in the Saguenay district, has assigned. He was originally a farmer, but has been some years in business. Through over-crediting principally, he became involved in 1895, and then compromised at 35 cents. Last week, a meeting of his creditors was held in Quebec, when a statement was submitted showing liabilities of $29,123, and assets of $28,825.

ABOUT two years ago an American, J. Lawton Work by name, located at St. Adolphe de Howard, Que., in the Laurentides Mountains, north of Montreal. He was reported to have been connected with some large American manufacturing concerns, and to be a man of large means, who had come to reside in the Canadian Adirondacks for his health principally. He soon developed an active interest in the lumber trade, and in the early part of 1902 organized the Howard Trust and Investment Co., with an authorized capital of $250,000, using the name of several friends for the purpose of incorporation, but apparently finding most of the capital himself. He bought limits freely, built a large sawmill, and bought others, built an enormous hen ranch or chicken hatchery. Everything was done on a lavish scale. He cut a road of his own, nine miles long, through the bush to have a shorter haul for his lumber to Ste. Agathe Station, and this summer started to grade an electric line to the same place. His undertakings were generally regarded as of a very visionary character by conservative business people, and the request for a winding up order, made last week, was therefore not much of a surprise. The liabilities are reported to be quite heavy, and his laborers, and a number of small local storekeepers, are expected to suffer severely. His brother-in-law, A. D. Spear, who opened a general store at St. Adolphe, a little more than a year ago, has also assigned as a result of the general smash, and Mr. Work is reported absent in the United States

DRESSING BAGS
To those who are looking for unlimited comfort when traveling a fitted bag appeals. As a gift to a friend going away there is no surer way of making him happy.

Mercantile Summary.

THE Montreal Light, Heat and Power Company is understood to be negotiating with the Shawinigan Company for an additional supply of 10,000 horse-power more power.

ELEUSIPPE BELAND, of Quebec, who has done a retail cigar and tobacco business, in a prominent stand for the past thirteen years, has, somewhat unexpectedly assigned, and is said to show an indebtedness of $13,000.——J. A. Canton, dry goods retailer, of the same city, reported embarrassed in a recent number, has now assigned on demand, and is estimated to owe about $20,000.

THE Mack Mineral Springs Company, Limited, St. Catharines, Ont., has been incorporated with a share capital of $100,000. It will manufacture, deal in, and sell carbonated, mineral, distilled and table waters and non-alcoholic beverages, and, subject to the provisions of The Pharmacy Act, to extract salts for medicinal and other purposes; acquire any other business similar to the business to be carried on by the company, with power to promote similar companies for any purpose which it may be desirable to carry on in connection therewith, and to sell and dispose of the undertaking of the company, and all the assets, trade-mark, good-will and stock-in-trade belonging to the company for shares, debentures or securities of any other company having objects altogether or in part similar to those of the company hereby incorporated.

CONSIDERABLE reductions in flour and grain rates have been made on Manitoba railways. The Government a little while ago caused the Canadian Northern to reduce their rates, and now these have been made general, by friendly agreement with the Canadian Pacific Railway. Briefly stated, the new freight tariff is as follows: C.P.R. reduces wheat and flour rate from Winnipeg to

PICKFORD & BLACK,
HALIFAX.

Mercantile Summary.

the Lake by 4 cents a hundred; C.P.R. reduces wheat and flour rate from all points west of Winnipeg by 3 cents a hundred; C.P.R. reduces rate on coarse grains by 2 cents a hundred; C.N.R. reduces rates on flour by 1 cent a hundred; C.N.R. wheat rate raised 1 cent a hundred west of Winnipeg. The net result is a 10 cent rate on wheat and flour from Winnipeg to Port Arthur, on the main line of the C.P.R., and a reduction from every station in Manitoba of 3c per 100 lbs. on wheat and flour, and 2c. on oats and barley, compared with the rates in force since February, 1902.

A WARNING TO THE SUCCESSFUL.

The processes of nature which work toward the highest perfection—work slowly. Too sudden appreciation of efforts tends to final failure. No man is more unfortunate than he who succeeds too quickly and too easily. His success makes him exaggerate his own importance and ability. It makes him underestimate the strength of those who compete with him, and the difficulty of winning in the long run. The world is full of all kinds of disappointed beings—workers of all sorts—who lead disappointed lives. Of these men, a great many started out hopefully and promisingly. They succeeded too soon; they made money too easily; they rose too suddenly. Failure at the right time would have made them think, work, and do better. But failure came too late, and when the energy to fight and overcome was no longer there. If every young man who thinks well of himself will realize that he may have mistaken good fortune for great ability, and that the failure that has been put off will come sooner or later, unless he thinks of it and struggles to improve himself in spite of success, many disappointments will be saved in the future. Discount your failure. Don't wait for it to discount you.—Exchange.

APPLES IN NOVA SCOTIA.

Wheat is not to have things all its own way this year; great as is the banner crop of the West in its specialty, the effete East is also to be heard from. The apple crop this year is undoubtedly the largest in our history, says the Maritime Merchant, and there is every probability that our export of apples will exceed by at least 100,000 barrels the great year of 1896, when 409,773 barrels were exported via Halifax and St. John. The exports for the past three or four years have been comparatively small, last year only 156,000 barrels being exported. In fortunate conjunction with this is the excellent price being obtained. A large number of the orchards have sold their fruit

J. E. ROBERTS. - - GEN.-MGR.

for $2 per barrel, and those not yet sold are holding for a higher price, with probability of getting it. The Gravensteins and other early apples are now all picked, and have turned out even better than anticipated, many farmers having nearly doubled their estimate. Ribston Pippins also have been coming on well and will exceed early estimates. Both Ribston and Blenheims are also pretty well picked. Baldwins and Northern Spies are reported rather scarce, and they are likely to be high priced.

Judging from present appearances, there will be some difficulty in getting the apples shipped this season. The farmers of the Valley have in times past complained a good deal about the inadequate facilities provided for them by boats running out of Halifax and St. John, but the fault is not all on the part of the steamships. In past years, growers have been in the habit of engaging a certain space on the boats, and after having done so, the opportune visit of a speculator would induce them to sell their apples in the orchard; the result being, of course, that the space was, so to speak, left on the steamship company's hands. It is only natural that if they expect the steamship companies to keep faith with them, they must do likewise with the companies.

THE STOCK EXCHANGES.

The extraordinary dullness in stock transactions continue to prevail throughout Canada and the United States. The only activity that exists seems to lie in the direction of an occasional further decline in prices. On Tuesday last, in New York, there was another serious break in stocks, and the Montreal and Toronto markets tended to follow suit. Under this influence, Dominion Coal fell seven points, and even C.P.R., which held up better than most of the popular stocks, declined to 117½, and sold at that point. Practically all transit and industrial stocks shared in the easiness.

MORE CANADIAN BUTTER.

The following is extracted from a London letter of September 21st: "Some of the Canadian butter shippers to this country should get ten years penal servitude." Another dealer writes as follows to our correspondent: "Please instruct us as to the disposal of two boxes butter sent us as sample Canadian finest butter, but which is bad confectioners'."

—Technical journals have recently drawn attention to the fact that, despite the rapid extension of tramways and enormous increase in the number of passengers carried, the railways have also had an augmented passenger traffic. In the last seven years, according to Engineering, of London, the aggregate number of rail fares has risen by 11.7 millions, while in the same period tramcar fares have increased by 196.2 millions. British tramways last year conveyed 1,394,000,000, which was 25 per cent. more than the railways. The figures seem to demonstrate that what the railways have lost on suburban and short-distance traffic they have more than made up on their long-distance fares; and further, that facilities for travel increase its amount, and doubtless that lesson will be anew illustrated when the railway companies connect their outlying areas with the trunk lines by their own electric motors or branch tramways. Though we have had seventy odd years of railways, the science of locomotion is still in its infancy.

—We have had another remarkable spectacle in the strike of the members of a trade union employed in a boiler shop in Jersey City, N.J., for what amounts to practically a reduction of wages. The minimum scale was three

CHATHAM, ONT.

dollars per day, but the firm paid a number of workmen more than that, some of them receiving as high as three dollars and seventy-five cents a day. To this the union objected, saying that the men should be paid equal wages, and a strike resulted. What is more remarkable, the men who were receiving the extra pay went out with the others, thereby placing themselves officially on record as protesting against a recognition of their superior abilities. It can well be imagined that they did not go willingly, however, and the incident furnishes another illustration of the tyranny of those who get themselves into power in labor circles. The proprietors of this particular shop filled it with non-union workmen, and the union made so much trouble that the police were called in to keep the peace.—New York Exchange.

UNITED STATES FINANCES.

Henry Clews & Co., New York, in their weekly letter dated October 10th, say: For some time past Wall Street has been hunting for troubles, and like most individuals engaged in that doleful occupation it has found them with greater promptness and abundance than anticipated. The result has been a mood of undue despondency from which recovery is slow, because the patient has been weakened by previous over-indulgences and requires time for rest and recuperation. Nevertheless, the outlook is more assuring than a month ago, apprehension is disappearing, a number of important doubts are now a matter of history, and there is no longer any cause for anxiety concerning the crops, money, or even the Steel dividend, which was the last element of uncertainty. The reduction of the Steel dividend was both wise and timely, having been fully discounted by the previous decline in the stock. Public opinion no doubt had much to do with forcing this conservative action by the directors, and had two per cent. always been paid, instead of four, the stock would probably have been selling at double its present value. The best corporation management is that which builds up a reserve, not one that distributes all the net earnings to stockholders; the reserve being to a corporation precisely what a savings bank account is to the wage earner when the day of stress arrives. Outside of Wall Street the only cloud on the horizon is in the industrial situation, where there is a feeling of hesitancy owing to the high costs of production forced by the demands of labor and by high priced materials. It is this fact that strengthens the impression in business circles that an industrial reaction of more or less consequence is in front of us. Perhaps a reasonable recognition of this fact on the part of both capital and labor will facilitate readjustment. No sane person ever expected that the abnormal activity of the past few years was to continue uninterruptedly. This does not mean that a precipitate fall is to be expected; on the contrary, a gradual reaction is likely and desirable. Readjustment to a lower level of prices does not necessarily involve depression and loss, because, to a very considerable extent, it is certain that enterprise and industry would revive under a moderate recession in costs, and that the industries of the nation would be upon a more stable basis if upon a lower level.

PETERBOROUGH

The Greatest Cereal Company in the World have recently erected mills here, with capacity to handle ten million bushels of grain per annum.

An Immense Electrical Manufacturing Works are now erecting half a million dollars worth of additional buildings to their plant.

Binder Twine Mills have recently been completed at cost of about $300,000.

A Beet Root Sugar Factory is now being built at a cost of $400,000.

Cheap Water-Power,

Railways, Geographical position and Trent Valley Canal are Inducements.

WESTERN PROGRESS AND WESTERN VIEWS.

On another page of to-day's issue is begun a series of papers which will contain note and comment upon the Great West of Canada as a recent visit disclosed it. Comparison with the appearance of things a dozen years ago is unavoidable, and, indeed, it may often prove interesting, for the strides made are often remarkable. The present article dwells upon some features in the shape of opinion and fact which are most prominent.

Progress was very marked in towns and villages along the main line of the railway. Portage la Prairie, Brandon, Regina, Calgary show great strides since 1890. The shops are extensive and admirably arranged. At such distances from the bases of supply in the East large stocks are a necessity for the storekeepers. And their customers want good goods: nothing is more prominent than the high character of the merchandise found in western stores. The western man works hard; conditions around him are stimulating; he usually prospers, and he wants the best of everything for his wife and children, and will pay the price for it. Nor is there, as a rule, the laxity in farmers' methods that older Canada too often sees. In care of his stock and of his field implements the Manitoba farmer is prompt.

Winnipeg makes a strong impression upon the visitor, especially if he views it from a great height, when the extent of the place and the growing beauty of its residential quarter can be seen; the grading and boulevarding of the streets, the modern tastefulness of the dwellings, the up-to-date character of nearly everything, give an air of comfort to what would have otherwise an air of newness, not to say rawness. In the business quarter the bank buildings are elegant and spacious: that of the Merchants Bank is lofty and striking, while the Dominion and Commerce have offices surpassed nowhere in Canada for beauty. Of the wholesale warehouses one can say that everyone is busy, and in some the employees have to work at night. Half a dozen at least have been enlarged this year by the addition of stories, and several have been doubled in size. The retail shops are a revelation: two in particular, a furniture shop and a jewellery shop, both on Main Street, had stocks of the most beautiful and expensive things. But Winnipeg seriously needs a large and modern hotel. This she will shortly have. There is every indication that Winnipeg will be a second Toronto as a distributing centre. Some of her citizens assert that in ten years she will have 250,000 people. Certainly when the plans for power and boat traffic from the great cluster of waterways to the north are carried out, Winnipeg will progress by leaps and bounds.

It is impossible not to be struck with the curious impatience of "the East" which characterizes the talk of the Western folk. One finds it everywhere. It seems as if, when persons have lived a certain number of years or months west of Lake of the Woods they inhale along with the intoxicating western air, a feeling of contempt, or something very like it, for the old-fashioned East. This is expressed in several ways. In the view of one person, the East is synonymous with excessive freight charges on the railways; another declares the banks and wholesale houses grinding monopolists. But the third criticism one hears of Eastern Canada is by far the most powerful and widespread. It was heard in Regina, in Edmonton, in Calgary as well as in Winnipeg. "You people at Ottawa deny us the custody of our lands. You give them away to the C.P.R., to the Hudson's Bay Company, to monopolists and speculators, who withhold them from settlement. We demand the administration of our domain; we want to mine our own coal, and not to have millions worth of it given away to Eastern capitalists or great railways. Whatever else our lands contain we demand the right to the disposition of it." Now, whether we reject such views as savoring of State rights as opposed to federal sovereignty, it is impossible to deny their existence or to get away from their expression, sometimes with earnestness, sometimes with actual animosity. It is no figure of speech if we say that he who lives in Eastern Canada cannot understand the feelings and views of Northwest Canadians unless he visits that great country, learns its capacities, and realizes what statesman-like breadth of view and the relaxation of red tape may make it.

THE OPPOSITION TO MR. CHAMBERLAIN.

In our comments on the great Imperial fiscal revolution recently inaugurated by Mr. Chamberlain, we have taken the line that Great Britain's best and probable course would be to decide as to where her best individual interests lay, leaving the colonies to do likewise, each of them discussing the plan from its own standpoint. That accomplished, each one would know exactly how its own interests are liable to be affected; the Chamberlain scheme would be thoroughly known in all its bearings, and the component parts of the Empire would be in a position to arrive at a common understanding for the benefit of the whole. Any alternate method seems likely, in our judgment, to expose the new Imperial tariff policy to the liability of hiding numerous defects, which, being discovered afterwards by one or another of the countries involved, would lead to disappointment and, perhaps, to a fatal ending for the whole framework. And this would be even more detrimental to the Empire's best interests, and to its unity, than a continuation of the present admittedly unsatisfactory conditions.

Bearing this danger in mind, but believing that the main principle of Mr. Chamberlain's proposals is calculated to strengthen the world-wide British Empire as nothing else can do, provided he can steer it clear of certain treacherous rocks lying along its course, we have tried to point out those rocks so far as Canada is concerned. Indeed, we have gone so far as to point out, though regretfully, what appears to us to be one almost unescapable objection to the plan, namely, the innate incompatability of Mr. Chamberlain's aim with regard to British products and that of our own manufacturers. But this is surely objection enough without the intrusion of others based on an utter lack of understanding regarding facts and conditions as they prevail in this country. Yet this is what some of Mr. Chamberlain's opponents are doing in the Old Country. Most objections concern themselves with the effect of the proposed new policy on the British public, and, as such, are better understood and answered where they originate; but there are others which have their basis in alleged facts in Canada, and these, we think, should be answered here. Lord Spencer, in a speech against Mr. Chamberlain, argued that his proposals for a duty against wheat except that grown in the colonies would tend to cause an influx of American wheat-growers into Canada, in order to reap the benefit of the British preference. Is Lord Spencer a friend or an enemy of the British Empire? From the way he talks it is difficult to gather. Of course the preference would help the development of Canada as a still greater wheat-growing country than it is; but that, we thought, was one of Mr. Chamberlain's aims. Is not this also one of Canada's strongest desires, to attract a good class of immigrants, who will not only enrich the country, but incidentally strengthen Great Britain and render it less dependent on foreign food supplies? The opposition to Mr. Chamberlain in Britain must be lamentably weak if this is one of its types of reasoning.

Another peculiar argument against this statesman's proposals, which concerns this country, was made by Mr. Ritchie, the former Chancellor of the Exchequer. It was to the effect that any move on the part of Great Britain to institute a tariff with preferential treatment of the colonies would instantly be followed by trouble with the United States, who would retaliate on Canada. Now, poor Canada has already been retaliated against by the United States, and has lived through it; in fact, never has been so prosperous as during this same "retaliation" period. We would suggest, therefore, that Mr. Ritchie should confine his objections to matters nearer home, and with the conditions of which, perhaps, he is better acquainted.

AN ALTERNATIVE IMPERIAL POLICY.

Some of the opponents of Mr. Chamberlain's tariff and Imperial unity scheme, while they seem to us at this distance to bring against it some objections which are unsound, if not sometimes absurd, at the same time have brought out some of its intrinsic weaknesses. Some of them, too, are undoubtedly in full sympathy with Mr. Chamberlain's main object, the unifying and strengthening of the Empire, though, perhaps, the spirit of partisanship, now so rampant in Britain, prevents them from showing that sympathy as earnestly as could be hoped.

For instance, Lord Rosebery in his speech at Sheffield in answer to Mr. Chamberlain's, spoke of the difficulty of uprooting protection when once it should have been established, and referred to the danger of its bringing in the reign of trusts, monopolies and, perhaps, corruption. He also ridiculed the idea, so the dispatches inform us, that the colonies would consent not to establish new industries in order that British manufacturers should be allowed a free hand. In his opinion a fair and practical Imperial tariff along these lines could not be devised, and he prayed heaven to protect them from the bad blood and jealousies that any such attempt would engender.

Now, this is all very well; Lord Rosebery puts his fingers on some of the weak points in Mr. Chamberlain's plan. But even Lord Rosebery admits that things are not going well with the British manufacturer; admits, too, we believe, that something is needed to bind the component parts of the Empire scattered all over the globe in closer relations one with the other. Mr. Chamberlain sees these things, and tries to remedy them; he at least tries to build up something. On the other hand, Lord Rosebery and his school content themselves with criticism of the bolder statesman's political edifice. They see it has faults, and condemn it, but they do not offer anything better. Destruction, not construction, seems to be their motto; and it may be remarked that the first is much easier.

What will the public—and this word includes now not only the people of Great Britain, but those of Canada, Australia and a dozen smaller countries as well—decide, as between the two opposing modes of thought? It seems to us quite likely that their sympathies will go out, and in a practical manner, towards the man and the party who, recognizing the need, dare to do something in the attempt to alleviate it. Great peoples, in their heart, believe that mere criticism is cheap. If Lord Rosebery would only promulgate some alternate plan of his own, he would have a

chance; but, as it is, apparently all he can do is to find fault with the plans of others. A natural consequence of this possibly congenital mood of Lord Rosebery's will not unlikely be the swallowing, by the public, of Mr. Chamberlain's ideas, faults and all.

SOME CANADIAN STATISTICS.

Quite a number of instructive diagrams illustrating the growth of the Canadian Northwest appear in the Winnipeg Free Press of 7th October. The essence of some of these may be given as under. For instance, as to the increase of elevator capacity. In 1891 the storage capacity for grain represented only 7,628,000 bushels; the next year it was 10,366,000; by 1898 it had reached 18,368,000; last year it was 26,298,000, and now it is over 39,000,000 bushels. At every point on the railway lines elevators have been built to make easy the handling and shipment of grain. These range from 50,000 to 500,000 bushels' capacity in the towns, but the enormous elevators at Port Arthur and Fort William will hold from one to three millions each.

From the insignificant number of 1857 in the year 1896 the entries for free homestead lands increased to 7,850 in 1900 to 22,215 in 1902, and this year to 33,102. This growth naturally corresponds with the great growth of immigration into Manitoba and the Territories. The 18,000 of newcomers in 1896 have been succeeded regularly by greater numbers in the later years. In 1899 and 1900 the figures of arrivals were about the same, namely, 44,000 each, while in 1901 there were 50,000; the next year 67,000, and last year no fewer than 124,000. The division of these between "European," "British" and "American" is indicated in the diagram. In 1903 there were 47,000 immigrants from the United States, which proves that the greatest influx has been from that country.

Next, we may take the land sales by the great railway companies. These amounted in 1896 to only 108,016 acres, valued at $361,338, figures which were about doubled in the next year; 1898 and 1899 were nearly equal, sales being, say, 450,000 acres each. Then 1900 and 1901 advanced to 630,000 acres, and in 1902 they leaped to 2,201,795 acres, realizing $7,746,958. Thus there have been sold in seven years nearly four million acres of our western domain. These are scattered through Manitoba and the Territories. The growth of railway mileage affords another basis for a comparative table. In the Canadian Northwest there were but 64 miles of railway, which length was increased to 630 miles by 1883. With the construction of the C.P.R. in 1888 the figure grew to 2,366 miles, while to-day the total is no less than 4,555 miles, and the network of rails a very remarkable one.

OVER-BUYING BY RETAILERS.

If he would only realize it, the retailer loses more than he makes by over-buying, or speculating in merchandise. For this is exactly what he does—he speculates—when at the instigation of some over-zealous traveller, he buys more goods than he can see his way clear to selling again to advantage. He is gambling against chance. The fault sometimes should be about evenly divided between wholesaler and retailer. To hear retailers condemned for careless buying by the same wholesalers who led them to it is not an unfamiliar feature of the trade. It would be better for all concerned if every retailer was enough of a business man to run his own business: if he made enough of a study of his buying to be his own buyer instead of coining the liberal advice of the salesman into large entries on the depreciation account.

Credit men as a rule advise a conservative policy in buying. The retail merchant who overbought last year can probably call to mind a talk with or a letter from his credit man advising him to buy carefully; to make the wholesaler carry the stock as long as he could. Not to stock his shelves and warehouse with goods which he might not need for months to come. On the other hand, whilst the credit man was giving this advice the sales department was booming sales. The salesmen were coaxing their customers into larger purchases. Is it any wonder that many merchants became confused and did the wrong thing?

It is not the salesman who is to blame. He is out to sell goods. He is after orders. That is the particular reason why the retailer should take counsel from himself, and not absorb too much boom advice from the man who is really seeking to load him. If he accepts the advice of the salesman, and finds that he has made a mistake, he should profit by the error and decide to do his own buying. The education of the retailer, either through the school of experience, through his trade paper, or through the conservative advice of the credit man is the one way out. Conditions which storm around the retailer daily are to blame for much of the over-buying. One of the greatest influences through which these conditions work is the anxiety of the wholesaler to sell goods. This anxiety is natural enough, though it often works afterwards very strongly against the same wholesaler's interests; it should be counterbalanced by the equally strong desire of the retailer not to load himself up with goods beyond his easy capacity to sell.

THE LUMBER TRADE.

Business continues good, though it has been hampered by poor transportation facilities, railroad cars having apparently given preference to the shipment of grains and other products. Prices keep up well, and so does the demand. This is referring more particularly to Ontario and Quebec. In Manitoba the farmers as a rule are too busy just now to pay much attention to building operations. In New Brunswick and Nova Scotia the situation is about normal. We have received from Liverpool Farnworth & Jardine's monthly circular, dated October 1st, which speaks of the conditions in Great Britain as follows:

The arrivals from British North America during the past month have been 41,266 tons' register, against 47,645 tons' register during the corresponding month last year, and the aggregate tonnage to this date from all places during the years 1901, 1902, and 1903, has been 352,662, 381,441, and 378,701 tons respectively. The business of the past month has been fairly steady. Imports on the whole have been large, but the deliveries generally satisfactory, and stocks

with few exceptions are not excessive. There is little change in values to report, but the trade has been considerably disturbed owing to the financial difficulties of one of the large importing firms. Referring to Canadian woods, the arrivals of waney have been on a moderate scale, and largely on merchants' account; the deliveries have been small chiefly owing to the bulk of the import arriving at the end of the month. but stocks are moderate, and values continue very firm. Square pine has also been imported moderately, but the demand is quiet, and stocks are adequate; values are steady. There have been no arrivals of red pine; the demand is very limited, and stocks appear sufficient, prices are steady. The arrivals of oak have again been moderate, but the deliveries rather disappointing, and stocks have increased; values are steady. There has been no import of elm, but with a good consumption stocks of prime wood are now light, and values are firm. There is little enquiry for ash. Compared with the previous month, the arrivals of pine deals have been on a smaller scale; the deliveries have been large, but stocks are sufficient; there is little change in value to report. For red pine deals the demand continues quiet, and the stock is adequate. Of New Brunswick and Nova Scotia spruce and pine deals, the arrivals during the past month have been large, but considerably less than the corresponding month last year, viz., 16,700 standards against 20,630 standards; the deliveries have been satisfactory, and stocks here are now fairly light; values are well maintained. There has been a small import of birch from Quebec, the demand is quiet, and the deliveries have been small, but stocks are not too large, and prices rule firm. The arrivals of planks have been on a fairly moderate scale, and the deliveries have more than kept pace; the stock is moderate; but there is little improvement in values to report. With regard to British Columbian and Oregon pine, the import consists of a cargo of logs and planks from Portland, Oregon; the deliveries have been fair; values are fairly steady but the stock is heavy.

THE RISK FROM SKY-SCRAPERS.

To judge from the boastings of some people, civilization depends upon the number of sky-scraping buildings within a given area. Ugliness is one feature of such buildings, which most of them have in common, but lack of artistic beauty is not their strongest defect. Indeed, the unlimited construction of edifices of unlimited height may well become a menace to public safety. New Yorkers should be good authorities on the qualities of these specimens of architecture, and so we will quote the opinions of one or two gentlemen who are well qualified to speak of the conditions prevailing there. Mr. George B. Post, one of New York's foremost architects, well known as the designer of the new Stock Exchange and other prominent buildings, in an address a short while ago, expressed his confidence that some day there would be a terrible disaster in one of Gotham's huge office buildings. A small fire might start in a basement, filling the structure with smoke. Thousands of tenants would be likely to rush down stairs or into the elevators, which would be quite unable to accommodate the crowds, the possible result being suffocation for hundreds of people. One of New York's fire chiefs, Mr. Chas. D. Purroy, corroborates this view of danger, and adds that it is a lamentable fact that the "fireproof" building often burns. He gives a recent terrible case in which a captain of the fire department was killed owing to the fireproofing material giving way and falling through the stairway of the building. Again, even in the best fireproof structures there is no absolute safety; the contents will burn. And in the sort of building now under discussion, the panic liable to arise even from a small fire is likely to give rise to a terrible disaster. Mr. Purroy draws attention, too, to a danger different from that arising from panic or from actual destruction by fire, namely, that proceeding from the weakened power of resistance against wind. A fireproof building in which a fire starts may possibly not burn, but its whole construction is rendered weak by the heat, and may give way afterwards when least expected.

Altogether, we living in Canadian cities may be the better off for our lack of enterprise in not building more of the sky-scraper structures which are the adornment, or the abomination, of so many cities across the line. Our backward condition may conduce to longer life.

THE REAL MEANING OF INSURANCE.

When the home or household belongings of a family are destroyed of course the sympathy of neighbors and friends is aroused, and they are disposed to do what they can for the unfortunate; but sympathy and charity do not take the place of that aid to which the holder of a policy of insurance is entitled under his contract, and which he can claim without humiliation or any feeling of dependence upon the kindness of others.

But insurance is not a creator or restorer of wealth, as Mr. J. H. Washburn lucidly pointed out at the recent meeting of the Fire Underwriters' Association of the Northwest. Property destroyed is a loss to the world just as much when insured as when it has no such protection, although we often think and speak as if insurance made good any loss as far as it went, and the only real waste was of the excess beyond insurance. Of course, it is not necessary to emphasize this fact to our readers, but the error is so prevalent and widespread that a reference to it cannot be omitted when considering what insurance is and what it is not. It is only too common to regard a loss by fire as only the excess over the amount recovered by way of insurance, in entire forgetfulness of the fact that insurance companies are only regulators and distributors. Their office is to collect small, in fact almost inappreciable, sums from unnumbered sources and to retain these amounts, trifling in themselves but immense in their aggregate, until the time of need, and then from the accumulated store to distribute what is required to relieve those who by the contribution of premiums have become entitled to such help. As the bee gathers the particles of honey from the flowers, which suffer no appreciable loss from such contribution, and stores the collection in the hive until the time of need arrives, so the insurance companies accumulate these trifling sums, received from one and another who do not feel the loss, until disaster comes and the sufferers are relieved from the treasury where their small contributions have been preserved.

And so insurance becomes an equalizer and regulator, applying its stores to alleviate the sufferings of the losers, to prevent the weight of disaster from crushing its victim, and distributing the loss over such a wide field that no individual is irreparably injured. As the fly-wheel regulates the machinery in the great manufactory, taking up the excess of power in case of

breakage or sudden stoppage of machinery, and thereby preventing entire destruction of the works, so insurance comes in as an intermediary to relieve the strain of sudden calamity, and enable those who suffer to maintain their position in the business world and to enjoy the comforts of which they must otherwise be deprived. But the fly-wheel cannot be kept in operation without absorbing some of the power which would otherwise be applicable to propelling machinery. It requires so much of the power that there must be an increase in that direction or a reduction of the productive capacity of the establishment. But mill owners and operators do not regard such power as wasted; indeed, plans which do not provide for such a regulator would be discarded as absurd and their designer called a madman.

THE C.M.A. EXCURSION TO THE PACIFIC OCEAN.

On Monday night last was completed a business men's excursion, which, so far as we know, has had no parallel in Canada for either size or success. This was the trip from Toronto to the Pacific Ocean organized by the Canadian Manufacturers' Association. It began at noon of September 19th, and covered 6,482 miles in going and returning—that is to say 3,237 miles from Toronto by main line via Revelstoke to the coast, and 3,245 miles coming from Victoria by the Kootenay Lakes and Crow's Nest Pass, all the way, except to and from North Bay, by C.P.R. cars and boats. It had been planned to come home by the Canadian Northern Line from Winnipeg to Port Arthur, but circumstances prevented this. The party numbered 166, of whom some 48 were ladies. The train of eleven cars—seven Pullmans, two diners, a baggage and a tourist—is declared to be the heaviest passenger train ever attempted in Canada, and that some of the divisional officers underestimated its weight (which was 763 tons), was clear from the inadequate motive power sometimes supplied it. This unfortunately caused it to be two days late in arrival. But even those merchants who were disturbed most by the delay, showed wonderful patience, making every allowance as they did for the difficulty of the undertaking.

To write a continuous story of this wonderful trip seems to the writer impossible. He has tried it. But the long intervals of distance, the stoppages for welcomes and speeches, the scenic wonders that absolutely disarm one from attempting their description, and the fatigue of eye and brain and body caused by trying to see the whole of our Great West, interfere with the taking of notes en route, much less the recording in full of impressions. These will be, therefore, occasional notes of the most striking scenes or doings of interest to commercial men. To, perhaps, eight out of ten of the party this was a first visit to the Canadian prairies or the Rocky Mountains, and what that means those who have been across before will understand. Often and often the expression was heard: "This trip is an eye-opener." And this is exactly what we believe the sagacious people who planned the trip intended it to be, namely, to open the eyes and the mind to the extent of our country, to its capabilities, and to the growth it has already made.

When, at Peninsula, on the northern shore of Lake Superior, our train westward bound met the returning train with the Chambers of Commerce delegates, some of us talked with those previously met in Ontario or at Montreal. They were curiously changed from the doubting and questioning, or self-satisfied and politely apprehensive people we had known in August, to loud-voiced admirers of Canada, both East and West; and the way they bluntly confessed their unpreparedness for what they had seen, reawakened our admiration for

> The Englishman, the Englishman,
> The upright, downright Englishman,

as Charles Mackay's song styles him. The inhabitants of these two trains fraternized, photographed each others' groups, "traded" wonders, and ended by singing God Save the King, after the British fashion. There were no formalities, but there was the heartiest good feeling, that popular Anglo-Canadian, General Laurie, being among the jolliest of the jolly.

The Crow's Nest Pass, River and Lake are scenic wonders which we were enabled to see by stopping the train in the night for some hours at Fernie. Many went at Michel to see a coal mine, a little way from the town, which is regularly laid out, with uniform houses, painted brown. Farther on we came to the loops, where a serpentine track of three miles long twists up the heights to gain 200 feet in altitude. It gave one a dizzy feeling to look downward and see the track we had passed over and then to look up on the other side of the train and see the mouth of a tunnel through which the train later passed. This tunnel is through a mass of gravel, and is reached by an alarming-looking trestle. At ten on a brilliant morning we reached Old Man Cave, from whose rocky mouth poured Old Man River. This river issues from the mountain side, its source being no one knows where. It is supposed to be a lake on the top of the mountain. The deep blue lake and the great peaks beyond it with a vista of receding lesser heights to the eastward formed a view of impressive grandeur. Here is the summit of the Rocky Mountains, which we have crossed into Alberta. Sorry as every one was to leave the picturesque province, once disparagingly described as "a sea of mountains" we welcomed the pastoral hills and slopes of the Territory dear to the ranchman and the hunter. Before noon we reached Frank, the scene of the landslide, which buried nearly 100 persons. The mass of rock and gravel, which had fallen from a height of 2,700 feet, spread over the valley for *a mile square*. Impossible to imagine, as the disaster was to people far away, now that one has seen it the tremendous force of the descending mass cannot yet be realized. Falling down the mountain side half a mile, it dashed across the valley another half mile, burying the railway track. Rocks 20 by 30 feet were rolled along as if they were pebbles, and on one of these were to be seen inscribed in colored chalk the names of curious visitors since the fatal convulsion took place.

With an abruptness that is very striking, we leave such rocky fastnesses as have hemmed us in of late, and at noon are in a ranching district, with pasture slopes and vales of inviting green. Horses by the hundred on one side the train, cattle by the hundred on the other. Trails, wire fences, occasional houses, cattle near and far, are the characteristics here. So wide is the landscape since the train left the passes that we no longer have to crane our necks and strain our throats to describe the wonders passed through. The prospect widens: mountains and foot hills bound the horizon, but close by hay-cocks and ricks, farm dwellings, roaming cattle, and an occasional village tell of a region that is no longer of a scenic and mining nature. The sun is bright and warm; the clouds of a wondrous softness; the air balmy to a degree. In fact, the scene lulls one to a dreamy state after the excitement of grander surroundings.

A man comes through the car and finding the writer making these notes says: "Come out on the platform, and rest your eyes and your soul. Leave your bookish duties to a later time:

> Come out into the light of things,
> Let Nature be your teacher."

Only—he did not put his lesson in these last dozen words, for he probably does not read Wordsworth. My idea is that he reads Kipling, for he is always ready with strong forms of expression. And then the humorous man of our car, determined to be boyish, set the example of a back at leap-frog, being promptly followed by our 230-lb. passenger of Car No. 3, who in his turn was almost overset by the trailing Broadway overcoat of a six-foot committeeman.

"Say," was the enquiry of a solemn native, "who are these folks, anyhow?" Mr. Rose, our always urbane C.P.R. official, answered the question, and then the native wondered

that so big a "gang" of important and wealthy folks could be so "gay." This reminded a by-stander of the criticism passed on us at Brandon or Portage on the trip west. A man confided to a station-hand his opinion that "This is the finest outfit that ever blew into our town." All along the route, as we flew by, settlers, village merchants, Indians on cayuses, children coming home from school, gazed at our train along whose sides were emblazoned on cotton banners in letters a foot high such mottoes as these:

CANADA OUR COUNTRY.

WHAT'S THE MATTER WITH B.C.?
SHE'S ALL RIGHT.

EAST AND WEST CLASP HANDS.

THE GRAIN THAT IS GROWN IN CANADA
IS THE PRIDE OF A PRINCELY LAND.

CANADA FOR THE CANADIANS.

At Souris, where we arrived in the night and lingered till ten in the morning, we were surprised to see, among the carriages and democrat wagons which arrived to meet us, a fine automobile. But this is not the only one out on the plains, as somebody told us. There are several in the towns near Winnipeg; and some of the ranchmen near Calgary use them for getting quickly about their great meadows. Our vice-president found many friends at Souris, which used to be his "stamping-ground" in years gone by.

"This is a young man's country." Such was the phrase often on the lips of residents and visitors alike, between Winnipeg and Vancouver. And it was illustrated by the scarcity of old or elderly men, as well as by the number of young men we found in positions of responsibility. In banks, in counting-houses, in real estate offices, in sawmills, the young men had the call. Perhaps this was what accounted for the quickened pace of business—quick bargains in the shops—rapid decisions in the banks—prompt orders in the mills. In Victoria, however, people take things more leisurely. It is an older community, and the people take time to enjoy the beauty around them.

CANADIAN FIRE UNDERWRITERS' ASSOCIATION.

The most interesting feature of the regular quarterly meeting of the Canadian Fire Underwriters' Association, which was held in Montreal on Friday and Saturday of last week, was the discussion of the surcharge upon Ottawa fire risks, which a section of the press of that city has brought into somewhat undue prominence without a proper understanding of the conditions. The meeting received a deputation from the Ottawa City Council and Board of Trade, and after listening to what they had to say as to the steps which had been taken to provide better protection against fire, decided to remove the surcharge of 25 cents under certain provisions. The reason that the underwriters had levied the surcharge in the first place was the extra hazard which prevailed in Ottawa owing to the number of large lumber yards and the inferiority of the water system. The deputation showed, with the aid of a map of the lumber district, how under the terms of the late by-law, certain of the lumber yards are to be entirely removed, while certain others are to be kept 100 feet distant from any building In consideration of these facts and of the improvements in the waterworks system now in progress, the underwriters decided to reduce the surcharge by one-tenth after December 1st. The by-law further provides for the removal of certain other lumber yards by the end of next year, and if this be carried out, or if two extra fire engines be added to the fire-fighting equipment, the underwriters agree to take off the remainder of the surcharge.

HEAVY RAILROAD ESTIMATES.

The subsidies for new railroads, laid before the Dominion Parliament last week by the Minister of Finance, call for an expenditure of at least $12,092,800. The real amount needed, however, will be considerably ahead of this, as it has been calculated at $3,200 per mile, whereas in some cases the maximum amount allowed for railroad building in difficult sections, namely $6,400 per mile, will be paid. In addition, a total of $150,000 is to be laid aside for new bridges. The following summary will show the districts in which subsidies are to be granted:

Tillsonburg, Lake Erie & Pacific, from Woodstock to Berlin or Stratford, 31 miles, $99,200. Irondale, Bancroft & Ottawa, from present terminus to Renfrew, 75 miles, $240,000. Nepigon Railway, from Lake Superior to Lake Nepigon, and from the north shore thereof in a northerly direction, 81 miles in all, $256,000. Manitoulin & North Shore, from Little Current towards C.P.R. main line, via Sudbury, 30 miles, $96,000. Thunder Bay, Nepigon & St. Joe, 50 miles northeasterly from Port Arthur, $160,000. For a line from Sturgeon Falls to the westerly shore of Lake Temagami 50 miles, $160,000. Bay of Quinte, from Actinolite, via Queensboro' and Bannockburn to a point in the township of Marmora, 20 miles, $64,000. Bruce Mines & Algoma, 21 miles northward from present terminus, $67,200. James' Bay Railway, from Toronto via east side Lake Simcoe to a point at, near or beyond Sudbury, through Parry Sound, not exceeding 265 miles, in lieu of two subsidies granted in 1900 for 35 and 20 miles respectively from Parry Sound towards James' Bay, $848,000. Interprovincial & James' Bay Railway, from Lake Temiskaming, in a northerly direction, 50 miles, $160,000. Lake Superior, Long Lake & Albany Railway Co., from Peninsula Harbor, in a northerly direction, 10 miles, $32,000. The Canadian Bridge Co., of Walkerville, receives $35,000 to strengthen and complete the foundation and approaches to the bridge over the St. Francis river. Payable to the Canadian Bridge Co., towards the construction of steel superstructure of railway bridge on St. Francis river, $50,000.

Classifying by provinces, the subsidies may be summarized as follows:

Renewals—Ontario, 171 miles, $547,200; Quebec, 332 miles, $1,062,400; New Brunswick, 195 miles, $624,000; Nova Scotia, 401½ miles, $1,283,200; British Columbia, 45 miles, $144,000; Manitoba, 35 miles, $112,000; Northwest Territories, 50 miles, $160,000; total $3,932,800.

New Subsidies.—Ontario, 632 miles, $2,022,400; Quebec, 1,005 miles, $3,216,000; New Brunswick, 49 miles, $156,800; Nova Scotia, 243 miles, $777,600; British Columbia, 361 miles, $1,155,200; Manitoba, 32 miles, $102,400; Yukon, 84 miles, $268,800; Northwest Territories, 144 miles, $460,800; total, $8,160,000.

Totals—Ontario, $2,569,600; Quebec, $4,278,400; New Brunswick, $780,800; Nova Scotia, $2,060,800; British Columbia, $1,299,200; Manitoba, $214,400; Northwest Territories, $620,800; Yukon, $268,800; total, $12,092,800.

POSITION AT THE SOO.

It is difficult to foresee the outcome of the present complicated state of things at the Soo. All sorts of rumors have been about to the effect that first this, then that, syndicate of capitalists was about to make arrangements whereby the works could again begin operations. In the meanwhile, the attempts of the companies holding the mortgage to regain possession are being firmly resisted with a view, it is supposed, to making a deal with one or other of the parties spoken of as wishing to take up the industry, the latest of whom are said to represent British capital. A peculiar state of things has developed from the attempt of the Clergue syndicate to obtain a further injunction against giving up the properties. The counsel for the Philadelphia syndicate urged that opposition to them really did not exist because they were the virtual owners of all the plants and the stock of the subsidiary companies at the Soo. and that

the funds, which were being employed to fight their legal action, really belonged to them. He also contended that irreparable damage might accrue to the whole property by its being left in possession of the present occupants, but to this it was replied, that the old management had closed down the works in what was considered an efficient workmanlike manner, and that, since that time, the properties had been protected.

GALT BOARD OF TRADE.

The annual meeting of the Galt Board of Trade was held on the 9th inst., and was largely attended. A review of the work done by the Board during the year was given by F. H. Hayhurst, the retiring president. He referred to the securing of a number of industries for the town, and to the fact that the Galt Board had been the largest represented Board of any town in Canada at the Congress of Chambers of Commerce, held at Montreal recently. The Board gave its endorsation to the proposed new collegiate institute building and to the granting of a franchise to the Grand Valley Railway. Officers were elected as follows: President, R. O. McCulloch; vice-president, Joseph Stauffer; treasurer, James E. Warnock; secretary, A. G. Donaldson.

BRITISH FAILURES.

The twentieth general annual report by the British Board of Trade shows that during the year ending December 31st, 1902, the total number of receiving orders under the Bankruptcy Acts was 4,202, the liabilities as estimated by debtors £5,569,669, the assets as estimated by debtors £2,770,881, and the estimated loss to the creditors £4,633,-995. As compared with the previous year, there was a decrease in the number of receiving orders of 42, a decrease in the liabilities, as estimated by the debtors, of £1,224,651, and in the assets of £471,564, whilst the estimated loss to creditors showed a decrease of £1,032,877. The number of deeds under the Deeds of Arrangement Act, 1887, was 3,305; liabilities, as estimated by debtors, £4,483,128; assets, as estimated by debtors, £2,756,744; and estimated loss to creditors £2,829,082. There was a decrease in the number of deeds of assignment of 64 compared with the previous year, but an increase of £482,687 in the liabilities, as estimated by the debtors, of £501,732 in the estimated assets, and of £181,648 in the estimated loss to creditors. Among the numerous and important decreases in liabilities under insolvency, silk manufacturers and merchants are particularly noticeable. There was a decrease in the number of failures of women of 16, compared with the total number of such failures in the preceding year. The three trades in which the largest number of female failures occurred were: Grocers, 43; publicans and hotel keepers, 35; and milliners and dressmakers, 34. Drapers and haberdashers show a decrease from 41, in 1891, to 28.

INSURANCE NOTES.

In order to do away with the objection sometimes urged against the Tontine Policy, that profits are lost in case the insured dies before completion of the tontine period, the Manufacturers' Life Insurance Company is issuing a guaranteed investment policy, under which, in addition to the benefits secured under the ordinary endowment principle, the company guarantees to loan all the premiums after the fifth, interest on the premiums so loaned being paid in advance each year; and to return all the premiums after the tenth, along with the amount of the policy, in event of the insured dying before completion of the investment period. It also guarantees to cancel all loans made for payment of premiums after the tenth year, should the insured die before completion of the period. Should the insured party survive, he has the choice of any one of a number of desirable plans for settlement.

FINANCIAL ITEMS.

The Bank of Hamilton has opened a branch at Ripley, Ont.

The Sovereign Bank tells us that a new branch has been opened at Frelighsburg, Que.

We are advised that the Bank of British North America has opened a branch at Reston, Man., under the temporary management of Mr. S. A. Burpe.

The Bank of New Brunswick, in St. John, has inaugurated a new departure. Its clerks are now served, in a cosy little dining-room on the premises, with a good hot dinner. It is served by the bank free of charge to the clerks, and saves a good deal of time, as the business can go on all the time without inconvenience.

ANCIENT VERSUS INDEPENDENT FORESTERS.

The following is from the Financial Times, of London, England, September 18th: It is now well known throughout the country that the "Independent" Order of Foresters has no more resemblance to the "Ancient" Order than a horse chestnut has to a chestnut horse, but apparently this fact has not yet reached the city of Perth. Last week the Scottish Courts of the Canadian concern held their joint annual meeting there, and so impressed were the authorities that they could hardly do enough to show how they valued the honor. The magistrates appeared in their official robes, and not only welcomed but fed the delegates. Speeches were made to them and about them, and the organization was gratuitously advertised in a way which will be remembered later on, when the day of feasting and speech-making has given place to days of a different type, and when people begin to wonder what all the stir was about. The feature of the event was the curious fact that the welcome would seem to have been given to the wrong people. The late chairman of the General Accident Office claimed them as brethren because he was himself a Forester, while Perth's largest employer of labor made a similar declaration, yet we are practically certain that neither Mr. Coates nor Sir Robert Pullar ever went through the extraordinary rites which form the entrance way to the organization over which Oronhyatekha rules with such doubtful wisdom. The "Ancients" are a well-managed British Friendly Society in a sound position which is improving every day; while the "Independents" are a colonial institution, founded, we believe, on unsound principles, in the financial ability of whose chiefs we have not the highest confidence, and which we consider to be seriously on the down grade.

TRADE OPPORTUNITIES.

Scottish firm would be glad to receive samples and prices of Canadian wood fibre, also enquire names of Canadian importers of hosiery, sweaters, shawls, and other worsted goods.——North of England firm desires to start agencies in principal cities of Canada for sale of their tinplates, blackplates, galvanized sheets, etc.——London general agent, acquainted with textile and building trades, wants to represent Canadian houses.

The Portland Rolling Mills, at St. John, N.B., are being largely extended, and it is hoped that by January there will be a nut and bolt plant in operation. The new building will be used also for additions to the horse shoe plant and spike-making departments.

—The final returns of the Assessment Commissioner of Toronto for the year 1904 show the value of land and improvements to be $127,781,864, compared with $123,155,686 for the year 1903. The total assessment is $143,458,393 or an increase of $4,812,398 over the net assessment of the present year. This does not represent, however, a taxable increase. The city's population is estimated at 219,002, as against 211,-735 for the year 1903, an increase of 7,267 or 3.44 per cent.

DRIED FRUITS.

Strength and high prices may be described as the chief features of the foreign dried fruit market at present. The Malaga raisin crop is scarce, and muscatels have made an advance of about 50 per cent. compared with last year. Valencias are 25 to 35c. higher for October orders. In currants, an advance was decided upon about a month ago, and since then prices have remained unchanged. In the primary market it is not finally decided yet as to what action the "Bank" will take. If through its means about 10,000 tons of currants are "absorbed," or kept back from the market, the atmosphere would become clearer, and prices may advance materially. Recent estimates claim that shipments from Patras to date, especially those to Great Britain, have been somewhat less than in former years.

As to the California crops of fruit, it is even yet difficult to arrive at a right understanding of the situation. The growers appear to have made up their minds to fight for higher prices, and scarcity in several lines will help them to realize such, provided they do not try to get altogether too much. It is likely that some lines of dried fruits will hardly enter this market at all. We shall probably, however, this year receive more raisins than usual from Spain, and this will tend to keep the California product on a reasonable level as to values.

DRY GOODS NOTES.

Manufacturers of fingering yarns give notice of coming advances.

William S. Russell, warehouse manager in the Montreal fur house of Jas. Coristine, shot himself in his office on Monday last.

Greenshields Western, Limited, is the name of the branch recently opened in Winnipeg by Messrs. Greenshields & Co., the well-known wholesale dry goods house of Montreal.

Advices from Europe say that Valencia and Malaga raisins and currants are all steady at the recently made high prices. New Smyrna figs now arriving in Montreal, are considerably cheaper than last year.

The Imperial Commissioner of Agriculture for the West Indies, is paying a visit to the Southern States, to study the cultivation and treatment of Sea-Island cotton. This variety appears to be best suited for cultivation in the West Indies, from where it is said to have been originally introduced to the United States.

A despatch from Montreal announces that the Montreal Colored Cotton Co. has purchased the plant and business of the Cornwall Cotton Manufacturing Company. It further says that the company will continue the operation of the entire cotton plant in connection with its business. The woolen machinery recently purchased by the Cornwall Company will be disposed of.

The Ashburnham Woolen Mills, Peterborough, Ont., which have been closed down for some weeks past, are now resuming operations, with at least two-thirds of their former staff in requisition. Lack of orders is given as the reason for the closing down of the mills, but it is stated now that if the recent increase in this respect continues, there is hope of a resumption in the near future at full capacity.

At the present time the fashionable New York girl has laid aside her shirt waist of summer materials and is wearing the new light-weight mercerized cotton waists. While white is still a favorite, the girl who looks well in a shirt waist does not this fall confine herself to white alone. She arrays herself in the new and stunning gun-metal effects in the brocaded cottons, in those which show a dash of color against this gun-metal ground, nor does she neglect the cotton waist adorned with pompadour colorings.

There is little change to report in the Belfast linen market, but any there is is in the direction of improvement. The tone of the market is healthy. Prices rule high, and are firmly maintained, and buyers are content as a rule to order only for immediate requirements. Yarns have sold to a moderate extent. The activity manifest a few weeks ago has been succeeded by a quieter movement. Spinners have orders on hand to keep them well employed for some time to come, and are not anxious to enter into fresh contracts at the moment. Linen yarns continue in good demand at full rates, and tows are steady and firm. Business in the brown cloth market is largely of a sorting-up character and shows something of an increase. Powerloom linens for bleaching keep in steady demand at firm prices. Cloth for dyeing and hollands is rather quiet. The handkerchief trade is improving, and makers-up are doing a steady business.

The Chemnitz market is firm, and prices remain where they were, with an upward tendency. In lace hosiery, which has been the best-selling article for several seasons, a decided improvement is felt. The stocks, which have been offered at exceedingly low prices, are selling fast. Judging from the present situation of the market, it is safe to say that lace goods will again be good sellers for the coming spring season, and buyers who do not place their orders now will find that later on they will not be able to procure the goods at present prices. Embroidered and extracted goods are bought, but the main demand is on solid colored goods. Outside of black, tan shades are bought in fair quantities. While some of the houses prefer shades with a bronze hue the majority are using about the same brown shades as last year.

A comparison of present raw silk prices with those ruling at this time last year shows that the advance ranges all the way from 5 to 35 per cent. Japan and Canton filatures show the least change and European and Chinese fine sizes the greatest. An exception is tussah silk; this shows an advance of 35 per cent., due to the very large call for such silk for pongees. Tussah silk, that sold at $1.75 a year ago is now worth $2.35. Tsatlees are up about 12½ per cent. and steam filatures 20 to 25 per cent. Although Canton filatures have advanced only 5 per cent., rereels have risen 15 per cent. The advance in Japanese filatures and rereels is about the same—5 per cent. The advance in Italian, Piedmont and Cevennes fine sizes averages a little over 15 per cent., while coarse sizes of Italians are up 10 to 12½ per cent.

Glasgow advices report that there has been the usual lull after the briskness of the autumn "shows" or sales, and general business in the wholesale branches has fallen off. Reports received from representatives with connection in the South point to improvement, although advices from Manchester and Lancashire, as a whole, are not toned too highly. Scotch agents are pretty well finished with their spring orders, so far as the big houses are concerned. As soon as the smaller houses are overtaken, the usual lull is anticipated till repeats are made. An explanation of the rush of business during the first few days of the autumn shows was that buyers had the benefit of forward dated invoices, which were denied them during the second week. Agents are now awaiting new styles. The large houses will not be showing their spring goods till next month.

FOR GROCERS AND PROVISION DEALERS.

Canadian apples are being exported this season in quantities larger than ever before. Last week the Montreal shipments were 124,000 barrels, rather more than double those of the similar week last year. A new feature this year is the presence in Canada of French buyers, who are evidently desirous of cultivating a Canadian apple trade.

The demand for Canadian butter in Britain during the week ending 25th ult., was reported to be better than for any period since last May opened the season, and prices advanced 2s. per cwt., in sympathy with the rise in Canada. The demand for Canadian cheese at 55s. per cwt. for white, and 56s. for colored, was at last advices, moderately good.

The market for Brazilian coffees still continues very unsettled, though values seem to have a slightly ascending tendency.

Tapioca is in more active demand and firm on strong advices from the East; sales are reported as 400 tons medium and fine pearl, closing at $1.97½ to $2.05 for medium pearl.

The prospect for Newfoundland fishermen, who now hold anything like a fair catch, is very bright for realizing a good figure. A calculation made shows that in store one day last week in St. John's, the total amount of fish was 110,000 qtls. less than of this time last year. Although the price has not advanced yet, St. John's business men will have to compete against many buyers this year.

Oranges from Puerto Rico are being talked of a good deal just now. Soil and climate are good, but bad roads and bad treatment in shipping have militated against their greater popularity on this continent. With the occupation of the island by Americans, and their better methods of cultivating, transporting and packing, the Puerto Rico should become quite a factor in the orange situation.

Some one conceived the idea of introducing Newfoundland codfish into the regular bill of fare of the British army. The proposal took concrete form lately when the East Surrey regiment, stationed at Aldershot, was given a meal of Newfoundland codfish. Probably it was the way it was cooked, but from whatever cause the men did not take to the fish kindly, and the experiment is not likely to lead to any extension of the market for the great staple product of the ancient colony.

Referring to spices, no cable information of interest has lately been received from either Eastern or European markets, and there were no new developments of importance in the New York market. No trading in a large way is reported, but there has been a fair distributing business. Holders of cloves continued indifferent sellers, with prices for Zanzibar quoted at 13¼ to 13½c.; sales were reported of 200 bales at 13¼c. Pimento was firmly held at 8 to 8½c.; offerings were small. Pepper was steady.

There were 186,880 bushels of wheat received for shipment at country points on Friday by the C.P.R., and 163,000 bushels loaded for shipment. The total amount of wheat received to date by the C.P.R. is 3,49,912 bushels. The C.N.R. recipts average about 50,000 bushels daily, and shipments to date total 1,700,000. On Friday 276 cars from the Northwest were inspected, of which 92 cars graded No. 1 northern, and 100 No. 2 northern. The weather is again most favorable for threshing and shipment.

We hear from our Nova Scotia correspondent that the only drawback to the excellent trade conditions prevailing there is the partial failure of the Nova Scotia bank fishery. The catch has been about one-half the normal, while the price paid is about one-fourth greater than usual. Fortunately, the Nova Scotia fishermen have laid something away for the "rainy day," and so will not mind one season's partial failure. Already they are looking about to prevent a recurrence of a shortage. The whole trouble has been the scarcity of bait, and means are being taken to ensure an amply supply in the future. The suggestion has been made that the trawlers should also be fitted out for hand-lining. Then, while waiting for bait for the bank fishery, the men might be employed ten or twelve miles off the coast, and if they only caught a few quintals per day they would make wages without in the least interfering with their chances for the bank voyage. Our bankers have hitherto only made two trips a year—one in the spring and another in the summer. An attempt is now being made to organize what in the United States is known as a "shacking fleet," that is, one that will fish the year round. The proprietors of a fish curing station at La Have are the pioneers in this industry, and already they have induced five crews to make the experiment. The new venture is one of considerable importance to the fishing industry of the province. During the winter season the fish will be taken green from the fishermen and converted into boneless cod and a variety of other fish products.

Canadian goods received a good advertisement at the International Grocers' Exhibition recently held in London. Owing to the neatness of the Canadian patent butter boxes, and the attractiveness of the canned goods' labels, these goods were used for ornamentation on nearly every stand, making the Exhibition seem almost all Canadian. Seeing that there are 120,000 British grocery shops, every one of which will be influenced by this display, the results should be of the highest importance.

Mr. Ball, the Canadian Government agent in Birmingham, quotes one of the largest dealers in flour in England as having said, in referring to a trial shipment of 500 bags of flour from Ontario: "We beg to say this is the finest Canadian patent we ever saw. It makes a splendid loaf, in both bloom and texture. We are trying to buy a line for shipment, and we feel bound to say, if your Canadian millers can ship us flour of this kind, and keep shipping up to this quality, they will have very little trouble in displacing the fine winter patents on our market that we are now getting from the United States."

A report from Trinidad, B.W.I., says that there have been no arrivals between mails, but stocks which are working down are still ample to meet present light requirements until the arrival of the steamer "Maracas," now due. There is a steady, although light, demand for flour, and we quote bakers' quality at $6 to $6.25; extras, $5.70 to $5.90, and superfine at $4.40 to $4.65, according to brands. Some small parcels of Canadian flour have lately come to hand, but this description having been out of the market for some time is not now enquired for, and the trade which at one time looked promising will have to be practically built up again. Price quoted for oatmeal is $4.25, but stocks although small are moving slowly owing to the absence of any Venezuelan demand.

INDUSTRIAL ENTERPRISES.

Messrs. Preston, Card & Bell are about to establish large furniture and woodenware factories at Fort Francis, on the Rainy river.

The Ralston Health Food Company, New York, and the Franklin Mill Co., of Lockport, N.Y., are both talking of erecting factories in Winnipeg.

Mr. John Dick has purchased the old Davies' brewery property, in the eastern part of Toronto, and will establish a factory for making bags, etc.

The McLennan Paint Company, of Buffalo, has decided to spend $1,000,000 in opening up a Canadian branch factory. It is carrying on negotiations with the city of Hamilton with a view to see what inducements the later will offer.

The Great West Saddlery Co., Winnipeg, is spending $65,000 in erecting new buildings, and have decided to expend a further sum of $38,000 for new plant. The Winnipeg factory is being extended, a new factory being built at Calgary, and a new store building at Prince Albert.

The Canadian Westinghouse Company, Limited, held an organization meeting in Hamilton on the 8th, under the presidency of Mr. George Westinghouse, the originator. The new company will be known as the Canadian Westinghouse Company, Limited, with a capital of $2,500,000, and is a consolidation of all the Westinghouse interests in Canada, including the sales organization and business of Ahearn & Soper, of Ottawa. The following board of directors was elected: George Westinghouse, of Pittsburg; C. F. Sise, of Montreal;; H. H. Westinghouse, George C. Smith, Frank H. Taylor, L. A. Osborne, all of Pittsburg; Thomas Ahearn, of Ottawa; Hon. J. M. Gibson, of Hamilton; W. Y. Soper, of Ottawa, and Paul J. Myler, of Hamilton. The executive will consist of the following: H. H. Westinghouse, F. H. Taylor, L. A. Osborne, George C. Smith and W. Y. Soper, while the officers elected are: George Westinghouse, president; H. H. Westinghouse, vice-president; F. H. Taylor, vice-president; Paul J. Myler, general manager and trea-

surer; John H. Kerr, secretary. While only the ten directors named were elected, the board when complete will consist of fifteen members. Ground is to be broken for the erection of the new works in Hamilton at once.

CANADIAN PACIFIC RAILWAY.

The twenty-second annual meeting of the Canadian Pacific Railway was held in Montreal, on the 7th inst. The president, Sir Thomas Shaughnessy, expressed his and the directors' gratification at the results of the year's operations, notwithstanding the substantial increase in working expenses, and for this reason they had felt justified in declaring an additional ½ per cent. dividend for the second half of the fiscal year. Since the publication of the report a further amount of $1,000,000 had been deposited with the Dominion Government towards the redemption of the 3½ per cent. land grant bonds, leaving the balance to be paid on account of that security, $13,500,000. The directors of the Minneapolis, St. Paul & Sault Ste. Marie Co., at a meeting held in August, declared a dividend out of the earnings of that company for the last calendar year of 7 per cent. on the preferred shares, and 2 per cent. on the common shares, payable October 15th. The C.P.R. portions of the dividends amounts to $388,670. Although not an auspicious season for Atlantic traffic, the steamship line, established on the opening of St. Lawrence navigation, had done very well, the earnings being more than sufficient to meet the interest on the investment. The location of the rest of the lands earned by the construction of the main line and branches in Manitoba and the Northwest had been finally and satisfactorily settled with the Dominion Government. Formal resolutions were passed ratifying the action of the directors in various schemes for improving and extending the line. The old Board of Directors was elected as follows: Hon. Geo. A. Drummond, Sir Sanford Fleming, K.C.M.G., George R. Harris, Wilmot D. Matthews, for one year; Charles R. Hosmer, Hon. Robert MacKay, David McNicoll, Robt. G. Reid, for two years; Clarence H. Mackay, Thos. Skinner, Rt. Hon. Lord Strathcona, and Mount Royal, Sir Thomas Shaughnessy, for three years; Richard B. Angus, Edmund B. Osler, M.P., Sir William Van Horne, K.C.M.G., for four years.

FRENCH INSURANCE.

Most of the French fire insurance companies have published their balances for the year 1902. We take from the same that the companies have made a trade profit of 16,592,861 frs. out of a premium income of 111,537,159 frs., after deduction of re-insurances. The result has therefore become better for the direct companies, whilst the re-insurance companies are still showing a loss. On re-insurance premiums were ceded 29,186,533 frs., and the loss of the re-insurers amounts to 2,729,013 frs. = 9 7-10 per cent. Below we give a statement which proves these figures, but it may be pointed out that the results of the re-insurers, stated in round figures, are only according to an approximate estimate, which is, nevertheless, a rigorous one. There are only a few companies who publish in their balances the results of the business with their re-insurers, such as Assurances Générales, Union, Providence, and Urbaine. It is clearly shown by the balances of the latter four companies that the re-insurers have had on the premiums of 13,076,542 frs. ceded to them by these companies a loss of 1,077,014 frs. = 8 per cent. of the premiums.

—There were two small boys who asked their mother if they might play store in the dining-room. "Yes," replied she, "if you don't make much noise." "Oh, we'll be quiet enough about it, mom," remarked one of the children. "We'll be storekeepers who don't advertise."

—Chilliwack, B.C., merchants and business men have organized a Board of Trade with the following officers: W. A. Rose, president; J. H. Ashwell, vice-president; S. A. Cawley, secretary-treasurer.

—The South African British colonies have followed the example of Canada and, with the adoption of a new tariff have declared a rebate in favor of Great Britain of 25 per cent. on most articles bearing an ad valorem duty, while articles taxed less than 2½ per cent. will be admitted free to the Mother Country. Similar concessions will be made to any British possession, which grants an equivalent privilege. This new schedule is likely to affect materially the increase of imports from the United States, which are rapidly gaining ground, and last year amounted to about one-fourth of those from the Mother Country.

—So far as Canada's foreign trade is concerned, the fiscal year 1903-04 has started off well. The aggregate value for the quarter ending Sept. 30th reached a total of $133,758,124, or $21,506,588 more than for the same period last year. The total imports for consumption were $66,895,837, and the exports of domestic products were $61,479,884, as against $51,505,768 of imports, and $57,493,585 of exports in the same period last year. The dutiable goods imported totalled $39,579,910, an increase of $6,409,382. The imports of free goods reached $24,940,898, a gain of $7,226,986. Exports of agricultural products show an increase of $2,517,499, and mineral products an increase of $1,692,793. There was a falling off of $1,393,770 in exports of forest products, while animals and their produce reveal an improvement of $760,397, and manufactures of $535,168.

—The report of the first full year's working of the Glasgow, (Scotland), municipal telephone system has recently been issued. The service was formally opened on August 28th, 1901, with 1,500 lines connected with the system. The tariff is £5 5s. for an unlimited service over the whole system, extending over 143 square miles, or £3 10s., and one penny per message. This is slightly over half the tariff charged by the National Telephone Company. The balance sheet just issued covers the year June 1st, 1902, to May 31st, 1903. The total revenue for the year was £35,014. Working expenses absorb £20,871 of this, leaving a net revenue of £14,143. Of this net revenue £6,642 was paid in interest on loans, and £5,806 was placed to the credit of the sinking fund, leaving £1,694 to go to the relief of rates. The services generally continues to be acceptable to subscribers, as may be shown by the fact that during the year just ended the number of orders received was considerably in excess of the previous year; traffic during the year steadily increased, and has now reached the rate of 31,500,000 messages per annum.

CLEARING HOUSE FIGURES.

The following are the figures for Canadian Clearing House for the week ended with Thursday, October 15th, 1903, compared with those of the previous week:

Cities	Oct. 15th, 1903.	Oct. 8th, 1903.
Montreal	.....	23,374,187
Toronto	.....	15,547,975
Winnipeg	.....	5,047,901
Halifax	1,683,723	1,927,861
Hamilton	900,819	1,356 562
St, John	902,749	1,051,433
Vancouver	1,148,780	1,531,031
Victoria	843,688	.....
Quebec	1,321,990	2,086,858
Ottawa	.....	2,360,968

EFFECTS OF THE GERMAN SURTAX.

Much interest was felt in Montreal last week in the arrival of the Leyland steamship "Tampica," as she included in her cargo a large quantity of German goods. The surtax was to come into force on the 1st inst., and it was for a while doubtful whether the vessel would be able to reach Montreal and deliver her goods by that date. It was, however, arranged, that, should she pass Three Rivers by midnight of the previous day, the goods should escape payment of the extra duty. This she did. The cargo comprised cement, iron, glass, girders, and other manufactures.

The effect of the new duty is making itself felt in a considerably increased demand for German manufacturers, especially dry goods, such as certain lines of trimmings, drop ornaments, gold, jerseys, toys, gloves, and stockings, etc. When the present stocks are exhausted, an increase duty on one-third will apply, and the effect is likely to be practically prohibitive. Already we notice, according to press despatches, that some of the German commercial bodies are crying out for negotiations to be made with Canada on a friendly basis. So the keen edge of our weapon is already making itself felt.

It may surprise some to learn that, as in most things, there is another side of the story, and that the action of Germany in the fiscal controversy with this country is not resented as a piece of high-handed arrogance, by all parties in the Mother Country. Such a prominent journal as the London Economist acknowledges that, however unwise might have been Germany's policy of imperiling a trade of large dimensions in order to foster one of smaller importance, she was certainly within her rights. An examination of the facts will, that paper believes, convince any fair-minded man that a consuming hatred of Great Britain was not the inspiring cause of Germany's determination to exclude Canada from most-favored-nation treatment. On the contrary, the reason for her decision was of a far more common-place character. By the action of Canada, she was deprived of fiscal privileges which she had long enjoyed, and whether her present attitude be a wise or an unwise one, it was not unnatural that she should resent that action. As Baron von Richtofen remarked in a statement to Sir Frank Lascelles, "Canada has deprived Germany of a valuable right, of which we retained possession for more than thirty years under the Anglo-German Commercial Treaty, which has come to an end. It cannot be expected of Germany that, upon a change being made by one party in the state of affairs which has hitherto prevailed, she should accept the change without more ado."

THE CANADIAN CASUALTY AND BOILER INSURANCE COMPANY

Full Government Deposit Paid.

President:
ALEXANDER SUTHERLAND, D.D., Toronto,
Vice-Presidents:
H. N. BATE, Ottawa, Director Bank of Ottawa.
W. S. DINNICK, Toronto, Vice-Pres. and Mng.-Dir. Standard Loan Co.
A. G. C. DINNICK, - Managing Director.

This Company having deposited $30,000 with the Treasury of the Ontario Government, has been duly licensed to transact the following classes of Insurance [ance

Boiler Inspection — Personal Accident Insur-
Boiler Insurance — Sprinkler Insurance
Consulting Engineers — Elevator Insurance

The patronage of the public is respectfully requested. Correspondence with Insurance Agents and those wishing to engage in the business is invited, and will receive prompt and courteous consideration.

Chief Engineer, - - - A. M. WICKENS.
Superintendent of Agencies, - J. G. BEAM.

43½ King Street W., - - HAMILTON, Ont.

MONTREAL MARKETS.

Montreal, October 14th, 1902.

Ashes.—The high quotations for first qualities of potash are still in force, good tares realizing from $5.90 to $5.95. Receipts are still light, but there is an impression in some quarters that stock has been held back in the country, and that the high prices will now bring out larger offerings. In pearls there is still a total absence of business.

Dairy Products.—Cheese shipments last week were not quite so large as those of several former weeks, but were still respectable in volume, aggregating 61,665 boxes, and bringing the total for the season to date close on to the two million mark, the exact figures being 1,988,771 boxes, and nearly 400,000 boxes more than at same date last year. Of butter there were exported 16,487 packages. There has been some further weakening in cheese values, and quotations for finest Ontarios now range from 11c. to 11¼c., fine Townships 10¾ to 10⅝c., and Quebecs, 10⅝ to 10¾c. Butter is also somewhat easier, finest Township creameries now quoting at 21 to 21¼c., on spot, with ordinary grades ranging from 20¼ to 21c.

Hides.—Lambskins were further advanced yesterday to 70c. each. Beef hides are steady, with 9c. now the general figure at which dealers are buying. The demand from tanners is reported about equal to supplies offering.

Oils, Paints and Glass.—Not a change of any kind is reported in values since last report. Business continues very good. Quotations are as follows: Single barrels, raw linseed oil, 47 to 48c.; boiled, 50 to 51c., net 30 days, or 3 per cent. for 4 months' terms. Turpentine, 85 cents; single barrels. Olive oil, machinery, 90c. to $1; cod oil, 35 to 37½c. per gal.; steam refined seal, 50 to 55c. per gal.; straw do., 45 to 47c.; castor oil, 7½ to 8c., for machinery; pharmaceutical ditto, 8½ to 9c.; lead (chemically pure and first-class brands), $4.75 to $4.85; No. 1, $4.50 to $4.60; No. 2, $4.40; No. 3, $4.15; No. 4, $3.90; dry white lead, 4½ to 4¾c. for pure; No. 1 do., 4 to 4¼c.; genuine red ditto, 4¼ to 4½c.; No. 1 red lead, 4c.; putty, in bulk, bbls., $1.80; bladder putty in barrels, $1.90; ditto, in kegs or boxes, $2.40; 23-lb. tins, $2.55; 12½-lb. tins, $2.65; London washed whiting, 45c.; Paris white, 75 cents; Venetian red, $1.50 to $1.75; yellow ochre, $1.25 to $1.50; spruce ochre, $1.75 to $2; Paris green, 14c. in bulk, and 15c. in 1-lb. packages; window glass, per 100 ft., $3.50 for first break; $3.70 for second break, and $4.20 for third break; per 50 feet, $1.95 for first break; $2.05 for second break

TORONTO MARKETS.

Toronto, October 14th, 1903.

Cement.—In our last issue it was stated that the price of cement at the mills held at about $2.25 per barrel. This was the case for a few weeks, but latterly it has been nearer $2, and fall business shows a still easier tendency. A fair trade is passing, however.

Dry Goods.—The demand for practically all lines of seasonable staple goods continues good. That for the lines of which the price was advanced last week is very brisk. Cool weather, however, is liable to bring a still greater pressure of business.

Flour and Grain.—The price being realized as a rule for ninety per cent. patents is $3.05, in buyers' bags, east or middle freights, with a little more for extra grades. Manitoba flour is steady. No appreciable change has occurred in mill feed, bran and shorts being both pretty firm. Oatmeal is a little on the dull side, but prices keep steady. No change has been made in the price of wheat or other grains since

TYPEWRITER CENSUS

A typewriter census of the following representative towns are the proverbial "straws that show which way the wind blows."

	OUR SALES	NOT SOLD BY US		OUR SALES	NOT SOLD BY US
Hamilton.....	210	46	St. Catharines....	52	5
London	166	40	Peterboro.....	50	8
Brantford	80	30	Brockville	60	8
Berlin	72	7	Belleville	36	5
Windsor and Walkerville..	64	9	St. Thomas.....	26	11
			Woodstock	32	8
Guelph.....	65	10	Chatham	54	6
Galt	36	6	Owen Sound	36	6

Only a small percentage of the machines not sold by us **were sold since the Underwood came in** the field. If you contemplate the purchase of a Typewriter, it is your privilege to try the Underwood without placing yourself under obligation to buy. Test it well, then ask your neighbor who uses one.

Our trade mark is on the most attractive and comprehensive line of gas and electric light fixtures in Canada.

We carry a beautiful range of stock patterns and create special designs to suit any taste.

We are always pleased to quote prices on this line.

The James Morrison Brass Mfg. Co., Ltd.
TORONTO

J. J. W. Deuchar, F.F.A., F.I.A., General Manager and Actuary of the Norwich Union Life Assurance Company, speaking of investments says:

"It may serve to indicate the great importance of obtaining a good return on the investments, if it is realized that one per cent. of increased interest on the funds of a company will, on the average, have as great an effect as a saving in expenditure equal to 10 per cent. on the premium income, while, if an office could count on realizing 5 per cent. interest in place of 3, it might reduce its premiums some 30 per cent., or double its bonuses."

Mr. Deuchar does not name **THE GREAT-WEST LIFE**; but the above statement exactly describes the happy position of its policy-holders.

last week's quotations. Not much business is passing.

Fruits and Vegetables.—The receipts of domestic fruits are now rapidly falling off, while the demand also seems slack. Grapes are fairly plentiful at 15 to 25c. per small basket. Apples are being shipped to Europe in extraordinarily large quantities. Prices on other fruits and vegetables are as follows: Cocoanuts, per sack, $3.70 to $5; Oranges, late Valencias, $4.50 to $5;

Jamaica oranges, $6 to $6.50 per barrel; lemons, Verdelli, $4 to $4.50; bananas, 8s, $1.50 to $2; firsts, $2 to $2.50; extras, $2.50 to $3; sweet potatoes, $3.50 to $3.75 per barrel; celery, 35c. to 40c. per dozen; gherkins, 40c. to 50c.; Spanish onions, $2.75 to $3 per large case, and $1 for small; cranberries, $9 per barrel; pears, 25c. to 35c. per basket; quinces, 35c. to 40c.

Groceries.—Very little of a new character can be recorded in the grocery trade, which continues about normal for this time of the year. The movement in sugar is fair. Some increase of trade is being noted in dried fruits, as is natural with the new crops. In canned vegetables not very much trade is passing, the conditions, as fixed by the Consolidated Canners, not being deemed advantageous.

Hardware.—Business is good; that in such goods as guns and rifles, ammunition, etc., particularly so. In metals, conditions remain the same, most lines having reached an apparently lasting basis as to value, etc. Glasgow reports, dated 2nd inst., speak of a flat market for pig-iron. Cleveland warrants have fluctuated in sympathy with depressed conditions in the Stock Exchange and London metal markets. Less business has been done with local consumers, though deliveries continue on a heavy scale.

Live Stock.—Not a very large amount of business is going on just now in the cattle trade. The demand for really good stock keeps up at good prices, but a larger portion of the stuff offered drags.

Provisions.—Prices for butter remain practically unchanged, but there is a larger quantity of poor qualities coming forward, which do not help to keep the market firm. Cheese is in about the same condition as last week. Good fresh eggs sell for large figures, 19c. being about average. With the exception of chickens, the supplies of poultry are very limited. The price for turkeys is about 12 to 12½c.; geese, 7 to 8c.; ducks, 10 to 11c.; chickens, 9 to 10½c.; fowl, 7 to 7½c. The trade in all kinds of hog products is very brisk.

Continued Progress

During the last few years the North American has made marvellous strides in all Departments tending to its upbuilding, which can readily be seen by the following figures, showing a comparison of

Three SEPTENNIAL Periods

Year	Cash income	Assets	Policies in force
1881	$ 39,613	$ 88,763	$ 1,221,712
1888	263,691	666,919	7,927,564
1895	581,478	2,300,518	15,779,385
1902	1,270,840	5,010,813	30,927,961

A strong progressive Canadian Company giving excellent returns to its policy-holders, therefore making it a desirable Company for agents to represent. Three active agents wanted.

With the largest resources of any mortgage corporation, and its funds carefully invested by officers of such experience, its depositors are assured of absolute safety.

As an... Investment

We believe our 5% **DEBENTURES** to be one of the safest and surest that you could possibly enter into. It is safer than a Bank, because you have all of our Permanent Capital Stock, and the whole of our Assets, consisting of first mortgages on improved real estate, as a guarantee behind the Debenture. It is the surest, because the half-yearly coupons are attached to the Debenture and can be cashed at any bank in the country. . . . . .
Write to-day for our booklet, entitled, "An Investment of Safety and Profit."

"This commercial struggle is terrible," said the man who takes everything he reads seriously. "What's the trouble?" "The patent food people are trying to make everybody so healthy that there will be no one left for the patent medicine people to cure."—Washington Star.

Mercantile Summary.

The Hamilton, Grimsby and Beamsville Railway Company will issue first consolidated mortgage bonds, not to exceed $10,000 a mile, for the whole length of the railway, and secure the same by mortgage on the property, assets, rents and revenues of the company.

The Richelieu and Ontario Navigation Company have declared the regular semi-annual dividend of 3 per cent. This may be looked upon as the result of last season's business having been better than ever before, and of the fact that the company does not lose appreciably by the burning of the SS. Montreal.

The Peoples Building and Loan Association,

LONDON, Ont.

The Directors have authorized the issue of

$100,000

Permanent Stock at a premium of $3 per share. Par value $100 per share. Pays dividend of 6 per cent. per annum, payable half-yearly. Also

$50,000 Debentures

payable in gold, with coupons attached, bearing interest at from 4% to 4½%, according to time of investment. Guaranteed by First Mortgages on Real Estate.

Annual Reports. Application Forms, etc., upon application.

THE Winnipeg Power Company is making good progress in the installation of its water power plant at Dashwood Falls, near Lac du Bonnet.

THE Canadian Northern Transfer Company, Limited, Winnipeg, capital stock $500,000, has received a Dominion charter. It will carry on the business of transferring persons and goods from place to place by waggons, omnibuses and other vehicles, and also of warehousing.

WHEN a balloon passes over a forest it descends, and ballast must be thrown out to keep it up. This is explained by Professor Mouillefert, of the French National Agricultural College of Grignon, as being due to the existence above every forest of a prism of cool, moist air, produced by the abundant transpiration of the trees, and extending to a height of from 3,000 to 5,000 feet above the treetops.—American Inventor.

Mercantile Summary

THE Ottawa Free Press, Limited, has received a Dominion charter to carry on the printing and sale of newspapers or weekly or monthly magazines, also a general printing and engraving business. The capital is $100,000.

LAST week was held the annual meeting of the Association of Accountants in Montreal. Satisfactory reports were submitted by the president and treasurer. The following officers were chosen for the ensuing year: President, John W. Ross; first vice-president, A. Cinq-Mars; second vice-president, George Hyde; secretary and treasurer, A. F. Mitchell; council, A. K. Fisk, John Hyde, A. F. Riddell, C. A. Savage.

THE annual general meeting of the shareholders of the Canada Cycle and Motor Company, Limited, Toronto, will take place on the 29th inst. to receive the report of the directors for the past year, and elect directors for the ensuing year, to sanction the cancellation of the common stock of the company and the reduction of its capital to $600,000 in shares without preference or priority, and amending the charter accordingly.

THE Imperial Rolling Stock Company, whose object is to purchase rolling stock from manufacturers and lease it to railway companies in good standing, who will pay for it in instalments amply sufficient to pay interest on and retire the bonds at maturity, are offering through the Canadian Securities Limited, Toronto, part of an issue of $2,100,000 first mortgage 5 per cent. gold bonds for Canadian Northern Car Equipment.

THE following is a record of patents recently granted to Canadian inventors in Canada and the United States: Canadian patents—J. Miller, steam dampeners; A. H. Brintnell, advertising waggons; A. McNally, machine for forming hollow concrete blocks; G. Bruce, apparatus for use in teaching writing and copying manuscript; I. Kinney, pocket knives. United States patents—N. Barrett, machine for dove-tailing window sashes; H. Braniff, apparatus for the removal and dumping of spent tan bark; R. I. Creelman, knitting machines; G. W. Mitchell, life preserver; E. W. Phelps, incandescent gas burner.

AN agency for the Far West has been established at Winnipeg by the Robb Engineering Co., of Amherst, Nova Scotia, where they will be represented by Mr. J. Fulton Porter, who has travelled in the West for them for years. The company continues to make high-class engines and boilers, turning out the Robb-Armstrong engine in any size from five to 1,000 horse-power. They are now putting the Armstrong Corliss valve on their medium speed engines. At the present time the C.P.R. Co. is installing at Fort William two of their 750 horse-power vertical cross compound direct connected engines. At Edmonton last year the company put in a 300 horse-power engine for the municipal lighting plant.

Mercantile Summary.

A REPORT from Rat Portage, Ont., says that the old ore-vein has been rediscovered in the Sultana mine, and that this will soon be in full blast again as a consequence. This will mean a good deal for the town.

THE Canadian Pacific Railway Company has now completed its arrangements for steamship service with Europe during the coming season. Vessels will ply every fortnight from St. John, N.B., to Liverpool, Bristol, London and Antwerp.

J. B. COATES' hoop and stave factory at Dutton, Ont., has been burned down at a loss of $4,500. The machinery was insured for $4,500. A fire also did damage to the works of the Toronto Woolen Machine Co. to the extent of $5,000; covered by insurance.

THE Imperial Paper Mills of Canada, Limited, incorporated under Ontario charter, are offering in London, Eng., an issue of £100,000 six per cent. prior lien bonds of £100 each. This is the company which acquired the timber concessions, mills, sites, etc., of the Sturgeon Falls Pulp Co.

THE Imperial Oil Company are putting in new 5,000-barrel steel storage tanks at Winnipeg and Vancouver. At Fort William the company already have a storage tank capacity of forty thousand barrels. They have eighteen cylinder tank cars in constant commission between Fort William and Winnipeg, and eleven similar cars running between Fort William and Vancouver.

THE Preston-Bell Furniture Company, Limited, announce that their arrangements for erecting large factories at Fort Francis, Ont., are now about completed. The company has taken over Mr. Preston's tie, piling and lumber contracts in that town, and will proceed to put in camps and take out ties and logs for the spring cut. A large saw mill will be built during the coming winter, to be followed by the erection of a sash and door factory, planing mill, furniture factory and woodenware factory. About $60,000, it is said, will be expended this winter. The leading spirits in the enterprise are Mr. W. A. Preston, of Winnipeg, and Mr. H. O. Bell, of Wingham, Ont.

MAINLY as the result of strikes and unsettled labor conditions there has been a very marked falling off in the building operations of many large cities in the United States during the present year. For the first nine months of the year the decrease, as compared with the same period of 1902, is estimated as follows: Chicago, $14,000,000; New York (Manhattan), $10,000,000; Philadelphia, $6,000,000; Pittsburg, $5,000,000; St. Paul, $3,000,000; Minneapolis, $2,000,000; St. Louis, $1,250,000; Washington. $1,000,000; total, $42,250,000. Besides which there can be little doubt but that many plans for building were nipped in the bud for the same reason, which would not be shown by the permit record.

LAST week a report "went the rounds" to the effect that Harland & Wolff, the well-known Belfast shipbuilders, had contracted with the United States Steel Corporation to supply all the iron and steel required by them. The report was no doubt widely credited, so the contradiction may as well be widely circulated. The firm states that some time ago a small quantity of American steel was submitted to them for experimental purposes. However, it failed to withstand the tests and was returned to the consignors. With the exception of certain steel castings and angle iron all the iron and steel they use will be made in the United Kingdom, and large orders have already been placed in Scotland and the North of England.

A Boon to Machinery Men.

Ofttimes a manufacturer, or any one in fact, who is interested in machine tools wants a machine or some accessory in a hurry. Perhaps he cannot wait while correspondence is entered into and the machine shipped from some distance. Here is where those who find themselves in such a position will find in Machinery Hall, 131 Front St., W., Toronto, a boon. On the floors are to be found all conceivable kinds of machine tools and accessories. Call and see them. Open evenings.

Mercantile Summary.

AMERICAN steel manufacturers are registering their dislike of the Dominion Government's bounty policy in this country a bounty of $2 per ton on pig iron and $2 more per ton upon the steel made from this iron. Complaint has been made to the United States Treasury Department that the Dominion Iron and Steel Company of Canada has been exporting some of this material into the United States, and it is argued that the countervailing duty against bounty-paid products should be applied.

THE dividend on common stock of the Dominion Coal Company has been reduced from 8 to 6 per cent. Mr. James Ross, president of the company, in explaining this action, stated that in the past, dividends had been paid, not out of the earnings of the Coal Company, but out of the rental paid by the Steel Company; and that though future earnings might probably be sufficient to allow a dividend at the old rate, yet in the interests of conservative management a reduction would be advisable. This dividend is what should have been declared on October 1st.

LATEST business casualties in the Province of Quebec are reported as follows: Upon demand an assignment has been made by J. Simard, dealing in boots and shoes, liquors, etc., at Chicoutimi. He was formerly in an extensive way of business for some twenty years in Quebec, running three retail shoe stores, and failed there in 1896, compromising at 50 cents. Having been out of business for a time, subsequently he opened up at Chicoutimi, and has undergone more or less pressure from Quebec creditors.—L. P. Garon, formerly a clerk at St. Denis de Kamouraska, and who began "to keep store" on his own account four or five years ago at St. Michel de Bellechasse, has assigned. He began on a small capital inherited from his father, but is evidently not cut out for a successful merchant, having already failed in the spring of 1902, when he compromised at 55 cents.—A. J. Kelly, hardware dealer, of Hull, reported failed several weeks ago, has arranged to pay his creditors 50 per cent. of their claims.—Theriault & Theriault, general dealers, of L'Anse a Griffon, also recent insolvents, are offering 30 cents on the dollar.—G. A. Biron & Co., general dealers at St. Telesphore, have assigned. Biron has had a rather unfavorable business record. He failed in 1893, estate being wound up. He then became interested in the firm of Lauthier & Co., who failed in 1897, compromising at 40 cents. He then resumed business as G. A. Biron & Co., his wife being registered as a partner. Present liabilities are reported at $3,100, with assets of $1,170.—M. E. Dunn, of Windsor Mills, a dealer in agricultural implements, is reported offering a compromise of 50 cents, cash.—L. Dorval, a small trader of St. Odilon, has assigned on demand.

Mercantile Summary.

BERT STEWART in May, 1899, bought out a hotel at Port Dover, Ont., being assisted by his sister, Mrs. Sullivan, who advanced him $1,000, taking security in the shape of a chattel mortgage. However, he was never able to pay anything on the mortgage, and succeeded in having it renewed last July. He has proved a poor manager, and the consequence is an assignment to his brother-in-daw, Hugh Sullivan, Toronto.

J. W. Desjardins, of Plantagenet, Ont., succeeded to the fairly established general store business of his late father in 1897, but has not been able to continue it successfully. He has been slow in payments of late, and is now reported insolvent.—Zotique Deshais, carrying on a small grocery business at Rockland, Ont., has assigned. He only began business last spring, and was formerly a laborer, having no trade experience.

WM. MAKEPIECE & Co. began business in Toronto on February 1, 1902, as a wholesale and commission fancy dry goods house. Makepiece came from England, and the company—W. H. Harris—had been in the employ of several houses in Toronto. At the start the latter claimed he had $3,000 in investments and Makepiece had property in England said to be worth $6,000. Owing to lack of capital they have been compelled to make an assignment.

THE news comes to hand of two assignments in Nipissing District. J. T. Newton went from Baltimore, Ont., to Milberta, where started a general store with no previous business experience. In August, 1902, he submitted a statement, which showed a surplus of $4,850, but since then he has been gradually getting behind, and has been slow with his pay ments to wholesale houses. Now he assigns. John McNeil has been engaged in the sawmill business at Sturgeon Falls for about four years. Last May he was obliged to chattel-mortgage his assets for $285, and now he makes an assignment.

THE following story is told about Frank H. Clergue, when he was a small boy playing around the lumber wharves of Bangor, Maine. A circus was coming to town, and the embryo promoter was hard put for the price of a ticket. Then he had an inspiration. All the water which came to the circus grounds was brought through a wooden tunnel from far up the hill. Its source was an old spring, seldom visited and hard of access. Frank waited until the morning parade was over and the circus help were hungry for their midday meal. Then he mounted the hillside and inserted a wooden plug in the tunnel. By the time he had reached the grounds he found everything ripe for a strike. The water had ceased to run. "Say, mister, gimme a ticket, an' I'll fix it for you," he offered. "Fix it and you can have half a dozen," cried the manager. Inside of ten minutes the plug was removed, and the horses were drinking their fill. And the boy Frank took five bosom friends to the show.—New York Times.

Mercantile Summary.

THE Dominion Motor and Machine Company's premises in Toronto were last week injured by fire to the amount of about $10,000, partially covered by insurance.

WITHIN the corporation limits of the town of St. Mary's, Ont., there is said to be raw material enough to supply one of the largest cement factories in the world. A diamond drill test is reported to have shown a depth of sixty feet of fine clay and sixty feet of fine cement stone.

AN old-time and much-respected lumber merchant of Montreal, named Damase Parizeau, has fallen on evil days, and has been asked to assign. He was at one time in very fair shape, but was induced to go into politics some ten years ago, and his business has shown decline ever since. The following are further Montreal failures: Alex. R. Forrester, doing a small business in belting and mill supplies, under the style of the T. Forrester Co., has been found very backward in payments, suits appearing against him from time to time, and he has now been served with a demand of assignment.—H. F. Fregeau, in a small tailoring way, has assigned, and his assets are to be sold.—J. H. Girouard, in the same line of business as the above, has assigned, and offers 50 cents on the dollar.—P. A. Morin and Miss Decarie, both small millinery concerns in Montreal, have assigned.

MEETINGS.

THE MOLSONS BANK.

The forty-eighth annual general meeting of the Molsons Bank was held in the board room of that institution in Montreal at 3 o'clock Monday afternoon, 19th inst. The president, Mr. W. Molson Macpherson, occupied the chair.

The president, having called the meeting to order, requested Mr. A. D. Durnford to act as secretary, and after that gentleman had read the advertisement convening the meeting, the president named Messrs. George Durnford and Charles Spragge to act as scrutineers.

The general manager, Mr. James Elliot, then read the annual report of the directors, as follows:

REPORT.

The directors have pleasure in presenting this, the forty-eighth annual report, showing the result of the bank's business for the year ending 30th September, 1903:

The profits, after providing for operating expenses and bad and doubtful debts, are $439,092.24.

There have been paid two semi-annual dividends, amounting to $235,580.95—9 per cent. for the year. One hundred and fifty thousand dollars has been transferred to the reserve fund, and $35,908.27 expended in branch buildings, leaving at credit of profit and loss account $25,755.91.

The reserve fund is now $2,720,778, having grown from $2,250,000 balance last year, by addition of $150,000 from profits and $320,778 from the premiums paid on new stock (issue of 15th May last, $500,000, at 190), now being paid up by instalments.

During the year branches have been

J. E. ROBERTS, - - GEN.-MGR.

opened at Frankford, Highgate and St. Mary's, all in Ontario.

With deep regret the directors record the death of Mr. Samuel Finley, who had been a useful and honored member of the board for thirteen years. Mr. William C. McIntyre has been called to fill the vacancy.

The branches, including Montreal, have, as usual, been carefully inspected. The officers of the bank have performed their duties efficiently and zealously.

WM. M. MACPHERSON,
President.

THE PRESIDENT'S ADDRESS.

The president then said:

The annual statement of the bank carries with it the assurance of prosperity for the past year. We have been enabled to pay 9 per cent. dividend to the shareholders, have added $150,000 to the reserve fund, have contributed to the pension fund, and have given a bonus to the officers of the bank.

The growth and prosperity of the country necessitated increasing the banking capital available for the furtherance of business and The Molsons Bank, since our annual meeting last year, received your authority to increase its capital by $2,500,000, of which $500,000 has since been called up.

The capital of the chartered banks is now upwards of $77,500,000, an increase over last year of upwards of $7,300,000.

The circulation of the chartered banks shows an increase of upwards of $5,000,000, amounting to $60,414,740.

While we are to-day enabled to look upon the past year with feelings of satisfaction, we must view the present and future with feelings of extreme caution. The channels which the increasing loans have gone into are, we apprehend, in many cases surrounded by a speculative element other than of a bona-fide business character.

It is pleasing to note that the deposits in the chartered banks, the savings banks and the loan and building societies have increased by over $35,000,000 during the past year, a very strong indication of the prosperity we are now enjoying throughout Canada.

The farming community of all the provinces of the Dominion have harvested abundant crops, which must enrich all parts of the country. The older provinces have shipped very heavily, cheese, butter, cattle, apples, etc., the exports of the country aggregating $215,145,308, an increase over last year of $16,545,006, and such shipments will continue for some time.

The attention which Canada has attracted owing to her growth and prosperity resulted in the most important commercial gathering which possibly ever took place in our country, the fifth Congress of the Chambers of Commerce of the Empire, bringing, as it did, representatives from all parts of the British Empire, with the view of favoring "closer trade relations" within it, which cannot fail to render most beneficial results. So far as Canada is concerned, the representatives of the Chambers of Commerce, as well as the members of the House of Lords and the House of Commons, who subsequently visited Canada, and traversed the country from the Atlantic to the Pacific, inspecting its wonderful resources and capabilities, have imbibed information which cannot fail to make Canada prominent in the minds of those who viewed it, as well as in the councils in which they will be taking part.

The Molsons Bank suffered a serious loss in the death of Mr. Samuel Finley, who for many years served as a director, and gave the most valuable advice. His business experience and good judgment were of the greatest benefit to the bank.

We are pleased to inform you that Mr. William C. McIntyre has been elected to fill the vacancy. Mr. McIntyre's high reputation and business experience are so well known that it is needless for me to say more than that we consider the bank fortunate in having his advice and council for their guidance.

We are indebted to the general manager and the other officers of the bank for their untiring energy and services. The payment of a bonus will indicate the directors' appreciation.

Gentlemen, I do not know that there is more to be said in reference to the affairs of the bank and the trade which our country has enjoyed. They both benefited as time went on, and the only feeling we have is one of caution, that caution should be exercised in the future.

I beg to move the adoption of the annual report.

This was seconded by Mr. S. H. Ewing, vice-president.

The president invited discussion on the report, but, no one having any remarks to offer, he put the motion for its adoption, and it was carried unanimously.

Mr. G. W. Robinson then moved "That the thanks of the shareholders are due and are hereby tendered to the president and directors for their efficient services during the past year."

This was seconded by Mr. Alfred Pidington, and was unanimously concurred in.

The President—"As president, I have much pleasure in thanking you, gentlemen, for the way in which you have referred to the services that have been rendered. It seems to me an oversight that the motion omitted to mention the officers of the bank, as I think it is the officers, and not the directors, who have rendered the services. However, I beg to thank you very much, and to assure you that the officers of the bank have this year done really exceptional work, inasmuch as it has been a trying year, and several new branches have been opened, causing additional work."

The Vice-President—"After what the

B. W. MURRAY, Accountant's Office, Supreme Court of Ontario, - TORONTO.

president has stated, there is really very little to be said by the directors. I thank you very sincerely for the kind vote, and I may say that the president and all the directors take as much interest in the affairs of the institution as if they were dealing with their own private business. I am not saying more than the truth in making that statement. We have done so in the past, and, if elected again, I can only say, as far as I am concerned, and I think I can speak for my fellow-directors, that we shall do our duty in the future as in the past.

"We have in the bank a very modest general manager. He does not think that he has done any more than his duty, and he does not think that those under him have done any more than their duty. We think they have done their duty so well that they are entitled to thanks, and I have much pleasure in asking the shareholders to pass a vote of thanks to the general manager, chief inspector, the managers and all the officers connected with this bank. They have all done their duty. Going back over the past year, I do not think that we have had one serious complaint about anyone in this bank. There has been no serious complaint of misconduct of any sort, which is a great thing to say, considering that we have about 270 employees. I do not think that it would be right to allow the meeting to close without a vote of thanks to them, and I move it now."

Mr. W. M. Ramsay seconded the motion, which was carried unanimously.

The General Manager—"I thank you very much for your kindly allusion to us. As the vice-president has said, we have only done our duty. We have a little over 270 men, and there has been nothing really which has gone wrong. A guarantee fund was some years ago established by the bank, and it is contributed to partly by the bank and partly by the officers, but it has not been called upon for some years, and I hope it will not be for many more."

The meeting then proceeded to the election of directors, Mr. Alfred Piddington moving, seconded by Mr. G. W. Robinson, that one ballot be cast.

This was unanimously agreed to, and, the ballot having been cast, the scrutineers reported the election of the retiring board, viz., Messrs. J. P. Cleghorn, S. W. Ewing, Lieut.-Col. F. C. Henshaw, H. Markland Molson, W. Molson Macpherson, W. C. McIntyre, W. M. Ramsay.

The President—"You have heard the scrutineers' report gentlemen, and I can only say that we shall give our services as in the past, and hope we may see a continuance of prosperous times in Canada. I thank the scrutineers for their services."

At a subsequent meeting of the directors Mr. W. Molson Macpherson was re-elected president and Mr. S. H. Ewing vice-president for the ensuing year.

Quality, Durability, Desirability,

are the distinguishing marks of all our blank books. They are in use in nearly every banking house in Western Canada, and are in use in every agency of some of the largest banking houses in Canada. 4

GENERAL DRY GOODS.

An interesting commentary on the continued appeal to Government for further help to the Canadian woolen industry is the present state of things reigning in the chief mills. That is to say, in the mills devoted to several of the different lines of manufacture, for we do not dispute that the tweed manufacturers are in an unenviable position. In the mills which make such goods as blankets, underwear, flannels, etc., the number of orders pouring in of late has created nothing short of a congestion, causing grave inconvenience to the trade. More than one wholesale dealer going to the mill with complaint as to the slowness of deliveries, has been confronted lately with the remark, "Wait patiently till we can catch up, or go without the goods altogether. The main source of trouble no doubt is the scarcity of labor, besides which packing cases in which to ship the goods have been in scant supply, which is only another mark of the labor shortage in another line of manufacture.

It cannot with justice be said that wholesalers, speaking from a general standpoint, have been overrushed with work during the last week or two. The warm weather has militated against this. At the same time, there is little to complain of; the only real reason for anxiety in the case of a late season, namely, large quantities of surplus stocks, being this season nonexistent. The sorting trade in some lines, however, such as ladies' smallwear may be said to have been particularly good this year. This is notwithstanding the high price of such goods, which is 10 to 25 per cent. above that of the beginning of the year. Great firmness exists in dress goods, both domestic and imported, and it is a noteworthy fact that in some cases so far as the latter are concerned, trade has slowed down on account of the way prices have gone on increasing in Europe. This is sufficient to convince retailers that it is of no use to wait for declines; and that waiting may mean the necessity for paying still higher prices. The cotton goods market is in a similar position; all staples are very firm, and repeats are in many cases only accepted under conditions.

THE ALASKA BOUNDARY DECISION.

The award of the Alaska Commission is not satisfactory to Canadians. Even those, and they are of course in the vast majority, who cannot pretend to have studied the question for themselves, are not content to be told that Canada had a weak case in the controversy. Lord Alverstone himself admitted points in her favor two or three weeks ago which he now sees fit to compromise away. The argument of the man in the street runs somewhat in this way: The United States appoints three commissioners out of a total of six; these three publicly known as politicians with their minds made up, and not by any means the "eminent jurists" for whom the convention calls. These take a united and definite stand in the matter of the boundary. Two Canadian commissioners, men of legal grasp and skill, take a different view and insist upon certain rights for Canada. Lord Alverstone, the sixth commissioner, and the British chief justice, eventually sides with the United States contention which gives that country certain rights and territory. The two Canadian commissioners refuse to sign the award, which thus is the work of three American and one British member of the court. In these circumstances it is not easy for the average Canadian to avoid comparing this instance with others that have gone before in which British statesmen or negotiators have got the worst of it in treating with Uncle Samuel as to boundaries. Meanwhile, and until we read the full text of his reasons, we cannot impugn the good faith of Lord Alverstone, who may have thought he was making an altruistic compromise "for the sake of peace," that would please Jonathan as well as satisfy John Bull. But Canadians will continue to praise Jette and Aylesworth for standing up for our side.

PROPOSED ALTERATION OF BRITISH DUTIES.

In view of the proposals of Mr. Chamberlain in the direction of altered duties in the Customs Tariff of the United Kingdom, it is perhaps worth while to show what these duties are at present, what they yield to the national exchequer, and how their incidence will compare with the altered duties as proposed. The customs dues of the United Kingdom are levied upon

a small number of articles, not more than twenty; but these can all be placed under seven or eight categories, for the sake of condensation. In the fiscal year 1901-2, the following were the sums collected by customs dues:

Article.	Amount.
Sugar, glucose and molasses	£ 6,498,228
Tobacco, snuff and cigars	10,585,819
Tea, at 6d. per pound	5,802,896
Coffee, at 14s. per cwt.	174,445
Chicory, at 13s. 3d. per cwt.	53,616
Cocoa, at 1d. per lb.	188,429
Spirits (brandy, rum, gin, etc.)	4,790,616
Wine, at 1s. to 2s. 6d. per gal.	1,452,238
Fruit, dried (currants, figs, prunes)	383,889
Other items	1,308,432
Total customs revenue	£31,338,608

Sugar pays, according to different degrees of polarization, 2s. to 4s. 2d. per cwt. Glucose, solid, 3s. 3d.; liquid, 2s. 6d.

Tobacco, raw, pays 3s. to 3s. 4d.; manufactured, 4s. 4d.; made in bond, 3s. 10d. per lb. Cigars, 5s. 6d. per lb. Snuff, 3s. 7d., to 4s. 4d. per lb.

Brandy, rum, and gin, pay from 11s. 4d. to 12s. 5d. per proof gallon each. Liqueurs, cordials, and perfumed spirits pay 16s. 4d., to 19s. per liquid gallon.

Among dried fruits, currants pay 2s. per cwt.; figs, plums, prunes and raisins 7s. per cwt.

It is to be remarked in passing that excise duties on beer, levied during the same year, brought in no less than £13,718,438; and excise duties on spirits yielded £18,490,779; while the property and income tax reached £34,806,000.

The proposals which Mr. Chamberlain now makes, most of which were summarized in our article of October 9th, are given in tabular form in the Birmingham Gazette of October 8th, from which journal we reproduce them, together with their estimated effect, as below:

PROPOSED NEW DUTIES.

Foreign corn	2s. per quarter.
Foreign meat	5 per cent.
Foreign dairy produce	5 per cent.
Foreign finished manufactured goods	10 per cent.

PREFERENCES.

Preference to the British miller on flour.
Reduced duties on Colonial wines and perhaps fruits.

FREE OF DUTY.

Maize
Bacon.
Colonial Corn.
Colonial Dairy Produce.
Raw Materials.

TAXES TO BE REDUCED.

Tea	Three-quarters of the duty taken off.
Sugar	Half of the duty taken off.
Coffee	Half of the duty taken off.
Cocoa	Half of the duty taken off.

WEEKLY NET RESULT.

Cost of New Duties:	Farthings.
To the Laborer	9½
To the Artisan	10
Effect of Lessened Duties:	
To the Laborer	18
To the Artisan	19
Gain to the Laborer, weekly	8½
Gain to the Artisan, weekly	9

Mr. Chamberlain estimates that a ten per cent. duty on foreign manufactured goods coming into Britain would produce £9,000,000 yearly. Of this sum, £2,800,000 would be absorbed by the reduced duties he proposes, and the balance of £6,200,000 should be used in the reduction of the taxation of foods and other taxes which press heavily on the people.

Our readers will notice that it is proposed to let colonial grain, bacon, cheese, butter and raw materials come into Great Britain and Ireland without duty, while the duty on colonial wines and possibly fruits will be reduced, a preference on flour being secured to the British miller. So far as we have seen he has not anywhere in his speeches laid special stress on the proposed great reduction in duties on tea, coffee, cocoa, and sugar; but these are of the nature of foodstuffs, and are very largely grown in the British Indies, east and west. The proposal cannot but be eagerly approved there.

PRICES OF COMMODITIES.

The London Economist's Index Number representing the average price of commodities at different periods, stood at the end of September, at 2,114, as compared with 2,002 at the same date last year, and 1,980 in September, 1901. There was an advance during the month of August which was barely sustained in September, though the level is still a little higher than at the end of June, and indeed, on the whole, higher than at any time during the year. It may be remembered that while the present Index Number is higher than has been the case for two years, it is a little lower than at the end of 1900 or 1899. Pig-iron is lower than at the same period in either one of the last three years, with steel rails correspondingly cheaper. Copper and lead are slightly higher than in September, 1902, though the former is lower than in either 1901, 1900, or 1899. Tin is below the average of previous years. As to wheat, its level is about normal, while tea, coffee and sugar cost a little less, though a slightly advancing tendency is traceable. Cotton, of course, is very much above what may be considered a normal level. The same may to a considerable extent be said of wool. Yarn is higher now than in 1902 or 1901, but lower than in 1900 at the same date. Jute is slightly higher than in 1902, but considerably lower than in 1901.

DEFICIT SHARING.

Profit-sharing does not now appear to be the panacea for all ills of the economic body which some expected it to be, and which it certainly seemed to promise under ordinary conditions. It will be all right, so long as things go right; so long as the workman sees his profits regularly coming in. When instead of profits, however, a deficit looms in view, his feelings undergo a change, and he begins to think someone or something wants to cheat him. A year or two ago, the employees of the United States Steel Trust were given a chance to buy preferred stock in that corporation at $82.50 per share, and some $2,000,000 was provided by the management for the purchase

of not less than 25,000 shares. This was offered to employees in amounts equalling 5 per cent. of the salaries of the highest paid employees, up to 20 per cent. of the salaries of the lowest. Three years were given in which to pay for this stock, dividends in the meanwhile going to the purchaser. A further inducement was granted in the shape of a bonus of $5 per year per share to employees holding their stock for a period of five years, and remaining continuously in the employment of the corporation. At the end of the fifth year a plan still more advantageous to employees was to be made, provided that the net earnings of the corporation should have risen to a certain amount.

However, things have not come about as they should have done. Instead of profits increasing from year to year, a very different tale is being told; and the men who thought it a fine thing to be capitalists on their own account, and to be the proud receivers of what might be termed an "unearned increment" find that an increment which is both unearned and unpaid is a very different matter. Already the value of their shares which was to have gone up like a rocket, seems to have started to come down like a rocket-stick. The men now want a different arrangement altogether, and already, to a certain degree, have gained their point. The corporation, in order to allay their growing discontent, have promised to take back the stock in 1908 at the original selling price of $82.50 per share. Should the time come when the payment of a dividend becomes inconvenient, if not impossible, that will be the opportunity for the Voice of Labor to make itself heard. What is sauce for the goose is not always sauce for the gander, by any means.

BRITISH COLUMBIA LUMBER MILLS.

The cutting of logs into lumber, an industry with which people are familiar enough in every province of Eastern Canada, takes on a new interest in British Columbia from the great size of the logs which are there to be handled, i.e., those from the trunks of the Douglas fir, the British Columbia spruce and cedar. It was a new experience to most of us to witness the process of making finished lumber in the Hastings' mill and other great mills at Vancouver. Some figures respecting one of these may help to make our readers understand the remarkable capacity of such up-to-date structures. The writer was invited to visit the Pacific Coast Lumber Company's mill, by the vice-president and manager, Mr. J. G. Scott, whom he had known in Ontario. The premises are nearly fifteen acres in extent. The sawmill is 330 feet from end to end and 60 feet in width. Great interior length is needed because of the length of the logs handled, extending from 40 to 105 feet. On the day of our visit, some logs of spruce 46 feet long were being sawn, which were brought from the northward, a distance of eighty miles. One of these, 42 inches in diameter, which we saw sawn, yielded 3,681 superficial feet of inch boards. The sawyer showed us memos in his book of a log 24 feet long and 48 inches diameter, which had yielded 2,470 feet of inch lumber, and of another 36 feet long, 60 inches diameter, from which no less than 5,538 feet had been made. Ordinary Ontario logs will average 100 feet board measure per log, or ten logs to the thousand feet. The contrast is thus very marked when a single log of British Columbia spruce, cedar or Douglas pine, will yield as much as 25 or 30 Ontario logs.

Mr. Scott assured us that sawmill men in British Columbia had very little trouble with rotten trees. The pine, it appears, is clear and also the spruce. But to return to our description of the mill. Its steam engines, which are double cylinder, will develop 1,200 horse-power, and are made by Wm. Hamilton & Son, of Peterboro, in Ontario. These engines drive everything in the sawmill, and planing mill, on the wharves and in the drying kiln, except the lighting plant, which is furnished by the Canadian General Electric Co., and driven by a Robb-Armstrong engine from Amherst, N.S. The big band saw travels at a speed of 8,000 feet per minute, making, say, 300 revolutions. It is the boast of huge and modern mills that they train their servant, steam, to do everything. In this mill there was a curious absence of men with cant-hooks, once so numerous and indispensable, in fact, the small number of men in the sawmill was a surprise. The logs were hauled out of the water up an inclined plane, lengthwise of the mill, by a travelling chain, as is usual. When opposite the saw-frame they were pulled cross-wise by other chains. To adjust a log accurately on the frame, there shot up out of the floor on the pulling of a lever a gigantic cant-hook worked by steam, and pulled it over this way, while a huge buffer, also concealed hitherto, pushed it bang up against the cruel edge—then away went the log to the saw, no human hand touching it. The Brobdingnagian character of the whole proceeding, and its quickness, filled the spectators with amazement. A great maze of conveyors, edgers, cross-cutters, and other fierce-looking subdividing machinery got possession of the boards the moment they had left the band saw, and made them into respectable sized boards or insignificant lath strips. Out they go to the trucks or piles in the sunlight to be kiln-dried, if clear pine, and sent to the planing mill or to be sold at once for cheaper uses.

The planing mill was turning out that day sheeting for farmers' or ranchers' houses, near Calgary, but the shingle mill we found was shut down, a sufficient stock of that commodity being on hand. Newel-posts, banisters, moulding, flooring, scantling and every sort of dimension lumber was piled up in the store room or yard of this great mill to meet likely demand from house-builders. And houses are the immediate want of settlers to-day in Alberta and Assiniboia.

We heard, here and there, of the combination of sawmill men in the province and of the exactions they were making, but no definite statement on the point could be obtained. We did, however, learn both going and coming of the severe competition Canadian mills had to endure from the lumber of United States mills, whose product has to pay shorter freights. Upon these points a British Columbia lumber maker explained as follows: "We are forced to buy our sawmill material in the United States. When I speak of sawmill material, I mean frames, gear, band-saws, chains, tools, practically everything except steam engines and electric work. All this costs us from 25 per cent. to 30 per cent. duty. Again, we have to compete in the market of prairie Canada or British Columbia with the lumber manufacturers of the States of Washington and Oregon, whose lumber comes in here free while they pay no 25 to 30 per cent. on their mill equipment." From this point of view, therefore, the Canadian lumber maker of the far West has no "cinch," if, indeed, he has not a very substantial grievance.

THE MOLSONS BANK.

A very satisfactory statement was presented to its shareholders by the Molsons Bank on Monday last. Its earnings for the twelve months ended with September were $439,092, which is at the rate of nearly 16 per cent. on the average capital employed. Dividend was paid at 9 per cent.; $35,908 was expended in new bank buildings, and $150,000 placed to reserve out of profits. Then, the new stock having been issued at 190 per $100, there accrued to the reserve fund $320,778 from the premium on stock thus far paid. This makes the reserve fund $2,720,778, whereas the paid capital is $2,856,420, soon doubtless to be $3,000,000. An addition of $10,000 was prudently made to officers' pension fund and a bonus paid to the officers of the bank.

While congratulating his auditory on the general prosperity in Canada, as attested by a growth in deposits of

$35,000,000 in one year, the president declared that "we must view the present and future with feelings of extreme caution. The channels which the increasing loans have gone into are, we apprehend, in many cases surrounded by a speculative element other than that of a bona fide business character." This word of warning is needed in certain quarters, for we believe Mr. Macpherson's views, as given above, are shared by many bank directors. The visits to Canada during 1903 of persons from all over the British Empire were referred to as likely to result in increased attention being paid to this country by people in the Old World, and we may probably look for increased business from it, too—but not at once, for the average Englishman does not move in a hurry. Kindly reference was made in the report to the death of Mr. Samuel Finley, and also to the appointment as his successor on the board of Mr. W. C. McIntyre.

OUR HALIFAX LETTER.

Halifax is considerably elated over the decision of the Allan Steamship Company to make this port the terminus this season for two out of five of their steamers, formerly under contract to go to St. John. After the C.P.R. had bought the Elder-Dempster boats, they notified the Allans that they could only guarantee freight at St. John for three out of the five steamers, which the Allans were under contract with the Government to send to that port. The steamship company got the consent of a number of St. John people to the reduction and armed with this succeeded in getting the Government to vary the contract allowing two of the steamers to sail from Halifax instead of St. John. The Intercolonial Railway authorities will endeavor to provide the freight at Halifax, and the subsidy has been increased on account of larger boats being put on from this port.

This city is about to lose one of its oldest landmarks, namely, the old Masonic Hall, which has been recently purchased by the Y.M.C.A., who will have it demolished to make room for a new Association building. The cornerstone of the old hall was laid with imposing ceremony by the Duke of Kent in the year 1800, the event being announced by a salute of 21 guns from a park of artillery on the Grand Parade, the guns, by special order of the Duke, being served by artillerymen who were members of the Masonic Order. The building has long since been abandoned for Masonic purposes.

The Allan Line steamer, "Siberian," which arrived last week from Liverpool, had as part of her cargo the Irish jaunting car in which the four murderers of Lord Frederick Cavendish and under secretary Burke drove into Phoenix Park, Dublin, the morning of the crime, May 6th, 1882. The car is much the worse for wear, and has not been painted since the crime was committed. It was consigned to a dime museum in Philadelphia.

The office of Post Office Inspector for Nova Scotia is vacant through the death of Colonel Charles J. Macdonald, which occurred last week. Colonel Macdonald was a most efficient official, and was very popular with the public owing to his efforts to maintain the best possible postal service. He was a retired colonel of the 66th Prince of Wales Fusiliers, and served throughout the Riel Rebellion. The applicants for the vacant office are numerous.

A daring post office robbery occured at Port Grenville, Cumberland Co., on Thursday night. The robber snatched from the postmaster a parcel containing $2,700, and is still at large with his ill-gotten gains. The money was sent from the Union Bank, at Parrsboro, for the Colonial Copper Co., at Cape d'Or, to pay their men, and was registered and insured. It is generally known that the money goes forward on the same date each month. The mail is carried by coach which remains overnight at Port Grenville. Owing to having no safe, the postmaster carries all registered matter home for safe keeping. This crude arrangement proved too great a temptation on this occasion, as some one snatched the parcel from his hand and made off in the darkness. The postmaster curiously enough did not give chase and raised no alarm until next morning. The matter is under investigation.

The premises of the Bank of Nova Scotia, in Halifax, have been in the hands of the building contractors for several weeks, and although the work of remodelling the building is still incomplete, sufficient progress has been made to give an idea of the improvements. The entrances have been changed and admission will be had to the banking and board rooms by separate doors. The public banking room has been enlarged by the removal of a partition at the rear, thus adding twelve feet to the apartment. New fittings are in position, and these have been arranged so as to give the centre of the room to the bank's patrons, the offices forming a semi-circle occupying three sides. The premises are well lighted and present a decidedly handsome appearance. Changes are being made in the directors' and manager's apartments of the building.

Before another Provincial Exhibition is held in this city, considerable building operations will be necessary. Three of the large horse and cattle sheds at the Fair grounds were destroyed by fire on a recent morning. These buildings were large and a considerable quantity of lumber was required in their construction. The fire was probably the work of tramps.

A company is being formed to acquire the rights and establish a plant at Halifax for the manufacture of silicate brick. The components of this brick are lime and sand, which by chemical action are united into a stonelike building material of great beauty and hardness. This brick is already being made at Sydney.

The Government cable steamer, "Tyrian," has arrived in port, having spent three months in laying cables, repairing stations and replacing land lines. At Chateau Bay, on the Labrador coast, new Marconi masts were erected in place of the old ones which were in too exposed a position. The Marconi station reports all vessels passing through the Straits of Belle Isle, has a range of twenty-two miles and works as successfully as the cable. The operator and his family remain alone at their lonely post during the winter months.

Halifax, 19th October 1903.

OUR SAINT JOHN LETTER.

Lumbermen are now getting their crews into the woods for the winter's operations, and the opinion is that previous predictions will be borne out and that the cut will exceed that of recent years. Good wages are being offered for men to work on land burned over during the spring fires. The trees must be cut this winter or they will be destroyed by worms. It is not unlikely that in some places the cut of this class of logs will greatly exceed the capacity of the mills to manufacture, but the logs will keep in the streams, where they would soon be worthless if left standing.

The Provincial Government has about decided to increase to $1.50 per thousand the stumpage on logs cut on Crown Lands. This will greatly increase the provincial revenues, for there are many square miles of valuable timber limits held by the Crown, and now operated under leases to the lumbermen, the present rate of stumpage is $1.25. The increase is justified by the fact that lumber brings to-day a high price, and by the fact that private property-owners are exacting a much higher rate than the Government. Frequently the suggestion is heard that if the Government looked more carefully into the collection of stumpage, they would find that the present receipts are not so high as they might be.

The Canadian Pacific Railway Company intends to run ten of its fleet of steamers from St. John during the coming winter; operating three boats to Liverpool, three to Bristol, and four to London and Antwerp. A result of this decision

will be to crowd out two of the Allan Line boats. The terminal facilities here are limited, and as the C.P.R., in furnishing cargo, will give the preference to its own liners; the Allans have nothing to do but abandon the field. Their contract with the Dominion Government for the carriage of the mails compels them to stop at Halifax, both going from and coming to St. John. The Canadian Pacific has positively informed them that cargo will be forthcoming for but three of the five boats engaged in the service, and the Allans request permission to end at Halifax the voyages of those steamers that cannot get cargo here. Some St. John politicians are endeavoring to make political capital out of the affair, but so far as can be seen the deal is a business one purely, and the situation is forced on the Allans as a natural result of the C.P.R. becoming competitors in the ocean trade. So far as St. John is concerned, there will not be any loss of business, but rather a gain, for under the proposed schedules of this winter all the facilities will be worked to their utmost capacity, and while not much increase over last winter can be looked for, still there will be some, because the ships will be of greater tonnage, and it will be possible to squeeze in a few extra trips. Last year 102 steamers were loaded here during the winter and this year there will likely be ten or a dozen more.

The works of the Intercolonial Copper Company at Dorchester have been closed down for a few weeks, but preparations are being made to resume operations, the works are to be enlarged, and a much more extensive plant to be put in. The ore at Dorchester is extracted by an electrolytic process, and the work so far carried on is said to have established the fact that the process is a good one and that there is abundant copper at Dorchester.

A prominent wholesale provision merchant, Mr. Hiram Finlay, died a few days ago, and his place of business is now closed. Mr. Finlay succeeded his father, Mr. Joseph Finlay, who though retired is still hale, hearty and as vigorous as the Marquis of Donegal. Unless he decides to engage again in mercantile life, there is no relative to carry on the business of the late Mr. Finlay. Another prominent citizen, Mr. C. B. Pidgeon, merchant tailor, with stores in this city and in Sydney, Cape Breton, is now seriously ill and cannot long resist the grim reaper. Mr. Pidgeon has associated with him several sons, so his large interests will be maintained.

* * *

St. John, N.B., 16th October, 1903.

THE C.M.A. EXCURSION TO THE PACIFIC OCEAN.

SECOND PAPER.

Our stay of four hours at Regina was interesting to those of us who had crossed the prairies in former years because of the great recent growth of the place. It was also memorable by reason of the party's reception at the Town Hall, which was decorated with bunting and with mottoes, one of which read:

WESTERN GROWTH
MEANS EASTERN PROSPERITY.

The speeches here were striking. Mr. Brown, the member for the district, outlined with fluency and feeling the views of many residents of the Territories upon questions of transportation and tariff. While declaring his staunch Canadianism, he insisted upon the duty of people in the East to try and understand the Western conditions. "If you want us to buy Canadian implements instead of American," he said, "make your goods to suit us, as Americans do, and don't tell us that your goods are what we need when you have never come West to see what we need. Place warehouses among us, and fill them with stock. Do not expect us to send all the way to Winnipeg, 400 miles, for parts of machines, needed to repair breakages, when the United States maker has parts of his machines on the main street of Regina." Mr. Drummond's speech in response was admirable for its restraint, and for its strongly Canadian tone. It was here that the C.M.A. secretary, Mr. R. J. Younge, made his first speech of the trip. He explained with earnestness and lucid fullness the aims of the body he represented, and closed by reciting Pauline Johnson's poem, "Made in Canada," which brought down the house. Mr. Younge is a speaker of whom more will be heard.

At this point, Regina, we remarked, as we had done elsewhere, the number of signs of American manufacturers of farm implements and machinery. It struck us at first curiously, always unpleasantly, but it was to be accounted for in this way: The United States maker of farm gear made that farm gear long ago for the farmers of the "Western Reserve," as Ohio and thereabout was called—then for Iowa and Wisconsin—then for Minnesota and the Dakotas, all prairie country. And as the farmer settler pushed westward the maker pushed westward his factories, at St. Louis and Chicago and beyond. What more natural than that he should make, when he knew so well how to make, reapers and binders for the Canadian Northwest, as that great belt of fertile land came in 1880 and 1890, gradually to be known? And, on the testimony of hundreds of farmers they were good tools. Honor is due to the Canadian firms whose factories were 1,500 miles away in Ontario, instead of 500 miles, that they early began to plant agencies in the Canadian prairies for hay cutters, binders, threshers, field engines, and portable sawmills. At almost every stopping-place on this trip we saw the goods or the signs of Frost & Wood, of Smith's Falls, of the Massey-Harris Co., of Toronto; of the Cockshutt Plow Co., and the Waterous Engine Works Co., of Brantford. Still the persistent and earnest Mr. Brown told us at Regina, "You Eastern Canadian manufacturers have neglected your chances. To hold their trade the United States makers of farm machines have established local warehouses for the sale of *parts of machines.* You have only agencies for the sale of whole machines." The point could not well be evaded.

A proof of shrewd perception of value of printer's ink, and especially of the effect of photographic pictures upon the average mind, was given in the deluge of illustrated pamphlets showered upon our excursion party at point after point in the Northwest. At Brandon, Souris, Deloraine, Indian Head, Calgary, Red Deer, Edmonton, Strathcona, and half a score of other places there reached us from handfuls to armfuls of pamphlets, booklets, maps, and other data vaunting the claims of each place to the attention of the settler, the speculator, the ranchman, the miner. The claims of Regina as "The distributing point of the Northwest Territories," were eloquently insisted on at the hearty welcome meeting given us at that place. Diagrams, figures, facts, were poured upon us to convince the visitors that no other place need apply for the post that at first Nature, and latterly circumstances had given Regina in this regard.

Calgary was a point which impressed every one for its delightful situation as well as for its unusually substantial appearance. The olive-gray tint of the stone of which the banks and other main structures are built, lends itself well to the landscape and to "the illimitable air," which now blew its fragrant perfume about us. And here were the foothills of the Rocky Mountains—far away on the horizon the fabled Rockies themselves. How indescribable their effect upon such of our number as had never beheld rising ground greater than "The Mountain," at Hamilton or the Royal Mount at Montreal! At the railway station here we listened to the genuine eloquence of a western lawyer and patriot who described in a way which thrilled the listener the thoughts and needs of our Great West. Quaint were the scenes and characters at this point peculiar to ranching life, the "rustler" of the plains, the cayuse and his equipment, the tepees and their dwellers, the "silent, smoky Indian that I know." And a certain group of us who were privileged to frequent the Rancher's Club, brought away a refreshing sense of the conventions of Piccadilly tempered by the freedom of a new, strong land.

Testimony as to the character of our northwestern grain fields, given recently by commissioners of seven prominent United States farm journals in answer to hundreds of enquiries by subscribers, is deserving of notice. It is uniformly favorable. Not less noteworthy is its reassuring tone as to the social and fiscal arrangements of our country. One man, the Orange Judd Farmer correspondent if we remember correctly, says that a wonderful relief is found by many of the new-comers from the States in being freed from the harassments of the political "heelers," and bosses, who at home worry them for contributions.

New Westminster, with emphasis on the "New," is a place greatly changed since the fire that swept most of its business quarter. The buildings that used to tower on the upper levels have been replaced by two or three-story substantial ones, more in keeping, as we were told on the spot, with the extent of the city's business, than the higher ones, which formerly existed. At this point a most interesting visit was paid to a salmon-freezing establishment, of which Mr. Cassidy is the manager. Here the salmon are taken from the river and placed in air-tight chambers. They are dipped in cold water at a temperature of 20 degrees, which coats them with ice, and excludes the air. A car-load of these beautifully shaped fish were shipped to New York on the day of our visit. Our being penned up for a quarter of an hour in a temperature some 40 degrees lower than the outside atmosphere was a curious experience. All about us were men muffled in double sweaters, mitts, and rubber boots, dipping the silvery fish and then wrapping their stiffened bodies in paper, to retain the icy coating.

The Provincial Fair at this point attracted crowds of people, and a town half-holiday was declared on September 30th. The display of horses and cattle was good. We found Mr. Henry Wade, of the Ontario Department of Agriculture, on the grounds, and it appeared that he had been chosen one of the judges in this line. Implements from Eastern Canada and the States were in evidence plentifully. But the greatest feature of the Fair, to us visitors, was the remarkable show of fruits, and the huge size of the vegetables. One particular display of this kind, from Chilliwack, some miles up the river, was of especial merit. A lacrosse match between the Montreal "Shamrocks" and a local team was an immense attraction, but certainly the display of base-ball was of a poor type. Fakirs' tents formed a sort of Midway Plaisance, and the crowds that were always around them showed that here, as elsewhere, people like to be amused—and fooled. We were driven to the Fair grounds and admitted as guests of the city; the warmth of our welcome was great.

STUBBORN UNIONISM.

In London, England, where large works are in progress for the installation of electricity, under the management of Americans, there is a good deal of friction between these and the British workmen, who are often union-ridden. We hear of one case in point. The union rate of pay for bricklayers is twenty-one cents an hour, with a working day of nine hours. The manager of the Westinghouse Company, at Neasden, paid the bricklayers twenty-two cents an hour, but he stipulated that the men should start work immediately when the whistle blew. The representative of the union insisted that the men must remain at the bottom of the ladder until the whistle blew, and that when it had finished blowing they should ascend the ladder to where the work was to be done. It was a matter of three minutes, but as the first rule of the managers is to get the work done promptly, they refused to change the rule.

The union's representative, however, insisted on the old way, and now the men have returned to work under the old conditions, getting a cent less an hour and killing time at the bottom of the ladder until the signal is sounded. The unions also are incensed at the system of bonuses to men doing especially good work. A pretty pass, indeed, for the unions to arrive at—the unions, whose very raison d'etre was to "protect" labor.

FINANCIAL ITEMS.

The recent report of United States Public Examiner Evans S. Tyler, shows that there are now 211 State banks in North Dakota, an increase of twenty since April 9th, 1903, and fifty-seven since April 30th, 1902. Comparing deposits of April 30th, 1902, with those of April 9th, 1903, there is shown a gain of $2,517,075, or about 27 per cent.

In 1896 the province of Quebec got along with an expenditure on ordinary account of $4,099,707. Last fiscal year, on the same services, there was spent $4,599,584. The increase of close upon half a million in the annual outlay the Parent Government claims is evidence of economy. A Government with aberrations like this is not safe to trust, and its candidates should not be voted for.—Montreal Gazette.

As bearing upon the money market situation, says the Chicago Bankers' Monthly, it is an interesting fact that several of the largest national banks in Pittsburg that formerly kept their largest balances in New York now carry them in Chicago and St. Louis. The explanation is that the western correspondents offered better terms for handling the accounts, and are more accommodating in the matter of making collections.

The Shipbuilding Trust was to "sweep Britain from the seas," says the Saturday Review, but it has itself collapsed. The Atlantic combine was to put an end to English supremacy on the ocean; the one thing which is evident amid all the rumors which have been current for some months past is that American management has not been a success. Even the great Steel Trust itself, with its nominal capital of £280,000,000, is no longer referred to as a miracle of finance in the way that was common immediately after its inception. While the boom held the structure looked beautiful, but now at the first suspicion of bad times its common stock is quoted at 16 (par 100), its preferred below 62, and even its 5 per cent. gold bonds at 70¾. If a real depression comes it will be found that the watered stock, which was dumped on the public, is the reverse of a gilt-edged security. There is doubtless a good deal which we have to learn from the States, but buccaneering methods in finance coupled with unlimited bounce in commerce are not the weapons with which supremacy will be wrested from the Old World.

At the meeting of the New York State Bankers' Association the other day, at Saratoga Springs, Mr. A. H. Curtis, of New York, made the following suggestion in the general interest: "It is the idea of having, not exactly a black list, but a bureau of information, in regard to people who come to us to do business in one way and another. I think this is a matter that the executive committee of this association should take into consideration and look into with a view to developing some plan by which such a bureau might be established. I might say that a few years ago, when I was paying teller of the Bank of New York, a man came in one day with a cheque for $21,000, which he wanted cashed in twenty-one thousand dollar bills. Of course I knew the man, and as I handed out the money to him he turned away without waiting to count it. The cheque went through the clearing-house all right, but the day afterwards the Washington Bank, on which it was drawn, closed its doors. That man was John H. Silver. Years afterwards he got William J. Quinlan, of the Chemical Bank, to loan him over $200,000 on securities which he was floating and which turned out to be utterly worthless, and which cost poor Quinlan his position in the bank. Within a year or so this promoter got over a million dollars from different banks on worthless collateral. Yet, within a few weeks thereafter he was able to go into one of our big trust companies and get a note for $75,000 discounted. So, you see, if we had had a little list of such men, we could all have been informed at a glance what that man's record was. Do you suppose George H. Pell could have closed up the Sixth National Bank if they had known what his record was? There are scores of just such instances that I could give you, all or many of which could have been avoided if we had such a bureau of information as I speak of, and which could be instituted if we got to-

gether and chipped in $15 or $25 apiece to employ a good man to keep a record of these men, whether they be promoters or shovers of worthless securities, or what not,"

It was only a year ago or thereabout that a seat on the New York Stock Exchange brought $80,000. And yet one sold a few days ago for $51,000. What is wrong? Did the 1902 buyer pay too much, or have "lambs" grown scarcer during the past twelvemonth?

The depositors in the Elgin Loan Company, St. Thomas, Ont., have now received another instalment on the money due them. It was for $150,000, and, with the $75,000 paid a few weeks ago, makes about 75 per cent. of the total claim. The shareholders also hope to save something from the wreck.

Messrs. F. W. and J. W. Baillie and F. P. Wood have started business as stock brokers and dealers in municipal and corporation bonds, under the name of Baillie Bros. & Co., at No. 10 King St. West, Toronto, where they have opened up handsome and commodious offices. Special direct wire arrangements have been secured with the Montreal, New York and Boston stock exchanges. Mr. F. W. Baillie was formerly general manager of the Metropolitan Bank, Mr. J. W. Baillie was a branch manager of the Canada Life Assurance Co., and Mr. Wood has had stockbroking experience in Montreal.

All of the twelve financial institutions composing the Speyer Syndicate, which holds a lien against the Consolidated Lake Superior Company for $5,000,000, have now consented, we understand, to change the lien for bonds with a view to a reorganization of the company. The new corporation will be capitalized at $40,000,000, and there will be a bond issue of $10,000,000 on a 70 per cent. basis. The old stockholders will give $12 and four shares of common stock, or $6 and two shares of preferred stock for one share of the new stock, and an income bond for the amount of money paid in. There will be a stock bonus with the bonds of $2,142,900, and the underwriters will receive a stock bonus of $5,857,000. The bond issue will be covered by a first mortgage upon the stock bonds, and other securities now pledged with Speyer & Co., probably in the form of a mortgage upon the Algoma Central and Hudson Bay Railway. President Shields says he thinks the net earnings of the company for the present fiscal year will amount to about $950,000. It is now hoped to get all the profit-producing part of the works into operation at an early date.

Mr. Dwight M. Lowrey, of the Philadelphia Bar, delivered an address last month before the Pennsylvania Bankers' Association, from which the following is an extract: "Business does not undermine the character of good men—it strengthens and establishes it. Thackeray understood this when he wrote The Newcomes. Colonel Newcome is, perhaps, the finest gentleman on the pages of English fiction, and there is a text for a hundred sermons in his sententious remark: 'Money is character.' In truth, business is the foundation on which all civilization rests. The accumulation of wealth is the first condition and prerequisite in the development of sound knowledge, polite culture and pure religion. And just in proportion as knowledge increases, as manners soften, as in religion superstition gives way to the thirst of righteousness, business broadens its lines, extends its sympathies and elevates its standards, without in the slightest departing from its essential rule and method. No thoughtful man supposes that we have attained perfection in business ethics in this country, but every man in this hall over forty years of age can testify from his own experience to a constant improvement. There has been a steady improvement in the direction of better goods, fair prices and prompt payment. Lower rates and better service is the watchword. Not as a concession to our poverty, but as the triumphant accomplishment of our increasing wealth. Short weights and cunning are the weapons of the poor: rising affluence gives us fixed standards and good measure. The term shoddy, which was in every man's mouth when we were boys, has practically disappeared from the vernacular."

INSURANCE ITEMS.

At Boston, Mass., University, a new course has lately been installed—medicine in its relation to life insurance.

We learn from the Sherbrooke Gazette that Mr. C. C. Knight, manager for the Eastern Townships of the Sun Life Assurance Company, with headquarters in Sherbrooke, has been appointed manager of that company for Manitoba and the Northwest. His head office will be in Winnipeg.

While life insurance is doing a great work in aiding men to save money for future contingencies; it also does a great deal for men in the matter of character-building that cannot be computed in cold cash. The man who carries a goodly sum of life insurance is, other things being equal, a much better man to society than the man who carries none, and worries about the future welfare of himself and family. Worry and anxiety are not conducive to enlargement of character, but rather the opposite, and the man who is the victim is not doing his duty to his fellow-men and society in general.—Sunshine.

Hitherto the city and district of Montreal have been without the blessing of a branch office of the Independent Order of Foresters. When it was deemed needful to rouse, to sound the tocsin, or fire the heather, or ring the alarm bell, or whatever is the proper phrase to use to express the gathering of the credulous faithful together, the Most Supreme Ranger, Oronhyatekha, always went down himself, and accompanied by a band of music and some clever speakers, aided too by torch-lights and other illuminations persuaded a few scores of display-loving people to come in and be uniformed. But now, it is to be different. Representations have been made that it will be worth while to open a regular branch there, and accordingly a branch-office has been opened at No. 20 St. James street. This office, we are told, will be in charge of Brother J. B. A. Alarie, who is well-known to many Montrealers. Information with regard to the Order may be secured from Mr. Alarie, and members of the Order from various parts of the Province visiting Montreal would be welcomed as callers. A large membership of the Order exists already in Quebec province, and it is expected to be increased by this move. Mr. Alarie has been supplied, no doubt, with the usual ammunition to fire off among the good-natured and sociable people of the East End, declaring as it does, the bombast we are accustomed to hear about the great size of the concern, and its great "strength!"

DRY GOODS NOTES.

The W. R. Brock Company, Toronto, have a line of 36-inch wrapperettes in 150 patterns and a full range of colorings, which they are able to offer to the trade at the same rate of value as that presented in the cut lines last March. It can be retailed at 12½c., leaving a big profit, as this house controls a whole mill's output in this line of goods.

A company has been incorporated at Ottawa under the name of the Parisian Corset Manufacturing Co., Limited, with a capital of $65,000 and headquarters at Quebec. It will manufacture and deal in all sorts of corsets, braces, dress shields, laces, and dry goods, and smallwares in general, and also carry on a publishing and book-binding business in connection with the first-named business. Among the charter members are J. A. Cole and E. E. Ross, of Quebec.

In order to succeed, churches and theatres must have audiences, newspapers and magazines must have subscribers and mercantile establishments must have customers. Other things being equal, the degree of success is measured by the size of the audience, the length of the subscription list, and the number of customers. How, then, to increase the audience, the subscription list and the number of customers is the problem for the institutions mentioned to solve. The one word "attraction," indicates how this may be done, indeed, it explains the why in the daily accomplishment of the

fact There is something unusual which is required, something special and unique. In no line of business does this hold more than in dry goods.

Messrs. H. Telke and M. Finklestine have formed a company in Winnipeg for the purpose of starting a fur dressing, tanning and manufacturing business. It is stated that the home product will be used as largely as possible, but that a large supply of furs will be obtained from London, and that Russian fur experts will be employed in the business.

Never has there been more variety in the millinery lines than this season, says the Dry Goods Economist, of New York. This statement holds quite as good in regard to shapes as materials. Everything is selling, and so far there are no indications that any particular style will show a stronger development than another. This makes easy business in one sense. Again, it may be said to have the opposite effect. It takes a level head and a strong personality to dominate the situation at the retail end this season. The head of the department or establishment must have the utmost confidence in his or her choice of styles, for certainly with a season like the present, a selection must be made by all but the most extensive establishments.

ONTARIO CHARTERED ACCOUNTANTS.

The opening meeting of the season's programme of the Institute of Chartered Accountants of Ontario was held at the new rooms of the Institute, in the Royal Insurance Building, Toronto, on Monday evening, 19th inst., when a gratifying full house was present. Mr. A. C. Neff, F.C.A., delivered an address on "Accounting as a Profession," which subject was discussed by several members present. Mr. Neff drew attention to the comparatively recent growth of the profession of accountancy into anything like prominence in the business world, the first association of accountants having been formed in Liverpool in 1870. The Ontario Association was organized in 1879, and incorporated in 1883. He further discussed the very wide field of work which the profession is required to cover, its importance to the financial and commercial world, the standing of the profession, the high qualities and training necessary to success in it, and the desire of the Institute that every member bearing its endorsement should prove worthy of public confidence.

We are pleased to learn that the fall and winter course of meetings of the Ontario Institute begins under gratifying auspices. We are told that more than seventy students have been enrolled as members of the Chartered Accountants' Students' Association, an organization formed for the purpose of training for the Institute examinations, which take place next May. Furthermore, arrangements are made, we are glad to see, for broadening the minds of students of this important branch of commercial machinery by means of a library, technical works, periodicals, and the like, of a character which will help to equip the ideal accountant. It is also intended to have a series of lectures. These are all desirable things: they all cost money: and we have no doubt that any additions to the library committee in their labors, by those who have the means or the time, will be received with cordial good-will. At the rate at which the business of the country is now growing, more accountants will surely be needed. It is to the general interest that they should be competent accountants, not mere machines who write a good hand and are quick at figures, but well-informed business men, whose assurances or certificates will carry weight in a commercial community.

TRINIDAD PRICES CURRENT.

Advices from Port of Spain, Trinidad, say that additional supplies of breadstuffs which had at time of writing recently come to hand, had weakened values generally. The demand for American and Canadian foodstuffs was light, notwithstanding the comparatively low prices at which they have been offered. Flour was moving slowly with bakers' quality quoted at $6.25 to $6.40 for extra No. 1. Cornmeal was moving slowly at $4.25. For the cheaper grades of clear pork, there was some demand, but stocks were heavy, and with holders anxious to realize, prices were easing off. Stocks of family beef were still excessive. Cheese, principally Canadian, was still in heavy supply, and was being offered at low rates. Trinidad dealers are beginning to realize the truth of the reports of a small catch of fish, and the market should be in a good healthy condition for some time to come. Importations lately have been small. Good quality of lumber, especially boards, is scarce. Not many potatoes were in the market, and recent sales of new Canadian went at $2.70 to $2.85. Onions were in considerable supply. As to Island produce, the continued advance in London in the price of cocoa has brought about a very good feeling. Cultivation of this valuable crop is being extended, but the increase from this source is diminished, owing to the fact that the yield from older trees is rapidly shrinking. Exports of cocoa to Canada and the United States have shown a large increase during the past year.

FOR GROCERS AND PROVISION DEALERS.

The Florida orange crop for the coming season is estimated at 1,725,000 boxes, and it is said to promise to be of excellent quality, the fruit being likely to be small, heavy and juicy.

The price of English hops is expected to advance materially. Owing to the gale a short while ago, and to other causes, the yield will be considerably less than anticipated, probably less than 400,000 cwt. altogether.

The steamship, "Escalona," with dried fruits from Mediterranean ports, arrived in Montreal last week, and the "Bellona" is now on her way across the Atlantic with a full cargo of similar goods.

The new president of the British Board of Agriculture appears to be no more amenable to enlightenment, so far as Canada's interests are concerned, than was his predecessor. A despatch from London says that a deputation of Scotch farmers met Lord Onslow and tried to induce him to promise the removal of the restriction on the importation of Canadian cattle into Great Britain. His Lordship declared this to be impracticable, and approved of the Government's policy of a general restriction of cattle importation.

The George Matthews Company, of Peterboro, have bought the plant of the Farmers' Co-operative Pork Packing Company, at Brantford, which has proved as unlucky a venture as so many others of the so-called co-operative packing concerns. The purchase price is understood to be a little over $40,000. The original company was formed about two years ago, with a subscribed capital of $200,000, which will, at any rate partially, prove a loss to the farmers. The new company proposes to overhaul the factory thoroughly.

There is only a moderate number of hogs being marketed. Total Western packing, 265,000, compared with 305,000 the preceding week and 265,000 two weeks ago. For corresponding time last year the number was 310,000, and two years ago 390,000. From March 1st the total is 11,960,000, against 11,155,000 a year ago—an increase of 805,000. Prices are further reduced, closing for prominent markets at an average of $5.60 per 100 pounds, compared with $5.70 a week ago, $5.95 two weeks ago, $6.95 a year ago, and $6.15 two years ago. The speculative provision market was quiet the past week. There was not much disposition to trade. The undertone was easy, but there were no important price changes.—Cincinnati Price Current.

—After months of a rate war, during which none of the transpacific steamship companies reaped any profit on the transportation of flour or wheat from Vancouver to the Orient, the rates have been restored.

TORONTO STOCK TRANSACTIONS.

The last few days have witnessed enough hardening of values to warrant the hope, if so many previous exceptions had not already proved treacherous, that the market is about to resume more normal conditions. The coal and steel companies have received perceptible strength, while other industrials and railways have also enjoyed a little buoyancy. Details are as follows: Ontario Bank, 15 at 128; Toronto, 15 at 220; Commerce, 49 at 153½-154½; Imperial, 45 at 220; Dominion, 271 at 219½-223; Hamilton, 28 at 212; British America Assurance, 296 at 90; Western Assurance, 340 at 88-90; C.P.R., 10,490 at 118½-120⅛; Toronto Electric Light, 15 at 127⅞-128; Can. Gen. Electric, 426 at 139-140; preferred, 1 at 105; Com. Cable, 120 at 150; registered bonds, $10,800 at 90½-91; Rich. & Ont. Navigation, 1,035 at 70¾-75½; Sao Paulo, 408 at 78½-81; Toronto Rail, 420 at 90¾-94; Twin City, 1,600 at 82-84; Can. Land. & Nat., 28 at 100; Can. Per. Loan, 399 at 119-119½; Huron & Erie, (fully paid) 19 at 179¾; Lake Superior, preferred, 17 at 116; common, do., 25 at 54½; North. Nav., 279 at 107-110; St. Lawrence Nav., 34 at 110; Dominion Coal, 3,013 at 64½-72; Nova Scotia Steel, 225 at 70¾-78; Dominion Steel, 375 at 8-9; Toronto Mortgage, 16 at 87; Niagara Nav., 110 at 109¾-110; and National Trust, 11 at 140.

BOOKS RECEIVED.

We have the pleasure of a letter from Quebec, a business letter, which has, however, something more than a business aspect. Mr. J. Arthur Paquet of that city writes, while forwarding us a copy of his fall catalogue: "I hope it will interest you. The historical monuments it contains are a novelty which should be appreciated by everyone who ever visited or intends to visit old Quebec." Accordingly when opening the catalogue we find on the first page a view of the monument to Jacques Cartier; then, one of the spirited monument to Champlain, which stands on Durham Terrace; and so on till the monuments to Wolfe and Montcalm, and various other memorials in and around Quebec are depicted. Undoubtedly this pamphlet does interest us, and we thank the donor for it. But Mr. Paquet is something more than a public-spirited person—he is a furrier, and presents in these pages scores of attractive pictures of fur coats, capes, boas, muffs, caps, and snow-shoeing requisites, all or nearly all of his own manufacture. Mr. Paquet should send this pretty pamphlet by thousands to the United States and to Ontario.

—The announcement has just been made of some important changes in the staff of the Bank of Montreal. Mr. H. V. Meredith has been appointed assistant general manager of the bank, retaining the title of manager of the Montreal branch, while Mr. C. W. Dean, becomes assistant manager of the Montreal branch, and Mr. W. A. Bog, general accountant.

—For the first time in Canadian history, the Post Office Department more than paid its way for the year just past. The revenue exceeded the expenditure by $292,702, even taking into account the deficit of over $100,00 for the Yukon service. In view of this satisfactory state of things, an increase of pay to postmasters in the country districts is announced. And now, if the surplus will allow of still further inroads, we would suggest that something be done in the direction of rural delivery, which would do much to break the farmers' isolation, the chief bane of country life.

—Three directors of the Bank of Nova Scotia, Messrs. J. Walter Allison, George S. Campbell, and Charles Archibald, and the general manager, Mr. H. C. McLeod, have just finished a long tour of the North American Continent on business in connection with the bank. They examined with care the business conditions of the Canadian West, and as a result of investigation decided to open several new branches. They have definitely decided upon Calgary, Vancouver and Wetaskiwin, in which places they intend to open immediately. They have other locations in view, but inasmuch as they propose to build their own premises in each case will not be able to open up so soon as at the points named.

—The Montreal Harbor Commissioners are discussing the question of adding a floating crane to the harbor equipment. The first cost would be in the neighborhood of $60,000, while maintenance would mean an expenditure of $7,000 per year. It would be useful for lifting heavy weights, such as locomotives, etc.

—An official from England, now on a visit to Canada, is the organizer of the National Amalgamated Association of Shop Assistants, Warehousemen and Clerks, in Great Britain. He is now chief organizer for that Association. He explains that: "The shop assistants are what you in America call retail clerks; the warehousemen are what you call wholesale salesmen, and the clerks are bookkeepers."

—Straightforwardness is honesty down to a fine point. It is internal honesty—being just as honest with yourself as you are with others—just as honest with facts as you are with people. The straightforward man knows to-morrow or next year just how he acted to-day or last year, even though he has forgotten the actual incidents. He can always take the same facts and arrive at the same conclusions. He has rarely to explain. There are few comebacks in his business. —Exchange.

—Mr. B. J. Coghlin, ex-president of the Montreal Reform Club and a lifelong free trader, who just returned from England, has given out the following statement: "During my absence I have given a good deal of study to the trade question, and I have reached the conclusion that the time is quite ripe for England to protect her manufactures against foreign goods. I regret being forced by stern facts to make this statement, as I have been a free trader all my life, and have also advocated the same policy for Canada. However, I can no longer close my eyes to the facts which stare me in the face."

—It is estimated in the "Official Messenger," of Russia, that a reduction in the duty on raw cotton may be expected in the autumn of 1904. This is the first prospective departure from the prevailing protective system. The purchasing power of the Russian masses is so low that the textile interests are threatened with ruin, notably those in the St. Petersburg district. Duties on finished goods are sufficiently high to exclude foreign competition, but the high prices cannot be maintained, owing to the inability of the masses to pay them. The spinners have long been asking for a reduction in the duty on raw cotton, which now stands at 50 to 80 per cent., according to the price of cotton abroad.

CLEARING HOUSE FIGURES.

The following are the figures for Canadian Clearing House for the week ended with Thursday, October 22th, 1903, compared with those of the previous week:

Cities	Oct. 22nd, 1903.	Oct. 15th, 1903.
Montreal	25,521,493	20,427,107
Toronto	17,747,859	12,790,654
Winnipeg	6,680,702	.....
Halifax	2,013 968	1,683,723
Hamilton	1 290,673	900,819
St. John	1,157,953	902,749
Vancouver	.....	1,148,780
Victoria	.....	843,688
Quebec	2 047,693	1,321,990
Ottawa	.....	1,917,215
London	851,813	711,997
	$.....	.....

TRADE OPPORTUNITIES.

Imperial Institute, Canadian Section, 10th October. Among enquiries received are the following: A firm of cider makers would receive quotations from Canadian makers who can supply pure apple juice, well-refined, in 50-gallon barrels. A London firm having warehouse accommodation would represent Canadian makers in the following lines, namely; cotton and woolen goods, carpets, boots and shoes, rubbers. A Liverpool firm having a steady outlet for veneer is prepared to arrange with a Canadian maker who can ship regular supplies. A firm of cider makers would correspond with a few Canadian cider makers who can ship fair consignments.

EQUIPPED WITH THE

HENDERSON ROLLER BEARINGS

SUCCESSFULLY APPLIED TO RAILROADS.

ENORMOUS SAVING OF POWER

Railroad Company Expresses Appreciation.

OTHER ROADS TO USE THEM.

The following letter has been received from the Officials of the Hamilton, Grimsby and Beamsville Railway.

Hamilton, Grimsby & Beamsville Electric Railway Co.
COR. MAIN AND CATHERINE STREETS.

HAMILTON, OCT. 9TH, 1903.

HENDERSON ROLLER BEARING CO., TORONTO, ONT.

DEAR SIR,—We have had placed on our car the Henderson Roller Bearings, which has run for several weeks to the extent of over 4,898 miles without the least sign of heat. This car was run 216 miles in one day, without any relief, and upon examination of the bearings we could not detect the slightest evidence of heat.

We have curves upon our road to the extent of 45 degrees, and find the end thrust perfect.

It is our intention to equip our whole system with these bearings.

These bearings have been placed upon one of our largest passenger coaches, some 58 feet in length, weighing about 22 tons, and carrying at times as many as 150 passengers.

We find the saving of power by meter test to be from 45 to 50 per cent. In all this time the bearings have required no attention or oil whatever.

We can heartily recommend them to all railroads. Yours truly,

(Signed) C. J. MYLES, President.
L. BAUER, Director.
GEO. E. WALLER, Manager.
Hamilton, Grimsby & Beamsville Electric Railway Co.

The results as shown in the foregoing tests will mean much to the electric railways throughout the country Electric railway corporations will be able to increase the number of their cars almost 50 per cent. without making any extensive additions to their power plant. The number of cars on steam railroads also will be greatly increased, while the motive power remains the same.

Several railroad companies are negotiating with a view to having these bearings applied to their systems.

The Henderson Roller Bearing Manufacturing Co., LIMITED

HEAD OFFICE: TORONTO. **TORONTO** FACTORY: 66 ESPLANADE WEST.

The Enormous sale of

OLD CHUM

Cut Plug

Smoking Tobacco

Proves its Superior Quality.

Sold by all leading wholesale houses.

UNITED STATES FINANCES.

Henry Clews & Co., New York, in their circular dated October 17, 1903, say:

Conflicting conditions still confuse the stock market outlook. It is quite plain, however, that the time has arrived for clear cut discriminations, and that experienced judgment is necessary in deciding where liquidation has gone as far as justified and where it has not. It is equally evident, also, that the market has not permanently turned, and is not yet on the way to real recovery; and yet there is no escaping another conclusion, that many good stocks are selling much below intrinsic value, having changed hands at sacrifice prices in order to meet pressing obligations or to protect securities of doubtful value. This unusual movement has disturbed the market's equilibrium, so that there is to-day a wide disparity in values which cannot be adjusted until both the good and the bad have reached a level more in keeping with new conditions. Beyond question, the better class of railroad securities are selling at very attractive prices to investors. Our railroads are in both excellent physical and financial condition, honestly managed, not over-capitalized, and generally speaking are up-to-date in all respects. In event of business reaction their dividend paying capacity is not likely to suffer, for the reason that there is such a large margin between earnings and necessary operating expenses that any loss in earning could be readily compensated for by diminished outlays for improvements, to say nothing of the economies made possible by recent betterments. As for the industrial section of the market, its future, it must be admitted, is uncertain. Liquidation in that quarter has been simply tremendous, and it would seem as if these securities had fully paid the penalty of excessive inflation. It must be remembered, however, the industrials have not yet withstood the crucial test of a business reaction: their decline thus far, Steel excepted, being due to failure of promoters and underwriters to float their new creations. The general conservatism now prevailing in business circles, while an assuring symptom, is strongly suggestive of reactionary tendencies.

September returns of exports plainly show the effects of backward harvests, the total for the month being $11,000,000 less than last year. Our imports, however, fell off nearly $6,000,000, so that the month's excess of exports was $28,000,000, against $33,000,000 a year ago. Figures for nine months show a much more rapid growth in imports than in exports, but this tendency will be quickly arrested should we meet any decided trade reaction. More concern has been displayed over the friction between Japan and Russia than deserved at present, though war in that direction is among the strong possibilities in the distant future. Unnecessary concern is aslo shown over the approaching Presidential election. Experience shows that the latter event always has less influence than feared, and in the interim we are likely to have little new legislation—"Stand pat" being the political watchword.

THE CANADIAN CASUALTY AND BOILER INSURANCE COMPANY

Full Government Deposit Paid.

President:
ALEXANDER SUTHERLAND, D.D., Toronto.
Vice-Presidents:
H. N. BATE, Ottawa, Director Bank of Ottawa.
W. S. DINNICK, Toronto, Vice-Pres. and Mng.-Dir. Standard Loan Co.
A. G. C. DINNICK, - Managing Director.

This Company having deposited $30,000 with the Treasury of the Ontario Government, has been duly licensed to transact the following classes of Insurance

Boiler Inspection — Personal Accident Insurance
Boiler Insurance — Sprinkler Insurance
Consulting Engineers — Elevator Insurance

The patronage of the public is respectfully requested. Correspondence with Insurance Agents and those wishing to engage in the business is invited, and will receive prompt and courteous consideration.

Chief Engineer, - - - A. M. WICKENS.
Superintendent of Agencies, - J. G. BEAM.

43½ King Street W., - - HAMILTON, Ont.

MONTREAL MARKETS.

Montreal, October 21st, 1903.

Ashes.—The market is firm at last quotations, with limited offerings of pots still reported, and practically no pearls. Buyers are apparently still prepared to pay $5.95 for good tares of first pots.

Cements and Firebricks.—Importations of cements have fallen off materially since the surtax on German goods went into effect on the 1st inst., and only 600 bbls. of Belgian, and 920 bbls. of English are reported for week ending to-day. Last week's figures were 11,500 bags of Belgian cement, and 122,000 firebricks. Business is reported as well maintained at steady prices as last quoted.

Dairy Products.—Shipments of cheese to Britain last week aggregated 70,962 boxes, against 97,425 boxes for same period of last year. Butter shipments were also somewhat light, comprising 11,779 packages. After writing last week cheese prices took quite a sudden and stiff upward movement, but the market at the moment seems rather unsettled. It is claimed that equal to 11⅝c. has been realized for fine Ontarios in the country, but on spot these goods are said to be offered at 11⅜ to 11½c.; fine Townships and Quebecs are quoted at 11⅛ to 11¼c. The butter market is not specially active, and values barely steady at 21 to 21¼c. for finest Townships creamery, Quebecs quote about 20½c., and Western dairy about 16c.

Dry Goods.—The weather continues almost too fine and open for country stocks of fall goods, to be yet much broken into, but city retailers report a good business doing, and wholesalers say that general remittances are better than in September, while failures are few. With regard to values nothing new has been reported during the past fortnight, but there is no evidence of weakening in the firm quotations in all lines.

Furs.—The October sales in London are on this week, but results will not be definitely known for a few days. Some of the minor houses had their sales on Monday, but the Lampton collection was booked for the 20th and 21st. The offerings for the first day are principally Australian and Eastern furs; the Ameri-

can collection being sold to-day, comprising 113,000 rats, 1,300 bear, 12,000 coon, 1,400 skunk, 4,500 mink, 4,200 marten, small assortments of otter, lynx, wolf and fox, and some fair lots of Russian squirrel, chinchilla, etc.

Groceries.—All the wholesalers in this line appear to be busy, and speak favorably of collections as a whole. The dried fruit cargo of the "Escalona," which arrived in port last week, is said to open up well. The "Bellona" is now fairly on her way across the Atlantic, having cleared from Cadiz on the 15th. She has a full cargo, and it is reported had to refuse shipments at every port of call. The strong tendency to advance in both Malaga and Valencia raisins is maintained. Quotations for new dates are momentarily expected, and it is said will be about the same as last year. A report from New York to-day says that there has been quite a strong advance in Grenoble walnuts and V lencia almonds, but this has not yet been definitely confirmed. The demand for sugars has fallen off somewhat, and the New York market is barely firm, but local refiners still quote standard granulated at $4.10, and yellows from $3.40 to $3.90. Molasses is more in demand, and quotations are very firm at 40 to 42c. for single puncheons of Barbadoes, as to quality.

Hides.—Receipts of beef hides are increasing, but the demand from tanners is very fair, and prices are steady, dealers buying freely on the basis of 9c. for No. 1. Lambskins were advanced last week to 70c. each.

Leather.—The demand from local boot and shoe manufacturers is still somewhat slow. From leather jobbers there is fair enquiry, and export business in sole is apparently moderately active. Values are all steady; sole is quoted on the basis of 23½ to 24c. for mfrs. No. 2, B.A., and 27 to 28c. for best grades of slaughter. In black leathers Western splits are quoted at 20 to 21c.; Quebec ditto., 16 to 17c.; junior, ditto., 15 to 16c.; glove grain 10½ to 12 c.; buff and pebble, 11 to 12c. Dongolas are held at firm figures.

Metals and Hardware.—Heavy metal men report a continued good demand, and in general hardware there is no slackening of business. The Glasgow pig-iron market is reported showing signs of easiness, but local quotations remain steady at figures given last week. Bars are unchanged at $1.90 to $1.95; bar steel $2.05 to $2.10; cast steel, 7¾c. Boiler plate is quoted at $2.10, and tank steel at $2. Coke tins of standard weight are sold at $3.65, and charcoals at $3.90; Terne plates, $6.75; galvanized sheets, $4.25; Canadas, $2.45, and black sheets are unchanged at $2.40 for 28 gauge, and $2.25 to $2.30 for No. 26. Ingot tin is a little stronger at 30c. for straits; copper easier at 13¾c.; lead steady at $3.10, and spelter at $5.75.

Oils, Paints and Glass.—Travellers are reported to be doing very well, and

TYPEWRITER CENSUS

A typewriter census of the following representative towns are the proverbial "straws that show which way the wind blows."

	OUR SALES	NOT SOLD BY US		OUR SALES	NOT SOLD BY US
Hamilton.....	210	46	St. Catharines....	52	5

J. J. W. Deuchar, F.F.A., F.I.A., General Manager and Actuary of the Norwich Union Life Assurance Company, speaking of investments says:

"It may serve to indicate the great importance of obtaining a good return on the investments, if it is realized that one per cent. of increased interest on the funds of a company will, on the average, have as great an effect as a saving in expenditure equal to 10 per cent. on the premium income, while, if an office could count on realizing 5 per cent. interest in place of 3, it might reduce its premiums some 30 per cent., or double its bonuses."

Mr. Deuchar does not name **THE GREAT-WEST LIFE**; but the above statement exactly describes the happy position of its policy-holders.

TORONTO MARKETS.

Toronto, October 22nd, 1903.

Chemicals, Drugs, etc.—Few features of interest are to be noted just now in the local drug market. Business is normally active, and prices remain firm. In New York the demand for drugs is fair. Quinine is in good request, but stocks of German are light. Opium is dull and a shade lower. Manchester advices report a fairly good export trade going on, but a slackness in the home demand, especially for future delivery.

Flour and Grain.—At $3.10 the usual price quoted for ninety per cent. patents in buyers' bags, middle or east freights, a fairly good business is going on. No particular change has taken place in mill-feed. Wheat is about 1c. higher and in good demand for milling. Barley is dull, at a 2 to 3c. decline. Oats are the same as last week. Peas are 2 to 3c. lower, and dull at the decline. Corn and buckwheat keep nominally the same.

Fruit and Vegetables.—Considerable domestic fruit is dragging on the market, such as peaches, etc. Grapes sell pretty well, as they are not in over supply. Quotations are as follows: Oranges, Jamaica, $2.75 to $5.-25 per box; Torrento, $1.50 to $3.50; lemons, Verdelli, $4.50 to $5; cranberries, Cape Cod, $10; Jersey, $9.50 per bbl.; grapes, Concord, 35 to 40c. per basket; pears, 30 to 40c. per basket; peaches, yellows, 40 to 65c., white, 30 to 40c.; celery, 35 to 40c. per dozen; egg plant, 25c. per basket; tomatoes, 25 to 35c. per basket; peppers (green), 40c. per basket, apples, fall, $2 to $2.50 per barrel; winter, $2.25 to $2.50; onions, Canadian, $1.25 per bag, Spanish, $2.50 per case; sweet potatoes, $3.25 per barrel; Bananas, $2 to $2.25 per bunch.

Hardware.—At the early part of the present month there was a slight slackening off in orders, probably due to the mild season, as orders received at this time of year are on winter account. Latterly, however, since Thanksgiving more particularly, business has been fully up to the normal. Taken as a whole trade has been fully up to last year's aggregate, but probably it will be found not to have exceeded that. At the same time, last year, it reached a point never before known. A feature at present is the extra good call for goods for the West.

Live Stock.—A ready sale met the offerings of cattle at the market this week. Of exporters, buyers would have been disposed to take more than offered if it had been there. The price ascended slightly. Butchers' cattle, too, especially those of good quality, were in very good demand.

Provisions.—Dairy pound rolls are coming forward in larger quantities, but quality is not as a rule very high. Good dairy tubs and creamery prints are in demand. An upward movement is traceable in cheese. The present price is about 12 to 12½c. Eggs are high-priced and a considerable percentage of those coming forward are not strictly fresh. Owing to the warm weather and the fact that too many scrubs are coming forward, the poultry on the market for hops is dull, Canadian new cannot be described as brisk. The demand for hops is dull, Canadian new crop being quoted at 18 to 20c. Provisions hold firm, and smoked meats are in somewhat scanty supply.

Hides and Skins.—Hides are low in sympathy with the recent decline in Chicago, and there may be a decline shortly. Sheepskins are steady at 60c. Tallow is dull.

Wool.—American buyers have been making enquiries about Canadian fleece lately, but little or no business has resulted. For pulled wools, a firm market obtains, the demand from the domestic mills being quite fair.

Something Really New in LIFE INSURANCE.

THE
ADJUSTED INDEMNITY POLICY
ISSUED BY
The NORTHERN LIFE
Assurance Company
has no equal

It gives the necessary Home Protection for less money than the Regular Policies.
Write for Booklet explaining it.

JOHN MILNE, Managing Director.
Head Office, - London, Ont.

Continued Progress

During the last few years the North American has made marvellous strides in all Departments tending to its upbuilding, which can readily be seen by the following figures, showing a comparison of

Three SEPTENNIAL Periods

Year	Cash income	Assets	Policies in force
1881	$ 39,613	$ 88,763	$ 1,221,712
1888	263,691	666,919	7,927,564
1895	581,478	2,300,518	15,779,385
1902	1,270,840	5,010,813	30,927,961

A strong progressive Canadian Company giving excellent returns to its policy-holders, therefore making it a desirable Company for agents to represent. Three active agents wanted.

WILLIAM F BULLEN,
Manage

London Ontario, 1903.

Of all the financial institutions of Canada receiving money on deposit, only three have a Paid-up Capital as great as that of the Canada Permanent Mortgage Corporation, Toronto Street, Toronto.

A deposit account with this exceptionally strong institution may be opened with one dollar. Interest allowed at three and one-half per cent. per annum, compounded half-yearly.

THE haste to get rich often leads many a person who has money to invest to speculate in bonds and stocks ground out by speculators during good times when everything is on the boom, and which, when times are hard and the investor is most likely to need his money, must be sold at a great loss. We would advise you not to speculate with this class of stock, but to invest your money in the Debentures of The Standard Loan Company, which bear interest at the rate of five per cent. per annum, payable half yearly; interest coupons are attached to debenture made payable to bearer. 8

Mercantile Summary.

The Acme Harvester Company, at Peoria, Illinois, one of the largest manufacturers of agricultural implements, has been forced to place its affairs in the hands of a committee representing the creditors, and ask an extension of time. The assets are nearly $4,000,000, and much in excess of their liabilities. The reasons assigned for the embarrassment are a bad season, bad collections, and doing a business that was unwarranted by the capital of the concern.

The Peoples Building and Loan Association,

LONDON, Ont.

The Directors have authorized the issue of

$100,000

Permanent Stock at a premium of $3 per share. Par value $100 per share. Pays dividend of 6 per cent per annum, payable half-yearly. Also

$50,000 Debentures

payable in gold, with coupons attached, bearing interest at from 4% to 4½%, according to time of investment. Guaranteed by First Mortgages on Real Estate.

Annual Reports. Application Forms, etc., upon application.

JUDGE EDWARD ELLIOTT, President.
WM. SPITTAL, - - Secretary-Treasurer.
A. A. CAMPBELL, - - Managing-Director.

THE GREAT WEST
PERMANENT LOAN AND SAVINGS CO.,

274 Portage Ave., Winnipeg, Man.

Permanent Preference Stock of the par value of One Hundred Dollars per Share is being rapidly subscribed for at a **20** per cent. premium. This stock bears Five per Cent per annum, paid half-yearly. It also participates in the profits in excess of said five per cent. Profits paid yearly.

Five per Cent. Full-paid Stock (is an excellent investment), withdrawable in three years

Money to Loan on First Mortgage on Real Estate on reasonable and convenient terms.

PORT ARTHUR & FORT WILLIAM.
Post Office Address—Port Arthur, Ont.

A strong movement is on foot in the West in favor of holding a Dominion Exhibition in Winnipeg in 1905, and committees of the Exhibition Board are being appointed to look into the question of changing the present site, and other matters.

W. F. Dever & Company, a Toronto stockbroking firm, which makes a specialty of dealing in Canadian securities, have been awarded the contract for $10,000 debentures of the town of Durham, Ont.

The Montreal Street Railway has expended during the last few months, the sum of $125,000 in new closed cars. They are each fitted with air-brakes, and with four motors, of 40 horse-power each. Heavier cars mean heavier equipment generally, and whereas a few years ago a 72-pound rail was the heaviest in use, now all the rails being laid are 96 pounds to the yard. This year the city will receive 10 per cent. of the railway company's gross receipts.

Mercantile Summary

The Big Bend Lumber Company, Limited, is building a sawmill at Arrowhead, B.C., with a capacity of 25,000,000 feet of lumber per year.

Lewis Wigle, buyer for the Empire Tobacco Co., purchased the great bulk of the leaf tobacco in the township of Colchester, Essex, says the Amherstburg Echo. Price paid 10 to 10½ cents per pound.

Alex. McNeil, and other Halifax, N.S. capitalists, are organizing a company to make silicate brick in that city. It is a material formed largely of sand and lime united by chemical action into a hard sort of stone.

A Prince Edward Island paper says that oyster fishermen ought to reap a good harvest this year. The price is $5.50 for common oysters, and $6.75 for hand-picked. The shipments this season so far are only about half what they were this time last year.

W. J. Finlay's paper mills at Strathcona, Ont., formerly known as the Napanee mills, were on Sunday last, destroyed by fire. The building was insured for $8,000, which will only partially cover the loss; while an insurance of $3,000 on the stock was only recently cancelled.

The Granby Consolidated Smelter Company's production for the year just closed amounted to 12,551,000 pounds of copper, 277,574 ounces of silver, 35,121 ounces of gold. Receipts from real estate amounted to $38,511, making total receipts $2,271,252. Expenses were $1,974,954, net profits $291,298, previous surplus $398,000, total surplus $694,298.

Liquidators have been appointed in the matter of the Howard Trust and Investment Company, St. Adolphe, county of Argenteuil. On motion being made by Mr. Prevost, representing the Molsons Bank, and agreed to by the other counsel, Messrs. Gagnon and Caron, accountants, Montreal, were appointed liquidators. Messrs. F. E. Gilman, K.C., Edward C. Pratt, manager Molsons Bank, Montreal; C. L. Demartigny, advocate; and L. E. Parent, manager Ste. Agathe sawmill, were named inspectors.

A startling story of a big mine's closing comes from Butte, Montana. By the shut-down of the Amalgamated Copper Company, a payroll of over $50,000 a day is cut off in Butte. Representatives of the company declare that by the decision rendered by Judge Clancy last Friday, the company named, is practically wiped out of existence, and cannot do business in Montana. Its stockholders are prevented from receiving dividends, they say, although $3,000,000 is tied up and awaiting distribution. All the mines and smelters of the company have been ordered closed, and 15,000 workmen are thrown out of work. How long the shut-down will continue is a matter of doubt. It may take nine or ten months before the company can get a hearing before the Supreme Court.

A. L. BROWN, - PRINCIPAL.

Mercantile Summary.

THE Crown Elevator Company are about to erect in St. Boniface, Man., an elevator and cleaning plant at a cost of $150,000.

MESSRS. J. P. Murray, of Toronto, W. J. L. McKay, of Orangeville, and others, have formed a company to be known as the Sprouted Food Company, with a capital of $100,000.

THE Williams Iron Mines' Company, has received an Ontario charter. The authorized capital is given at $3,000,000, and the chief promoter is John McKay, of Sault Ste. Marie. We have not heard what the actual capital is to be.

E. R. MOFFATT, grocer, North Sydney, N.S., who was reported some weeks ago as offering 35 per cent. on liabilities of $14,000, has assigned, having been unable to complete the arrangement.——Robert Bond, a builder and contractor, of Bridgetown, in the same province, has also assigned, his liabilities being mainly local.

THE Canada Furniture Company's sawmill at Wiarton, Ont., was on the 22nd October, destroyed by fire, at a loss of about $60,000, including several hundred thousand feet of lumber, Partially covered by insurance. On the same date, one of the Flavelle Milling Company's elevators at Lindsay, Ont., took fire, and was damaged to the amount of some thousands of dollars, Insured.

EUGENE GALARNEAU, grocer, etc., at Pont Rouge, Que., a recent insolvent, has arranged a compromise at 25 cents on the dollar, on liabilities of about $6,500.——W. Lebel, harness making at Three Rivers, Que., since the spring of 1901, is seeking compromise indulgence from his creditors.——L. P. Beauchemin, in the dry goods line at Nicolet, Que., has assigned, and a meeting of creditors is called for the 30th inst.

EUCALYPTUS TREES.—An interesting article appears in "The Scientific American" on the subject of the world's fuel. The impending wood famine predicted by publicists and foreigners may, after all, be prevented by the planting of eucalyptus forests. Large areas in every continent are now being planted with this tree, owing to the energy of the late Baron Ferdinand von Mueller, Government Botanist of Victoria, Australia, who declared that "eucalypts are destined to play a prominent part for all time to come in the sylvan culture of the vast tracts of the globe." In America the experiments have proved so successful that already scientists maintain that the eucalypt has served more aesthetic and utilitarian purposes than all other forest trees. Moreover, it is reported that eucalypts will revolutionize sylviculture in France, Algeria, Italy, Spain, Corsica, Portugal, Cape Colony, and the Transvaal. It is claimed for the tree that, apart from its sanitary properties, it is unrivalled for giving forest cover and as a source of timber, fuel, oil, and honey.

26 Wellington St. East, Toronto.

H. W. WILSON, dry goods retailer, Ottawa, lately reported as preparing a statement of his affairs, and as likely to offer 75c., on liabilities of about $11,000, has assigned.

PREPARATIONS are being made for an early beginning with construction work on the North Fork line, a branch of the Kettle Valley Railroad, in British Columbia. A bonus of $5,000 per mile has been granted to it by the Dominion Government besides a subsidy from the Province. The line will bring Grand Forks into touch with the Franklin Camp, and several other rich mining districts, besides opening up a large coal field recently discovered about fifty miles from the former place.

ALL shades of plum velvet are being used by the Parisians for the new waists. Aubergine, dahlia, fuchsia, archeveque and eminence are among the shades of plum and purple to which fashion gives particular prominence today. The last touch of style is given to the waists of this color,. in that fashionable fabric, velvet, by being trimmed with touches of gold, both in buttons, narrow braids and lace. Gold trimmings combine artistically with almost every shade of mauve, whether it be the deep plums or the faintest of violet shades. The velvets which are fashion's choice for waists this winter are of the soft, clinging fabrics, which are something entirely new in pile fabrics.

Mercantile Summary.

THE shareholders of the Coaticook Electric Light Company, who sold out the other day to the municipality, will only receive a return of 80 2-3 per cent. of their investment.

ROCK ISLAND is trying to secure the location in its midst of a branch the Fairbanks Scale Company intends establishing in Canada.

MR. W. D. FRASER, manager of the Eastern Townships Bank at Magog, has been promoted, says a Townships paper, to the Waterloo branch, in succession to Mr. W. I. Briggs, resigned, on account of ill-health.

THE Montreal Rolling Mills are about to construct a new wire nail plant, with an output of 100,000 kegs per year, extend the 12-inch and 18-inch nail mills to double their present capacity, erect cooperage and keg shops, and build larger office buildings.

THE Avenue Realty Company, headquarters at Montreal, has been granted a charter by the Dominion Government to deal in real estate, to erect buildings, to borrow money, and secure the same by mortgage, debentures, or otherwise, and to deal in all rights and privileges convenient for such purposes, E. S. C. Desbarats and D. C. MacCallum, of Montreal, are among the charter members.

No new failures are reported in Montreal for the week. The liabilities in the matter of D. Parizeau, lumber merchant, whose case we referred to last week, amount to $35,100, and the estate will likely be closed out.——Miss P. Decary, and P. A. Morin, in the millinery line, both recently reported as insolvent, are offering 35 cents and 60 cents respectively.——J. H. Girouard, tailor, lately failed, has compromised at 50 cents.

RIDLEY College senior school, at St. Catharines, Ont., was on the 25th inst., completely destroyed by fire. Eighty people were sleeping in the building at the time the fire was discovered, and many of them had difficulty in escaping without injury. Practically all their clothing was burned. The loss on the building and contents, apart from personal effects is placed at $42,000, while the insurance is about $20,000. The college may be re-constructed on another site.

FROM Charlottetown, P.E.I., we learn of the embarrassment of the firm of Mark Wright & Co., Limited, manufacturers of and dealers in furniture. The company, which is one of some years' standing, has been reported as leaning prettily heavily of late on the bankers, in whose favor confession of judgment was recorded several weeks ago for $30,403. The stock of $27,000 was sold under this judgment, realizing $20,000. The directors now are offering general creditors 30 cents on the dollar. Here is a case where ordinary creditors have a good right to be angry.

Bellows Top
Suit Case

An ordinary Suit Case may be large enough when you start, but will it hold all that you accumulate on your trip?
The advantage of a Bellows Top Suit Case is that you can double the capacity at your will.

Manufacturing and Wholesale Stationers.

43 to 49 Bay Street, Toronto.

Mercantile Summary.

A long desired steam packet service, between Bridgetown and other points on the Annapolis river, and St. John, N.B., is to be begun next spring. A company is now seeking incorporation for that purpose, intending to build a suitable steamer for such a service.

It is related by the Halifax Chronicle that the schooner "Indepndence," that arrived at Gloucester from a salt cod-fishing trip, weighed off 318,000 pounds from which a stock of $12,900 was realized. The crew shared for the trip $333.33 each.

According to the Gazette, it is the intention of Messrs. Samuel, May & Co., billiard supply manufacturers, and the Alward Cash Register Manufacturing Company, both Toronto firms, to open branches presently in Montreal. Each house will employ in the neighborhood of fifty hands, it is said.

The Sturgeon Falls, Ont., Pulp Company have begun operations at their paper mills, which have been in course of construction for the past six years. The company owns some 36 square miles of pulpwood lands, with sufficient spruce, it is said, to keep the works in operation for fifty years. The output, we believe, has been mostly bespoken for United States newspapers. For the present, 50 tons of paper will be manufactured daily, and about 400 hands employed.

At a meeting of the creditors of P. Therien & Co., general merchants at St. Remi, Que., held in Montreal, on the 22nd inst., Mr. Therien made an offer of 50 cents, cash, which his creditors were not disposed to accept, and the meeting adjourned, to allow him to amend his offer to 60 cents. Mr. Therien has been prominently in business, off and on, at St. Remi for a good many years, but not always successfully. Last spring he got behind and arranged an extension with his principal creditors, which he has not been able to complete. His liabilities then were about $16,000.

The entire aluminum industry of the United States seemingly was involved in a case recently settled in New York. The suit was one brought by the Electric Smelting & Aluminum Company, of Cleveland, against the Pittsburg Reduction Company, which is, we believe, the only concern making aluminum in the United States, with plants at Niagara Falls and Massena, N.Y. The court granted the Cleveland company an injunction restraining the Pittsburg Reduction Company from the use of the processes at present employed, and ordered an accounting of profits for the time that it has been manufacturing aluminum in infringement of the Bradley patent, some twelve years. The Bradley patents, sustained by the court, were taken out by Charles S. Bradley in 1891 and 1892. The Pittsburg Reduction Company has been operating under the so-called Hall patent, taken out by Charles H. Hall, its vice-president.

UNITED STATES IMMIGRATION.

The immigration of aliens of a not wholly desirable class into the United States, seems to be increasing to an alarming extent, notwithstanding the restrictions imposed by the authorities. The annual report of the Bureau of Immigration, for the year just closed, shows a large increase of steerage immigration compared with last year, the aggregate for the fiscal year of 1903 being 857,046, or an increase of 208,303, which is 32 per cent. The statistics show that the United States are receiving an increased number of immigrants from all foreign sources. Of the total steerage immigration, there came from Europe 814,507, from Asia 29,960, and from all other sources 12,573. Including the cabin passengers, the total incoming of aliens to the United States during the year aggregated 921,315, or 105,043 more than the greatest number heretofore reported for any one year. Of these, 230,622 came from Italy, and 206,011 from Austria-Hungary. Russia sent 136,093; Germany, 40,036; Sweden, 46,028; while England was the home only of 26,219, and Ireland of 35,310. Japanese immigrants increased by 5,698 and Chinese by 560, compared with last year. The total amount of money brought by 613,164 steerage passengers into the United States was $16,177,513. The number of rejections, exclusive of those denied admission at the land boundaries of the United States was 8,769, nearly double these of the preceding year.

SAM PARKS' TRIAL.

On Monday last, the case of Sam Parks, the venal walking delegate, was called before Judge Newberger, in New York, the charge being extortion. Parks' lawyer, Mr. Osborne, moved for a postponement on the ground that he believed his client could not obtain a fair and impartial trial; that the case should not be called until the Court of Appeals had rendered a decision on a certificate of reasonable doubt, the issuance of which released Parks from Sing Sing, where he was confined, and that the health of the defendant is such that counsel could not properly consult with him. Mr. Osborne produced affidavits from prominent physicians to the effect that Parks is suffering from chronic tuberculosis of both lungs. Judge Newberger, however, denied the motion for a continuance, and asked Assistant District Attorney Rand on which indictment he intended to proceed. Mr. Rand named the indictment known as the "Tiffany Studio Indictment," in which Parks is accused of having extorted $500 from Louis Schmidt, president of the "Tiffany Studio Company," as the price of calling off a strike on a new building which that company was having constructed. The army of counsel which Parks has secured for his defence caused a good deal of comment in the corridors.

GEO. J. KINNAIRD,
Secretary-Treasurer,
Town of Edmonton,
Alberta, N.W.T., Canada

Mr. Black belonged to this class. He had been in the habit of paying all the household bills at the end of each month, and his wife, although allowed unlimited credit, had never had an allowance. One day the Blacks happened to be passing the comparatively new building in which the bank was situated.

"Do you know, John," remarked Mrs. Black, "I have actually never been inside the bank since it was built more than two years ago."

"You haven't!" exclaimed John. "If that's the case, I guess I'd better give you a check this month and let you pay the bills. Do you think you'd know how to cash it?"

Mrs. Black received the check. That evening Mr. Black asked, not without sarcasm, if she had succeeded in indorsing it properly.

"Oh, yes," returned Mrs. Black cheerfully.

"How many bills did you pay?"

"None—it seemed a pity to waste all that money paying bills."

"Then what in the world did you do with it?"

"Oh," returned the little woman serenely, "I just deposited it to my own account."

—The London Star tells the following story: Giving evidence of character for a man charged at North London, a witness declared that he was eccentric.

Mr. Fordham—Can you give an instance of his eccentricity?

The Witness—Well, yes, I can; during the fourteen years I have known him he has never been a minute late in getting to his work.

Mr. Fordham—And you call that being eccentric?

The Witness—Yes, certainly, it is; for a workingman.

THE NEW INSURANCE AGENT.

Have you met the new man yet? Do you remember your initial appearance in the business? How many men came to grasp your hand and wish you luck? How many others told you of their bad luck, and how many others came to warn you of such and such a one? And, of course, you remember those who came to tell you how to keep from getting "stuck," and those other fellows who volunteered to show you how to "fix" things any time you got "stuck?" Yes, we all remember those things.

Now, when you look back and think of those things, and you meet the new man, why not go to him, and, with a hearty grasp of the hand, wish him good luck in the business? Then assure him of your help at any time, and also show him how much there is in the business, if honestly worked. The business itself will present enough apparent difficulties without any others being thrown at him; so, for charity's sake, boys, push the new man along with a word of encouragement, and you will never regret your action.—Insurance Monitor.

THE VALUE OF A COMMA.

The Beatty will case, involving the omission from the instrument of a comma, which, had it been inserted, would have been worth $45,000 to John Beatty, has been decided against the latter by Judge Hord, of Columbus, Ind., says an exchange. The will is that of Joseph Beatty, who made it in ungrammatical fashion, and the construction of it has caused much trouble in the courts. The court termed it the case of a $45,000 comma, as it was merely the insertion of a comma that would make the will clear. The plaintiff asserted that this property was bequeathed to Emma Beatty during her natural life and not in fee simple, and that, at her death, the

property should go to him and Mary Brown. The court said that a comma necessary to the easy construction of the will had been omitted, that, had it been placed in the will, would have settled the intention of the instrument, and his ruling was made on the presumption that the comma was omitted or rather that the intention of the testator was that the comma should be left out.

BRITISH ARTISAN SKILL.

Of the skill of the British workman I am more than ever convinced, says an American correspondent in Engineering. As a mechanic, pure and simple, whether on bench, floor, or machine, I have not seen his superior. Most decidedly I have not seen his equal as a handicraftsman—a manual worker. Perhaps your rigid apprenticeship system is responsible for this. Anyway, your thoroughness is well known; what you make, endures. We have blowing-engines, etc., still working over here that you sent over forty or fifty years ago. You may be sure they would be replaced if such were a gain. I know that critics here pretend that the only superiority in your work, if any, is in superfluous finish. That is untrue, and they know it. Look at your boiler work; is your excellent workmanship there a matter of polish? I quite agree that you do put in a lot of unnecessary work on your locomotives, for instance; but that is not their only point of excellence, for they certainly do more pulling on less coal and repair than the American engine; and what more do you want?

Have you ever used our

Buff Linen Ledger

papers in your blank books.

We can give you the names of a large number of firms using them who will use nothing else. If you are interested write for a sample of the paper and quotations. 5

FINANCIAL REVIEW.

It is quite apparent that the business of moving the crops, at any rate, is not proceeding as actively as it was last year or even the year previous. The increase in the circulation during the month of September is an infallible indication of the activity with which the movement of the crop is being carried on. Now last year the increase during September was $5,930,000, while this year it is only $3,327,000. Even in 1901 the increase was $4,675,000, and we must go back to the year 1900 to get so small an increase as we find in the present year. The large decrease of course is in the Northwest, and although as we have before opined the total value of the crop of all kinds may for the whole year be fully equal to the amount realized last year, the trade has not commenced with the same activity. For one reason the variations in the quality of the crop are very marked, making it more difficult to conduct the actual buying and selling of the wheat satisfactorily. Then the price is considerably higher, a very satisfactory thing for the grower, but not so satisfactory for the merchant, for when the price is higher there is room for a fall. The quantity of wheat shipped out of the country by the Canadian Pacific Railway is several millions less than the figures of last year. Still the trade will go on, the crop will be moved and its results will be reached, although it may proceed more gradually through the various months of the year.

Deposits, however, still go on increasing with remarkable steadiness, the increase this month over last being no less than $7,700,000. The total deposits of the banks now amount to $439,000,000, which is an increase of no less than $30,000,000 for the year, and of $73,000,000 since September, 1901. Indeed if we go back only as far as the month of February, 1901, we shall find the astonishing increase of $100,000,000 in the bank deposits during the last two years and a half. During the same period the increase in money placed in the savings banks of various kinds amounted to $12,000,000; this is in addition to the former figures. The total deposits of the country in the chartered banks, Government savings banks, and other savings banks, amount to no less than $543,000,000. When the figure of £100,000,000 sterling for the whole country was reached some years ago, we thought it possible that any subsequent increase might be at a smaller ratio, and slow. But instead of that it has proceeded faster than ever, and is now nearly $60,000,000 above the £100,000,000. The country is evidently increasing its available wealth at a very rapid rate. This, however, is no reason why there may not be a set-back or reverse at some future time, and that perhaps at no distant date. There are signs already of reaction in the United States; reaction that is in some great lines of industry, and the profit of manufacturing enterprises, and if this reaction proceeds and develops into a course of steady depression it will almost certainly extend to Canada within a year afterwards.

To what extent depression may reach, will all depend upon monetary conditions. Indeed, all commercial depressions finally resolve themselves, so far as their intensity is concerned, into scarcity of money. Now, scarcity of money, or otherwise, is dependent very largely on the amount of production, and the saleableness of what is produced. The United States and Canada are both in the satisfactory position with regard to their chief productions that the articles produced are in universal demand. A manufacturer may produce goods which he cannot sell; but what a farmer produces is always saleable. The great crops of wheat, corn, and cotton are universally in demand. No farmer or wheat merchant need be afraid that he cannot sell at some price the staple produce he raises. The same may be said of dairy products and cattle; still more of gold. So long, therefore, as these great staple productions of Canada and the United States continue to be abundant, money cannot be scarce; unless, indeed, there is a wild outbreak of extravagance in the way of importing goods on credit, which extravagance will result in such a demand for money as will offset the advantage of abundant crops. This, however, is a very unlikely contingency.

Following out these conclusions it may be assumed as certain that money will continue to be abundant for trade purposes, at any rate, until the next harvest. And in Canada, at any rate, there is likely to be a continuance of business activity from

the large influx of a good class of settlers that is going on. Nearly all these people are of a class that have great consuming power. They will want lumber to build houses and all sorts of hardware in connection with it. They will be good customers for dry goods of all descriptions, and of groceries, too. They will be in want of boots and shoes, and, in fact, of almost everything included in the staple wholesale trades of the country, such as is consumed by our farmers generally. Whether they will be able to pay for all these things, will depend on the crops they raise. Good crops mean the power to purchase and to discharge debts; bad crops mean running into debt and difficulty of getting out again, diminution of purchasing power and stagnation of business. The eyes, therefore, of bankers, merchants, and manufacturers will need to be fixed for some time, first upon our products and the price we get for them; next, upon our imports, whether they are upon a reasonable scale or not, and third, upon the influx of desirable settlers into the country.

THE BANK STATEMENT.

We present below a condensation of the monthly statement of Canadian banks for September, 1903. It is compared with the bank statement for the previous month, and shows capital, reserve, assets and liabilities; average holding of specie and Dominion notes, etc.

Canadian Bank Statement.

LIABILITIES.

	Sept. 1903	Aug, 190
Capital authorized	$97,046,666	$97,046,66
Capital paid up	78,057,190	77,617,88
Reserve Funds	48,897,498	48.289.78
Notes in circulation	$63,741,270	$60,414,74
Dominion and Provincial Government deposits	6,886,296	6,122,116
Public deposits on demand in Canada	116,701,497	111,735,920
Public deposits at notice	275,081,027	273,770,645
Deposits outside of Canada	35,391,668	34,709,511
Bank loans or deposits from other banks secured	515,428	474,534
Due to other banks in Canada	4,553,233	4,591,695
Due to other banks in Great Britain	3,863,586	5,887,935
Due to other banks in foreign countries	1,423,813	1,386,563
Other liabilities	10,732,913	10,960,702
Total liabilities	$518,890,806	$510,054,432

ASSETS.

Specie	$14,717,111	$14,232,456
Dominion notes	30,330,480	29,289,503
Deposits to secure note circulation	3,130,844	3,130,844
Notes and cheques on other banks	18,069,250	16,993,887
Loans to other banks, secured	515,428	474,534
Deposits with other banks in Canada	5,727,632	5,321,131
Due from banks in Great Britain	5,936,832	3,818,961
Due from other banks in foreign countries	18,240,336	16,414,017
Dominion or provincial Govt. debentures or stock	11,142,682	11,498,222
Other securities	52,562,189	51,914,053
Call loans on bonds and stocks in Canada	41,650,056	41,424,670
Call loans elsewhere	36,538,040	38,942,855
	$238,560,880	$233,455,133
Current Loans in Canada	373,633,072	368,641,999
Current Loans elsewhere	24,118,210	22 450,523
Loans to Dominion and Provincial Governments	1,471,990	1,265,950
Overdue debts	2,042,238	2,163,506
Real estate	787,154	836,722
Mortgages on real estate sold	717,954	725,372
Bank premises	8,625,443	8,438,438
Other assets	6,747,406	8,663,097
Total assets	$656,704,532	$646,640,915
Average amount of specie held during the month	14,449,361	14,106,127
Average Dominion notes held during the month	29,264,103	29,016,004
Greatest amount notes in circulation during month	65,089,739	61,600,333
Loans to directors or their firms	11,578,494	10,960,294

The present is a good time to compare some prominent features of the present Bank Statement with those of a year ago, as well as with that of the previous month. It is observable, for example, that current loans are enormously increased, while call loans are greatly lessened. We compare September, 1903, with September, 1902:

LIABILITIES.

	Sept., 1903.	Sept., 1902.
Paid capital	$78,057,190	$71,084,350
Reserve	48,897,498	41,130,286
Circulation	63,741,270	60,965,801
Deposits	444,416,548	403,384,270
Other liabilities	10,732,913	12,453,860
Total liabilities	$518,890,806	$488,112,270

PRINCIPAL ASSETS.

Specie of Dom. notes	$45,047,591	$35,647,717
Due from bank agencies	24,177,168	21,648,739
Securities held	63,706,871	59,963,990
Call loans	78,188,096	101,993,914
Current loans	397,751,282	339,390,266
Other assets	47,833,524	52,283,198
Total assets	$656,704,532	$610,927,824

An increase of $14,740,000 is shown in shareholders' paid capital and reserve funds during the twelve months, and of no less than $41,000,000 in total deposits, the whole obligations of the banks, to their shareholders and the public are thirty millions greater than they were a year ago, but in that period their assets have increased by forty-six millions. It is true that the increase in current loans (from $339,000,000 to $397,000,000), is much greater in proportion than that of other assets. But this is a concomitant of a remarkable growth in business of all kinds, manufacturing, merchandising and transportation; and that there is no reason to suppose this business expansion is unhealthy is indicated by the small amount of over-due debts, real estate or mortgages among the assets. Call loans on bonds and stocks are very much reduced, being twenty-four millions less than they were a year ago.

ABSTRACT OF BANK RETURNS.

Description.	Sept. 30th, 1902	Sept. 30th, 1903.	In Month 1903.
Capital paid up	$71,084,000	$78,057,000	In. $ 440,000
Circulation	60,965,000	63,741,000	" 3,327,000
Deposits	409,162,000	439,127,000	" 7,726,000
Loans, Discounts and Investments	458,404,000	465,482,000	" 7,078,000
Cash, Foreign Balances, Net & Call Loans	180,273,000	169,051,000	" 7,761,000
Legals	23,145,000	30 330,000	" 1,041,000
Specie	12,501,000	14,717,000	" 485,0 00
Call Loans	101,992,000	78,188,000	Dec. 2,178,000
Investments	59,963,000	63,703,000	In. 292,000

Government Savings Banks,	$ 62,082,000	
Montreal City and District Savings Bank	15,048,000	
La Caisse d'Economie, Quebec	7,043,000	
Loan Companies	20,000,000	
		104,173,000
Bank Deposits		439,127,000
		$ 543,300,000

GOVERNMENT CIRCULATION.

Large	$ 27,666,000
Small	$ 12,969,000
	$ 40,635,000

Gold held, $27,834,000 or 68 per cent.

MR. CHAMBERLAIN'S CAMPAIGN.

It really seems as if Mr. Chamberlain, unable to get opposition politicians to admit that fiscal affairs the world over have undergone any change in the last fifty years, is yet making an impression upon the mind of the British working man. At Liverpool on Wednesday, he was listened to by many thousands, who were evidently moved by the way he dealt with statistics of food prices. He declared, in combating the statements of Lord Goschen, that the extra prices to the consumer bore no real proportion to the amount of the taxes. "Figures are only the illustrations of an argument, and I have been looking at the figures and have come to a totally different conclusion. I appeal to the past, beyond Sir Michael Hicks-Beach, Sir William Vernon Harcourt and Mr. Ritchie, to a Chancellor of the Exchequer who was greater than all, namely, Gladstone, who said: 'If you want to do the working classes the maximum amount of good you should operate upon the articles which give them the maximum employment.'" At the second meeting before the Conservative Workingmen's Association Mr. Chamberlain asked of what use is it that a weaver of Halifax should nominally receive a high rate of wages, when there is actually no work for three days in the week; what use is it that a Lancashire operative should be credited on paper with higher wages than fell to the lot of the German or French millhand when long periods of short time occur, and raw materials are rendered unprocurable by the market manipulations of American speculators? Free trade is responsible for the failure of the raw cotton supply. Had Britain learnt wisdom from the events of the famine of forty years ago she would have taken steps for the encouragement of the cotton industry in India or the West Indies. There has been too much trusting to luck with the British Empire and its industries.

He reminded the audience that an experiment in protection can do no great harm. Other States have proved that protection does not mean disaster. British exports, not German or American, have declined under foreign protection, and protected industry can undersell free trade, or how else can we explain that American manufactured exports to Britain rose between 1890 and 1902 from £10,200,000 to £21,000,000, while British manufactured exports to the United States fell from £29,000,000 to £19,467,000? The time must come when the cycle of bad trade and the things he dreaded will be concentrated upon them. With the influence of the working classes he hoped to seize the first opportunity to alter the system under which this was possible. The doctrine that a tax for revenue was justifiable, but must be condemned if it benefited the whole country and advanced Imperial ideals was preposterous.

INDUSTRIAL PROBLEMS.

A letter from one of our travelling representatives, which we print to-day, contains a striking report upon the extraordinary condition of activity which he found to prevail in a score of industrial establishments in half a dozen Ontario cities or towns. There is not a single exception to the uniform condition; every one was working all hands full time, some working over-time. The experience of the editor of this journal, lately home from a trip to the Pacific Coast, tells of a condition of general business activity, the result of a good harvest. Our Montreal correspondent says: "Business is very active here this month. Foundries, factories, mills, wholesale warehouses, forwarders, all seem to have the same story to tell, of unusual activity in demand for merchandise of every sort." As to Toronto, and the great recent additions to the number of its industries, a curious circumstance will illustrate their activity. When the stoppage of the Sault Ste. Marie works came, a Toronto manufacturer, hearing of the many men thrown out of employment by that step, and desiring to secure for his factory, fifty Scandinavians, he directed one of his men to go up to the Sault for that purpose. The man cautiously suggested that, as most of the hands wanted were married men, it would be a wise thing to find out if they could be accommodated in Toronto. Messengers were accordingly sent out, and it was found impossible to get house-room *for ten families*, to say nothing of fifty, within a mile radius from the factory. The fifty men were accordingly not sent for. There is a suggestion here for our capitalists and builders. Building is exceedingly active in this city at present, new dwellings are going up and other new buildings are rising in all directions. But this is only half of what might have been going on at this moment but for the folly of the strike in the building trades. Real estate men and contractors have given us instance after instance where strikes of men, breaches of faith consequent upon them, and scarcity of building materials have caused the abandonment or postponement of many structures that might ere now have arisen.

In all estimates for the future, in the outlook for financial and industrial conditions, the threatening feature of the uncertainty of labor must be considered. Busy as we are, prosperous as many of our factories may be, we have only to look around us on this continent to see how menacing is the environment of many employers. Here are a few facts: The Chicago labor troubles led the Allis-Chalmers Company to move their purchasing and traffic departments to their new works at West Allis, near Milwaukee. W. J. Chalmers declares as follows: "We are compelled to make the change on account of labor trouble here in Chicago. It is impossible for us to secure protection, and there is no other alternative but to go

elsewhere. During the recent strike, which lasted for thirteen months, and cost us $350,000, we were unable to get police protection, and consequently we lost heavily."

The Pennsylvania Railroad dismissed last week between 6,000 and 7,000 of its men, in response to their demand for shorter hours, which demand the company considered unreasonable. Such a step ought to admonish the labor unions that they cannot afford to make ill-judged demands.

On Saturday last, at Indianapolis, Mr. Parry, of the National Manufacturers' Association insisted, in a pamphlet then issued in reply to the Central Labor Union of that place, that while men have a right to quit their employment when they see fit, they have no right to interfere with their former employer or with the men he hires to take their places.

This is now an established principle of law, being steadily reduced to practice. And the declaration that labor unions can be proceeded against for damages must cause a halt in their arrogant proceedings. The short-sighted walking delegate or labor union leader, who usually terrorizes the laborer or mechanic, still thinks he can compel the employer to accede to union terms. But he forgets that, as in the case cited above, the manufacturer can leave a place where he is unable to get just treatment, and can remove his works to another place. True, it will cost him a lot of money to do it, but there are, in this free country as well as in the United States and elsewhere, people who will not be brow-beaten or deprived of their rights by any sort of combinations. There has already been too much concession to labor union demands.

We would urge our employers of labor, as already suggested above, to take every reasonable heed of the labor situation, of which unrest has been so long a characteristic. And further, the less experienced among our manufacturers may be the better of a reminder that, busy as they are, and rosy as things appear to them from the present activity of demand, it is well not to be caught with too much sail spread if a squall should come. Everything is not quite blissful in the United States at present, either industrially or financially; and we cannot afford to forget that a panic or an industrial reaction over there would affect Canada.

LIFE ASSURANCE.

In selecting speakers before the International Congress of Actuaries, the managers showed good judgment in the choice of Mr. Cortelyou, secretary of the United States Department of Commerce and Labor. This gentleman well deserves the distinction he has attained. He has been through nearly all the grades of commercial education in that great country; he has served his employers well, from a humble office to the high and important office of President's secretary; and he has shown his ability and willingness to learn from his surroundings, in whatever position he held for the time. No greater instance of deserved promotion can be pointed to of late years than his.

In addressing that important body of actuaries, Mr. Cortelyou showed an admirable appreciation of the real status of an actuary, and an understanding of the real signincance of life assurance. Said he, to these gentlemen: "You stand for things that make stability. You are the architects of firm foundations upon which rise institutions whose helpfulness is far-reaching and incalculable. Your study is life, and the extent of your influence is only equaled by its beneficence." To encourage thrift, to develop habits of foresight and economy, to recognize the obligations resting on parents and others to provide for dependent ones—these are motives which it is the part of life insurance men to awaken and stimulate. And in so doing the members of that profession may dignify themselves and their office.

He paid a tribute to the high aims and the weighty responsibilities of actuaries, and the plane of impartiality on which they stand, in saying that "You recognize in the broadest sphere of your calculations. gentlemen, "neither race, nor class, nor creed; you encourage thrift; you are the friend of the toiler as well as of those in high places of power and affluence; you carry light and cheer and comfort and hope into the earth's dark places." Those who exemplify life assurance and explain it to the average man should never lose sight of the honorable nature of the business, the necessity for keeping it clean. No narrow or petty personal advantage should ever induce a life assurance canvasser or manager to forget that he is a representative of a righteous and beneficent plan, that he is safeguarding great interests, and that a stain upon his honor is a blemish upon the whole profession of which he is a member.

THE ROOT OF THE TROUBLE.

It is by no means improbable that an explanation will be forthcoming as to Lord Alverstone's apparent sacrifice of Canada's rights in the Alaska boundary question sufficiently plausible to make anything but its open acceptance an insult to all those ideas of the stainlessness of British justice and the impartiality of the British judiciary which Canada has always shared with the rest of the Empire. The longer-sighted among Canadians, too, will be found not lacking in sympathy with the idea that it is essential sometimes to sacrifice the immediate interests of one portion of the Empire for the good of the whole.

But a perception of these facts, while no doubt it will do much to raise a body of conservative opinion in opposition to the loud-mouthed expressions of the more rabid part of our population, should not blind us to the significant truth that, underlying all the froth and excitement produced by the disappointing award, there is a deep-seated conviction in this country that Great Britain's diplomacy becomes weak-kneed, when it has to deal with the United States. The reasons from which this popular fancy has been evolved may be explained away, but the conviction remains as strong as ever, the result, perhaps, not so much of reasoning as intuition. That it is something deeper-seated than the mere ebullience of a youthful nation contemptuous of a mother country's age is proved by the fact that it is held largely by the most

imperialistic amongst us, by British born residents in Canada, by descendants of the staunchest U. E. Loyalists. It may be shown hereafter that Lord Alverstone acted from a strictly judicial standpoint; it may even be realized that the Canadian commissioners were no less biassed than the American; the fact remains that the great majority of Canadians firmly believe that the claims and preferences of the United States rank higher in the parent-nation's eyes than their own. And Canadians, who live next door to him, believe they understand Uncle Sam much better than John Bull can possibly do!

Now, Canada's lack of confidence in the perspicacity of Great Britain may be rightly or wrongly based; but it cannot fail, unless remedied, to work disastrously in the future relations between the two countries. Therefore, let us implore the motherland to learn to know us better, and at closer range, to understand our feelings and aspirations, to mix with us more in our play and in our work. Then will be the day when the average Briton's knowledge of the colonies shall have become no longer a word for laughter or contempt.

NEW FORESTATION POLICY.

It is pleasing to know that the Ontario Government has learned the lesson of nature taught through other countries' folly in the matter of wastefulness of their timber resources. One of the most prodigal causes of the destruction of standing timber, which, in some years grows to alarming proportions, is the carelessness of new settlers in clearing their lands by burning or in making camp fires, as often-times the little blaze which they allow to creep out unnoticed grows until millions of feet of valuable wood have been ruined, sometimes indeed reduced to ashes. To make matters worse, these settlers have been allowed in the past to locate on lands either partially or wholly unadapted to farming operations, so that the timber interests have suffered not even in a good cause. For some time past, it has been growing more evident that the only way to limit this destruction was to prohibit the opening up of certain districts by farmers altogether. The Temagami region is one which was thus reserved for forest purposes two years ago, and this is a course which will be adopted by the Government in a larger measure in the future.

Not only this, but in many cases a scientific system of reforestation is to be put into force. It has been found that especially in Northern Ontario large tracts of wooded land exist, which are naturally so rocky and thin-soiled that they depend upon a forest covering to obviate becoming practically desert, for as soon as the surface of the ground becomes exposed to summer heats and wintry gales, its protecting litter of dead leaves and shallow layer of rotting vegetation become scattered to the four winds, making the attempt to grow anything, even new trees thereon, almost useless. The idea, therefore, is to cut the timber, mature at a certain age, so as to allow a perpetual new growth to take its place. Lumbermen have been accustomed in their own interests to clear away the lumber as completely as possible; but this is suicidal so far as the future well-being of the country is concerned; and it does not require much thinking to come to the conclusion that the best interests of the lumbermen themselves are conserved by the new methods. These may be said to be experimental only so far as this country is concerned; Germany and some other European countries have been obliged to call in the aid of science for forestry purposes; and the United States already regrets it did not do the same long ago.

THE FARMER-STOREKEEPER.

We have asked the question more than once, how is the large proportion of Canadian farmers who try storekeeping to be accounted for? And we are as yet without a satisfying answer. Another thing that adds to one's wonder is that a very considerable number of those who wish to be merchants are farmers in the province of Quebec. How are we to account for this when we have been told, for a hundred years, how conservative is the French Canadian habitant—the meaning of habitant is a small rural proprietor or farmer—how happy in his surroundings, how little desiring change! It used to be said that the Montreal and Quebec commercial travellers of a generation ago coaxed many a habitant to become a shop-keeper, flattering him with the ease of the occupation, with visions of wealth thereby to be gained, and flattering his wife that she might become the Lady Bountiful of the parish. Rarely was the vision fulfilled. Rarely did the simple-minded farmer become a successful merchant. He lacked knowledge of merchandise, knowledge of accounts, knowledge of human nature. Most often he made an ignominious failure, and was saddled with debt for many a day.

Here are some specimens of the farmer storekeeper:

Having formerly been peddlers among the farmers of that section, Price Bros. opened a regular store business at Iberville, east of Montreal, in the spring of 1902. They have been sued on several recent occasions, and made an offer to their creditors last week of 25 cents on the dollar, which they have since amended to 35 cents.

L. Lacombe, formerly a farmer, and who began storekeeping at St. Victor de Tring, a little more than a year ago, has arranged to pay his creditors 50 per cent. of their claims. It is to be hoped he will quit storekeeping.

A. Chouinard, a farmer and fisherman at L'Anse au Gresfonds, on the Gaspe Coast, who has also been doing a limited store business for several years, is unable to pay in full, and proposes a compromise.

The assignment is noted of Joseph Pigeon, general retail dealer, at Beloeil, Que. This is another case of the farmer storekeeper with the usual results. In 1899 he engaged in business as one of the firm of Archambault & Pigeon, who became embarrassed and compromised at 90 cents in January, 1901. In March following the firm dissolved, Pigeon continuing alone, but he has done no better. About ten days ago a seizure was put in on a past due claim, and he has now put his affairs in the hands of an assignee.

—It is announced by the Royal Bank of Canada that Mr. C. E. Neill, supervisor of the British Columbia branches of the bank, and manager at Vancouver, has been promoted to the chief inspectorship, with headquarters at Montreal. He is to be succeeded at Vancouver by Mr. C. A. Crosbie, the bank's secretary, of the head office, Halifax.

CANADIAN MANUFACTURERS' EXCURSION.

Describing to a wholesale man on my return to Ontario the improvement of Winnipeg and the somewnat grandiloquent views of Manitoba men, as to the future of our Northwest, the wholesale man replied: "Oh, yes; that is the way they nearly always talk. Those Western fellows are bright and hopeful, but they want the earth and all the fullness thereof." He had not, I think, ever seen Winnipeg. Probably I had better here transcribe some brief notes made on our outward journey, which speak for themselves as to the progress of the province: "Said a Winnipeg branch bank manager to me: "When I came to take charge of this office three years ago, there were thirteen clerks. To-day I have thirty, and have to work at night. The building we are in is being enlarged.'" Another illustration, noted the same day, is the following: A member of the excursion, a stove manufacturer near Toronto, told me of going, on 22nd Sept., to call on his Winnipeg traveller, who had secured storage space in a building behind the market. He found not only the stock exhausted, but orders 450 stoves behind! The wires to Toronto were "hot with hurrying words" that night.

A prominent and long-established merchant, Mr. J. H. Ashdown, was so good as to show a party of us through his wholesale premises. This warehouse measures 130 by 135 feet, four stories in height, and has been doubled in size this year. The view of the city of Winnipeg from the top of the building was impressive. The great size and great variety of stock carried here surprised us at first, but the explanation is not difficult. The distance of Eastern markets and the length of the winters compel merchants to keep heavy stocks on the spot. Mr. Ashdown, who is not a man to waste many words, told us some pregnant things about the comparative value of goods which our manufacturers would do well to remember. Referring to one piece of machinery in his warehouse, he said: "This one is of American make; we have used it six or seven years without a fault. That other is Canadian, put in this year when our addition was built. It sticks every now and then, and we have to get an expert. We try," he added, "to buy everything in Canada that we can buy to advantage, but the American maker beats the Canadian in not a few directions."

Another interesting warehouse we visited on the same street, was that of the Cockshutt Plow Company. These were admirable new brick premises of slow-burning construction. For light, and air, and convenient interior arrangement, they are hard to surpass. The company sell, besides their own goods, Canadian and American field and other implements. The great extent of their business and its rapid growth will be gathered when we say that after ten years' business in Winnipeg, their turnover, which at first was $30,000, amounted to $500,000 last year. Wonder being expressed at the amount of building going on in the city, a Winnipegger responded: "Building in Winnipeg to-day is only limited by men and material—both of which are hard to get."

At Strathcona (formerly South Edmonton), in 1902 farmers were paid for No. 1 and No. 2 wheat 55 to 62 cents. This year they are talking of paying 60 cents for wheat; it is not likely there will be any No. 1 to speak of, because of the wet weather and a touch of frost. Oats are worth 25 cents (this was on 26th September). In the year 1901 there was a million bushels of oats shipped from this point and from Wetaskiwin; they brought 32 cents per bushel at Strathcona, and were sent all the way to South Africa from Vancouver round the Horn.

Many of the travellers asked the meaning of the two or more parallel furrows ploughed along each side of the railway track on the prairies at a distance of twenty to forty feet, and were told that it is a "fire-break." It was explained that in case of a prairie fire sweeping from north or south, which might burn the sleepers and telegraph poles, this strip of ploughed land, a break in the area of prairie grass, might stop the sweep of the fire.

Statements by Mayor Hall, and Mr. Nation, president of the Board of Trade, at Brandon: "This was the first point to ship 1,000,000 bushels of Western Canada grain." . . . "Nearly 75 per cent. of the produce of Manitoba is produced within a radius of sixty miles from Brandon." Mr. Nation "hoped to see the industries of the country fostered and cared for." At this point the extension of the station terminals of the C.P.R., at a cost of some $300,000, is a marked and suggestive feature. Such shops as Nation and Shewan's, at Brandon, are extensive and admirably kept.

I think I have already mentioned the quantity of literature with which the excursion party was favored describing the claims of this, that, and the other town or locality to public notice, every one believing that its district is the especial favorite of Heaven. Some of the pamphlets were of exceeding interest. It would be impossible to quote one-tenth of those showered upon us, but I will take one as a specimen. Red Deer, Alberta, which is on the Calgary and Edmonton railway. It is thus described:

> "The town of Red Deer is beautifully situated on the Red Deer River, half way between Calgary and Edmonton. Possessing as it does every natural advantage, it is bound to become an important centre. It is now the commercial, judicial, railway and manufacturing centre between Northern and Southern Alberta. As a location for manufacturing industries, it affords superior advantages to any town in the Territories, having splendid water power, abundance of cheap fuel, and direct communication with British Columbia mining country. . . There is a good opening for several leading industries at the present time. Plans are drawn for a large courthouse, also a town hall. The streets are wide, the buildings creditable, and altogether an air of prosperity pervades the place. Many who are familiar with the West believe that we have here the beginning of one of the greatest centres of trade and commerce on the eastern slopes of the Rockies."

Other localities are described whose advantages we may take opportunity later to present briefly. They are many and lie far apart. "What a tremendous distance we have already travelled," said a man in Car No. 3, as he looked at the wall map of the C.P.R. and saw the tremendous stretch of territory from the shores of Lake Ontario to Red Deer, Alta., where we then were.

THINGS GREAT AND SMALL TO BE NOTED EN ROUTE.

The contrast a New Canada town or village makes with one of Older Canada consists in part in the newer styles and more substantial materials of the dwellings. The people out West want the newest and the best of everything—and they get it.

Note a distinction between "prairies" and "plains," which Mr. C. N. Bell drew for us, and illustrated as we left Assiniboia and got into Alberta. The prairie is practically a dead level, nearly treeless, with such depressions as buffalo-wallows and small reedy lakes. But the plains are diversified with rolling land, belts of timber, occasional rocky-looking gulches.

"Butte" means a low hill.

"Prairie" means burnt-over land.

A "belt" of timber is a different thing from clumps of timber.

Douglas fir is the same as Oregon pine.

The plentiful supply of elevators at every prairie town was manifest. In this respect, the contrast with a dozen years ago is very great.

A farmer in the Far West says: "I have seen the sort of implements the Dakota and Iowa farmer uses, and I want them. But they are made in the States; and because I prefer them to Canadian ones I am taxed 30 per cent. which is intended to force me to buy your Eastern Canadian goods. I would buy Canadian goods if they suited me as well."

As a good illustration of direct business over a great distance, there was lying on the railway station, at Souris, piles of grain-bags, the name stencilled on which was McDonald & Robb, millers, Valleyfield, Que. These people send every year scores of bales of such bags for No. 1 hard grain of this district.

"Friday night, October 9th, at Crystal City to meet Hon. Thomas Greenway, who had driven miles to see us.

It was dark and chill, and there was only time for a shake of the hand instead of the drive about his model farm, as we had hoped."

WHEAT IN WINNIPEG.

Wheat is abnormally high-priced in Winnipeg this year, higher than is warranted by the conditions, says the "Commercial" of that city. On that market it is quoted 1 to 3c. higher than in other centres, and (referring to the end of last week), ranged between 77 and 78c., whereas bids received from Liverpool and Glasgow for No. 2 Northern would be equal to about 75c. Bids from Ontario millers, too, have been generally half a cent or more below the net cost of Manitoba wheat, delivered at Fort William. In spite of the high price, however, Western farmers seem disposed to hold out for higher prices. They have been helped in their attitude by the recent purchase of large blocks of high grade wheat by the big milling companies, who feared there might be a shortage of such. They have shown little demand for the lower qualities, and this no doubt has accentuated the differences in values between the grades, and has helped to keep the market above an export basis.

THE APPLE CROP.

Shipments of apples from Canada to Great Britain this year have been extraordinarily large, but prices for good qualities continue to be very fair. For the week ending Oct. 24th, the number of barrels which left the port of Montreal was 59,354, of which 24,265 went to Liverpool. All the others went to British or Scotch ports except a few to Antwerp. Most of these came from Ontario, where the crop, while not so large as that of last year, is astonishingly good for an "off" year. The Nova Scotia crop, fit for export, is estimated at 500,000 barrels, of which about 155,000 have already gone, and it is calculated that the amount of cash which orchardists, mainly in the counties of King's and Annapolis, will receive, is not far short of a million and a half dollars. A study of the estimates for the apple crop in various parts of the United States, as prepared by the International Apple Shippers' Association, leads one to the conclusion that while the aggregate is not so good, in comparison, as that of this year's Canadian crop, yet it is not by any means a small one, being probably about 46,600,000 barrels, only a million short of last year. In some states the crop is described as poor, as in Indiana, Illinois, Missouri, and Kansas, while in others it is good, as in Maine, New Jersey, Pennsylvania, Maryland, and in the far Western States.

ONTARIO MANUFACTURING TOWNS.

Your correspondent last week took a trip to several of the manufacturing towns near by Toronto, and was pleased as well as surprised to discover signs all along the line of unusual activity. Busy workshops were the rule. In fact, I do not remember an exception.

The first place touched was Guelph, where close by the station is the Bell Organ and Piano Co., Limited; found this extensive place busy in the extreme. Although during the past year much additional factory room has been provided, still the factory is taxed to its utmost. The instruments of the Bell Company are shipped to all parts of the world, and the prospects for a continuance of present good conditions were considered bright indeed. The J. B. Armstrong Mfg. Co., which is directly across the street, I found in much the same position, so far as work was concerned. This concern, it may be remembered, made a most creditable showing at the recent Exhibition, their carriages eliciting much admiration. At present they are busy filling orders for cutters, etc., for the coming winter.

Preston, famous among other things for its mineral waters, was the next stopping place. This town, though much smaller than the city I had just left, presented as much business activity to the square inch as the Royal City; there was not one of its various factories that was not busy. Frank Moss, of the Preston Furniture Co., reported a steady demand for roll-top desks, as made in Preston. This factory makes nothing but roll-top desks, turning them out at the rate of about twelve per day. A special feature with this firm is its export trade which is considerable. The Metal Shingle and Siding Co., of which Mr. C. Dolph is manager, was in much the same box as the others. He expressed himself as at his wits' end to know how to keep up with the orders. Clare Bros., the stove manufacturers, I found exceptionally busy. From all reports this seems to have been a banner year for most of the stove men, and judging by the bustle which characterized this plant, Preston-made stoves are going to give cheer to many homes throughout our Dominion during the coming winter months. Some time ago, The Canadian Office and School Furniture Co., of Preston, tried to dispose of their old factory building, their intention being to erect an entirely new place at some point more valuable so far as transportation facilities were concerned. However, they were unable to find a purchaser, and decided to stay where they were, but to add a new part to the plant. This was begun, and when this addition is completed they will have just double the capacity they now possess. While here, your representative ran across a new firm, which is quietly engaged in the manufacture of mechanical piano-players. The name of this firm is Werlich Bros. & Co. Two of the brothers have had several years of practical experience in the building of piano-players. Although it is only a few months ago since they opened up, there is at present one of their instruments on the ocean, bound for South Africa, having been shipped the day before I called.

To the solid town of Galt I was only able to say, "How do you do," being there but an hour or two. It was possible, however, in that time to detect the same general air of active prosperity about its people, observed in Guelph and Preston. I found the extensive Goldie & McCulloch plant taxed to an unusual degree, the four hundred or more employees finding it hard to keep pace with the orders for their great variety of output. In several departments overtime was being worked. The firm reports an unusual demand for bank safes, due in some measure at least to the large number of branch banks being opened in various parts of the country.

At London most of the factories were busy. An exceedingly interesting shop to visit is that of the Dennis Wire and Iron Co., Limited. This firm makes ornamental iron work, which finds its way into all parts of Canada. There seems to be no limit to the variety of work done here in that direction. As Mr. Dennis put it, when asked what his specialty was: "Everything the other fellow can't make." At present the company are making two very fine pieces of work, one for the Bank of Toronto branch at London, the other for the new Bank of Hamilton building at the corner of Queen St. and Spadina Ave., in Toronto. This firm, like most of those I had visited, experienced great difficulty in securing skilled labor; the dearth of such help, coupled with numerous orders, produced not unnaturally a disturbing condition in the matter of delivery and the keeping of a firm's promises. The Electrical Construction Co. of Canada was very busy, too. When asked as to their experience in securing desirable workmen, they replied they had little or no trouble. Desiring to know why this should be so in view of the difficulty other firms had, it was explained that most men nowadays are anxious to get an insight into electrical work especially the construction of dynamos and motors, which work is an important feature with this company. For this reason men were always more or less willing to come to them.

Stopping off at Woodstock for an hour or more, I made a call at the Karn Organ and Piano works. Here again I was confronted by an unusually prosperous condition of affairs. This immense factory is running overtime in many of the departments. While there, I had the pleasure of seeing an organ of imposing size which is being built for the Metropolitan Methodist Church, Toronto. One cannot realize how much work there is upon an in-

strument of such proportions, until it can be seen on the inside. Another large instrument in process by this firm and just about ready for delivery is that for St. Paul's church, Toronto. Having made a visit to their works, Mr. Watson, of the Woodstock Wind-Motor Co., informed me that the demand for their windmills during the past year had been unprecedented. He was quite optimistic as to the future; in fact the same remark can be justly applied to almost all of the manufacturers I called upon during my journeyings.

I next made Brantford. This is truly a busy place. It was Saturday morning and the market-place was at its busiest. I have been in market-places in some of the older cities across the ocean, but for genuine quaintness and animation, Brantford market-place would be hard to beat. Here I called at a few of the factories. The Waterous Engine Co.'s works were, as usual, throbbing with action, and evidently were feeling the effects of the good times. The demand for their field engines and fire engines seems endless. Gould, Shapley & Muir were turning out windmills, gas engines and their other commodities just as fast as their 260 hands were able. This concern is running all night in some of its departments, and even then is away behind in filling orders. I do not see how it would be possible for them to use any more men even if they could get them. Every shop seemed so full of men. Too often it is a case where we cannot see men for machines—here one could hardly see machines for men.

As I went about on my almost flying visits, it was a real pleasure to find on every hand the unmistakeable evidences of good times and the almost unanimous optimism of proprietors and men alike.

J. J. S.

CANADIAN LIFE INSURANCE OFFICERS' ASSOCIATION.

At the October meeting of the Association, which was held in the rooms of the Toronto Insurance Institute, Toronto, the following members were present: Messrs. D. Dexter, Federal, president, in the chair; J. F. Junkin, Manufacturers; J. K. Macdonald, Confederation; F. Sanderson, Canada; F. Sparling, National; G. B. Wood, Continental; B. Hal. Brown, London & Lancashire; John Milne, Northern; E. Marshall, Excelsior; R. Junkin, Manufacturers; T. Bradshaw, Imperial; D. Burke, Royal Victoria.

The advisability of the Association encouraging the formation of a Life Insurance Agents' Association in Canada was discussed and action left over until the next meeting in November. The subject of competitive literature was considered, with the object of an agreement being arrived at between the companies which are members of the Association, to refrain from publishing, circulating, or in any way treating with literature of a competitive character. The subject is being further considered by the Executive.

The Executive Committee pointed out the undesirable features contained in the recent Act passed by the Legislature of Nova Scotia entitled, "An Act respecting Life and Accident Insurance." The Act contains a provision to the effect that the age of the assured shall in all cases be determined within three years from the time the policy of assurance is effected, otherwise the age mentioned in such policy shall be conclusive proof of such age. An effort will be made to bring about a modification of this provision at the next meeting of the Legislature of the province of Nova Scotia.

The annual meeting of the Association will take place on the 19th November, and is altogether likely to be a very important gathering.

ANGLO-AMERICAN "FRIENDSHIP."

To the Editor, Monetary Times,—

Sir,—Truth certainly has her abiding-place at the bottom of a very deep well, so far as the governmental Briton's idea of American character is concerned; he has a long way to go in order to arrive at a true understanding thereof. The simile of a deep well is applicable also to another phase of the subject; the pit into which he seems desirous of casting sacrifice after sacrifice in order to gain that problematic reward of American friendship is a bottomless one. Or, to use still another simile, that mythical friendship is likely only to prove a sort of Frankenstein, growing with each gift more ravenous of greater, until at length it shall devour its creator. We speak this way of the recently published award of the Alaska Boundary Commission, because there seems to be only one way of looking at it, and that is in the light of a desire on the part of Great Britain to stand well with the United States at any cost. Alas, the folly of it! But even if the result of the conference be satisfactorily explained by Lord Alverstone, we think these few remarks will apply. While recognizing its idleness, one cannot restrain the wish for something to teach British legislators the truth about American friendship. Not protestations of friendship, for the Americans are not hypocrites; and they have made no particular claims to friendship for Britain or for Canada. But the trouble is that the Briton has not only become possessed of the idea that American friendship is a thing worth having, which is true; but that it is something which can be gained by a series of graceful yieldings on his own side, than which no greater error could be made. The American is a man who, in his national dealings, looks after his own interests first, last, and all the time; a cession from his opponent he looks upon as a suggestion for a bigger claim next time; when repeated, he regards it not as a "guarantee of good faith," but as a mark of truckling for which he has nothing but contempt. The last thing that John Bull wants, no doubt, is a reputation for toadying for American favor, but it is a bare statement of facts to say that that is precisely the reputation he is gaining all over this continent..

Benjamin Franklin had a good deal to say about paying too much for one's whistle. Putting this matter on the lowest of political grounds, it is not too much to say that the day may come when the good feeling, the unshaken loyalty of Canada, comparatively weak though she is now, will be worth a hundred times more to the Mother Country than all the unwillingly bought "friendship" of the United States. We do not blame the Americans; but it is Canadian interests that are being turned into a shuttlecock.

October 27th, 1903. W. P. F.

COMMERCIAL BANK OF MANITOBA.

The Commercial Bank of Manitoba was established in 1885, and had several branches. It was in existence in Winnipeg for about nine years, and closed its doors in July, 1893. Since then its liquidation has been going on. Mr. Hunter Cooper, who has just returned from the Old Country, tells the Winnipeg Free Press that he is on the point of closing up the bank's affairs. The outcome of the winding-up is that every creditor of the bank has been paid in full. Mr. Cooper doubts whether if the assets had been forced and the bank wound up in the ordinary way, the creditors would have been paid the full amount of their claims." As it is, they have received every dollar due them with interest, and the shareholders have, up to the present time, received $36 a share on account of their stock. In addition to this, I hope to pay a final dividend of from $7 to $9 a share." The bank had been holding a lot of lands under doubtful title, but by taking time and trouble many thousands of dollars were realized from those lands.

CONSUMERS' GAS COMPANY.

The annual meeting of the Consumers' Gas Company was held in Toronto on Monday last. The chief feature of the situation, so far as this city is concerned, is the large increase of consumption of gas. The output of gas during the year ending September 30th was 1,126,527,000 cubic feet, or 199,778,000 more than that of the previous year, an increase of over 21 per cent. The net receipts for the year were $332,669.16. Of this amount $176,630.07 was paid in

dividends, $16,223.80 in interest, and $139,815.29 placed to profit and loss account. The net profits for the year were $139,815, or about $14,000 less than last year, which is due to the reduction in the price of gas, and the increase in the cost of coal. It is stated by the officers of the company that with a 10 per cent. increase during each of the next two years, the capacity of the present works will be reached. During the twelve months ended with September, 2,599 new services were put in and nine and one half miles of new mains laid, making a total of over 277 miles. The following gentlemen were elected directors: Messrs. A. W. Austin, J. L. Blaikie, Henry Cawthra, G. R. R. Cockburn, George Gooderham, James Henderson, Thomas Long, E. B. Osler, Andrew Smith, L. W. Smith, A. J. Somerville and Thomas R. Wood. At a meeting of the board of directors held subsequently, Dr. L. W. Smith and Mr. G. R. R. Cockburn were unanimously re-elected president and vice-president, respectively.

TRADE OPPORTUNITIES.

Canadian Offices, London, 16th October.—A wholesale provision merchant in the North of England makes enquiry respecting regular supplies of split peas from Canada. A Canadian maker of washing machines would like to correspond with English importers of them.

INSURANCE MATTERS.

The big aerial truck at Lombard street fire station, Toronto, has been sent to Walkerville to be fitted with a quick-hoisting device, by which the 85-foot ladder can be raised by one man instead of requiring ten or a dozen. The Waterous engine at Bay street station has lately been returned from Brantford, where it underwent extensive repairs.

The various companies transacting fire business in London, in 1901, covered risks for £975,014,285. Now municipal mutual insurance is started, and fifteen London authorities propose to take it in hand. We note that not more than £5,000 will be retained on any one risk; it is stated that arrangements have been made for the rest to be underwritten, so the municipal authorities will have to fall back on either the fire offices or Lloyd's somehow. The School Board of London prudently declines to carry any special hazards—such, for instance, as schools which are near to timber yards. These risks the fire offices are benevolently allowed to retain themselves. Altogether the experiment is a curious one.—London Review.

After an examination of the affairs of the Mutual Life Company of New York, asked for by the company, which occupied the entire examining force of the New York Department from January 2nd to September 21st, 1903, every dollar of the hundreds of millions handled by the company from January 1st, 1898, to January 1st, 1903, was checked and found accounted for in strict accordance with the laws of the State. In his official sanction of the findings of the examiners, the Superintendent of Insurance says: "I think it fitting to note the unusual extent and thoroughness of this examination and the evidence which it bears to the conscientious and careful management of this large institution."

Yale College has established a course of insurance instruction; a lecture on insurance subjects has been arranged for each week of the college year. The first was given by an officer of the Phoenix Life last month; the next by the actuary of the Prudential; then came Mr. Walter S. Nichols, of the Insurance Monitor, who lectured on Fraternal Insurance; closing with a lecture by a vice-president of the Travelers. The lectures of the second term are to be devoted to fire insurance, the lecturers chosen being Mr. Bissel, of Hartford; Mr. Raven, of the Atlantic Marine, and Mr. Allen, of the Steam Boiler Co. Next will come Employers' Liability and Accident Assurance. The course is to be limited to senior students. Members of the lower classes will be permitted to attend, but will not receive marks therefor. The lectures will also be open to the public.

AN AMERICAN VIEW OF CANADA.

Canada need not be down-hearted, even under such a solar plexus blow as the Alaska Boundary decision. Hear what the Insurance Advocate says: Canada has found herself. She has struck a Lou Dillon gait and licked creation in the rate of export trade increase during the last ten years, Japan following a close second, and the United States away behind Japan. With a population of some thousands less than the State of Pennsylvania, Canada's per capita export trade now exceeds that of any other country with the exception of the Netherlands. The yielding ripeness of her virgin breast has been tickled, and gods, men, and all Flanders, may now the life-giving office long engage. Her pastures glow beyond even Nature warm; the mine, the quarry teem with human form. For long years her modesty has been as candle to her merit; she lay, as it were, in the gloomy calm of idle vacancy, glancing the while to Captains of Industry, otherwise wheedled, the bashful virgin's side-long looks of love. They came, they saw, they conquered; they wooed her as the lion wooes his bride. They fired each art, reproved each dull delay; and now the land of skies bluer than Italy, the land where at once the snow-flake reposes and grapes as of Eschol fruiten in their season, is marching on. Peace: that leaven which leavens the whole lump—the Scotch—the sanest government under heaven, and over all, the smile of God, will, ere the present generation of babes and sucklings taste of death, place Canada regnant among the nations. To quote Edmund Burke: "She has that action and counteraction which, in the natural and in the political world, from the reciprocal struggle of discordant powers draws out the harmony of the universe."

DRY GOODS NOTES.

The neckwear manufacturers complain that as over 95 per cent. of the silk suitable for their business comes from Germany, they have to pay 40 per cent. upon their raw material, whereas the same silk goes into Great Britain free, and is there made into neckties which are imported into Canada with a duty of only 23 1-3 per cent. At the time that the surtax was first proposed, it was suggested that manufactured goods coming from Great Britain of which more than 50 per cent. of the value was created in Germany, should also bear the extra impost. But this clause seems to be evaded in the plea that the silk is Austrian or Swiss, or that 50 per cent. of the value is created in England, which cannot be the case. The Montreal branch of the Canadian Manufacturers' Association is taking up the matter.

A cable from London stated that at the sale of sheepskins in Mincing Lane, last week, 4,180 bales were offered. Coarse crossbreds were in animated demand at unchanged prices to an advance of 5 per cent., and better conditions prevailed. Merinos and fine crossbreds sold readily at unchanged rates, inferior merinos were irregular. Following are the sales and prices obtained for clothing and combings: New South Wales, 144 bales, at 5½d. to 7¾d.; Victoria, 664 bales, at 4½d. to 8½d.; South Australia, 395 bales, at 5¼d. to 8d.; West Australia, 534 bales, at 8¼d. to 8½d.; Tasmania, 543 bales, at 5d. to 8d.; New Zealand, 804 bales, at 4½d. to 7¾d.; Punta Arenas, 884 bales, at 5⅝d. to 7⅛d.; Falkland Islands, 87 bales, at 4¼d. to 7d.; Canada, 38 bales, at 7¾d.; Buenos Ayres, 25 bales, at 4¼d. to 6⅜d.

A paragraph in the Fashion column of the Drapers' Record reads as follows: The extraordinary partiality for green, which has been developing for a number of seasons now, continues to find new outlets for its expression, and the ribbon department is now feeling it strongly. All sorts of ribbons in all sorts of greens are in demand, and makers incline to think that the color which has been in so long will favor their department for at least another season, and they hope to be in a better position to cope with the movement in the spring. Plain navy ribbons may also be men-

tioned as a prominent demand. Feather hats of new descriptions are popular. An abundance of birds is noticeable, and is spoken of with entire confidence. Feather ruches of a new character are to be seen placed all round the hats, and the feathers are other than ostrich. This is a feature which may, perhaps, be made the nucleus of a fresh start in millinery developments.

Further concessions in Japan silks have stimulated buying somewhat, and there has been a later accession of firmness that has temporarily checked trading. In Cantons there have been but moderate transactions, owing to advancing exchange. In Shanghai the same factor and still greater firmness of prices have prevented any increase in sales. In Europe the market remains as at last report with buyers operating in a cautious way and with prices unchangedly firm. Although in the local market the majority of importers are holding stocks firmly, and are simply following fluctuations in foreign prices, some are commencing to anticipate a future decline in Japans and Cantons, and are selling "short" for January and later delivery. The majority of manufacturers feel more confident than ever before this season that prices on coarse sizes, at least, will decline and are not inclined to anticipate such an event except at marked concessions.—Dry Goods Economist.

FOR GROCERS AND PROVISION DEALERS.

There is again an unsettled feeling in the Brazilian coffee market, owing to adverse reports about the crop. The tendency in both New York and European markets is towards better prices.

A prominent New York dealer in Florida fruits and vegetables says that the acreage in tomatoes on the east coast during the coming season is not likely to be so large as usual, owing to the damage caused by floods last year. Prospects for a heavy planting of pineapples, however, are very good, but fruit from these would not come into market until the summer after next.

A company has been formed in Berlin, Germany, to purchase meat in the vast country opened up by the great Siberian railroad. For this purpose salted meat will be packed in 4-kilogram (8.8-pound) packages and transported in carlots of 10,000 kilograms (22,000 pounds), and then brought for sale to the great central meat market of Berlin. Only the better cattle will be slaughtered for the company, representatives of which start on the journey to make arrangements in a few days. The expenses for transport duty and other outlays are placed at 3,500 marks ($833) for a carload of 10,000 kilograms (22,000 pounds). The imports are expected to begin in the spring.

Neither Indian nor Ceylon tea circles appear to think they will suffer much harm through Russia's action in raising the duty on British-grown teas, says an English exchange. Ceylon and India have come to fill a place in the Russian tea market from which they cannot be displaced, principally because the intrinsic qualities of Ceylon tea have made themselves indispensable for blending and other purposes for which it is now recognized that China teas are too weak and are growing more so. It is thought in Colombo that the increased duty will affect the London trade, as the tea buyers will now prefer to buy in Colombo and Calcutta, and ship through Chinese ports, i.e., Dalny, Port Arthur, etc., and across the Chinese frontier, where the duty remains the same. Orders for despatch by this route have, in fact, already commenced to flow.

—One of the causes of the labor troubles in the shoe trade at Quebec, says the Montreal Gazette, is a rule of the union which subjects a member to a penalty if he does more than a fixed amount of work in a week. "It is a rule that robs both the employer and the good man, and one that neither the good man nor the employer should have to submit to. The prize of success is not won by loafing, whether such loafing is voluntary or enforced."

—The opening of several new branches by the Bank of Montreal is announced from head office. The branch at Brandon will be in charge of Mr. J. W. G. Watson, as manager, and at Indian Head, Assa., Mr. R. M. Napier will be manager. A branch has also been opened at Gretna, Manitoba, under the charge of Mr. S. J. Jarvis.

—The Halifax grain elevator, belonging jointly to the city council and the Dominion Government, will be put into operation next month. It looks as though a large export trade in grain may this coming season be carried on through Halifax. The St. John trade is also expected to be larger than usual this year.

—A well known man in both Peterboro and Toronto, Mr. Dalton Ulyott, died last Saturday at the former place. He was born in Yorkshire, England, in the year 1823. He lived in Montreal for some years, later going to Port Hope, and Fenelon Falls. Mr. Ulyott was a large shareholder in several important concerns, and was for years a director of the Ontario Bank.

—About the middle of October, some seven hundred carpenters in Winnipeg went out on strike. On Tuesday last some 640 of them went to work again. While the strike has not been declared off in the usual sense of the word, the men have accepted the suggestion as made to them by the Deputy Minister of Labor. Union men, it appears, will not be permitted to work for those contractors who do not see fit to meet the men's demands, which looks very much as if the men had won the day. Building in Winnipeg is extremely active.

—Bowmanville, Cobourg, Oshawa, Whitby, and other places in that part of this province, north of Lake Ontario, are asking the C.P.R. to change the route of the main line of that road from Springbrook, near Havelock, westward to Toronto, so as to connect them with the general system. The business of the above-named towns, and of several other municipalities in their vicinity has shown during the last few years a rapid increase, both in passenger and freight traffic, and a strong effort will be made to secure improved transportation facilities in the direction indicated.

—The Dominion Government is arranging to offer the same tariff preference, as that enjoyed by Great Britain, namely, 33 1-3 per cent. to the colonies composing the South African Customs Union, in return for trade concessions from them. The preference given by South Africa to Britain is nominally 25 per cent., but is somewhat variable in its action owing to the ordinary tariff being divided into several classes, each of which calls for a separate schedule. It will be remembered that the present Canadian tariff law includes a clause to provide for the extension of the preference to any British possession whose tariff is favorable to Canada.

—The new vault of the Royal Trust Company, in the Bank of Montreal Building. St. James street. Montreal, is one of the strongest of the kind on this continent. All the security of construction that human ingenuity has invented has been utilized. The vault itself is a solid steel box from 4 to 5 inches thick with double doors, protecting the entrance, also of solid steel, and each weighs several tons. The vault will accommodate from two to three thousand safes. The makers of the vaults are Messrs. J. & J. Taylor, of the Toronto Sale Works, who have carried out the designs of Mr. J. L. Mossman, of New York.

—A New York despatch of last Saturday says that Henry Farley, a co-worker of Samuel Parks, has confessed. The walking delegate who is on the eve of trial for perjury, by which he tried to save Parks from the stripes, has told a startling story to District Attorney Jerome. It was a

midnight confession. Farley says a prominent lawyer advised Parks and himself to concoct a lie. He says that the walking delegates blackmailed W. E. D. Stokes for $50,000, and gives the details of scores of other hold-ups. The main points of Farley's confession have been corroborated. Parks, it is said, can be sent to gaol for a long period.

—The City of Toronto has purchased from the Dominion Government, for $200,000, the large tract of land adjoining the Exhibition grounds, known as Garrison Commons. It has a magnificent situation along the the shore of Lake Ontario, and will be developed into a fine park. The old Fort is included in the property bought, and this, we are told, is to be restored and maintained as one of the historic spots of Upper Canada. It would be pleasant to think that this acquisition is the beginning of a systematic development of Toronto from a "beauty" point of view. Perhaps no city on the continent would better repay for such a work; and regard for true business economy says, "begin the work now."

—A paragraph in the St. John's, Newfoundland, Daily News of 22nd October, gives it as the statement of a Government member of the Island House of Assembly, that "the claim of the Reid Nfld. Co., for compensation under the telegraph clause of the Bond Railway deal, was filed with the Colonial Secretary last week, and that the claim amounts to three and a half million dollars." There is something very artificial about this surely. Our understanding of the matter is that the amount claimed is purely nominal and the award may not exceed one hundred thousand dollars. The telegraph lines were handed over to R. G. Reid, along with the railway, by the 1898 contract, and were taken back by the Government in 1901, the price not being specified; hence the arbitration.

—The annual meeting of the stockholders of the Consolidated Lake Superior Company was held in New Haven, Conn., on the 26th inst., over 329,000 shares of stock being represented. It was explained to those present that the condition of the company was fully covered by President Shields' report last May, and that no financial report could be presented yet owing to the inadequate office staff at present existing. It was deemed advisable, the company being in the hands of a receiver, to re-elect the old board, as in the event of reorganization, a new election will be necessary in any case. The following is the board: Gordon Abbott, E. J. Berwind, F. H. Clergue, Cornelius Shields, Lynde Harrison, Horatio G. Lloyd, H. K. McHarg, Charles Macdonald, Charles E. Orvis, George Philler, S. M. Prevost, Samuel Rea, T. C. Search, James Swartz and Charles Tweed. The meeting adjourned to November 24th.

—There is a very lively difference on foot between harnessmakers and their employers in Montreal. The firm of Hector Lamontagne & Co., Limited, refused to recognize the International Harnessmakers' Union, and this resulted in fifty hands quitting work on Monday last. The trouble has been growing for a long time, but it was not until Monday that it culminated, the firm notifying the men that belonged to the union that their services would have to discontinue after eight days. The consequence was that the men quit at once. The story of the locked-out men, as told to the Herald on Tuesday by Mr. R. P. O'Donahue, late secretary-treasurer of the local unions, is as follows: "Early last week several of our members were discharged by the firm, the reason given being that the firm would not recognize the International Union, and did not desire to employ any of its members. On Wednesday a deputation waited upon the firm and asked that the men previously discharged be reinstated. Their request was refused and they also were informed that their services were no longer required."

TORONTO STOCK TRANSACTIONS.

Not much change has taken place in the local stock situation, and while it cannot be said that there has been any greatly increased activity, or any considerable upward movement, yet it may be counted for something that no further slump has taken place. It may be said, indeed, that the undertone to the market has shown a distinct improvement during the last week or two. The following summary will serve to show the general trend of prices, for the more important stocks, based upon those realized yesterday: C.P.R., 120; Twin City, 86¾-87½; Toronto Rail., 96½; Sao Paulo, 2 at 82; Toronto Electric, 128; Can. Gen. Electric, 140-141; Richelieu & Ontario Nav., 76½; North. Nav., 102½; Consumers' Gas, 206; Dominion Steel, 9-9½; Dominion Coal, 72¼-72½; N. S. Steel, 74½-75.

CLEARING HOUSE FIGURES.

The following are the figures for Canadian Clearing House for the week ended with Thursday, October 29th, 1903. compared with those of the previous week:

Cities	Oct. 29th, 1903.	Oct. 22nd, 1903.
Montreal	21,072,173	25,521,493
Toronto	14,895,643	17,747,859
Winnipeg	6,398,360	6,680,702
Halifax	1,659,315	2,013,968
Hamilton	1,036,344	1 290,673
St, John	1,124,589	1,157,953
Vancouver	.....	.....
Victoria	1,597,052	.....
Quebec	1,548,016	2,047,093
Ottawa	1,814,854	.....
London	769,628	851,813
	$52,525,717	.....

PETERBOROUGH

"The Water Power City"

An American milling concern recently erected in Peterborough a Canadian branch factory—having a capacity of ten million bushels of grain per annum.

THE FOLLOWING LETTER, addressed to the "Peterborough Examiner" gives the reason why.

"We notice in your issue of Saturday, September 27th, 1902, a "statement by Mr. ——— at the meeting of the Peterborough Board of "Trade, that we were induced to locate here through the influence of "one man.

"Please permit us to state that Mr. ——— is incorrect in making "a statement of this kind, privately or publicly, and evidently speaks "without full knowledge, or, in fact, without any knowledge whatever "on the matter, and in correcting this mis-statement permit us to "assure you and the public that our Company came here **on account of the natural advantages of Peterborough**, which are the **geographical location**, **railways**, the **water power**, and **the Trent Canal**, which, "we were assured would be shortly completed, and which, when "finished and in operation, will in our opinion secure to Peterborough "all the industries that your city can comfortably take care of."

Peterborough now offers in addition FREE FACTORY SITES AND LOW TAXATION.

Electric Power—Lowest Rentals

Is located on main line of Can. Pac. Ry., G. T. Ry. and the Trent Valley Canal. Has a population of 15,000.

THE
NATIONAL LIFE
ASSURANCE CO. OF CANADA

This progressive Canadian Company wants agents in Nova Scotia, Quebec, Ontario, Manitoba and North West Territories. Apply HEAD OFFICE, Temple Building, TORONTO.

Something Really New in LIFE INSURANCE.

THE
ADJUSTED INDEMNITY POLICY
ISSUED BY
The NORTHERN LIFE
[Assurance Company]
has no equal.

It gives the necessary Home Protection for less money than the Regular Policies. Write for Booklet explaining it.

JOHN MILNE, Managing Director.
Head Office, - London, Ont.

Continued Progress

During the last few years the North American has made marvellous strides in all Departments tending to its upbuilding, which can readily be seen by the following figures, showing a comparison of

Three SEPTENNIAL Periods

Year	Cash income	Assets	Policies in force
1881	$ 39,613	$ 88,763	$ 1,221,712
1888	263,691	666,919	7,927,564
1895	581,478	2,300,518	15,779,385
1902	1,270,840	5,010,813	30,927,961

A strong progressive Canadian Company giving excellent returns to its policy-holders, therefore making it a desirable Company for agents to represent. Three active agents wanted.

FINANCES IN THE STATES.

Henry Clews & Co., New York, write as follows in their weekly circular dated October 24th, 1903: A better undertone is gradually developing on the stock exchange. This is demonstrated by the steady hardening of values in the face of bank failures and other unfavorable disclosures. In this respect the market is simply acting as usual under similar circumstances; that is, to recover from extreme depression as soon as the worst becomes publicly known. Those with foresight as to what must happen had already anticipated events, while the unfortunates obliged to liquidate were, of course, removed out of the way as elements of weakness. Thus it happened that in spite of unfavorable news, prices showed a general advance, stimulated more or less by purchases from the short interest, which had become considerably extended by recent events. The impression is growing that the decline of the last nine months has been rather too severe and in the case of good securities much more than justified. Beyond financial precincts, the outlook, though conflicting, is not discouraging. Everyone is familiar with the fact that agriculture, the backbone of the nation, has just secured another profitable harvest. The mercantile classes are also in good shape. There has been little if any overtrading of importance; our merchants having escaped the speculative frenzy which so nearly overwhelmed Wall Street. The least satisfactory feature in the outlook is the industrial situation, which is suffering from the consequences of the trust mania and labor agitation. Both capital and labor have been aiming at monopoly; both have been defying natural laws; both have been working on lines opposed to the strongest impulses in human nature, and both must pay the penalty. Capital has already taken considerable of its punishment, and labor is beginning to see the inexorable consequences of unwise leadership. Now that the iron boom is over the inflation based upon those phenomena is rapidly passing away. It must not be forgotten that we are just leaving behind the most extraordinary movement in iron the world ever saw, its chief source being the practical rebuilding of American railways during the last five years. This being acomplished the iron trade must subside to normal conditions. Possibly this may mean a period of temporary prostration; but with lower prices other demands will develop, and the export trade is open as a safety valve. Other industries are in much better shape than the iron trade, and there are few signs of overproduction, the only restraint upon business being the high prices induced by high costs of production. Nevertheless, outside of the above drawbacks, the outlook is for at least another six months of good business. Railroad traffic continues undiminished, and there are no signs of reaction in either the West or South. The Wall Street collapse is likely to exercise a restraining influence all through the country; it is even conceivable that in some districts a slight falling off may be experienced, but the business situation, as a whole, affords no good reason for discouragement. When the inevitable readjustment is more complete, the outlook will be still brighter.

RENFREW, Ont., town council has selected a site, which is to be given to the inauguration of a new enamelling factory project.

—"Is your son Josh doing well in the city?"

"I should say he is," answered Farmer Corntossel. "He bought a gold brick the first day he was there an' come home an' sold it to me for twice what it cost him. I tell you that boy's got enterprise."—Washington Star.

—A London schoolmaster, having requested each of his class of lads to bring in three items of information about the Thames that they could prove to be facts, received from one bright boy the following:

"I have lived neer it. I have sailed over it. I have fallun into. These are facts about the Thames."

THE CANADIAN CASUALTY AND BOILER INSURANCE COMPANY

Full Government Deposit Paid.

President.
ALEXANDER SUTHERLAND, D.D., Toronto,

43½ King Street W., - - HAMILTON, Ont.

MONTREAL MARKETS.

Montreal, Oct. 28th, 1903.

Ashes.—The improvement in English enquiry, usually noticeable towards the close of navigation, is not being experienced this year so far, and the volume of business continues of a very restricted character. Offerings are still extremely light, notwithstanding the high prices for first pots, namely, $5.90 to $5.95. Second pots are quoted at about $5.50; pearls nominal at $6 to $6.25.

Dairy Products.—Cheese shipments of late have not been so free as earlier in the season, and last week's shipments were 72,958 boxes, as against 125,102 boxes for the corresponding period of 1902, but the aggregate for the season is materially ahead of the figures at same date a year ago, being 2,132,693 boxes, as against 1,816,135 boxes at this date in 1902. Shipments of butter last week were only 8,115 packages, as compared with 44,262 packages for the same period twelve months ago. Cheese quotations have undergone some further revision since a week ago, and are about a quarter of a cent lower, fine Ontarios being now quoted at 11⅛ to 11¼c.; Townships, 10⅞ to 11c., and Quebecs at 10½ to 10⅝c. Butter values are not much altered, fine Townships' creameries

being quoted at about 21¼c.; good, at about 20½c, and Western dairy at 16c.

Dry Goods.—The colder and more seasonable weather of the last few days is just what is wanted, city retailers say, and they report good sales. Judging, also, from the increasing number of letter orders coming to hand, business in the country is also improving. Travellers are now mainly selling spring goods, such as prints, ginghams, and cotton goods generally, with some moderate proportion of sorting goods. Remittances, except from the Northwest, are coming in well, much better than in August and September. In the district above named, the backwardness in threshing operations has caused some delay in farmers' settlements with storekeepers.

Hides.—No changes are reported this week, but lambskins are expected to advance the usual 5 to 10c. at the beginning of the month. Beef hides are coming in freely, but are still readily bought on the basis of 9c. for No. 1, and the demand from tanners is reported good.

Leather.—Most of the boot and shoe travellers are now out with spring samples, and quite fair orders are already being booked, with a certain proportion of sorting business also being done. The factories are not doing any large amount of cutting as yet, and the local demand for leather is just moderate, apart from a pretty fair enquiry for jobbing sole, which cannot be entirely satisfied, owing to lightness of supplies in this line. Export business in sole is reported particularly good. Prices generally are steady to firm at late quotations.

Groceries.—The week has developed little of special interest in this line. Raw sugars are firmer, cane being quoted 3d. higher, and beet 2½d. higher, but New York refineries have not made any revision of prices, and consequently the local quotations are unaltered at $4.10 for standard granulated, and $3.40 the lowest for yellows. The demand at present is reported as rather quiet. In teas the only feature of special interest is the report that the export bounty on Ceylon teas—5 cents Ceylon currency per pound equal to about 1½c. Canadian currency—will expire December 31st, which will doubtless result in higher prices for these goods, and probably divert more attention to Japans, which, of late, have been displayed by Ceylons to some extent. The canners' combination are finding their orders for corn and tomatoes much better than was anticipated; and, it is said, will carry out their orders in full. Salmon rules very high, and some local jobbers are said to have cleared out their stocks, in round lots, at 50 to 60c. a case profit.

Metals and Hardware.—The general quotation for Summerlee No. 2, selected, in ordinary lots, is about $20, but it is reported some sales of round lots have been made as low as $19; English iron is quoted at about $17.75 to $18, with

TYPEWRITER CENSUS

A typewriter census of the following representative towns are the proverbial "straws that show which way the wind blows."

J. J. W. Deuchar, F.F.A., F.I.A., General Manager and Actuary of the Norwich Union Life Assurance Company, speaking of investments says:

"It may serve to indicate the great importance of obtaining a good return on the investments, if it is realized that one per cent. of increased interest on the funds of a company will, on the average, have as great an effect as a saving in expenditure equal to 10 per cent on the premium income, while, if an office could count on realizing 5 per cent. interest in place of 3, it might reduce its premiums some 30 per cent., or double its bonuses."

Mr. Deuchar does not name **THE GREAT-WEST LIFE**; but the above statement exactly describes the happy position of its policy-holders.

Managers and Underwriters

very little stock available, and from $19.50 to $20 is quoted as about a figure for Hamilton iron, but no free deliveries of the last-named brand are being made. Bars are steady at $1.90 to $1.95, and iron pipe at $4.81. Boiler plate is still quoted at $2.10 for best Scotch, and $2 is the general figure for tank steel, though some fair business is reported at $1.95. Coke tins are quoted a little easier in Britain, but local prices are unaltered, and in Canada plates, black sheets, Ternes, etc., no change is noted. Owing to the shut down in Montana mining operations, copper has taken an upward movement, and is now quoted at 14½c., but some predict much higher figures. Ingot tin has also firmed up some, and is now quoted at 30 to 30½c. for Straits, and 31c. for L. & F. Lead is steady at $3.10, and spelter at $5.75. Antimony easy at 7c.

Oils Paints and Glass.—The situation as regards linseed oil is unimproved, sales of fair being made, it is said, at

even lower figures than our quotations. Fish dull and unchanged. Turpentine continues quite firm. Glass is easier. Quotations are as follows: Single barrels, raw linseed oil, 47 to 48c.; boiled, 50 to 51c., net 30 days, or 3 per cent. for 4 months' terms. Turpentine, 85c.; single barrels. Olive oil, machinery, 90c. to $1; cod oil, 35 to 37½c. per gal.; steam refined seal, 50 to 55c. per gal.; straw ditto., 45 to 47c.; castor oil, 7½ to 8c., for machinery; pharmaceutical ditto, 8½ to 9c.; lead (chemically pure and first-class brands), $4.75; No. 1, $4.50; No. 2, $4.25; No. 3, $4; No. 4, $3.75; dry white lead, 4¼ to 4½c. for pure; No. 1 ditto, 4 to 4¼c.; genuine red ditto, 4 to 4¼c.; No. 1 red lead, 4c.; putty in bulk, bbls., $1.80; bladder putty in barrels, $1.90; ditto, in kegs or boxes, $2.40; 23-lb. tins, $2.55; 12½-lb. tins, $2.65; London washed whiting, 45c.; Paris white, 75 cents; Venetian red, $1.50 to $1.75; yellow ochre, $1.25 to $1.50; spruce ochre, $1.75 to $2; Paris green, 14c. in bulk, and 15c. in 1-lb. packages; window glass, per 100 ft., $3.25 for first break; $3.45 for second break, and $4.20 for third break; per 50 feet, $1.70 for first break; $1.80 for second break.

TORONTO MARKETS.

Toronto, Oct. 29th, 1903.

Chemicals, Drugs, Etc.—Nothing new has developed in the local drug line. A fairly good business is going on and prices keep steady. Opium is weaker in the primary market, owing to the break-up of the drouth. There is a very good jobbing demand for quinine in the New York market. Nitrate of silver has gone down in sympathy with the decline in the metal.

Dry Goods.—The spell of wintry weather did considerable to give a rush to the seasonable dry goods business, which needed slightly some such fillip. All staple goods show great activity. Prices remain as before with a strong feeling in some lines of an upward tendency. Some difficulty is still found in getting deliveries of such goods as blankets and other heavy woolens, the mills having more than they can do in keeping up with orders.

Flour and Grain.—Three dollars and ten cents continues to be about the price quoted for ninety per cent. patents, middle or east freights, in buyers' bags. Manitoba is steady. Millfeed and oatmeal are both steady. Wheat is unchanged from last week's quotations. Barley is 1c. higher. Rye is higher by a cent. Oats are nominally unchanged. No business is passing.

Fruits.—While there are still a few late peaches on the market, the bulk of the domestic fruit now on the market consists of grapes and pears, both of which, especially now the latter, are fairly plentiful. Quotations are as follows: Grapes, Concords, 30 to 35c. per basket; Niagara, 35 to 40c.; pears, 25 to 35c.; peaches, 30 to 60c.; Almeria grapes, $4.50 to $6 per keg; cranberries, per barrel, $9 for Cape Cod; $8 for Jersey; oranges, Jamaica, $2.75 per box; Sorrento, $2; lemons, Verdelli, $3 to $4; bananas, $2 to $2.25; celery, 30 to 35c. per dozen; egg plant, 20c. per basket; tomatoes, 20 to 30c.; peppers, 35 to 45c.; sweet potatoes, fancy, $3 per barrel; onions, Canadian, $1.10 per bag; Spanish, 80c. per small case; beans, white, $1.75 per bushel; Lima, 6c. per pound; apples, fall, $1.75 to $2.25; winter, $2 to $2.25.

Groceries.—An active business is being done in general groceries. Sugar remains unchanged, except that of beet granulated; the prices now asked range from $4.03 to $4.08. Empire tobaccos, two grades, have gone up 5c. The price of shelled almonds has been placed at 25 to 30c., while for Jumbo's, 35c. is asked. In teas, a not very large business is passing at the moment, though prices keep very high. The position of molasses is very strong, and Barbados cannot be obtained for much below 40c. Other West Indian molasses range between 30 and 50c., while for special lines of New Orleans, used in confectionery, 50c. is asked.

Hides and Skins—The hide market is very easy in sympathy with the heavy decline in Chicago, but there is expected to be a drop by next Saturday. Offerings of sheepskins are fair, and there is a good demand at 65c. Calfskins are steady. Tallow is dull.

Live Stock.—At the cattle market this week, cattle were in large supply, especially those of medium to poor quality, and some easiness in prices developed, though not enough to affect actual prices. Nearly all the export cattle offered was sold. In butchers' cattle, the market was pretty well cleaned out, though it dragged considerably towards the close. The demand is falling off for stockers and feeders.

Provisions.—The quantity of really choice dairy butter coming forward is only fair. They sell well at good prices. The demand for cheese keeps up well at steady prices. Eggs continue high and are in good demand. The demand for poultry has improved with the cool weather. A quiet market prevails for Canadian hops. In hog products the market is in a very healthy condition, and the demand is good.

Wool.—No export enquiry has set in to any extent, and everything in the wool business is very dull. Holders of fleece are firm, however. For pulled wools there is a good demand which keeps the market about steady.

SEVEN TO ONE

That is about the ratio. About seven times as many persons are injured as die from all causes yearly.

Accidents are a more prolific cause of death than any disease except lung diseases.

Twice as many people are accidently killed as die of old age.

Does it not seem reasonable to you as a business man that it would be to your interest to carry an accident policy?

WILLIAM F BULLEN,
Manage

London Ontario, 1903.

Of all the financial institutions of Canada receiving money on deposit, only three have a Paid-up Capital as great as that of the Canada Permanent Mortgage Corporation, Toronto Street, Toronto.

A deposit account with this exceptionally strong institution may be opened with one dollar. Interest allowed at three and one-half per cent. per annum, compounded half-yearly.

The Safest Way

To Invest Money Is in a Debenture.

We will issue you a debenture for any amount over one hundred dollars for 1, 2, 3, 4 or 5 years at five per cent. Interest coupons payable to bearer half-yearly. . . . . Do not let your money lie idle any longer; have it invested and earning something for you.

PORT ARTHUR & FORT WILLIAM.
Post Office Address—PORT ARTHUR, ONT.

THE customs revenue of the Dominion Government for the past four months amounted to $14,357,685, an increase of $2,046,066 over the same period of last year. For the month of October the receipts were $3,469,518, or $228,610 more than in the same month of 1902.

THE friends of Mr. W. McLea Walbank, of Monreal, will be glad to hear of his election as first vice-president and chief engineer of the Montreal Light, Heat and Power Company, offices which carry with them the practical managership of its interests. Mr. Walbank was entertained at dinner at the St. James' Club, a few evenings ago, and presented with a silver tea service as a mark of appreciation for his services in connection with the Lachine Rapids, Hydraulic and Land Company. Referring again to the Light, Heat and Power Company, it has been decided, owing to the large increase in the number of its shareholders, to augment the board of directors from nine to fifteen. Senator R. L. Forget retires, being succeeded for the present by Mr. R. Forget.

Mercantile Summary

THE Western Steamship Company, of Nanaimo, has been incorporated under British Columbia laws, with a capital of $150,000. It is composed largely of San Francisco capitalists, members of the Western Fuel Co., who recently bought out the new Vancouver Coal Company, and purchased also the steamer "Wyefield."

MR. J. B. DORFMAN, representing American capital, has purchased some more valuable timber limits on Vancouver Island from Mr. Dunsmuir. He expects to erect large sawmills at Departure Bay, and has already installed a portable mill near Nanaimo. A valuable piece of oak land, near that city, has also been purchased.

IT will be pleasing news to many to be told that Mr. W. H. Brown, for many years chief clerk of the St. Lawrence Hall, Montreal, has been appointed manager of that hostelry, Mr. Montgomery having resigned. Mr. Brown has always been popular at "The Hall," and his new position will further endear him to his friends.

NEGOTIATIONS have been in progress for some time between Mr. H. H. Hannon, of Toronto, representing the International Harvester Company, of America, and ex-Mayor Morris, of Ottawa, and Messrs. David and Albert Maclaren of that city, with the object of making Ottawa the headquarters of the company for its trade throughout Eastern Canada. Mr. Hannon says it is not improbable that the branch factory will be established at Ottawa.

IT is reported that the International Nickel Company, which is really the Canadian Copper Company, reorganized under Charles M. Schwab's control, has bought the well known Bruce mines, in the Soo district, in order to use the ore as a flux in the new furnaces at Sudbury. In their early days, the Bruce mines were the largest mines on this continent operated by British capital, and produced, it is said, over $8,000,000 worth of copper. The International Company is now putting in four new furnaces at Sudbury, at a cost of $1,000,000, and, altogether there is considerable activity in this region.

ONE of the largest bills of lading for a single shipment on record was in connection with the transport of machinery from Lawrence, Mass., to Munising, Mich., by means of the Canadian Pacific Railway and its connections. The train consisted of twenty-four flat cars and ten box cars, thirty-four cars in all, and its tonnage was 550 tons dead freight. It was handled in one section with two engines, left Lawrence, Mass., via the Boston and Maine Railway, on October 6th, and was delivered to the C.P.R. at Newport, Vt., on the 7th, to the Duluth, South Shore and Atlantic Railway at Sault Ste. Marie, Mich., on the 9th, and arrived at its destination on the 11th, a run of 1,050 miles in five days, the train being kept intact throughout.

A. L. BROWN, - PRINCIPAL.

THE first rural school on Prince Edward Island started under Sir William MacDonald's fund, was opened at Kensington. It will form one of a group of five nature study schools in Prince County, which embraces the western end of the island.

Mercantile Summary.

A NEW organ has been dedicated in St. Luke's church, Chatham, N.B. It was built by the Casavant Bros., St. Hyacinthe, and cost about $2,500.

FOR the first time the steam whistle at the A. C. Thompson Company's foundry, at North Sydney, was heard last week, and the first cast has been made.

THE customs collections on imports at the port of Montreal for the month of October, 1903, amounted to $1,068,792.13; those for October, 1902, were $994,336.88, being an increase of $74,455.25 during the last month.

SIX new drills, of a larger capacity and more powerful than those heretofore in use, have been ordered for use on the quarter-million-dollar tunnel of the Vancouver Power Company between Lakes Beautiful and Coquitlam in British Columbia. The tunnel is now in about 1,100 feet at each end, and it is expected to make faster progress when the new drills are installed.

Two fine tern schooners were launched at Port Greville, near Parrsboro, N.S., last week. The first was the "E. M. Roberts," built by the Fox River Lumber Co., for Parrsboro owners. The other was the "E. M. Roberts," which is 322 tons' register, is iron kneed and classed for twelve years. On November 4th, at Spicer's Island, N.S., the tern schooner, "Myrtle Leaf," will be launched.

A CAMPAIGN will presently be begun by the Pharmaceutical Association of the Province of Quebec against those who infringe on the Pharmacy Act. Mr. E. Muir, secretary, of Montreal, has found in Quebec city several who are to be summoned to appear in the Police Court, to answer the charges of infringements of the Pharmacy Act. The accused include physicians and druggists. Several physicians are charged with making the use of their names by other than certified druggists, while the druggists are charged with allowing clerks who are not certified druggists to dispense drugs; also, to carelessly sell poisons to unknown persons.

THREE new factories are being erected at Point St. Charles, Montreal, for the Sherwin-Williams Paint Company, which, according to Mr. C. C. Ballantyne, the manager, are to be first-class. An application is to be made to the city for permission to construct a bridge across Atwater Ave., from the new paint factory to the varnish shop. This new paint factory will be four stories high, 220 by 50 feet, while the warehouse is to be 283 feet by 50 feet, and also four stories high. In addition, a power-house 102 feet long, and 72 feet deep is to be built, with two Corliss engines of 130 and 200 horse-power. These will drive two Westinghouse alternating generators, having electrical power for the entire plant The Grand Trunk Railway is to run a siding alongside the factories.

Mercantile Summary.

THE Peterboro, (Ont.), Peat Co., was incorporated in January, 1902, with a capital stock of $150,000. In the beginning the company lost money, and about one year and a half ago was reorganized, but with no better results, and now they make an assignment.

IN June of last year, J. S. Wilson opened a grocery store in Paris, having been previously employed by the Grand Trunk Railroad. He had no business experience to speak of. For his stock he claims to have paid $1,200 cash; he does not seem to have made much headway from the start, now assigns and has left the place.

THE Canadian Pacific Telegraph people have determined to create new offices, and in this connection an official circular has been issued by Mr. James Kent, manager of telegraph lines appointing Mr. W. J. Camp, electrical engineer of the company, in charge of all electrical equipment, with headquarters at Montreal. Mr. J. F. Richardson becomes superintendent of the eastern division, with offices at Montreal. Mr. P. W. Snider, becomes superintendent of the Atlantic division, with headquarters at St. John.

OTHER assignments we hear of are as follows: F. S. Malcolm, of Lakeside, who carried on a general store. He was formerly a farmer and began business on his own account in October, 1900. When three years had flown by, he owed about $4,000, while his assets are represented by a stock worth $1,300.—— Richard Gilbert ran a grocery store at Tweed, after having been a commercial traveller for fifteen years. He was aided in his enterprise by a local firm of bankers; this company have lately been pressing for their claims and he now assigns.

ON Monday last what looked like a very serious state of things arose at Niagara Falls, Ont., through the strike of about 800 men employed at the Electric Power Development works. The strike was a result of a reduction in wages by the contractors of from 25 to 50c. per day. The firms interested included the Ontario Power Company, M. P. Davis, Braas & Bros., Gordon Construction, Dawson & Riley, Niagara Construction Company, Barry & McMordie, Jenckes Machine Company, and other concerns. A good deal of rioting and stone-throwing was indulged in, chiefly we believe by the foreign element, though fortunately nobody was seriously injured, and the militia which was called out early in the proceedings succeeded in restoring order. At last reports it appeared that work had been resumed for the most part.

THE annual meeting of the New Brunswick Petroleum Company was held last week, and the following directors elected: Jos. Allison, F. W. Sumner, N. Curry, Hon. A. R. McClelan, A. D. Richard, H. R. Emmerson and B. F. Pearson. The officers are: H. R. Emmerson, president; A. D. Richard, vice-

Mercantile Summary.

wells have been bored, four of which have proved to be producers. There are now twenty-five producing wells in all. A new power-house and pumping station at St. Joseph's, have been erected capable of pumping at least 100 wells. A pumping station has also been erected at Dover, and is now ready to commence operations. The line of work is being extended from Dover through to St. Joseph's. A small refinery is to be established.

THE new armory, at London, Ont., which is being rapidly built, bids fair to be a notable addition to the architecture of that city. It has frontage on two streets one of 253 ft. and another of 122 ft. The contract price was $140,000 and according to the terms of contract, the building was to have been completed by December, 1904, but it is stated that it will probably be in readiness six months ahead of this time.

THE Record Foundry and Machine Company, of Moncton, N.B., has bought a site at Windmill Point, Montreal, upon which there are already some extensive buildings, and will establish a stove manufacturing business there. This concern, which has a paid-up capital of $800,000, has been established over 20 years. The head of the Montreal branch is to be Mr. Joshua Peters. The company will also establish a selling agency in Winnipeg.

A BAKER and grocer, at Brougthon Station, Que., J. N. J. Bisson, has assigned, owing $2,690. Previous to the spring of 1901, he was working as a journeyman at his trade, so that his business career has been a brief one.—— Alfred Hamelin, doing a small general business, under the name of Joseph Ayotte, at St. Marc des Carrieres, has assigned.——A compromise at the rate of 50 per cent. on liabilities of $1,200, is offered by Mrs. C. Meunier, milliner, of Yamachiche, Que.

SINCE the death some months ago of Mr. James Cooper, the affairs of the James Cooper Mfg. Co., Limited, who have extensive new works at Lachine, Que., for the manufacture of mining plant and machinery, have not progressed altogether favorably, and it has been deemed expedient that liquidation proceedings should be instituted, though it is likely the business will be continued under a reorganization. More than half the stock was held by Mr. Cooper, whose estate also figures as a creditor for $112,000 of advances. The court also granted an order for the liquidator to continue the works, which will, accordingly, go on as if no liquidation had taken place. We learn further that the liquidation of the James Cooper Manufacturing Company, Limited, will in no way affect the business of the James Cooper estate or the Dominion Wire Manufacturing Company, Limited, or the Dominion Wire Rope Company, Limited, or any of the other companies in which the late Mr. James Cooper was interested.

R. M. MELVILLE, - TORONTO.

Mercantile Summary.

THE total amount of taxes for Winnipeg amount this year to $1,035,430; the assessable property is $30,873,000.

YORKTON, Assa., council is offering $18,000 worth of 5 per cent., twenty year debentures for sale by tender.

THE Singer Manufacturing Company is negotiating with the Cornwall council with respect to the location of a branch factory at that Ontario town.

THE Canadian Pacific Railroad is installing a water-softening plant at Moose Jaw, Assa., at a cost of $30,000, rendered necessary owing to difficulty caused to locomotives by the presence of alkali in the water of the plains.

AT the 36th annual sale, last week, by Messrs. Benning & Barsalon, in Montreal, more than 3,000 cases of rubber boots and shoes were disposed of. The recent advance in rubber goods made itself felt distinctly, as prices averaged from 10 to 20 per cent. higher than last year.

IT is stated that there is every prospect that the idea for building a dry dock, at Vancouver, B.C., capable of handling the largest vessels, will be pushed to a successful conclusion. The enterprise is to be carried through by a local company, whose bonds, it is understood, will be guaranteed by the Dominion Government.

A DESPATCH from London, England, states that at a meeting of the directors of the White Pass Yukon Railway, a balance of £78,000 was announced, and the proposition made to declare a further and final dividend of 5 per cent. It may be noted that the chairman's idea was that an all-Canadian or an all-American road would be impossible of realization for a long time to come.

THE failure of A. Longtin, doing a jobbing and retail business in groceries, liquors and cigars, under the style of Longtin, Frere & Co., at St. John's, Que., has created a mild sensation in that now rather drowsy town. The liabilities of the concern are said to be quite heavy, and, worst of all, Mr. Longtin is reported an absentee. He began business in 1895, and soon began to spread out in a manner which was not calculated to inspire confidence in his ultimate success. His business management was lacking in system and method, and reports were current at times that his dealings with the revenue officials were open to comment. Besides his regular business he was also associated with N. A. Sabourin, M.D., and druggist, in the Imperial Chemical Works, manufacturing proprietary medicines, etc., which concern has also gone into insolvency. Only a few months ago he claimed a surplus of $18,600, as per inventory taken in March last, but is expected that but a comparatively small dividend will be realized on the heavy liabilities. It is reported that the manager of the local bank, with whom he did his business, has been suspended.

MRS. J. MCDONALD, dealing in millinery and ladies' furnishings, Moncton, N.B., writes her creditors suggesting a compromise arrangement at 50 cents on the dollar, half cash, balance in six and twelve months. She owes $7,400. She was originally a dressmaker, but since 1894 has carried a good-sized stock of the kinds of goods described above.

THE following is a record of the patents recently granted to Canadians in this country and the United States: Canada.—Nos. 83581, Joseph Georges Bouchard, St. Hyacinthe, Que., heater or cooler for liquids; 83591, Louis Lacaille, Montreal, Que., lock; 83650, Archibald Edward Wilson, Winnipeg, Man., freezing box. United States—681718, George Thomas Martin, Smith's Falls, Ont.; variable speed gearing for bicycles, etc.; 682803, Henry B. Maldeis, Montreal, Que., leather working machine; 693424, Anderson McIntosh, Wallace, N.S., cheese cutter; 724469, Frederick C. Harris, Sackville, N.B., snow clearing machine; 732082, Capt. Charles Johnson, St. George, N.B., apparatus for cleaning ships' bottoms.

IRON IMPORTS INTO UNITED STATES.

According to the report of the statistical bureau of the United States Department of Commerce and Labor, imports of iron and steel into that country for the fiscal year 1902-3 were larger than for twenty years, except in the year 1893. They amounted to $51,617,312, as compared with $27,180,247 in 1902; $17,874,789 in 1901, and $12,100,440 in 1899. In 1882, they were $67,976,897. The years of exceptionally heavy importations of iron and steel have occurred always in periods of extra business activity. But on no former occasion have such large importations been made in the face of such a great home production of iron and steel. In 1893, when the importations were two million dollars greater than in the year just ended, the total United States production of pig-iron was only 8½ million tons, while that of 1902 was over 17 million tons, or double that of 1891. In the period from 1880 to 1883, when the importations of iron and steel were larger than those of 1903, pig-iron production only averaged about four million

tons per annum, or less than one-fourth the annual production of the present time; and in 1872 and 1873, when the importations slightly exceeded those of 1903, the pig-iron production averaged only 2½ millions tons annually, against 17 millions at the present time. This large increase in the importation of iron and steel is chiefly in the partially manufactured grades. Pig-iron increased from 158 thousand tons in 1902 to 956 thousand tons in 1903, the value being in 1902 less than 3½ million dollars, and in 1903 nearly 17 millions. Bar iron increased from 49 million pounds in 1902 to 96 millions in 1903; and steel ingots, blooms, slabs, billets and bars, from 202 million pounds to 850 millions, the value increasing from 3½ million dollars in 1903, and the value from six million Steel rails increased from $371,452 to $2,874,188, and scrap iron and steel, fit only for remanufacture, increased from $763,753 to $2,019,258. The one class of importations of iron and steel which shows a marked reduction is tin plates, of which the total importation fell from 199 million pounds in 1902 to 110 million pounds in 1903 and the value from six million dollars in 1902 to a little over three millions in 1903.

$225,000.00 Debentures

Town of Edmonton, N.W.T.

Sealed offers will be received by the undersigned up to noon on Wednesday, the 23rd December, 1903, for certain blocks of Debentures aggregating $225,000 00, interest 4 per cent., payable yearly, ($170,000 @ 40 years and $55,000 @ 20 years), denominations to suit purchasers.

Full particulars of Debentures and Municipal Statistics can be obtained from the Office of this publication, or from

GEO. J. KINNAIRD,
Secretary-Treasurer,

Alberta, N.W.T., Canada.

SHIPBUILDING DEPRESSED.

Not for six years has the depression in the shipbuilding trade been so severe as it is at the present time, and, unfortunately, there are not any indications of improvement. The figures recording the number of merchant ships in process of construction issued this week by Lloyd's Register indicate that the decrease since July equals 12 per cent. of the total then, while there is a drop equal to over 35 per cent. on the figures of two years ago, when the amount of work in the shipbuilding yards of the Kingdom attained the highest point. In other words, for every three men then employed, it is safe to hazard the statement that there are now barely two. The tonnage was 1,414,120 tons in October, 1901, and it is now only 906,608 tons. This latter figure is barely equal to the tonnage that is launched in eight months under ordinary conditions; but it by no means follows that the work on hand will suffice for that period. A considerable part of the work on the 393 vessels now on the stocks has already been done, since few are in the initial stages. The number and tonnage of vessels commenced during the past three months is the lowest for many years, totalling only 187,292 tons. In the preceding three months it was 372,000 tons; in the first quarter of this year, 206,000 tons; in the the last quarter of 1902, 267,000. Anything short of 250,000 tons can scarcely be regarded as equal to the normal requirements to keep the works busy. The producing capacity of this kingdom requires something like 330,000 tons to be laid down each quarter.

There are still building a fair number of vessels of large size, including three steamers of over 15,000 tons, four between 12,000 and 15,000 tons, and six between 10,000 and 12,000 tons; while a sailing ship of over 3,000 tons is on the stocks. The depression is wide-spread, the Tees alone showing an improvement on the figures of 12 months ago, when, however, their total was considerably below the average. There is less work in progress in each of the districts as compared with three months ago; but perhaps the most interesting indication is a comparison with the period of maximum prosperity of 1901. Here we find that:

At Glasgow, the decrease is 93,000 tons, equal to 33 per cent.

At Greenock, 69,000 tons, equal to 41 per cent.

On the Tyne, 123,000 tons, or 43 per cent.

At Sunderland, 74,000 tons, or 39 per cent.

At Hartlepool, 42,000 tons, or 44 per cent.

On the Tees, 31,000 tons, or 31 per cent.

At Belfast, 66,000 tons, or 29 per cent. —London Engineering.

THE WINE HARVEST OF FRANCE.

The reports from the French provinces concerning the vintage continue to be very discouraging, and the smallness of the wine harvest is already making itself felt in the big cities, where the prices of household wines have been raised. In the south, in the district known as Provence, the vintage is finished, but the vines have not yielded a quarter of the quantity of grapes which were picked last year, and one estate, which last year made 2,000 hectolitres, has this year barely made 200 litres. In the Yonne the yield is put down at a third of that of last year. In the Bordeaux region the vintage has only just begun, but, as elsewhere, the grapes have suffered from the inclement weather and have ripened slowly. In some places, such as Margaux and Blaye, the farmers are waiting for a few more fine days before picking the grapes. In the Charentes and the Islands of Re and Oleron the yield is the poorest on record, while the Bourgogne and Beaujolias districts have suffered greatly with the rest of the country. The Agricultural Society for the Aude Department considers the grape harvest

equal to about half that of a good average year. The grapes will not even be picked until the middle of October in the mountainous district of the Rhone. But if the crops are very small, the quality of the wine, it is stated, will be good.—London Telegraph.

THE SITUATION IN IRON.

The pig-iron market has been for years past looked upon as a sort of natural barometer of trade, and what affects that is likely to be seen influencing other markets a little later on. The following remarks upon the iron and steel situation in the United States, therefore, from the Iron Age, should prove interesting:

"It is exceedingly puzzling, with the spectacle of works closing and starting again, to reach any conclusion as to the real volume of consumption. Buyers keep very close to shore, and manufacturers decline to stock product when its cost promises to be lower with the opening of next year. Under such conditions consumption is probably larger than appears on the surface, but what is really troubling makers most is the uncertainty of the future. During the winter months in normal years the consumption is slighter than at other times of the year, and is too much to hope that this will prove an exception. With the tonnage on the books wasting away, it is difficult to hold prices, in spite of 'gentlemen's agreements' or pools. The Central Western producers of pig-iron are taking the restriction of output very seriously. The East may get down to business at the coming meeting on Monday. The South is rapidly getting down to restriction through the natural course of shrinkage selling prices. While many in the trade have great faith in the efficiency of the remedy proposed, others hold that the drastic measures reveal the existence of an unexpectedly serious evil. Birmingham has got down squarely to $10 for No. 2 foundry, but the most interesting development of the week has been the report that a lot of 10,000 tons has been sold for shipments to Manchester, England. The through freight from Birmingham to Manchester, including insurance, is close to $3.25 per ton, which does not net much above $8 per ton for No. 3 at Birmingham, against $9.50 as the ruling price for domestic markets. The best chance for Southern iron abroad lies in the Mediterranean markets. There have been some moderate steel rail orders for neutral or distant markets, like Australia and Asia, and there are feelers for a very large amount for Russia. Something has been doing in steel plates in a moderate way on the basis of about $1.30 at mill for export orders."

—Mining is the cleanest of all ways of getting rich. "Of all ways of making money it's the squarest and most level; nobody is the poorer for it; our luck brings no misfortune to others. The gold was put there ages ago, for anybody to find, we found it. It hasn't been tarnished by man's touch before. I don't know how it strikes you, boys, but it seems to me that of all gifts that are going it is the straightest. For, whether we deserve it or not, it comes to us first-hand—from God!"—Bret Harte.

PROGRESS OF IMPERIAL PROTECTION.

One cannot help sympathizing with Mr. Chamberlain in his wonderful, almost lone-hand, fight against the policy which in Great Britain has been a fetish for sixty years. That some of the idols which he has already succeeded in throwing down from their high places have shown such an immediate tendency to crumble away does not detract from the courage of this political iconoclast, for until he began the attack their omnipotence was practically unquestioned. Now that the inner weakness of much of the doctrine opposed to Mr. Chamberlain seems to have become manifest, it would ill become us to be the prophet after the event; we would merely explain that where to our mind the difficulties of his plan will be met will be in the making of preferential arrangements with the colonies.

Considerable encouragement has already, it is true, been sent to Mr. Chamberlain from the colonial interests involved. The Canadian Manufacturers' Association, at the time of its annual meeting, sent a message congratulating him on the stand he was taking; but this, we cannot avoid believing, was more in the nature of a general sympathy with his aims rather than any acceptance of the plans proposed. To a good many people it did not seem clear that the manufacturers of this country had, after thinking out the cost, concluded that they would be willing to sacrifice some of their own interests for the good of Great Britain and Imperial unity. Yet, if they are not prepared to do this, how can they consistently further Mr. Chamberlain's aim? A contradiction in terms is involved. If the British producer is to get his goods into Canada, and meets with a duty here low enough to allow it, the Canadian producer must lose his market to just that extent; while, if the Canadian duty is high enough to keep such goods out, which certainly seems to be our manufacturers' desire, it is all the same to the Britisher whether that duty be just high enough for that purpose, or twice or thrice that proportion.

We are glad to see that such an important body as the Toronto Board of Trade has seen fit to cable a resolution of support to Mr. Chamberlain, for it shows a strengthening desire on the part of Canada to meet his proposals half way; and after all it will only be when the details come to be worked out that the difficulties we have referred to will most make themselves felt. Nevertheless, it is not easy to avoid the suspicion that, so far as things have gone at present, Canada has merely shown a natural willingness to take the good things offered her, leaving the consideration of payment for the same to the dim and distant future. It is quite possible for such a broad-minded body of business men as the Board of Trade to believe that even a material sacrifice to British manufacturers for the purpose of meeting the requirements of a preferential tariff would in the end be more than offset by the enlarged markets brought about by the influx into the West of agriculturists taking advantage of the extra inducements offered to their point of view. So far, however, it must be conceded that individual industries have shown but little sign of this willingness for vicarious sacrifice. Another doubt assails us as to the question of preserving the Canadian market for British secondary industries, about which the Toronto Board of Trade meeting had a good deal to say.

The secondary industry of to-day may, for all one knows to the contrary, become of primary importance to-morrow. Will Canadians of the future consider themselves bound to abstain from entering upon a given enterprise merely because manufacturers of the present generation find themselves unable to carry on such at a profit, or are willing to give their British brethren the full advantage of the latter's superior adaptability for such an enterprise? If we understand the term aright, a secondary industry is often one which has been brought about by growing competition in some other, or primary, form of manufacture, which has created a desire to take advantage of every possible opening for profit; and sometimes it becomes almost impossible to carry on the larger or original enterprise without the aid of secondary industries to utilize the bye products. What sort of cul-de-sac, then, are Canadian producers likely to find themselves in, tied down to production in certain lines which, however satisfying for the present, hold no bond for prosperity in the future? We raise these objections, not because we refuse belief in the eventual practicability of Mr. Chamberlain's plans, but because it is generally better to recognize difficulties before rather than afterwards.

A POSSIBLE SLAUGHTER MARKET

There are signs cropping up here and there of something which approaches uneasiness in business circles over features of the industrial situation which are more or less menacing. At any rate they are sufficient to cause Canadian employers of labor to ask themselves whether they are much longer to be favored with the present prosperous activity which is so general. We do not refer so much to labor troubles, which are annoying enough, but to the conditions in the United States, and the possibility of their affecting Canada. It is easy for an optimist to say: "The difficulties of the Americans are not going to affect us," and quite a number of optimists have been saying so quite lately; but experience teaches to the contrary. There is unrest and apprehension in monetary circles in the United States. Undigested securities are giving the financial abdomen a pain. The combines and trusts, which have been carrying things with so high a hand are showing signs of perplexity. And their labor problems are many. True, the United States is a country of enormous natural resources, and of vast wealth and enterprise. But it is equally true that it is an extravagant nation, a headstrong nation, and that its manufacturers have for long enough been among the most violent over-producers in the industrial world. Things are looking like overproduction over there now, and it is absurd to say that Canada will not feel the effect of declining American prices and restricted demand. We are bound to feel it, for their goods will be sent in here at slaughter prices.

Evidence that the "dumping process" has already begun is beginning to show itself. We have heard from both Guelph, Galt and London of the advent there of commercial travellers from United States houses offering textile goods at job prices. In the east as well as the west of Ontario are heard American offers of desks, office specialties and other woodenware. An important manufacturer in Montreal writes to us: "Every mail brings us offers of iron and steel products from the American side at special slaughter prices for Canadian use. This sort of thing simply discourages Canadian manufacturers from making any attempt to develop and expend further our own home industries." A report almost exactly similar reaches us from Hamilton with respect to iron and steel products being offered in Canada at prices not only lower than Canada can produce them for, but lower than the prices which American people pay at home. And from the other side of the continent comes warning that our far Western people are already feeling the pressure. It is the opinion of the British Columbia Lumber and Shingle Manufacturers' Association: "Trade here will be ruined without some alteration of our tariff, as Washington State lumber trade badly demoralized, and large quantities American lumber and shingles being dumped into our market." Without any wish to be alarmist, and with no desire to prevent Canadians from buying cheap goods which our own people do not make, we still think that circumstances such as we have recited merit attention. And in the iron and steel trade, at all events, there are peculiarities in our tariff that justify the call which its members make for tariff revision.

THE AYLESWORTH BANQUET.

It was a prudent thing of Mr. D. Bruce Macdonald, president of the Canadian Club of Toronto, to make the announcement he did at Monday's gathering in honor of Mr. A. B. Aylesworth, K.C., one of the jurists who sat upon the Alaska Boundary Commission. The announcement, namely, that the Canadian Club is not anti-Imperialist, or in any sense anti-British; that the gathering was not intended to display resentment over the award; but that its purpose in honoring Mr. Aylesworth was to show that the Club, and he believed Canadians as a whole, considered that Sir Louis Jette and Mr. Aylesworth had in their refusal to sign the award represented the feelings and views of the Canadian people.

Without attempting to paraphrase his address at the King Edward Hotel dinner, we shall give a few sentences from Mr. Aylesworth's deliverance on that occasion, which made clear the reasons for the action of the Canadian members of the Commission in refusing to sign the award.

Respecting the basis upon which the tribunal was to act, "I honestly endeavored," said Mr. Aylesworth, "to come to a conclusion on the matters involved after listening to all the arguments that were urged upon either side of the debatable territory without being influenced by the circumstance that I was a Canadian and a British subject. The treaty of appointment required that the question should be submitted to adjudication, not to arbitration—to the adjudication of six impartial jurists." . . . "When it was proposed to divide the islands at the mouth of Portland Channel, that did not appear to me to be interpreting the treaty." He was not ascribing improper motives to his colleagues, however, that they had arrived at that conclusion, but it did not appeal to him as applying to the situation as defined in the basis of action outlined for the commission. The division was not, in his judgment, a judicial decision of the case.

As to the mountains, much was said in argument; much plainly could be said on both sides—a question, he declared, on which men might honestly differ, for it was a question largely of law. Of this decision he did not conceive there could be any complaint. Great Britain contended that the mountains described in the treaty were the mountains Vancouver had seen—those nearest the inlets. The States asserted that the mountains referred to were a "chain" of mountains, in the language of the treaty, and as these mountains near the coast were not a chain, therefore it could not be those mountains described by Great Britain. There were mountains, no lack of them, indeed too many, but no chain of mountains.

"These two views were as wide apart as the poles. It was miles and miles inland, or the mountains on the coast. This was a question for adjudication. The result is before you—neither one nor the other, but rather a division of the territory demanded by the two parties. To Sir Louis Jette and myself, this decision seemed so unusual that it caused us to decide upon the course we took—of declining to affix our names to the award. I am not here in defence of that course. I am not on my defence. That course has not been taken without great anxiety and thought. The responsibility

we assumed. It was not the result of irritation, impulse, nor of grief. If it were wrong, we are in the judgment of the country, of the British nation, for acting in this manner. But it is what we concluded was due to the country, and we bear the responsibility of it."

He repudiated any report touching friction between the members. As to an alleged collision between himself and the president, it was absolutely false. It could not have been possible, he said. He declared Lord Alverstone to be honest and true, and a thorough gentleman. They had differed inevitably in the results arrived at, but there was no excuse for these reports.

"We have made a good fight," Mr. Aylesworth concluded. "No piece of litigation could have been better prepared, and those responsible for the preparation deserve the hearty encomiums of their country. We have fought our fight; we have lost in the struggle, and must bow as gracefully as possible to the inevitable verdict."

GRAIN SHIPMENT FROM HALIFAX.

Many years ago the citizens of Halifax entertained hopes that their city should become a great grain shipping port during the winter months when St. Lawrence navigation was closed. These hopes apparently were also shared by the Intercolonial Railway authorities, who erected a mammoth grain elevator and several piers at deep water in that harbor for the speedy loading of grain cargoes aboard ocean steamers. But the grain did not come, the shorter distance to other points and the influences of American routes proving too powerful obstacles to be overcome. The original elevator was destroyed by fire, and a new one was erected at large expense, which has since stood idle, a towering monument to deferred hope. But conditions now have evidently changed, and there is a prospect that considerable Manitoba grain will be shipped at the port of Halifax during the next three or four months. A gang of men have been at work putting the elevator in condition for use, and the Allan and other ocean steamers expect to carry a goodly quantity of grain from that port during this winter. One of the things which has made it possible to carry grain to Halifax without loss is the reversal of traffic conditions on the I.C.R. For the first time in its history the westbound freight traffic on this railway exceeds the eastbound, and thus it is feasible to find return freight for the cars which bring the grain east instead of sending them back empty, which would have been necessary in former years.

SAINT JOHN AFFAIRS.

The difficulty, or rather the unpleasantness, that was created over the forced withdrawal from the St. John freight service of two of the Allan Line ocean steamers directed public attention to the need of increased facilities at that port. Quite recently, the Canadian Pacific Railway managers have visited St. John, and it has developed that much more business could be done if there was accommodation for the steamers. The whole difficulty is as to who shall provide the facilities. The city of St. John, it should be remembered, added nearly a million of dollars to its public debt in order to build the wharves now used, and it gives full use of them. There is, we are told, strong opinion in the community against any further expenditure by the city unless it be under some arrangement whereby the transportation companies will pay tolls that will meet the interest and maintenance charges. Efforts to get the Dominion Government to take the work up as of national importance have not been successful, and the Canadian Pacific have positively declined to build wharves. Thus the matter hangs fire. But our St. John correspondent says, writing on Tuesday, that there is a chance of the atmosphere clearing, and if things work out as seems probable, St. John will have three, if not four, new berths by next winter. Sir Thomas Shaughnessy, it seems, has told a delegation of private citizens that if the city of St. John can get the Dominion Government to do the necessary dredging, the Canadian Pacific will make a contribution that will pay the city interest and maintenance for the wharves it builds. On the strength of this a civic delegation has been appointed to meet the C.P.R. president, and the matter will probably take definite shape. With four more berths for steamships the winter business of the city can, it is believed, be doubled, and the Canadian Pacific can send to St. John all its fleet of transatlantic steamers. It is gratifying to learn further that the plans for the St. John dry dock have been approved by the Government engineers, and that tenders for the building of the dock will be called for in a few weeks.

APT ADVERTISING.

There are some kinds of advertisements that are of very little use to bring business to the advertiser. There are others which seem to "catch on" at once. That is to say, they create an interest in the reader's mind about an article they mention, and tend to make him look up the man who has it for sale. Much money is spent in ineffective, and, therefore, perhaps, disappointing advertising; and it is this which sometimes leads merchants or manufacturers to say that advertising is of no use. Not every one knows how to write enticing advertisements. Nor does every one know how to write a letter which will best suit the business purpose for which it is intended. Some bungling letter-writers manage to distort the meaning of the firm or company they write for, and thereby do harm to their employers. Others will express themselves on paper in such a high-and-mighty, "take-it-or-leave-it" style as to offend a customer without meaning to do so. It pays, therefore, to have a good letter-writer. It pays also to have a good advertisement writer.

A story related to the writer yesterday illustrates well the effect sometimes produced by a skilfully framed notice. An old farmer took a notion that he would sell his farm and maybe buy another and a larger one. Being unused to penmanship, he went to a newspaper man in a nearby town and asked him to write out a notice of the sale of the farm. The young man did so, and enlarged so captivatingly on the character of the farm, its situation and furnishing, that the old farmer slapped his knee and said: "Gosh! young feller, that's just the kind o' proputty I'm a lookin' fer." This unconscious testimony to a bit of graphic writing, comical as

it is, teaches what may be effected by a man who knows what he wants to say, and knows how to make himself understood by other people. It is gradually coming to be known (especially among Americans and Canadians, for the Old Country peoples have not made equal progress in the art) that there is both reputation and money to be made by advertisers who select good media for their announcements, and who give some attention to seeing that their advertising is of the kind that attracts.

INDEPENDENT ORDER OF FORESTERS.

An Australian correspondent, writing from Sydney on the 23rd September, says that the Independent Order of Foresters is meeting with determined opposition in various parts of Australia, and has made but little progress since beginning business in 1900. The Western Australian Government requires the presentation of separate figures for each State in which a company does business, and the Order has furnished the following particulars of its business on the 31st December, 1902:

	No. Policies in Force.	Sums Assured.
Victoria	823	£124,200
New South Wales.....	732	116,000
New Zealand.....	nil	....
South Australia	141	23,800
Queensland	333	49,800
Tasmania	nil	....
Western Australia	237	62,300
Total	2,266	£376,100

As the annual premium revenue is only given for Western Australia, amounting to £378 7s. for £23,000 of new business for the year, we have to estimate the amount for the other States on a like basis, which will give about £5,000. Expenses, rent, advertising and lecturing charges must cost much more than all the premiums. The public of Australia are pretty well warned of the risks they incur in assuring with a society with too low rates, inadequate reserves and deceptive promises to its adherents.

THE VICTORY OF TAMMANY.

Newspaper criticism of the internal politics of a foreign country is seldom attended with that perspicacity which alone warrants the passing of a judgment. However, in the case of the recent elections in New York, some excuse, if any be needed, is ready to our hand, for the result of those elections was exactly contrary to the entreaties and arguments of practically every respectable journal and every clergyman in the country. In spite of this, Mr. Low's reform majority of 30,000, two years ago, was destroyed and became controverted on Tuesday last into an excess vote of 70,000 for the Tammany candidate. Such a tremendous turnover, in the face of seemingly overwhelming odds, is almost inconceivable, and causes an unbiased outsider to conclude either that the respectable opinion of New York, as voiced by its newspapers and moral teachers, has made some absurd misjudgment, or that government by a democracy has yet to go through some pretty heavy trials.

OUR AUSTRALIAN LETTER.

Mr. Reynolds, manager of the Pacific Cable, has been here and is now in New Zealand. He has had interviews with the Premier and Postmaster-General of the Commonwealth, and appears to be delighted with what he has accomplished. He has also met the Chambers of Commerce of Sydney and Melbourne, and told them that he hopes that the Federal Telegraph Department will obtain repetitions of doubtful cables without prepayment, will accept clients' cheques in payment of messages, will deliver messages in duplicate, and use to some extent the telephone. What will actually be done does not yet appear; but grant that all these things shall be done, and the Eastern Extension Cable concern has been doing them and more for the past eighteen months, they do not reach the kernel of the trouble, the energetic method of securing business for the Pacific Cable. Mr. Reynolds presented an estimate of the year's business, as published a little time before in London, which shows a balance to be made good of over £93,000, and of which Canada will have to pay over $125,000. This estimate is apparently based on the expectation that the cable will carry about 750,000 words or little more than should come from New Zealand alone. He expressed himself as being highly satisfied with this outlook, and thought everyone else should be. Judging what those present at the meetings say, no one else was. They say Mr. Reynolds was ready to tell them about the drought and things they knew as well as he did, but when asked what was the total cable work Australia did, and how he proposed to get a fair share of it for the Pacific Cable, he was silent. He left his hearers more hopeless than ever of the Pacific Cable being made a commercial success under the present system.

The outlook for next year's trade is good, but at present business is dull and collections slow. Some orders are going to Canada for some lines of goods beside flour, timber and fish, which I notice are set down in a Monetary Times table as the staples of Canadian exports to Australia. As a matter of fact, they ordinarily compose about one-fourth of the Canadian exports to Australasia, other manufacturers making up the bulk. Flour, sawn timber and canned fish are also as much the products of a factory as any articles that come here.

Very little direct effort is being put forth by Canadian manufacturers to make a market here, and if they are filled with orders at home this is not surprising. In case of a reaction from present activity, which is bound to come to Canada, as elsewhere, a footing here would be very serviceable, and now is the very best time to make it. Not many goods could be sold the first year, and when a market for quantities is secured, it is likely the factories will be in a position to make them.

The Massey-Harris Company open their Sydney offices and warehouse, which have been reconstructed, next week, without very much formal ceremony. In spite of the fact that the big United States concerns have followed their example in opening their own offices, the Massey-Harris continue to hold their wonderful grip on the Australasian implement business.

I regret to have to say that there are rumors of actions at law here against one or two British Columbia firms for shipping inferior goods and dishonor of drafts. One of the last character is particularly annoying. A traveller was sent here by a Canadian house and his principals requested a Sydney firm, with whom it had had some transactions, to pay his salary and expense account and draw on them, which was done though the traveller did no business with the Sydney house or aided it in any way. The drafts were paid until recently when without an explanation of any sort the drafts were returned dishonored. Such transactions were more frequent six or seven years ago than latterly; they do not help Canadian credit.

The Right Hon. G. H. Reid, the Leader of the Federal Opposition, has given his friends another surprise. The resignation of his seat proved a fiasco, so far as attracting attention of the country to the issue is concerned, and the effect of the poll was against him, but on the heels of it he

gravely proposed in Parliament that the fiscal question should be referred to a referendum and declared he would abide by the result. This came as a shock to his free-trade supporters, who had pinned faith in his declarations that he would never rest until Australia was freed from the grip of protection, and that this question should be the issue of the coming campaign. They fear that this not only means the abandonment of the policy they hold dear, but is a preliminary to forming an alliance with the Socialists of the Labor Party, which they deem would be more dangerous than even protection. Some of them have repudiated his leadership in the issue he has raised. The outside trade is interested in this matter, as it betokens small likelihood of any lowering of the tariff after the next election.

The F. Peters Company, in which the Canada Furniture Combination is said to be interested, has gone into liquidation. Mr. Peters is an energetic man, who came here from the United States a few years ago and did a good business as a commission agent. He visited Canada a year ago and arranged with the Furniture Combination to represent them and endeavored to form a company to handle the business. The trouble was insufficient capital and a mistaken judgment as to the possibility of selling large quantities of finished furniture in this market. The improbability of this under the existing tariff was pointed out in this correspondence long ago. Mr. Peters hopes to arrange to carry on the business in the sale of goods in the white, completely knock-down, as he is now satisfied that this is the only way it can be done. Unquestionably a good trade can be done in this way. F. W.

Sydney, New South Wales, 25th Sept., 1903.

HALIFAX LETTER.

There is something seductive about gold mining which makes any important strike of the yellow metal a matter of general interest. For the last year there has been little new to report regarding Nova Scotian gold mines, the steady producers pursuing the even tenor of their way, and but little new work being done. Some time ago, the Nova Scotian and Mexican Mining Company began operations at Goldenville. Under the management of George W. Stuart, an experienced miner, a shaft was sunk on the south side of the anticlinal fold of the gold bodies in this district. The location of the shaft was severely criticized by many people, and the shareholders were told they were putting their money in a rat-hole. The shaft was sunk 175 feet and a cross-cut then driven 80 feet, when a belt of quartz veins 18 feet wide was struck, showing heavy and fine gold. These leads have no outcrop on the surface and their discovery will no doubt give an impetus to deep mining in this province.

The annual meeting of the Nova Scotian Mining Society was held in this city last week the chair being occupied by Mr. Alex. McNeil, in the absence of the president, Mr. Cornelius Shields. Interesting papers were read and it was decided to memoralize the Dominion Geographical Survey to publish better and more prompt reports regarding the work of its staff in this province. It was stated that frequently valuable reports, often accompanied by maps, were omitted from the reports. The excellence of the mining exhibit at the Provincial Exhibition was a subject of discussion, and it was decided to ask the Commissioners to erect a suitable building for the permanent accommodation of this exhibit.

The Ratepayers' Association of Halifax are pressing for a new system of taxation. Briefly, the salient features of the proposed scheme are: 1st, the abolition of the tax on furniture, etc., and the substitution therefor of a household tax based upon 20 per cent. of the value of the premises occupied; 2nd, where real estate is leased the value thereof for assessment purposes shall be ten times the amount of the rent which it produces in a year; 3rd, business tax, merchandise and all property in business premises, other than machinery in motion and tools of trade to be assessed at 75 per cent. of real estate occupied; 4th, poll tax of $5 on all persons in receipt of an income of $400 or over per annum; 5th, special taxes, including telegraph companies, $400; life, fire or marine insurance companies or agencies, $200; mercantile, trust, loan or building societies or agencies, $200; agency of non-resident merchants, $200; life and accident insurance agents, $15, etc., etc. There are many prominent men behind the scheme of which the above is a brief outline, but it is far from becoming law. The scheme was adopted at the last meeting of the Ratepayers' Association on motion of the Rev. Dr. Forrest, president, and professor of political economy of Dalhousie University.

The Halifax Electric Tramway Company were last week defendants in the Supreme Court in an action for damages brought by the mother of a young man who was thrown from his carriage by collision with an electric car, on Sunday, April 20th, 1902, receiving injuries from which he died. One of the grounds in the action was that in operating the cars on Sunday the defendants were acting illegally, being guilty of performing servile labor. The case lasted several days, and resulted in a verdict for the defendant company on all the points raised.

It is generally understood here that D. C. Fraser, M.P., the Guysboro giant, will receive the appointment to the Supreme Court Bench vice Mr. Justice Henry, who recently resigned. The report is current that His Lordship the Chief Justice of Nova Scotia, will tender his resignation this month, and that Dr. Benjamin Russel, M.P., is likely to be his successor.

Halifax, 1st November, 1903.

OUR ST. JOHN LETTER.

There has been trouble here, as you are aware, as to who should provide additional wharfage facilities, which it has been recently and strongly shown are so much needed here for ocean trade. It is felt that the municipality has done its reasonable share; the Government could not be got to promise all that was needed; the C.P.R. declined to build new berths for its steamers. But an almost unlooked for circumstance gives us hope. The C.P.R. offers a sum that will pay interest on the maintenance of wharves, if built by the city, provided the Dominion Government can be got to do the necessary dredging. So there is a fair chance that this port will get some new ocean berths before very long.

Louis Coste, C.E., engineer of the Dry Dock Company, is to come to St. John about the middle of this month, and Mr. George Robertson promises that the call for tenders for the dock will be issued before the end of the month. The Dominion Government engineers have approved the plans and the financial arrangements are progressing satisfactorily.

The present year is remarkable for the development in New Brunswick of a number of new industries allied to agriculture. At the present time three pork-packing establishments are being erected, and will furnish the farmers with good markets. One at Sussex will have a capacity for dressing two hundred hogs per day. That at Fairville, on the outskirts of St. John, will have an even greater capacity, and the third, at Woodstock, is now in operation, handling fifty hogs and ten cattle daily. The opening of these three factories is expected to stimulate the farmers to raise hogs, and as St. John is an excellent distributing point, the hope is entertained of a large development in this trade.

The Union Foundry, at St. John West, which recently passed into the hands of a syndicate of local capitalists, is being fitted with new tools and machinery, and is being put in charge of expert machinists. The management in the past has been slack, and a once profitable business was allowed to drift away. The effort will now be to capture all that was lost and more. Some of the more progressive citizens are behind the new company.

Building inspector Maher reports that up to date this year he has issued sixty-seven building permits for new buildings or extensive remodelling of old structures. This is the biggest building year St. John has had in a quarter of a century, and is evidence that there is a steady development. Many of the new buildings are among the best in the city.

Harbor fishermen, and fishermen from outside, who come into the harbor, have made great catches of sardines during the past few weeks. These little fish have been coming here each fall for years, but the seizers never bothered them, because big catches could be made at points nearer the border, where the canneries are. This year the sardines were not so plentiful in their old haunts, and the catchers came to St. John. It is said that in five or six weeks between forty and fifty thousand dollars' worth of the fish were taken out of the harbor. Only a few men were engaged, and they made "big money."

Mr. E. G. Scovil, a prominent business man, conducting a large wholesale beer and liquor business, died on Monday evening, aged 61 years. He at one time managed the Coldbrook Rolling Mills, which were established by his father, and were burned only a few years ago. Another former business man of St. John, whose death is announced to-day, is Mr. James Clerke, who in the old days, when shoe factories were few and shoes were mostly made by hand, conducted a last factory here, and did a large business.

St. John, N.B., 3rd November. * * *

THE CANADIAN MANUFACTURERS' EXCURSION.

FOURTH PAPER.

The writer of this series of papers went across the continent with the excursionists to see with his own eyes the progress made since his visit to the Great-West a dozen years ago. He wished, besides, to ascertain for himself the views of the dwellers west of the Great Lakes upon matters of trade and transportation, and tariff. True, it was a manufacturers' excursion, and one was surrounded on the trip as a rule with people who desired protection. Some of them, indeed, wanted "lashins of it." But, as on a former excursion of a like kind, there were those who deprecated any attempt at the high Tariff Wall which was to keep out all foreign goods such as we make, and were content to leave the tariff practically as it is. The reasonable mean is expressed by those who say: "The country's industries have increased in number and scope since the tariff of 1896 was framed. What we urge is a revision of the tariff in order to foster industries which have sprung into being in the last seven years. It is an anomaly to have articles produced in minor branches of a particular trade protected fully while great staples made of the same material suffer for lack of protection."

A concrete instance may best illustrate this contention: Our tariff on pig iron, which is the base of all the higher products of iron and steel, is $2.50 per ton, which is reduced in the case of British-made pig to $1.67 by the operation of the preference of one-third to British goods. But steel ingots, blooms, slabs, and billets, are allowed to come in at $2 per ton, which is surely illogical. Then as to structural steel, such as angles, beams, girders, etc., there is $7 per ton duty on what weighs less than 35 lbs. to the yard, while on the same kinds of goods weighing more than that the duty is only ten per cent. ad valorem, equal to about $2.25 per ton. It is clearly an anomaly to admit finished structural steel at a lower duty than crude pig iron. And the tariff, as we have shown above, actually discourages the manufacturer of steel above the limit of 35 pounds to the yard.

It was announced on 29th October from Montreal that the Canadian Pacific Railway Hotel and station at Winnipeg are to be proceeded with in the spring. The structure, which will probably cost $1,000,000, will have a frontage of 220 feet on Main street, and a depth of 750 feet. There will be 400 rooms and the hotel will be one of the finest in Canada. There is need in Winnipeg for such an hotel.

At Lethbridge, where a fall fair was going on, an entertainment had been laid out for us consisting of broncho-riding and the roping of steers. Unluckily we were late for it. But we saw Indian men, women and children, and talked with the settlers. One most picturesque Indian we saw, whom Frederick Remington would love to draw. A striking fellow, erect and with aquiline, unsmiling features, true copper color, who sat his horse like a part of it and cantered past with no more notice of us than if we had been so many scarecrows in a field. The squaws would talk and chaffer, but this dignified Centaur, dressed like a Mexican, would do neither. It was at this point we met, amid a complete entourage of Scotchmen, Col. Macdonald, of the North-West Mounted Police, a magnificent specimen of physique. He had been nearly thirty years in the force and was 71 that day. His appearance was that of a very brisk man of 60

Nature does much for Victoria and art is doing more. No one could fail to admire the Legislative Buildings here, a singularly handsome pile whose architect has taste and a sense of proportion. Outside and in, the buildings are most creditable; and there is no finer room in all Canada than the assembly chamber, where Sir Henri Joli de Lotbiniere received the excursionists and entertained them with his wonted courtesy and grace.

Victoria is to have a new hotel presently, for the C.P.R. will erect one at a cost of some $350,000. The site is across the arm, on a height beyond the land which is being reclaimed from the sea, where a retaining wall will replace the present wooden bridge. To our disappointment there were no warships at Esquimalt, but the party saw enough in the dry dock, the wharves and the long array of workshops and storehouse to impress one with the enormous cost to the Home Government of naval establishments all over the world—of which this is but one. The sight moved some of the party to a fresh realization of the duty Canada owes to the Mother Country, to contribute a definite sum regularly towards the Empire's defence. Some of the shops in Victoria were very fine; that of the Messrs. Spencer, a department store, is of immense extent, reaching from street to street. At the jewellery shops were fine assortments of goods and many of our people thronged them to buy Klondike nuggets or hat-pins and brooches bearing the arms of the province.

Had we any adventures? Well, not of the dime novel kind. We had no hair-breadth escapes—that we knew of—nor any rescues from Indians, or that sort of thing. But unhappily we did have one accident on the way home, a collision with a hand-car, on a curve, which cost the life of one section man, and broke the limbs of two more. This was near Rat Portage, and a goodly sum of money, $1630 I think, was contributed among our party to see to the comfort of the wounded and to comfort the widow.

What about scenery? To this there is no adequate answer. The annotated time tables of the railway describe it; tourists, poets and newspaper men have written about it; your friends and neighbors who have been out west have tried to make you see it with their eyes, but there is no way to grasp the beauties and the wonder of the Rocky Mountain scenery but to see it for one's self.

Were there any novel incidents? Yes, of course. Given a hundred and sixty men and women, "kept in school," so to speak, for three weeks, with only brief recesses by the wayside; surround them with new scenes and new people, and there are bound to be novel happenings. At one place on the prairie, the train being delayed an hour, all hands went ashore and we organized a gymnastic tournament, foot races, hop-step-and-jump, and the high jump. At other places the C.M.A. kazoo band would parade the town and sing wild eastern songs. This was usually taken by the residents in the right spirit, namely, a holiday one. But at one place we heard mutterings that "those Eastern folks were making too free; what do they take us for? They're just a little too sassy." And it was very possible that some of us were. We had not meant to be rude, but we were without doubt feeling frisky.

INSURANCE INSTITUTE OF MONTREAL.

On Friday night last, members of the Insurance Institute of Montreal held a social meeting at the Windsor Hotel. Ladies were present and dancing was indulged in as well as instrumental and vocal music. The Institute holds a series of these informal social evenings throughout the winter, of which this was the first. The gathering listened to the inaugural address of Mr. E. P. Heaton, president.,

after which Rev. James Barclay, D.D., delivered an address on the peculiar phases of society, and the need of gentleness and courtesy being shown by all persons, no matter where they were. The inconsistencies of society, as sometimes practised, were humorously touched upon. Eccentricities were, in the opinion of the Doctor, in bad taste, while the appearance of undignified things in art, society and literature was to be avoided at all times.

The programme of the other meetings of the season is as follows:

November 20th—Institute dinner.

November 26th—"The After History of Rejected Lives," Dr. Andrew McPhail.

December 21st—"Electricity," illustrated, Prof. Rob. B. Owens, E.E., M.S.C.

January 21st—"Canada: Its Fire Insurance Problems." A paper prepared by the president, Mr. E. P. Heaton, at the request of the governing council, and on the invitation of the Federated Institutes of Great Britain and Ireland.

February 18th—The "Clearing House, and that sort of Thing," Mr. John T. P. Knight, secretary of the Canadian Bankers' Association.

March 17th—Ladies' night. Programme to be arranged.

March 31st—Prize essays. The selected essays in the prize competition will be read.

April 21st—The Making of Iron and Steel (illustrated). Mr. George E. Drummond, president of the Canada Iron Furnace Company, and of the Canadian Manufacturers' Association.

May 4th—Annual meeting and smoking concert.

NOVEMBER FLOWERS AND STRAWBERRIES.

That bug-bear of so many transatlantic folk, the so-called "cold climate of Canada," has received some shocks during the year that is now drawing to a close. The various parties and delegates from the United Kingdom, who have seen our country somewhat thoroughly this year, have had their dread of our winter rigors somewhat removed. By way of further encouragement to them to believe that Canada is really livable in, we subjoin an incident or two. On November 2nd, Mr. W. S. Falls, banker, etc., living at Amherstburg, Ont., which is on the river Detroit, at the southwest point of Ontario, writes as follows to the Editor of the Monetary Times: "Just a line to let you know that a second crop of strawberries is again being picked in our vicinity. We had a box of delicious ones for dessert at dinner last evening. They came from the patch of the Golden Grove Farm, adjoining the town. If frost holds off for another week, Mr. J. H. Golden, the proprietor, says he will have a number of quarts. If the weather keeps as it is to-day, mild and warm, he will pick them."

In the Globe of Wednesday, we find the following, from a man who lives on Georgian Bay, Lake Huron, some 120 miles northward of Toronto: Mr. John Leece, of Coldwater, writes: "I herewith enclose you a wild rose in full bloom, picked to-day, November 2nd, on Green Island, Georgian Bay, nearly opposite Midland. This rose was growing on the exposed rock of the island, which goes to show that our climate is anything but frost and snow, which our illustrated papers so delight to picture."

Hard things have been said and sung of the harshness of November by British writers from Burns to Wordsworth, but the above-quoted letters go to show that a Canadian November may be not only bearable but delightful.

PROGRESS IN THE SOUTH.

The Southern States have not by any means been forgotten by the prosperity which has overtaken the United States during the last few years. During the last decade, but more particularly in the last two or three years, the material progress made by that region, taken as a whole, has been simply wonderful. The Southern Railway Company's report on industrial investments in its territory, which lately came to hand, should give a trustworthy record on this subject, and it claims that the years from 1901 to 1903 will figure in the industrial history of the South as the period of transition. The line of separation between the preliminary or tentative and the assured and permanent growth of the section, so far as this growth is effected by the investment of outside capital and the movement of immigration. In other words, the experimental aspect of Southern investments has all but disappeared, and the investments now being made are for the most part based upon grounds justified by the experience of actual performance, under conditions which have hitherto been more or less debatable or so considered by the cautious investor. Investments or expenditures in industrial enterprises, etc., for the year just closed in territory served by the Southern Railway amounted to $117,434,000, an increase of nearly $5,000,000, compared with the year before. Investment of capital in new plants is not so much a feature as the enlargement of those already existing, which probably imply greater producing capacity than similar amounts invested in entirely new plants. The cotton and related industries show a remarkable development, but perhaps this is somewhat at the expense of New England. While large numbers of American farmers have made their way into our own Northwest during the last two or three years, there has been a simultaneous movement into the southeastern States, of considerable proportions.

TRADE OPPORTUNITIES.

Imperial Institute, Canadian Section, Oct. 22.

A maker of glass bottles in the United Kingdom wishes to develop trade in Canada. A London firm wishes to hear from a Canadian maker who can ship regular supplies of maple dowels. Makers of agricultural and veterinary specialties, disinfectants and cattle foods, would like a Canadian firm to act as their representatives. The proprietors of a well-known time register are open to appoint a suitable Canadian resident agent. A Glasgow house doing a large business in plumbago invites samples and quotations from Canadian producers who can ship regular supplies. A firm making needles, safety-pins, hat-pins, fish-hooks, is prepared to entrust sole Canadian agency to a resident firm of high standing. The names of the above-mentioned enquirers, with the exception of the first and the last, can be furnished by The Monetary Times.

FINANCIAL ITEMS.

London, Ont., council has accepted the tender of the Dominion Securities Corporation, of Toronto, for $50,000 worth of 4 per cent. city debentures at $50,263.

The place on the board of directors of the Merchants' Bank of Canada, rendered vacant by the resignation of Hon. Robert Mackay, of Montreal, has been filled by the election of Mr. Alex. Barnet, of Renfrew, Ont.

The estate of the late Alexander Manning amounts to between $700,000 and $800,000, and except that $50,000 is left to the Home for Incurables, is about equally divided between Mr. Percy A. Manning and Mrs. Hume Blake, a daughter. The property is to remain, we understand, undivided for ten years.

The tenders received by the Temiskaming and Northern Ontario Railway Commission for the $2,750,000 worth of 3½ per cent. thirty-year, gold guaranteed bonds, though favorable, allowing for the stringent state of the money market, were considered hardly as good as could be obtained later. The Commission has, therefore, effected through the banks temporary loans aggregating $2,300,000, to run for upwards of a year from the 15th October, at 5 per cent.

A cable despatch of 31st ult. from Tien Tsin states that the third instalment of the indemnity to be paid by China to the United States, making to date 75 per cent. of the amount agreed upon, was given the American representatives on that day, and a promise was given to pay the remainder next December. So far the British commissioners have received 50 per cent. of Great Britain's award, and will possibly be paid an additional 10 per cent. in January.

As illustrating the wonderful growth of the Pacific Coast trade in a dozen years, the Financial Chronicle gives the yearly bank clearings on Pacific Coast at four recent periods:

(000 omitted).

	1902.	1901.	1894.	1892.
San Francisco	$1,373,362	$1,178,169	$658,526	$815,265
Los Angeles	245,516	162,378	46,897	39,208
Seattle	191,885	144,634	26,980	55,520
Portland	154,741	122,735	56,582	109,718
Spokane	88,469	58,856	14,058	....
Tacoma	75,739	59,622	29,095	48,011
Totals	$2,129,714	$1,726,396	$832,141	$1,067,724

Taking the six points collectively, we see that the aggregate of clearings in 1892 was roughly $1,067,000,000; that from this there was a drop to $832,000,000 in 1894, that 1901 saw the total up to $1,726,000,000, while in 1902 there was a further advance to $2,129,000,000. Everyone of the points has shared in the wonderful upward movement.

Touching the conviction of the walking delegate, Parks, the New York Journal of Commerce says: "The penalty of loss from disregarding economic laws and defying common rights in both cases was inevitable. That Parks fell into corrupt ways was as much due to the enticement of unscrupulous employers as to his own lack of moral principle and the weak subserviency of the men who followed his lead. The whole episode is a development of the pernicious "trust" movement that sought the power of monopoly in capital and labor, that its participants might profit at the expense of the unorganized mass."

INSURANCE MATTERS.

As the result of a conference of employers' liability company managers, liability rates have been raised in the West and South by the liability conference. The reason given was unfavorable experience. Chicago managers are to hold a meeting shortly to formulate an agreement as to rates and commissions.

At Boston, the other day, the well known American economist, Edward Atkinson, as a witness before the special executive committee on the relations between employers and employees, advocated mutual insurance against strikes as the surest panacea for labor troubles. He outlined a policy of organizing manufacturers into a mutual insurance company to which workmen, who are not members of trades unions, should be admitted and insured against loss of pay in time of strikes.

In a paper read by Mr. David Carment at the fourth International Congress of Actuaries, in New York, it is stated as a pleasing and significant fact that no Australian life office has ever become insolvent, although one or two amalgamations have taken place with advantage. The population of the five divisions of that Commonwealth is 3,783,085. With 772,720 added from New Zealand, the total population amounts to a little over 4,500,000. The mortality rates are considered to be distinctly more favorable than they are in England, more especially at infantile ages.

With reference to an item which appeared in our issue of 23rd October, we are informed as under, by the Sun Life Assurance Co.: "Respecting your announcement of Mr. C. C. Knight's appointment as manager of the Sun Life of Canada for Manitoba and the Northwest Territories, it may be stated for your information, that Mr. Edwin S. Baker, who has been connected with the Winnipeg agency of this company since 1893, and manager since 1900, retains the management of the district, and Mr. Knight is remaining in Sherbrooke. It is quite true that the change, as outlined in your paper, was practically arranged by Mr. Baker being appointed to fill an important position at headquarters, but he decided afterwards to remain in Winnipeg."

DRY GOODS ITEMS.

It is to be noted that advances in price have been made by the Canadian Colored Cotton Company in cotton blankets and napped sheetings. The advance is equal to from 5 to 12½ per cent.

The Winnipeg branch of Gault Bros. & Co., of Montreal, has been reorganized, under the name of Gaults, Limited, with Mr. R. W. Macdougall, president, and Mr. H. M. Belcher, managing director. The old firm name is being retained by the houses in Montreal and Vancouver, of which Mr. Leslie N. Gault is president. The factory of the company, in Montreal, will in future be known as the Crescent Factory Company, with Mr. James Rodger as president.

This week a case was brought into the non-jury court at Toronto, which will, no doubt, prove of great interest to dry goods and other merchants. It hinges on the sale of certain stock belonging to Albert E. Pentecost, a Hamilton retail dry goods merchant, who failed shortly after disposing of the same to the W. R. Brock Co., of Toronto, so it is alleged by Gault Bros., Montreal. The latter claim, too, that the transfer was made in such a way as to give the Brock Company a preference over other creditors.

A despatch from Chemnitz, Germany, says that glove manufacturers have plenty of orders for spring goods, and will have trouble getting them all made up on time, as experienced hands are in limited supply. Wages have gone up, and for duplicate orders buyers may have to pay higher prices in many instances. The main business this season has been done on silk gloves. Nearly all the goods are bought with two clasps, only a small percentage with one. Lisle Milanese goods to retail for 50 and 75 cents have been bought more than last year, also the gloves with a solid palm and net upper hands.

The cotton market has been, during the week, demonstrated to be in an exceedingly sensitive condition, and still capable of violent fluctuations. The first frost of the season in the cotton belt stimulated the most active kind of buying, and an advance from the low points touched in the previous week of 46 to 69 points. October sold up to 10.40c., December to 10.35c., and January to 10.25c. Spot was marked up to 10.45c. and there was a general stampede of shorts with estimated sales for the day of 1,500,000 bales on the local exchange. Afterwards it became realized that the reports as to damage had been exaggerated, and a slight reaction set in.

The temporary slackness in the Nottingham lace trade is evidently passing away. Home buyers are operating more freely, large shipments are being made to the United States and the British colonies, and moderate quantities of certain special classes of goods are selling for the nearer continental markets. Lace is required for so many different kinds of ladies' wear, and everything points to its being still more in favor. Unfortunately, says the Drapers' Record correspondent, a lot of lace sold in England is foreign-made, which has entered that country without paying a penny of duty, and this competes unfairly with the native product. Still, the fact cannot be denied that Nottingham lace manufacturers are not yet played out.

The volume of business in the Belfast linen market is steadily though slowly increasing, according to a recent report. Values are maintained at the high figures lately current, and any change is in the direction of increase. It is not expected that the new flax crop will be specially good in either quantity or quality, and, consequently, raw material is not likely to be cheap. Stocks are in very small compass all round. In the brown cloth market a good average trade is passing, and this is likely to be more than mantained. Manufacturers have a fair number of contracts on hand. Power-loom linens for bleaching are selling regularly at full

rates, and some makes are tending towards higher values. Export business is improving. The demand from the United States continues rather under expectations. Canada and Australasia are ordering regularly and somewhat freely, and Continental demand is gradually increasing.

It is not too early now to awaken public interest in holiday goods, and few departments of the retail dry goods store are more fitted to attract holiday purchasers than the ribbon counter. The New York Dry Goods Economist, in referring to the value of ribbon sales for attracting attention, makes the following suggestions: Group four or five different widths and qualities, take an average of the cost, and sell the entire lot at one price. Merchants who fear that customers will select the wide widths and fine qualities —which, of course, represent the highest prices—leaving the narrow widths neglected, should not overlook the fact that wide ribbons cannot be used for every purpose, and, therefore, narrower widths should have a fair showing in the sale. Moreover, the impression made upon the customer when there are wide ribbons at a low price is that the offering is a genuine bargain. To get an average price, select, say, widths costing, respectively, 7, 11, 12, 14 and 21 cents, the total amounting to 65 cents. Inasmuch as there are five lots the average cost will be one-fifth of 65 cents, which amounts to 13 cents.

Speaking of the trade situation in Manchester, the London Drapers' Record says that the interests of the cotton trade are so varied and extensive that dry goods men are naturally keenly interested in the present position of things. It finds it gratifying to be able to say that there are signs of improvement. Experts expect that the next few weeks will witness a revival, and it is reported that preparations are already being made for the arrival of the new crop. In the meantime, however, there continues to be a good deal of suffering, owing to short time and reduced wages. For several weeks past many of the mills have been working only four days out of six, and earnings have fallen in proportion. Deposits with savings banks and co-operative societies have been heavily drawn upon, and the fruit of years of thrift has in frequent cases been swallowed up. The distressed workpeople, our English contemporary adds, will read with mixed feelings the announcement that a considerable number of factory hands are returning to Lancashire from Canada, being dissatisfied with the wages paid in the Canadian mills. They are hoping for an improvement in the cotton trade at home.

ABOUT GROCERIES AND PROVISIONS.

The demand for Canadian cheese in Britain was ten days ago reported to be showing some improvement, though prices were not quotably altered.

Our Montreal correspondent reports a transaction in tea in that market on Tuesday, which illustrates the activity in Ceylon teas. It was the sale of a thousand cases of medium Ceylons.

The Consolidated Grocers of America, a combine formed in Illinois a few months ago, with a million and a half capital, to control the leading retail groceries of the country, has come to an end, not having met with financial success.

Something novel in the direction of fruit auction sales is to take place shortly in Montreal. We are told that a direct consignment of 2,000 boxes of dates, on English account, is shortly due and will be offered at auction.

The Union Stock Yards Company, of Winnipeg, has been granted a charter by the Manitoba Government. Mr. T. L. Metcalfe, of Winnipeg, and Mr. F. L. Bascom, of Chicago, are the promoters of the enterprise. The capital stock is $500,000.

Foreign despatches say that the Grenoble crop of walnuts looks magnificent, so far as the shell is concerned, but that they crack from 25 to 50 per cent. bad, and that there will be a large amount of trouble when they reach the markets on this continent.

While the shipments of butter from Montreal to the United Kingdom were last week unusually small, those of cheese were very considerable. The quantity shipped was 42,141 boxes, which is 12,000 boxes more than for same period last year. The total shipments for the season up to date exceed those of the corresponding period of 1902 by no less than 229,275 boxes.

The cargo of the second direct fruit boat from the Mediterranean Sea to Canada, the "Bellona;" is a sufficiently varied one. It includes currants from Patras, raisins from Denia, also wines, cordials, liqueurs, almonds, and Malaga raisins. Some figures of the manifest are given in our Montreal market report. The steamer is due on Saturday next, being reported at Sydney, Nova Scotia, on Tuesday.

A London circular, dated October 23rd, stated that there was a good demand for Canadian butter, especially as the supply of Irish was falling off, but prices remained the same. Choicest salt, newly arrived, was bringing 98s. to 100s. with sometimes a shilling or so more for an extra fine lot. Finest was 94s. to 96s., while for inferior 90s. to 92s. was the current price. It may be noted that strict choicest Danish butter has advanced two kroners, which is slightly higher than was the case last year at this date.

Matches made of the poisonous white phosphorus will shortly be forbidden in Germany, a Government commission having discovered a much preferable substitute in a combination of the non-poisonous red phosphorus, which while igniting easily by friction, requires a much higher temperature than the old substance to set it on fire, so that it will be every way safer. The new matches contain a much smaller percentage of lead, and samples manufactured five years ago are said to have been found in perfect condition.

A New York letter from Greece says that the currant market had shown a declining tendency which was inexplicable in view of the heavy buying of the Currant Bank, which had taken more than 10,000 tons. It had been anticipated that the absorption of this quantity would have entirely relieved the pressure, but apparently such is not yet the case. The time should not be far distant when a firm market will be in order. Advices to hand, under date of 15th October, make shipments at that time to all parts as about 69,000 tons gross, as against about 77,000 tons gross last year; the entire shortage being accounted for in the shrinkage in the shipments to England and Germany, all other markets having taken supplies fully equal to last year.

The Government egg collecting and storage plan in the Northwest is described by local papers as a great success. Each creamery patron has a number and he is required to mark this number in pencil on all the eggs he supplies. These eggs are held at the creamery for a short time and then sent in refrigerator cars with the butter to the storage at Calgary. There all the eggs are examined and classified by an expert, and every farmer is credited with the exact number of each class of eggs he has sent. The department advances fifteen cents per dozen on the eggs at the time they are received, and later the farmer gets the balance according to the classification. This year the average price to the farmer will be just about twenty cents per dozen for the season, or fully double what could have been obtained locally. About 30,000 dozen will be handled.

STOCK TRANSACTIONS.

The improvement in business on the stock exchanges, which started a few weeks ago, was not a very marked phenomenon, but such as it was, it has continued. Trading is still in somewhat small volume, but there is a better undertone. The following summary of Wednesday's prices will serve to show the present range of prices: Can. Gen. Electric, 140½; Richelieu & Ontario Nav., 80-81; Twin City, 88-88½; Sao Paulo, 83¼-84; Toronto Railway, 97; C.P.R., 118¾; Dom. Steel, 25; Dom. Coal, 74¼-75; Nova Scotia Steel bonds, 108.

—A despatch from Vancouver announces the shipment of the first carload of apples ever consigned from British Columbia to the Old Country. The apples were grown at Kelowna, on Okanagan Lake, and the shipment, which was consigned to Glasgow, consisted chiefly of Northern Spies. —Canadian Grocer.

—We hear from Montreal that the Royal Bank of Canada has bought a lot, corner St. Catherine and Green Ave., Westmount, on which to erect a substantial structure for their Westmount branch. A light-colored sandstone has been chosen for it. On the corner of Green and Western avenues, the handsome building for the Westmount branch of the Bank of Montreal is well advanced in construction.

—In spite of the strong chorus predicting ruin and decay to the United Kingdom, if the doctrines of Cobden be departed from, there are signs that some people over there are of an open mind. On Tuesday last, the Leeds Chamber of Commerce passed a resolution to the effect that the time has arrived when it is wise for the country to modify its fiscal policy, owing to the change that has taken place in the relative manufacturing powers of the different countries of the world.

—Canadian manufacturers are becoming aware of the fact that they are being handicapped in their trade with Japan by the extension of the favored-nation treatment, which that country is now extending to Great Britain, the United States and Germany. They do not understand why provision for Canada was not included in the treaty recently concluded between Japan and Great Britain. The principal lines at present exported to Japan by this country are woolens, tweeds, blankets, yarns, cottons, paper of all kinds, except wall paper, leather, corrugated sheets and plates, steel bars, rods and plates, condensed milk and gutta percha goods.

—That Sam. Parks, the United States labor delegate, has been found guilty of extortion on a second count and in a second trial is so far satisfactory news. The question now is, will he be punished or will he get off because of pretended insanity, or exaggerated ill-health? There seems to have been a good deal of one-man-power about Parks' union, for they would do any mortal thing he decreed. He made a demand on the celebrated jewellery house of Tiffany & Co., for $500, and he got it. This was his reward for calling off a strike that was causing the house serious loss. There are other men "working the same racket" as Parks, or trying to work it. It is to be hoped that manufacturers will make short work of such venal scoundrels, since there is no apparent chance of the labor unions themselves doing it.. And yet the unions ought to see what tremendous harm such conduct as that of Parks brings to them.

—We have received, but too late for extended comment in this issue, a copy of the report of the Canada Cycle and Motor Company at the annual meeting held a week ago. It shows a profit of $29,344. An injunction had been issued by the estate of a deceased shareholder on the morning of the meeting to prevent the passing of a by-law for the reduction of the company's capital, and to prevent also the transaction of any business by the meeting.

—There are some suggestive sentences in the letter of our New South Wales correspondent to-day. He does not mince matters in declaring the belief general, in the mercantile community of Sydney at any rate, that the Canada-Australia cable is not being well managed. Again, in the paragraph about Canadian manufacturers and the small effort they are making in getting into the Australian market: "In case of a reaction from present activity, which is bound to come to Canada, as elsewhere, a footing here would be very serviceable, and now is the very best time to make it."

CLEARING HOUSE FIGURES.

The following are the figures for Canadian Clearing House fo the week ended with Thursday, November, 5th 1903, compared with those of the previous week:

Cities	Nov. 5th, 1903.	Oct. 29th, 1903.
Montreal	25,083,834	21,072,173
Toronto	15,202,949	14,895,643
Winnipeg	7,192,438	6,398,360
Halifax	1,930,952	1,659,315
Hamilton	1,161,657	1,036,344
St, John	1,152,205	1,124,589
Vancouver	1,659,430	1,597,052
Victoria	652,601	1,597,052
Quebec	2,074,433	1,548,016
Ottawa	3,473,475	1,814,854
London	950,225	769,628
	$60,534,199	$52,525,717

A. H. HOOVER, PRESIDENT.
R. SHAW WOOD, 1ST VICE-PRESIDENT.
WILLIAM DINEEN, 2ND VICE-PRESIDENT.

ROBERT E. MENZIE, TREASURER.

SIDNEY H. PIPE, ACTUARY.

THE Accumulation Policies issued by the Sovereign Life Assurance Company of Canada are absolutely free from conditions, and guarantee the most liberal Extended Insurance, Paid-up and Loan Values annually, after being two years in force. First-class contracts can be secured by reliable energetic men as Managers, District and Local Agents throughout the Dominion. Address with full particulars and references.

A. H. HOOVER, President and Managing Director.

The Enormous sale of

OLD CHUM

Cut Plug

Smoking Tobacco

Proves its Superior Quality.

Sold by all leading wholesale houses.

FIRES OF THE WEEK.

Several properties have been burned down or damaged by fire during the last few days, and though no one of them was of very great importance, the aggregate loss has been considerable. Briefly stated, the fires were as follows: Wm. McCann Milling Company's premises, in Toronto, originating from a hot box in a suction fanning machine; loss on stock, $5,000; on building, $1,000; both fully insured. Building in Quebec, occupied by Martel & Martel, crockery, Goodman, clothing, J. H. Begin's Shoe store, and Armaly's photographic studio; loss, about $50,000; insured; the dry goods stocks of Lacroix & Co., and Fortin Freres were also damaged. The Flax Seed Company's crop of flax, at Belle River, near Windsor, Ont., destroyed by fire, believed to be the work of an incendiary; loss, $3,000; Cornell & Hetherington's implement warehouse, the hotel, and Geddes & Hamilton's stables, at Arcola, Man., total loss about $20,000, with only $3,000 insurance. The Mann block at Windsor, Ont., occupied by the hardware firm of James Nelson & Brother, and George Lodge's grocery, loss, $10,000; insured.

UNITED STATES FINANCES.

Henry Clews & Co., New York, under date October 31st, 1903, say: Though occasional disturbances, such as the copper war and the run on St. Louis banking institutions, keep the stock market in a somewhat nervous condition, the general trend in financial circles is towards further improvement. This is due to the belief that the forced liquidating movement has about reached its end, and that no further serious trouble is looked for from that source. It is generally admitted now that the country must readjust itself to lower prices; that supply has overtaken demand, and that the latter can only be revived by the ordinary and inevitable methods of concession. This applies not only to Wall Street but to the whole business world. Wall Street has simply apprehended this fact first; it has foreseen the inevitable and adjusted itself to events as usual almost before their occurrence.

Monetary conditions are more satisfactory than expected six months ago. A bad bank statement may occur this week owing to heavy currency shipments for crop purposes and to strengthen St. Louis institutions, and the absence of concern among bank officials is noticeable. The banks lost about $14,000,000 during the week and this caused some fear of a flurry in money rates. Ordinarily, we should be importing gold at this season, but backward crops or backward exports and large imports, coupled with comparatively easy money markets on this side, have delayed gold shipments from Europe here. Towards the end of the week there was a sharp break in sterling exchange, so that gold imports appeared more imminent, especially in view of the easier conditions in the foreign markets, funds being abundant at Paris. Discrimination is still the order of the day on the stock market. Many good dividend paying stocks have been almost cut in two, and correspondingly less money being required to carry them, speculation is likely to be encouraged thereby. Confidence is gradually reviving owing to the belief that liquidation is about over, and the satisfactory fashion in which recent shocks have been stood is practical evidence of the soundness of this belief. The outlook, therefore, is for a more active and stronger market except for the industrials. These are hampered by developments in iron and copper issues, particularly the weakness in iron and steel products. Outside of these influences, the situation remains hopeful and the great railroad systems continue on their prosperous career without interruption.

—Miss Sarah reads: "Rev. Mr. Marigold taken to the hospital, a victim of locomotor ataxia." How dreadful! I wonder whether the poor man was run over or whether the thing blew up with him?"—Harper's Monthly.

—A North Broad street man, who has a passion for reading the out-of-town newspapers, and also for answering many of the advertisements he finds in them, tells this on himself: The other day he answered an advertisement in one of the New York papers, stating that for a small sum in currency a method of saving gas bills would be sent. In two days he received a printed slip by mail, which read: "Paste them in a scrap-book."—Philadelphia Ledger.

THE CANADIAN CASUALTY AND BOILER INSURANCE COMPANY

Full Government Deposit Paid.

President:
ALEXANDER SUTHERLAND, D.D., Toronto,
Vice-Presidents:
H. N. BATE, Ottawa, Director Bank of Ottawa.
W. S. DINNICK, Toronto, Vice-Pres. and Mng.-Dir. Standard Loan Co.
A. G. C. DINNICK, - Managing Director.

This Company having deposited $30,000 with the Treasury of the Ontario Government, has been duly licensed to transact the following classes of Insurance [ance

Boiler Inspection — Personal Accident Insur-
Boiler Insurance — Sprinkler Insurance
Consulting Engineers — Elevator Insurance

The patronage of the public is respectfully requested. Correspondence with Insurance Agents and those wishing to engage in the business is invited, and will receive prompt and courteous consideration.

Chief Engineer, - - - A. M. WICKENS.
Superintendent of Agencies, - J. G. BEAM.

HEAD OFFICES:
N. E. Cor. Adelaide and Victoria Sts., TORONTO, - Ont.

BRANCH OFFICES:
Temple Building, - - MONTREAL, Que.
43½ King Street W., - - HAMILTON, Ont.

Commercial.

MONTREAL MARKETS.

Montreal, Nov. 4th, 1903.

Ashes.—British enquiry is still very restricted, and outgoing steamers are not taking out any lots of potash of consequence. Supplies, however, continue very small, and late high quotations for first quality pots, namely, $5.90 to $5.95, are maintained. In second pots and pearls there has been very little doing of late.

Cements and Firebricks.—A fair aggregate of business is reported in moderate lots. Prices are steady, but will be subject to advance towards the end of the month, when it becomes necessary to clear the wharves. Recent receipts of cements from Europe have been small, only 600 barrels of English last week, and 3,300 barrels of Belgian and 300 English this week. Receipts of firebricks for the fortnight ending to-day are 500,955 in all.

Dairy Products. — Cheese shipments last week aggregated 42,141 boxes, being some 12,800 boxes more than for same week of 1902; the total shipments to date exceed those of last year at same date by 229,275 boxes. Butter shipments were small last week, being 7,144 packages. The cheese market is inactive, but quotations are fairly steady at 10¾ to 11c. for fine Ontarios, Townships, 10⅝ to 10¾c., and Quebecs, from 10⅜ to 10½c. Butter is unchanged at 21 to 21¼c. for fine Townships; Quebecs, 20½ to 21c.; Western dairy from 15½ to 16c.

Dry Goods.—A return of fine, warm weather, of the Indian summer type, somewhat affects retail sales, and farmers are reported busy in the fields,

though in some sections, notably the Eastern Townships, there has been a great lack of rain, not only interfering with fall ploughing, but seriously affecting milling interests through the lowness of the streams. Travellers for wholesale houses are now mainly engaged in spring samples, and are reported as doing satisfactory business in spring goods. Collections are well spoken of, and there have been few applications to wholesalers for help towards the meeting of engagements due to-day. Under date, November 2nd, the Canadian Colored Cotton Co. advises advances in cotton blankets, napped sheetings. etc., of from 5 to 12½ per cent.

Furs.—The opinions held in some quarters that the late high prices for raw furs were not likely to hold, appear to be verified by the result of the London October sales, at which the only advance recorded was in muskrats, Canadian sorts going up about 15 per cent., as compared with last January. Taking prices at last March sales for comparison, the declines in shipping furs have been as follows: Red fox, 10 per cent. lower; white fox, 10 per cent.; grey, ditto, 20 per cent.; bear, 30 per cent.; coon, 15 per cent.; mink, 10 per cent.; marten, 15 per cent.; otter, 15 per cent.; lynx, 10 per cent.; wolf, 25 per cent.; beaver, 10 per cent.

Groceries.—The movement continues a good one. The second direct fruit boat, the "Bellona," is reported calling at Sydney, for coal, to-day, and is due in this port Saturday. Her manifest includes 5,420 cases and 16,407 half-cases of currants from Patras; from Denia, 34,972 half-boxes, 600 quarters, and 2,900 eighths of Valencia raisins; 1,225 cases loose muscatels, 14,740 boxes, 5,383 quarter-boxes of Malaga raisins, 5,063 packages of almonds, besides a general assortment of wines, etc. A direct consignment of 2,000 boxes of dates, on English account, is shortly due, and will be sold by auction, being a new departure in this line. Fresh advices, regarding Grenoble walnuts, which it was expected would turn out poorly, are to the effect that the later crop is filling out well. In sugars there is nothing specially new. Refiners report a better demand since the opening of the month, at unaltered prices. An excellent demand exists for Ceylon green teas, good value being shown in mediums at 16 to 17c. One transaction of 1,000 cases was reported yesterday.

Hides.—No advance has been made this month in lambskins, it being considered that there is really little difference between November and October skins, and the quotation remains at 70c. each. Calfskins are down 1c. per lb., No. 1 now being quoted at 10c., and No. 2 at 8c. Hides, unchanged, with dealers still buying No. 1 at 9c. per lb.

Leather.—The demand has not improved. A good many shoe manufacturers are getting ready for stocktaking, so that there probably will not be any very active buying this month. Prices rule steady for all sorts, except, perhaps, light dongolas, of which there appears to be some accumulation.

Metals and Hardware.—The movement is well sustained, and report of last week will fairly cover the situation at date. The Glasgow iron market continues easy, but local quotations for pig iron are unchanged, nor is there any variation in bars, plates, sheets or piping. Ingot tin is a little firmer at 30½c. for Straits, and lead is advanced to $3.20. Copper, spelter and antimony remain as last quoted.

Oils, Paints and Glass.——In these lines there is absolutely nothing new, and we repeat former quotations:

TYPEWRITER CENSUS

A typewriter census of the following representative towns are the proverbial "straws that show which way the wind blows."

	OUR SALES	NOT SOLD BY US		OUR SALES	NOT SOLD BY US
Hamilton.....	210	46	St. Catharines....	52	5
London	166	40	Peterboro.....	50	8
Brantford	80	30	Brockville	60	8
Berlin	72	7	Belleville	36	5
Windsor and Walkerville..	64	9	St. Thomas.....	26	11
Guelph.....	65	10	Woodstock	32	8
Galt	36	6	Chatham	54	6
			Owen Sound	36	6

Only a small percentage of the machines not sold by us **were sold since the Underwood came in** the field. If you contemplate the purchase of a Typewriter, it is your privilege to try the Underwood without placing yourself under obligation to buy. Test it well, then ask your neighbor who uses one.

UNITED TYPEWRITER COMPANY, LIMITED,
Successors to Creelman Bros.
7 and 9 ADELAIDE STREET EAST, TORONTO.

J. J. W. Deuchar, F.F.A., F.I.A., General Manager and Actuary of the Norwich Union Life Assurance Company, speaking of investments says:

"It may serve to indicate the great importance of obtaining a good return on the investments, if it is realized that one per cent. of increased interest on the funds of a company will, on the average, have as great an effect as a saving in expenditure equal to 10 per cent. on the premium income, while, if an office could count on realizing 5 per cent. interest in place of 3, it might reduce its premiums some 30 per cent., or double its bonuses."

Mr. Deuchar does not name THE GREAT-WEST LIFE; but the above statement exactly describes the happy position of its policy-holders.

It Leads Them All.

As applied to the gain in net amount of life insurance in force in Canada for the FIVE YEARS ending December 31st, 1902.

Head Office—WATERLOO, ONT.

The Mutual Life **OF CANADA**

has once more established its right to the above claim. It stands to-day

At the Head Of All

life companies doing business in Canada in the NET AMOUNT IN FORCE GAINED OVER all its competitors during the past five years, as shown by the Government Reports.

feet, $1.70 for first break; $1.80 for second break.

TORONTO MARKETS.

Toronto, Nov. 5th, 1903.

Chemicals, Drugs, Etc.—The situation in the local drug market remains much the same as for the last month or more. Business, while showing no very noteworthy features, nor being especially active, is quite up to the average for this period of the year. Prices keep steady. October was a dull month for chemicals in Great Britain, according to reports recently to hand. Transactions were neither numerous nor large. At the same time, prices were steady and being already low, some improvement may be looked for. At Baltimore, a very light demand has been experienced for ammoniates.

Dry Goods.—Mild weather has kept the demand for seasonable goods from taking the dimensions of a rush, but considering this, business has been quite good. The knitting mills are all very busily engaged, and in some cases are unable to keep up with the orders coming in. The sale of dress goods, etc., is large. With a little more seasonable weather, the prospects for a good season's trade may be considered good.

Flour and Grain.—No appreciable change has taken place in flour, and ninety per cent. patents still sell at $3.10 for export, in buyers' bags, middle freights. Manitoba flour is steady. Bran and shorts are steady, both in pretty good demand. Prices of wheat since our last week's quotations have been quite unchanged, and comparatively little business in grains has transpired. Receipts have been light.

Fruits and Vegetables.—The apple market has been on the quiet side this week, with winter fruit, carload lots, quoted at $2 to $2.50. A cable from Liverpool, reaching here Wednesday, stated that the market there for good quality apples was very active, greenings fetching 15s. to 18s.; Baldwins, 15s. 6d. to 17s. 6d.; spys, 16s. to 20s. 6d.; russets, 16s. 6d. to 20s. 6d., and King's, 18s. to 22s. London figures quoted were a little lower than these. Some domestic grapes and even a few peaches are on the market still, but supplies are lessening daily. Pears are plentiful. We quote: Grapes, Concords, 20 to 30c. per basket; Niagara, 35 to 40c.; pears, 20 to 30c.; peaches, 30 to 60c.; Almeria grapes, $4.50 to $6 per keg; cranberries, per barrel, $9 for Cape Cod; $8 for Jersey, oranges, Jamaica, $2.75 per box; Sorrento, $2; lemons, Verdelli, $3 to $4; bananas, $2 to $2.25; celery, 25 to 35c. per dozen; egg plant, 20c. per basket; tomatoes, 20 to 35c.; peppers, 35 to 45c.; sweet potatoes, fancy, $3 per barrel; onions, Canadian, $1.10 per bag; Spanish, 80c. per small case; beans, white, $1.75 per bushel; Lima, 6c. per pound.

Groceries.—The price of tapioca has gone up fully ¼c. per pound owing to rise in primary markets. Dried fruits have now become more settled. Prices are about as follows for raisins: Malaga, $2.25 to $6; Valencias, 7c. to 8c.; Sultanas, 5c. to 14c.; California, 8c. to 11c. Other fruits remain without feature. The price of peanuts has advanced, 9 to 10c. being asked for green, and 10 to 11c. for roasted. In teas not a very great deal of business is being done, though prices are high. It is expected that Japan teas will feel the benefit of the proposed abolition of the bounty on Ceylons, which in the past has pushed the sale of the latter at the expense of the former. Sugars remain unchanged, with a fair movement.

Hides and Skins.—As anticipated in our last, the prices for hides have declined by 1c. Moderate supplies of calfskins are coming forward, and the market remains as before. Sheepskins have gone up 5c. Tallow is quiet at unchanged prices.

Live Stock.—Dullness prevailed at the cattle market this week. Most of the export cattle offered were of secondary quality, and not well finished off, consequently prices were easy. Choice butchers' found a fairly ready sale, while other sorts, which were in the majority, dragged. Light stockers, though not offered in any quantity, were not easy to sell. A light demand was noted for sheep, and lambs declined a few points in price

Provisions.—A pretty good demand exists for choice butter. Strictly new laid eggs fetch 23 to 24c., and limed 17 or 18c. Cheese is quiet. Poultry, which was looking up owing to the cool snap of early last week, is very easy again, owing to the return of warm weather.

Wool.—Prices keep steady, and practically no business for fleece is passing. Pulled wools are in moderate demand from the domestic mills.

The Metropolitan Life INSURANCE CO. OF NEW YORK.

"The Leading Industrial Company of America."

Is represented in all the principal cities of the United States and Canada

THE METROPOLITAN is one of the oldest Life Insurance Companies in the United States. Has been doing business for over thirty-five years.

THE METROPOLITAN has Assets of over 89 Millions of Dollars Liabilities of 78 Millions, and a Surplus of over 10 Millions.

THE METROPOLITAN pays Death Claims, averaging one for every minute and a half of each business day of eight hours, and has nearly Seven Million Policy-holders.

THE METROPOLITAN offers remunerative employment to any honest, capable, industrious man, who is willing to begin at he bottom and acquire a knowledge of the details of the business. He can by diligent study and practical experience demonstrate his capacity and establish his claim to the highest position in the field in the gift of the Company. It is within his certain reach. The opportunities for merited advancement are unlimited. All needed explanations will be furnished upon application to the Company's Superintendents in any of the principal cities.

Continued Progress

During the last few years the North American has made marvellous strides in all Departments tending to its upbuilding, which can readily be seen by the following figures, showing a comparison of

Three SEPTENNIAL Periods

Year	Cash income	Assets	Policies in force
1881	$ 39,613	$ 88,763	$ 1,221,712
1888	263,691	666,919	7,927,564
1895	581,478	2,300,518	15,779,385
1902	1,270,840	5,010,813	30,927,961

A strong progressive Canadian Company giving excellent returns to its policy-holders, therefore making it a desirable Company for agents to represent. Three active agents wanted.
